

Environmental Health and Safety at East Stroudsburg University!

Safety Committee

The East Stroudsburg University Safety Committee includes members from academic, administrative and student divisions on campus. It is the committee's responsibility to guide and support the Office of Environmental Health and Safety, through proactive assessment of potential health and safety issues, and by responding to safety concerns raised by members of the campus community.

(570) 422-3235
- [Ralph Elick](#), Police Captain
(570) 422-4316
- [Colleen Shotwell Dudzinski](#), Athletics
(570) 422-3165
- [Joe Akob](#), Student Activities Assoc
(570) 422-3394
- [Helen Seidof](#), Facilities Management
(570) 422-3010

Safety Data Sheets

The Safety Data sheet (SDS) is a detailed information document designed to provide both workers and emergency personnel with the proper procedures for handling or working with chemical substances. The SDS provides information such as physical and chemical data (melting point, boiling point, flash point, reactivity etc.), toxicity, health effects, emergency and first aid procedures, storage, disposal, protective equipment, routes of exposure, control measures, precautions for safe handling and use, and spill/leak procedures. Information on the SDS aids in the selection of safe products. The SDS is of major importance if a spill or other accident occurs.
