![Change Account](image)

7. Click on More Settings
   --- Click Cancel when prompted for logon credentials – you cannot get them at this time.

see Picture 5
Connect MS outlook from HOME without using VPN.

8. Click the Connection tab
   *See Picture 6*

Picture 6

9. At the bottom, put a check in the box next to “Connect to Microsoft Exchange using HTTP” *See Picture 6*

10. Click on Exchange Proxy Settings as shown in picture 6
Connect MS outlook from HOME without using VPN.

Picture 7

11. Enter the following information into the designated space as shown in Picture 7: For https:// enter outook.admin.esu.edu

Check both Connect using SSL only and Only connect to proxy servers that have this principal name in their certificate:

For Principal name for proxy server you enter msstd:outlook.admin.esu.edu

12. Check both “On fast networks…” AND “On slow networks…”

Set Use this authentication when connecting to my proxy server for Exchange to Basic Authentication

13. Click OK on this screen and the next to save your profile.

Open Outlook and use the new profile you created in step one.

For logon credentials use ADMIN\<your-user-id-here> and your regular password

You are now connected to your work e-mail without using any tunnel.
