Notice of Nondiscrimination:
East Stroudsburg University of Pennsylvania is committed to equal opportunity for its students, employees and applicants. The university is committed to providing equal educational and employment rights to all persons without regard to race, color, sex, religion, national origin, age, disability, sexual orientation, gender identity or veteran’s status. Each member of the university community has a right to study and work in an environment free from any form of racial, ethnic, and sexual discrimination including sexual harassment, sexual violence and sexual assault. (Further information, including contact information, can be found on the university website at: http://www.esu.edu/titleix.) In accordance with federal and state laws, the university will not tolerate discrimination. This policy is placed in this document in accordance with state and federal laws including Titles VI and VII of the Civil Rights Act of 1964, Title IX of the Educational Amendments of 1972, Sections 503 and 504 of the Rehabilitation Act of 1973, the Americans with Disabilities Act of 1990, and the Civil Rights Act of 1991 as well as all applicable federal and state executive orders.
The University

East Stroudsburg University, a comprehensive university in northeastern Pennsylvania offering nearly 57 undergraduate and more than 21 graduate degrees and certification programs, is one of the 14 institutions in the Pennsylvania State System of Higher Education.

East Stroudsburg Normal School opened its doors on September 4, 1893. A faculty of 15 greeted a group of 320 students who had entered the two-year programs in elementary and science education.

Although the Normal School was originally privately owned, ownership was transferred to the Commonwealth of Pennsylvania in 1920, and the name was changed to East Stroudsburg State Normal School. In 1927, the right to confer the degrees of Bachelor of Science in education and Bachelor of Science in health education was granted, and the school’s name then became the State Teachers College at East Stroudsburg. In 1960, the college’s name was changed to East Stroudsburg State College, reflecting the addition of liberal arts and science curricula. In November 1982, the State System of Higher Education was authorized by Act 188 of 1982.

The college officially became East Stroudsburg University on July 1, 1983.

Mission, Vision, Values, and Student Learning Outcomes

University Vision

ESU will be an innovative and entrepreneurial university—educationally, socially, organizationally, and culturally—with an emphasis on quality and collaboration in everything we provide. As a scholarly community, its faculty, students, staff, administrators, and affiliates will be encouraged to be innovative and to explore opportunities that will constantly energize and improve its mission as a learning community of the 21st Century. As a “university without walls,” its sense of community will extend well beyond campus boundaries to embrace ESU’s surrounding communities and region to become a model that other organizations will want to emulate.

University Mission

East Stroudsburg University of Pennsylvania will provide:

- Challenging and contemporary undergraduate and graduate curricula that engage and equip students to critically appraise and apply knowledge in their lives and chosen fields of study.
- A scholarly community that promotes diversity and views teaching as the university’s primary focus.
- Varied opportunities for student and faculty research, creative endeavors and involvement in public service.
- Leadership and service in the educational, cultural and economic development of the region.

University Goals

- Achieve Higher Satisfaction, retention and graduation rates in order to increase student success at ESU.
- Build/create a strong sense of community by understanding and living ESU’s mission and values and by building a commitment to our local community and region.
- Develop a reputation for innovation and entrepreneurship by creating a curious, inventive and risk-taking culture.
- Through the work of innovative faculty, help to develop a culture of research and scholarship while rethinking the preparation of successful graduates.

University Values

We are committed to the principles of intellectual integrity, freedom of expression, the fair and equal treatment of all, good citizenship, environmental stewardship, and accountability for our actions and the resources entrusted to us.

Purposes and Scope

In pursuit of its mission and vision, East Stroudsburg University seeks to adhere to the following principles in both the development of its strategic plan and its ongoing decision-making processes.

Used in conjunction with the values outlined above, ESU is committed to:

- Providing quality, affordable academic programs as well as opportunities for lifelong learning, always focusing on student success.
- Sustaining an intellectually challenging environment that identifies and enhances its students’ and the university community members’ talents.
- Creating opportunities for innovation that focus on high impact teaching and learning both inside, and outside, of the classroom.
- Identifying, recruiting, and retaining students representing a multicultural world who by background, motivation, and commitment can benefit from higher education.
- Attracting and retaining a diverse, recognized, and credentialed faculty committed to excellence in teaching and continuing scholarship.
- Attracting and retaining exemplary faculty, staff members, and administrators who accept responsibility and accountability for the personal, professional, educational, and social values espoused by the University.
- Providing leadership, expertise, and service to its local, regional, and global societies.
- Encouraging opportunities for the university community to develop positive, healthy, and holistic lifestyles.
- Serving as a source of cultural and intellectual programs of importance to students and residents of the region.
- Building and maintaining partnerships to enhance opportunities for students, alumni, and the university community.

The Way of the Warrior

A Warrior is:

- A Champion of Social Justice
- Committed to Self Growth
- Willing to Sacrifice for the Greater Good
- Positive, Honest, and Loyal
- Respectful of the Environment and Community
- Dedicated to Empowering Others
- Accountable for One’s Actions
Graduate & Extended Studies
Graduate & Extended Studies embraces the University’s vision, mission, and values, and consistent with those, defines its particular vision, mission, and values as follows:

Mission
The mission of Graduate & Extended Studies at East Stroudsburg University of Pennsylvania is to advance graduate education in order to develop leaders in their fields who enhance the lives of individuals in our state and nation, as well as globally.

Vision
The vision of Graduate & Extended Studies at East Stroudsburg University of Pennsylvania is to be recognized and respected throughout Pennsylvania, as well as nationally and internationally, for first rate graduate degree and certification programs in education, health sciences, the arts and sciences, and business and management.

Values
Graduate & Extended Studies at East Stroudsburg University of Pennsylvania is committed to the following underlying principles in all that we do:
- Excellence
- Innovation
- Leadership
- Critical Thinking
- Integrity

History of the University
East Stroudsburg University, a comprehensive university in northeastern Pennsylvania offering 58 undergraduate, 21 graduate degree programs, and 2 doctoral programs is one of the institutions in Pennsylvania’s State System of Higher Education.

It opened its doors on September 4, 1893, as East Stroudsburg Normal School. A faculty of 15 greeted a group of 320 students who entered two-year programs in elementary and science education.

Although the Normal School was originally privately owned, ownership was transferred to the Commonwealth of Pennsylvania in 1920, and the name was changed to East Stroudsburg State Normal School. In 1927, the right to confer the degrees of Bachelor of Science in education and Bachelor of Science in health education was granted, and the school became the State Teachers College at East Stroudsburg.

In 1960, the name was changed to East Stroudsburg State College, reflecting the addition of liberal arts and science curricula.

In November 1982, the Pennsylvania State System of Higher Education was authorized by Act 188 of 1982, and the college officially became East Stroudsburg University on July 1, 1983.

History of Graduate Studies
East Stroudsburg University inaugurated Graduate Studies in 1962 with three Master of Education (M.Ed.) programs: Biological Sciences, General Science, and Health and Physical Education. In 1969, the first Master of Arts (M.A.) programs, in History and Political Science, were approved. Over the years, graduate programs in a variety of fields, including a Master of Public Health (M.P.H.) have been approved and offered. In 2001, ESU entered into a memorandum of understanding with Indiana University of Pennsylvania to offer the Doctor of Education (Ed.D.) in Administration and Leadership Studies on campus. In 2004, three new Master of Science (M.S.) programs were added: Exercise Science, Management and Leadership, and Sport Management. Also in 2004, the M.S., Cardiac Rehabilitation was revised to the M.S., Clinical Exercise Physiology. In 2007, our first distance education graduate program, M.S., Athletic Training, was approved. More recently, the university was approved to offer an M.A. in Professional and New Media Writing, an M.A. in Communication, a new Organizational Behavior concentration within the M.S. in Management and Leadership program and an M.S. in Accounting in 2019. In 2016, the university was approved to offer its first doctoral degree, an Ed.D. in Educational Leadership and Administration and in 2019, a second doctoral degree, a D.H.Sc. in Health Sciences was approved.

In its first graduating class of 1964, the university awarded 10 graduate degrees. Today, the University offers over 30 degree, certification preparation and certificate programs.

Accreditation
East Stroudsburg University is accredited by the Middle States Commission on Higher Education (1007 North Orange St – 4th Floor, MB #166., Wilmington, DE, 19801.) The Commission on Higher Education is an institutional accrediting agency recognized by the U.S. Department of Education and the Council for Higher Education Accreditation.

Accreditations awarded to academic programs include:
- Teacher Education Programs
  Council for the Accreditation of Educator Preparation (CAEP) Approved by: Pennsylvania Department of Education
- Athletic Training, B.S. and M.S.
  Commission on Accreditation of Athletic Training Education (CAATE)
- Biochemistry, B.S. and Chemistry, B.S.
  American Society for Biochemistry and Molecular Biology (ASBMB) Certified by: American Chemical Society (ACS)

Location
East Stroudsburg University of Pennsylvania is nestled in the foothills of the Pocono Mountains. The combination of quiet woodlands, mountain streams, and refreshing clean air has made the Poconos famous as a resort area for more than 100 years.

Because of the university’s location in the Poconos, students take advantage of the many scenic, historic, and recreational sites, including the Delaware Water Gap National Recreation Area, Bushkill Falls, and the Pocono ski areas. Others have found that the resorts and restaurants offer an excellent opportunity for employment. In addition, the area offers fine restaurants, high-quality entertainment, and excellent shopping. Situated on a hill facing Prospect Street in the community of East Stroudsburg, the university is characterized by large areas of grassy expanses comfortably shaded by a variety of towering trees.

The campus is located approximately 75 miles west of New York City and Newark, 85 miles northeast of Philadelphia, 40 miles southeast of the Wilkes-Barre/Scranton area, and 40 miles northeast of the Allentown/Bethlehem/Easton area. Students and faculty alike enjoy the opportunities and advantages of visits to the metropolitan areas. The university, which is located approximately one-quarter mile from the East Stroudsburg exit off Interstate 80, Exit 308, is within easy reach of major highway systems and commercial air services.

Accreditation
East Stroudsburg University is accredited by the Middle States Commission on Higher Education (1007 North Orange St – 4th Floor, MB #166., Wilmington, DE, 19801.) The Commission on Higher Education is an institutional accrediting agency recognized by the U.S. Department of Education and the Council for Higher Education Accreditation.

Accreditations awarded to academic programs include:
- Teacher Education Programs
  Council for the Accreditation of Educator Preparation (CAEP) Approved by: Pennsylvania Department of Education
- Athletic Training, B.S. and M.S.
  Commission on Accreditation of Athletic Training Education (CAATE)
- Biochemistry, B.S. and Chemistry, B.S.
  American Society for Biochemistry and Molecular Biology (ASBMB) Certified by: American Chemical Society (ACS)
The State System universities are Bloomsburg, Clarion, East Stroudsburg, Indiana, Kutztown, Lock Haven, Mansfield, Millersville, PennWest [California, Clarion and Edinboro], Shippensburg, Slippery Rock and West Chester.

Pennsylvania's State System of Higher Education
East Stroudsburg University is a member of the Pennsylvania's State System of Higher Education (PASSHE) which is comprised of the Commonwealth's public universities with a combined enrollment of more than 100,000 making it the largest provider of higher education in the Commonwealth.

The universities combine to enroll the largest number of Pennsylvania residents among all four-year colleges and universities in the commonwealth. With 90,000 degree-seeking students and thousands more enrolled in certificate and other career-development programs, the State System is vital to Pennsylvania's economy.

The State System universities collectively offer more than 2,300 degree and certificate programs in more than 530 academic areas. The universities have nearly 800,000 living alumni, most of whom reside in Pennsylvania.

The State System universities are Bloomsburg, Clarion, East Stroudsburg, Indiana, Kutztown, Lock Haven, Mansfield, Millersville, PennWest [California, Clarion and Edinboro], Shippensburg, Slippery Rock and West Chester.

Title IX of the Education Amendments of 1972
East Stroudsburg University is committed to providing equal educational and employment rights to all persons without regard to race, color, sex, religion, national origin, age, disability, sexual orientation, gender identity or veteran's status. Each member of the university community has a right to study and work in an environment free from any form of racial, ethnic, and sexual discrimination including sexual harassment, sexual violence, and sexual assault. In order to meet this commitment and to comply with Title IX of the Education Amendments of 1972 and guidance from the Office for Civil Rights, the University requires faculty members to report incidents of sexual violence shared by students to the University's Title IX Coordinator. The only exceptions to the faculty member's reporting obligation are when incidents of sexual violence are communicated by a student during a classroom discussion, in a writing assignment for a class, or as part of a University-approved research project. Faculty members are obligated to report sexual violence or any other abuse of a student who was, or is, a child (a person under 18 years of age) when the abuse allegedly occurred to the person designated in the University protection of minors policy.

Information regarding the reporting of sexual violence and the resources that are available to victims of sexual violence is set forth at: Title IX: Sexual Harassment and Sexual Violence [Direct Web Address: esu.edu/titleix]

Family Educational Rights and Privacy Act
The Family Educational Rights and Privacy Act (FERPA) gives students certain rights with respect to their education record.

ESU students have the following rights:
• To inspect and review certain education records
• To request an amendment of their education record believed to be inaccurate or misleading
• To have control over the disclosure of education records, except to the extent that FERPA authorizes disclosure without consent. The right to restrict access to information identified by the institution to be directory information available to the public without permission from the student.
• The right to extend third party access to education records to whomever is identified by the student in writing.
• To file with the U.S. Department of Education a complaint concerning alleged failures by the University to comply with the requirements of FERPA.

Directory Information Items Recognized by The University
Certain student information contained in the educational record is considered directory (public) information. Directory (public) information may be shared by the University. A student may request the University Registrar to prohibit the disclosure of any directory (public) information by completing a FERPA Restriction Form.

Directory Information includes:
Student’s name
Official ESU e-mail address
Degree sought and time
Major, Minor, dates of attendance, enrollment status (full-time, part-time - including credit hours), class year
Dates of attendance
Awards, honors (including Dean’s List), degrees conferred including dates Past and present participation in officially recognized sports and activities
Physical factors (height and weight of student athletes)
Most Previous education agency or institution attended by the student Fraternity and/or sorority and educational societies.

Annual Notification
Students are reminded of their FERPA rights annually while they are preparing to register for the fall semester. The Annual FERPA Notification will also be available in the University Catalog, Student Handbook and through other university-related publications.

FERPA Restrictions
If you wish to withhold the disclosure of directory information, please print, complete the FERPA Restriction form and submit to the Student Enrollment Center as soon as possible. An effective semester must be included. When this restriction is applied to your record, it also prevents your name from appearing on the dean’s list, graduation lists and other university-related publications. Please consider very carefully the consequences of any decision made by you to withhold your “Directory Information”. Any future requests from non-institutional persons or organizations will be refused should you decide to inform the university not to release the above items. ESU will honor your request but cannot assume responsibility to contact you for subsequent permission to release information.

It is the student’s responsibility to notify the university if restrictions are to be rescinded. Questions about the Annual Notification or the FERPA Restriction form, should be directed to University Records & Registration at ferpa@esu.edu.

FERPA Release
Students can give permission for someone else to have access to their educational record. This is done only when the student completes the FERPA Disclosure form. This form can be found on the myESU Portal under the student tab

The Campus and Academic Buildings
The campus of East Stroudsburg University includes 63 buildings located on approximately 258 acres in East Stroudsburg Borough and Smithfield Township.

The majority of ESU’s facilities are located in East Stroudsburg, Pa. These buildings include academic facilities, nine residence halls, a 1,000-seat dining hall, a student center, a 60,000 square-foot Recreation Center, athletic facilities, a library and more.

The three suite-style housing facilities and one traditional residence hall. In total, ESU provides its students with 3,248 beds in order to experience the on-campus lifestyle. Nearby, on 46 acres of ESU’s property, resides University Ridge, a ten-building student apartment complex that provides an additional 541 beds to ESU students.

Two of the suite-style facilities house a separate university function; the University Police Station is housed on the ground floor of Hemlock Hall and a Health and Wellness Center for students on the ground floor of Sycamore Suites.

Across campus, the Mattioli Student Recreation Center is a full-service fitness center featuring high end exercise equipment, an elevated running track, 4 basketball courts, racquetball courts and more for the exercise enthusiasts.

Located on Smith Street, Kemp Library provides ESU students, faculty, staff and visitors with materials, services, equipment, spaces, and environments that support the University’s academic curricula, assists campus constituents with their study, research, and informational needs, and stimulates cultural development.
Located in Smithfield Township, ESU’s Center for Innovation and Entrepreneurship, built in 2010, is located on the corner of Brown Street and Route 447. This 51,000 sq. ft. facility is a driver of economic development support for Monroe County and home to innovators and entrepreneurs whether they be students, faculty, staff or community members. The Innovation Center includes ESU’s Economic Development and Entrepreneurship Division, Business Accelerator Program, Office of Sponsored Projects and Research, Office of Workforce Development, Wet Lab Facilities, Entrepreneurial Leadership Center, ESU’s Dr. Jane Huffman Wildlife Genetics Institute, and Computer Training Labs.

Less than 10 miles from campus, ESU affiliate, The Student Activity Association, Inc. owns Stony Acres, a 119-acre off-campus student recreation area near Marshalls Creek, which includes a lodge and a small lake. Considered a wildlife sanctuary, Stony Acres is a 119 acre facility in Marshalls Creek, Pa., that serves as a recreational site and field campus for students, faculty and staff. While providing outdoor recreational activity and social opportunities, the site also promotes co-curricular involvement and fosters leadership development.

Lastly, ESU opened an additional location in Bethlehem, Pa. (the Lehigh Valley Center) in 2012 and also partners with Northampton Community College in Bethlehem to provide convenient educational experiences for students in the fields of nursing, public health and business management. ESU’s Lehigh Valley Center offers opportunities for the adult learner as well as the traditional undergraduate student. The Center offers undergraduate degree completion, continuing education, non-degree programs, certificate programs and accelerated graduate degree opportunities.

Computing and Communication Services

The university Computing and Communications Center supports administrative computing, academic computing and telecommunications. Administrative computing is served by the Banner student information system, encompassing more than 30 online systems and providing services to the students, faculty and staff.

The academic computing network consists of 30 UNIX or Windows based servers that are connected to approximately 2,200 personal computers provided to support instruction, Internet access, campus network access, and email. They are located in 35 computer laboratories across campus. There is an open-access computer lab in each residence hall.

Additionally, many academic departments maintain discipline-specific computer laboratories for their curricula. Wireless computing zones are located throughout campus and outdoors. Students can connect to the Internet in these areas using a standard wireless device or smart phone. In addition, faculty and students use wireless for conducting specialized labs in a variety of courses. Helpful computing information can be found at esu.edu/ac.

Additionally, the Office of Computing and Communication Services supports faculty, administration, students, and affiliated businesses with services such as local and long distance telephone, voice mail, digital cable TV, and Internet.

The McGarry Communication Center is the campus base for the Instructional Resources Department, including the audiovisual, graphics, and television services units. The Communication Center houses two television studios and is the distribution center of campus cable television as well as the community-wide ESU television telecasts. WESS 90.3 FM radio is also located in the Center.

Kemp Library

Kemp Library provides all students, faculty and staff with numerous opportunities to acquire information in pursuit of their academic and career goals. The library offers a wide variety of resources and services to help achieve these goals. The collection includes not only physical items such as print books and journals, but also a large number of electronic resources, such as EBSCO databases, electronic journals and e-books. The library strives to provide 24/7 access to electronic resources via the library website. Students, faculty and staff are encouraged to take advantage of the library’s services including Inter-Library Loan, Reference and Research Assistance and to contact faculty librarians to schedule individualized instructional sessions or personal assistance. The library also provides quiet spaces for study as well as comfortable areas for group discussions. For more information about Kemp Library, visit the website - www.esu.edu/library.

Graduate & Extended Studies Office

The Graduate professional and support staff provide essential services for all graduate faculty and students at ESU, from application through program completion. The Graduate office also offers special academic opportunities for graduate students, including research and travel support.

The Graduate Advisory Council provides guidance and recommendations to the provost on policies and procedures for admission, assistantships, academic status, degree candidacy, and other matters related to graduate studies. Council membership includes the graduate coordinator from each academic department offering a graduate degree program. Graduate coordinators are appointed by the department chair. For a current list of graduate coordinators, contact the Graduate office at 570-422-3536. All areas of graduate curricula, including the review and approval of new courses, programs, or methods of delivery are the role of the university curriculum process. Curriculum proposals are initiated by the academic departments for consideration by the University Wide Curriculum Committee (UWCC). Following approval by the committee, the Academic Council reviews all course and program proposals before recommending them to the provost, who acts on behalf of the president of the university for final curriculum approvals.

Each academic department identifies its graduate faculty according to established criteria. Faculty members hold high academic credentials and a long-standing commitment to teaching excellence; collectively, they are recipients of numerous grants and honors. ESU’s faculty are diverse and represent many prestigious institutions of higher education in the United States and internationally. The terminal degree is held by 88 percent of the instructional faculty.

The Graduate & Extended Studies office on the second floor of Reibman Administration Building, and can be contacted via telephone at 570-422-3536 or e-mail at grads@esu.edu.

Alumni Engagement

The Office of Alumni Engagement, as part of the East Stroudsburg University Foundation, works to support and engage a network of more than 45,000 ESU alumni. Membership into the East Stroudsburg University
Alumni Association is solidified the moment a graduate crosses the platform during commencement.

Located in the Henry A. Ahnert Jr. Alumni Center, the office plans multiple events throughout the year, including the All Alumni Annual Tailgate and other regional events to connect and engage alumni with each other and the university. The office also produces the *Alumni Herald* magazine (www.esualumni.org/herald), which is published twice per year and filled with information about classmates and alumni success stories. The office looks to its network of alumni to show their support and commitment to ESU. Alumni and friends are encouraged to extend their support through the ESU Foundation Warrior Fund. Gifts to the Warrior Fund provide direct and immediate support to ESU and its programs. Gifts are used for student scholarships, enhancing academic and athletic programs and improving ESU’s technology infrastructure.

For more information about the office, the benefits of being a graduate of ESU, the Alumni Association, connecting with ESU alumni, or the ESU Foundation, visit www.esualumni.org.

27-Jul Grade Links Open for Faculty
4-Aug 4C Ends
10-Aug Faculty Deadline to Submit Grades to Registrar’s Office by 9:00 AM

All Calendar Dates Subject to Change
Admission

Recruitment Activity Practice
Only appointed employees or trained alumni of ESU are authorized to officially represent the university in recruiting and enrolling students through direct contact with the applicant, the applicant’s parents/legal guardians, spouse or school-appointed counselors. The university does not condone high-pressure recruitment strategies nor provide compensation by commissions, bonuses, or other incentive payments based on the number of students referred, recruited, admitted, or enrolled, including recruitment and financial aid support of military service members.

Requirements
All applicants to East Stroudsburg University must meet the following requirements:

1. An applicant must have an earned a baccalaureate degree from a regionally accredited college or university.
2. The applicant’s undergraduate grade point average must be at least 2.50 (on a 4.00 scale) overall, and 3.00 in the major. Some graduate programs require higher overall and major grade point averages.
3. Additional Program Requirements – Some programs have additional admission requirements, such as graduate school admission test (e.g., GRE, MAT, etc.) scores, specific undergraduate degree or prerequisite coursework, Pennsylvania Department of Education certification, or other requirements. Please refer to the section “Overview of Graduate Program Admission Requirements” for additional, program-specific requirements.

Application for Admission
A completed application for admission to East Stroudsburg University will include the following components:

1. Application – All degree and post-baccalaureate certification programs require a Graduate Admission Application, to be submitted online. Prospective students interested in pursuing coursework for professional development, or to explore graduate study before applying to a degree or certification program, should complete the Special Status Application.
2. Official Transcripts – Official transcripts from each undergraduate and graduate institution attended, regardless whether a degree was earned, must be submitted as part of the application package for degree and post-baccalaureate certification programs. Transcripts must be sealed by the registrar and remain sealed until their arrival at the office of Graduate & Extended Studies. Electronic transcripts sent by the registrar via an official transcript service directly to the office of Graduate & Extended Studies are acceptable.
3. Letters of Recommendation – Two or three professional and current letters of recommendation depending on the program are required of each applicant. Letters are to speak to your ability to be successful in graduate school, career and academic goals, and your professional work experiences and skills. Recommendations should state how long and in what capacity the individual writing the recommendation has known the applicant, and are to be submitted on official letterhead or on the Graduate Application Recommendation Form. Recommendations mailed directly to Graduate & Extended Studies should be in a sealed envelope with a signature across the seal. Recommendations can also be sent electronically, but should come directly from the recommender. The Special Status Application does not require the submission of letters of recommendation.
4. Professional Goal Statement – A statement of your perception of your ability to be successful in graduate school, career and academic goals, commitment to your field of study, and your professional work experiences and skills is to accompany the application package. The statement, dated and signed, is an important component of the application. The Special Status Application does not require the submission of a goal statement.
5. Resume
6. Application Fee – A non-refundable application fee in the amount of $50 must accompany the online application.
7. Documentation of Additional Program Requirements – Documentation of additional admission requirements (e.g., graduate school admission test – GRE, MAT, etc. – scores, undergraduate degree or prerequisite coursework, Pennsylvania Department of Education certification, etc.), where required, must be included in the application package.

Admission Classifications
Applicants to East Stroudsburg University are notified of their admission status by a letter from the vice president for enrollment management before the beginning of the term of planned study. Typically, applicants will be notified of an admission decision within three weeks after all application materials are received. Admission decisions are not subject to appeal. Admission decision classifications are as follows:

1. Admission, Pre-Candidacy (Full) – Granted to an applicant who plans to work toward a graduate degree and whose application meets admission requirements as set forth by the university and academic department.
2. Admission, Certification Program – Granted to an applicant who plans to work toward a certification program and whose application meets admission requirements as set forth by the university and the academic department.
3. Admission, with Conditions – Granted to an applicant who plans to work toward a graduate degree or certification program but does not meet the academic criteria for admission (e.g., overall/major quality point average, graduate test scores, etc.) or who does not have all of the other requirements (e.g., prerequisite coursework, licenses, etc.) necessary for admission, pre-candidacy (full). Upon departmental recommendation of the stated conditions, the student may request a change of admission classification from Admission, with Conditions to Admission, Pre-Candidacy. The Vice President for Enrollment Management will seek the recommendation of the graduate coordinator, and then make the decision for approval or disapproval.
4. Admission, Special Status – Granted to an applicant who plans to enroll in graduate courses for professional development, but does not intend to pursue a degree or certification. Special Status admission also may be granted to applicants who wish to explore graduate studies before applying to a graduate degree or certification program. In such cases, students must apply to the program before the completion of 12 credit hours. Courses completed as a Special Status (non-degree) student will not automatically be applicable toward the degree or certification program. Students must provide documentation of an earned baccalaureate degree from a regionally accredited college or university.
5. Admission Denied – Applicants denied admission will receive a letter from the Vice President for Enrollment Management informing them of the decision.
Application Deadlines
Graduate & Extended Studies reviews applications for admission under a "rolling admissions" process. This means that applications are reviewed throughout the year and admissions decisions are made weekly. However, to assure full consideration for admission before the beginning of the semester in which you would like to enroll, please submit your application for admission with all required documentation two weeks prior to the start of the semester.

Some programs admit students only once a year or have specific application deadlines, which are enumerated below:

<table>
<thead>
<tr>

International Applicants
In addition to fulfilling the general application procedures, international applicants must present evidence of fluency in English, with either the Test of English as a Foreign Language (TOEFL) or International English Language Testing System (IELTS) score. The minimum TOEFL score acceptable for admission is 560 on the paper test, 220 on the computer test or 83 on the Internet test. The TOEFL score should be submitted directly from the Educational Testing Service in Princeton, N.J. ESU's Institutional Code Number is 2650. The minimum acceptable score for IELTS is "Band 6." For further information concerning IELTS contact Cambridge Examinations and IELTS International, 100 East Corson St., Suite 200, Pasadena, CA 91103, USA. Call 626-564-2954; e-mail ielts@ceii.org; or visit IELTS Web site, www.ielts.org.

International applicants also must submit a statement and documentation of financial resources. The statement must demonstrate sufficient financial resources to meet the cost of living in the United States, the cost of travel to and from the student's native country, and the cost of graduate education at East Stroudsburg University. Applications will not be processed without the financial statement and application fee. International applicants must submit an official English translation of their transcripts, including a credential evaluation equivalence course-by-course report of their baccalaureate degree from World Education Services, Inc. (WES) or other credential evaluators approved by the National Association of Credential Evaluation Services (NACES). For further information concerning WES, contact WES at 800-937-3895 or at www.wes.org. For a full listing of approved evaluations, please visit www.naces.org.

International applicants must furnish proof of health insurance (certification must be in English) meeting the required criteria or purchase student health insurance from East Stroudsburg University, which is recommended. Due to the time required to secure immigration documents and address other matters, international applicants are encouraged to submit all application materials as early as possible. The office of Graduate & Extended Studies works in collaboration with other offices on campus to assist international applicants and students. For further information, please contact Graduate & Extended Studies.

Doctoral Applications
Applications for the Educational Leadership and Administration, (Ed.D.) program and Health Sciences (D.H.Sc.) are accepted every other Fall term.

Applicants for Certification, Specialist, Supervisor, and Letter of Eligibility Programs
From the Pennsylvania Department of Education and other national certification programs, East Stroudsburg University offers state-approved certification preparation programs leading to certification in:

- Biology (7-12)
- Chemistry (7-12)
- Earth & Space Science (7-12)
- English (7-12)
- French (7-12)
- General Science (7-12)
- German (7-12)
- Mathematics (7-12)
- Physics (7-12)
- Social Studies (7-12)
- Spanish (7-12)
- Speech & Language Impaired (N-12)
- Instructional Technology Specialist (K-12)
- Principal (K-12)
- Reading Specialist (K-12)
- Special Education, PreK-8/7-12
- Special Education Supervisor

The university also offers programs of study to prepare students for national certifications, including the Behavior Analyst, Applied Behavior Analyst, and National Board Certified Teacher. Applicants for these programs should follow the same procedures for admission, plan of study, and registration, as described for degree program students in this catalog. Interested applicants should contact Graduate & Extended Studies office to confer with the graduate admissions coordinator, in consultation with the respective graduate coordinator, for further information, before beginning the admissions process.

Examination and Other Admission Requirements
All applicants to Graduate Studies at East Stroudsburg University are strongly encouraged to take a graduate admissions test, such as the Graduate Record Examination (GRE) or Miller Analogies Test (MAT). However, some programs require specific tests, as follows:

**Graduate Degree Program** | **Required Examination** |
---|---|
Athletic Training | GRE |
Biology | GRE |

In addition to the requirements enumerated for all applicants to Graduate Studies, specific programs have additional application requirements, as follows:

**Graduate Degree Program** | **Additional Program Requirements** |
---|---|
Special Education Supervisor Certification | Teacher certification |
Reading | Teacher certification |
Fees and Deposits

Financial Obligation
Students, parents and others who are responsible for the financial obligations of students at East Stroudsburg University should understand that acceptance of admission and the privilege of attending imposes a financial obligation for a complete semester. Neither non-attendance, non-payment, nor failure to attend class constitutes official withdrawal. This must be done through the Student Enrollment Center using the appropriate form(s).

Students who register online or in person can check their class schedule through the myESU student portal to confirm their registration. A semester/session e-bill will be sent to the student’s ESU email. Students will be held financially liable for their registration unless it is officially canceled when the student contacts the Student Enrollment Center. Non-payment of fees or other financial obligations will prevent a student from being allowed to register for subsequent academic work and from receiving any official transcript of their academic record or diploma from the university.

Should the university find it necessary to refer a delinquent account to a collection agency or to an attorney, the cost of collection including attorney’s fees, if incurred, may be added to the student’s financial obligation.

Student Payment Policy
A student attending a course without proper registration and payment of all tuition and fees does not constitute de facto enrollment. The university will not permit retroactive enrollment in or payment for any class after the end of the term in which the course is offered.

Graduate Students Taking Undergraduate Classes
Please note that effective Fall 2012, tuition is assessed based on the student type and not course type. That is:

- Graduate students taking graduate courses pay the graduate rate.
- Graduate students taking undergraduate courses pay the graduate rate.
- Graduate students taking both graduate and undergraduate courses pay the graduate rate.

This can make a substantial difference in the charges for a graduate student. Please be sure to visit the Student Enrollment Center, Zimbar-Liljenstein Hall, to see how a schedule change in graduate/undergraduate credits will impact your charges.

Graduate Tuition and Fees
For Graduate Program Tuition and Fees see the Student Billing website at: esu.edu/tuition

Guidelines for Determining Resident Status for Students
(Title 22 Pennsylvania Code, Section 153.1)
A student is classified as a Pennsylvania resident for tuition purposes if the student has a Pennsylvania domicile. A domicile is the place where one intends to and does, in fact, permanently reside. Because this decision is subjective, documentary evidence must be submitted to the Student Enrollment Center for consideration.

Students who believe that they are qualified for in-state residency and those who would like to be made aware of the necessary factors to make such a transition should contact that office. Each case will be decided on the basis of all facts submitted with qualitative rather than quantitative emphasis in support of the intention of the student to reside indefinitely in Pennsylvania.

If the student is not satisfied with the decision made by the Student Enrollment Center in response to the challenge, the student may make a written appeal to the Office of the Chancellor, State System of Higher Education, Dixon University Center, 2986 North Second Street, Harrisburg, PA 17110. The decision on the challenge shall be final.

Detailed Information on Fees

General Fee
This mandatory fee is used to support the university’s academic programs and a variety of student services and activities such as student government, student organizations, health services and wellness programs, and Student Center debt service, capital replacement, and maintenance.

This fee is charged to all students (undergraduate and graduate, full-time and part-time, residential and commuting/off-campus) during all university sessions (including Winter Session and Summer Sessions), and at all course locations (including internships, student teaching, and all other off-campus sites). Refunds of the General Fee during regular and special sessions will be processed in accordance with the same schedule and policy as tuition refunds.

Technology Fee
This mandatory fee was instituted by the State System Board of Governors in the fall of 2002 and is used to enhance student access to the latest technology in the classroom and to prepare students for a technology-driven world. The purposes of the technology tuition fee are: (1) to acquire, install, and maintain up-to-date and emerging technologies to enhance student-learning outcomes; (2) to provide equitable access to technology resources; and (3) to ensure, ultimately, that ESU graduates are competitive in the technologically sophisticated workplace. All hardware, software, databases, and other capital equipment procured with these revenues are to support student learning experiences such as smart classrooms, computer labs, technology-intensive scientific equipment, content management software, electronic media, library databases, distance learning hardware/software, web-course development cost, curriculum development costs for technology-based courses, student learning assessment, online student academic support services and security solutions to protect student and institutional data.

Room and Board
Each academic year an advance deposit of $200 is required, to be credited toward the second semester of that year. This deposit is non-refundable.

Damage Charges
Students are held responsible for damage, breakage, loss, or delayed return of university property. Damages that are determined to be communal will be prorated in accordance with university policy and
housing contract agreement. Deliberate disregard for university property will also result in disciplinary action.

All keys to university rooms are university property and are loaned to students. Students who do not return keys will be charged a lock replacement fee to be determined by the institution. Loss of a room key should be reported immediately.

Payment Information
Payments may be made online, via mail, or in person the Student Enrollment Center in Zimbar-Liljenstein Hall. ESU accepts bank or personal checks, debit cards and cash in office. Payments accepted on line are VISA, MasterCard, Discover and American Express, as well as electronic checks.

Delinquent Accounts
No student shall be enrolled, graduated, or granted a transcript of records or diploma until all previous charges have been paid.

Refund Policies
Students are encouraged to sign up for direct deposit. Otherwise, a check will be issued.

Tuition
A student who officially withdraws before the beginning of any semester is eligible for a complete refund of all fees EXCEPT the application fee and registration and room deposits. (Please refer to refund policies that pertain to housing and meal refunds, if applicable.)

A student who completely withdraws from the university after the beginning of a semester and who submits to Student Enrollment Center an officially approved withdrawal form is entitled to a refund of tuition according to the schedule below. (Subject to change by the university without notice.)

<table>
<thead>
<tr>
<th>Refund</th>

<td>Third week</td>
</tr>
<tr>
<td>50 percent</td>
<td>Fourth week</td>
</tr>
<tr>
<td>40 percent</td>
<td>Fifth week</td>
</tr>
</tbody>
</table>

No refund after fifth week

Housing
A student who officially withdraws completely from the university BEFORE the beginning of any semester is eligible to receive a full refund of housing fees, but must forfeit the housing deposit.

A student who officially withdraws completely from the university DURING the semester will forfeit the housing deposit but is entitled to receive a pro-rated refund of housing fees, based upon a weekly scale. The Housing Office will determine if any refund of housing fees is possible for a student who leaves university housing for medical reasons. If a student is asked to leave university housing, the details concerning a housing refund shall be determined by the Director of Housing.

Meals
A student who officially withdraws after the beginning of a semester and who notifies the Student Enrollment Center will be entitled to a refund of the board paid for the remainder of the semester. A student who withdraws during a week will be charged for the entire week.

Summer Sessions
A refund of fees for a student who withdraws after the beginning of a summer session will be determined by the proportion of the term attended and will be prorated on the basis of the refund policy in effect for a regular session. It is the student’s responsibility to submit withdrawal requests within the allotted time period.
Financial Aid

Forms of Financial Aid for Graduate Students
- Loans
- Student Employment
- Scholarships
- Graduate Assistantships

Tuition Payment Plan
ESU offers several installment plan options for you to break up your balance into smaller payments each month. These plans offer a flexible method for paying educational expenses from current income through regularly scheduled payments. Please contact the Bursar’s Office at billing@esu.edu for more information.

Student Loans
The Student Enrollment Center, located in Zimbar-Liljenstein Hall, welcomes the opportunity to provide information and to assist students. The Financial Aid Office is located within this center.

Please call 570-422-2800 or 1-800-378-6732 to schedule an appointment. Prospective graduate students should contact the Office of Financial Aid to discuss regulations and processes required in order to determine eligibility for loans and university student employment programs. The Office of Financial Aid administers the federal educational loan programs available to graduate students. Applicants must complete and submit the Free Application for Federal Student Aid (FAFSA). Students are encouraged to submit the FAFSA online at www.fafsa.ed.gov. Recipients must be enrolled in at least six credits of graduate-level class work and must maintain satisfactory academic progress (i.e. 3.0 Grade Point Average, 67% Pass Rate, Acceptable Completion Timeframe).

Graduate students enrolled in graduate-level course work, may borrow up to a maximum of $20,500 per year in an unsubsidized Federal Direct Loan. Graduate students enrolled in undergraduate-level course work should contact the Student Enrollment Center to determine eligibility. Total borrowing amounts for the loan term, however, cannot exceed the cost of education less other financial assistance.

After your completed application is received and processed, information from the FAFSA will be electronically transmitted to ESU. The Financial Aid Office will determine your financial aid eligibility. Once eligibility is determined, your financial aid awards will appear on your online portal. If a Direct Loan has been offered, you will need to take action in order for a loan to be originated. Online you may accept the full amount, partial amount or choose to decline the loan. If you are a first-time borrower, you will be required to complete a Master Promissory Note (MPN) and entrance counseling. These can be completed online at www.studentloans.gov.

Teacher Certification Students
Students enrolled in a post-baccalaureate teacher certification program may be eligible for Federal Direct Loans at the undergraduate level. Students simultaneously enrolled in a master’s degree program and teacher certification should check with the Office of Student Financial Aid in the Student Enrollment Center regarding their eligibility for student loans.

Verification Requirements
Verification is the process of comparing the data provided on the Free Application for Federal Student Aid (FAFSA) with other requested documentation such as a tax return transcript. Some of the selection process is random. However, students may be selected because the information on the FAFSA is either inconsistent or likely to have been estimated.

If a FAFSA is selected for verification the student will be sent instructions to begin the process, which can be completed online. If you have any questions or concerns about the verification process you can contact the Office of Financial Aid.

Once the verification process is complete the student’s federal financial aid can be processed. Failure to complete the verification process will result in the cancellation of all federal financial aid, and may result in an outstanding balance on the student’s account. Verification may also result in a revision to any aid awarded prior to the completion of the verification process.

Payment of Financial Aid
Financial aid awards are credited directly to the student’s university account each semester. Refunds from financial aid will not become available until the student’s university account is satisfied. Students should plan to arrive on campus with enough personal money to purchase books and pay any off-campus housing expenses.

Satisfactory Academic Progress Policy
A student must maintain satisfactory academic progress (SAP) to continue to receive federal Title IV financial aid. Federal financial aid includes Federal Perkins Loan, Federal Direct Loans, and Graduate PLUS loans. Federal standards of satisfactory academic progress (SAP) include maintaining a 3.0 Grade Point Average, completing 67% of all courses enrolled, and a maximum time frame measurement to ensure the graduate program is completed in a timely manner. If one of the measures is not being met, the student is not meeting the standards and will no longer be eligible for federal financial aid. All periods of enrollment are included whether or not the student received federal financial aid during that time.

SAP is measured at the end of each academic year, specifically the end of the Spring semester. Winter enrollment will be counted in your spring calculations. The option to submit a Financial Aid SAP Appeal is offered to students who experienced unforeseen and extenuating circumstances of which prevented them from being academically successful. This appeal submission requires documentation to support reason for appeal and must be submitted to the Office of Financial Aid by the required deadline.

Graduate Students
A student must meet all of the following requirements in order to be making satisfactory academic progress for Title IV aid.

Qualitative Standard (GPA):
- Graduate students (full or part-time) are required to maintain a cumulative GPA of 3.00.
- In addition to cumulative GPA requirements, graduate students in selected programs will not meet SAP requirements if they do not meet specific departmental standards related to “C” grades earned and/or clinical performance. At the end of each payment period (as identified above) the office of Graduate & Extended Studies will notify the Office of Student Financial Aid of any student in this circumstance.

Quantitative (Pace) Standard:
• Graduate students must complete a minimum percentage of attempted credits, Pass Rate. Students must maintain a minimum completion rate of 66.67%.
• Pass Rate is calculated by dividing the cumulative credit hours earned by the cumulative credit hours attempted.

Maximum Time Frame:
• Graduate students must complete degree requirements without exceeding 150% of the credit hours required. For example, a student enrolled in a 30 credit hour program will no longer be able to use federal financial aid once he/she has attempted 45 credit hours. Retaking coursework or coursework not required for program completion will affect the total number of attempted credit hours.

Program Completion:
Once the student completes all the academic requirements for his/her program, the student is considered to have completed the degree program and is no longer eligible for further federal aid for that program. Students who fail to meet the GPA and Pass Rate standard at the end of the academic year will lose federal aid eligibility unless they successfully appeal and are placed on financial aid probation, with an academic plan.

Financial Aid Satisfactory Academic Progress Categories

Financial Aid Appeal Process/ Financial Aid Probation:
• If, at the end of the academic year, a student is not meeting SAP requirements, the student may submit an appeal based on extenuating circumstances. Examples of extenuating circumstances are personal illness or injury, a death of a close relative, or other special circumstances. The appeal must outline the reasons that satisfactory academic progress was not met, what has changed that will allow the minimum standards to be met at the next evaluation and how the student plans to improve their academic progress (i.e. academic plan). The reasons for being academically unsuccessful must be supported with documentation.
• If the appeal is approved by the financial aid office, the student will be placed on academic probation, with an academic plan, and will be eligible for federal financial aid during a financial aid probationary period. The student’s progress will be monitored to determine the student is meeting the requirements of the academic plan. If the student is meeting the requirements of the academic plan, the student will be eligible to receive federal aid as long as the student continues to meet the requirements and is reviewed according to the requirements specified in the plan.
• If the appeal is denied, the student will not be eligible for federal financial aid until s/he is meeting satisfactory academic progress standards (i.e. GPA, Pass Rate, Max Hours).

Simultaneous Enrollment in Undergraduate and Graduate Classes
ESU and the federal government use different rules and regulations to classify students as undergraduate or graduate.
If a graduate student enrolled in a graduate degree program takes six credit hours of undergraduate course work and only three credit hours of graduate course work, the student is considered an undergraduate student and is only eligible for the maximum amount of federal aid for undergraduate students.

There is a significant difference in the amount of federal loan aid available to an undergraduate student and a graduate student. Students who are classified as graduate students in fall and undergraduate students in spring may find that they are only eligible for a small fraction of the federal loan that they would be eligible for in spring if they were classified as graduate students.

Certification-Only Students
Students enrolled in post-baccalaureate certification prep programs and not simultaneously enrolled in a graduate degree program may not be eligible for federal aid. Check with the Office of Student Financial Aid to determine your eligibility for federal financial aid.

Scholarships
Scholarships based upon a variety of achievements and talents are available at East Stroudsburg University. Funds for the various scholarship areas are made available through donations by private industry, faculty, staff, community contributions, and private endorsements. Additional information on scholarships is available online at www.esu.edu.

Students will be notified, in writing, by the East Stroudsburg University Office of Student Financial Aid if they have been approved for federal financial aid due to a successful SAP Appeal submission.

Academic Forgiveness
Graduate students do not qualify for Academic Forgiveness at this time.

Transfer Credits
Transfer credits accepted toward the student’s current program are counted as both attempted and completed credit hours. Grades earned in transfer credits are not included in cumulative GPA.
Graduate Assistantships

Overview of the Graduate Assistantship Program

East Stroudsburg University offers an excellent graduate assistantship program. The primary purpose of the program is to enhance the student's academic experience while pursuing a graduate degree at ESU. Therefore, graduate assistantships are available to attract the "best and brightest" prospective students to ESU graduate programs and to provide highly qualified graduate students with professional development experiences related to research and leadership in their field of study. Graduate assistants function under the auspices of graduate faculty on academic, clinical, research, or leadership activities or special projects related to the field of graduate study. Graduate assistant appointments are awarded on a competitive basis to highly qualified students without regard to financial need.

Therefore, the awarding of a graduate assistantship is an honor as well as a scholarship. The Graduate & Extended Studies is the designated unit on campus to officially offer graduate assistantships to students, based upon the recommendation of an academic department. Finally, a graduate assistant at all times is subject to all existing and any new policies, procedures, and rules that arise during the term of award and assistantships are based on available funding.

Graduate & Extended Studies offers a variety of graduate assistantships, categorized as follows:

- **Academic or research graduate assistantships** are available to highly qualified graduate students in any degree program. Academic graduate assistants are assigned to function under the auspices of a faculty member in their department. Responsibilities include academic, clinical, or research activities related to the field of study.
- **Administrative graduate assistantships** are available on a limited basis to highly qualified graduate students from any degree program.
- **Frederick Douglass Institute graduate assistantships** are named after Frederick Douglass, the 19th-century American abolitionist. Consideration for this scholarship is in keeping with the spirit of Douglass' life of public service and the university's mission to be a source of encouragement to historically underrepresented and underserved populations who have a commitment to leadership, social involvement, and commitment to education, as evidence by their professional experiences or professional goals.
- **Residence life graduate assistantships** are available on a limited basis to qualified, full-time graduate students in any degree program. Residence life graduate assistants are assigned to and receive room in one of the university residence halls and provide services as needed by the Office of Residence Life and Housing in the management of the residence halls.

Eligibility Criteria for a Graduate Assistantship

Eligibility criteria for full consideration for a Graduate Assistantship at ESU include the following criteria:

1. **Admission decision** – An applicant must receive an admission decision of Admission, Pre-Candidacy (Full) or Admission, with Conditions.
2. **Academic qualifications** – All applicants must be highly qualified academically. For new students, an undergraduate grade point average of at least 3.00 (on a 4.00 scale) overall, and 3.00 in the major; a grade point average of 3.00 or higher in graduate coursework; or other evidence of high academic achievement is required. Continuing graduate students must be in Academic Good Standing.
3. **Enrollment status** – An applicant must be enrolled a minimum of nine graduate credits for the semester for which the Graduate Assistantship is awarded.
4. **Additional requirements** – Some graduate assistantships have additional eligibility criteria, such as initial certification, specialized skills, or other attributes/qualifications.

Exceptions to these eligibility requirements may only be made upon written recommendation of the student's academic department, endorsed by the student's college dean, and with the approval of the Vice President of Enrollment Management.

Application for a Graduate Assistantship

A completed application for a graduate assistantship at ESU will include the following components:

Graduate assistantship online application form with supporting documents – A complete online application including all required supporting documents must be submitted through ESU's Human Resources website.

Applicants for Frederick Douglass Institute graduate assistantships are required to submit the specified Frederick Douglass personal statement. Applicants for a graduate assistantship must have a complete application package on file with the office of Graduate Studies, including the Application for Admission, official transcripts, letters of recommendation, goal statement, application fee, and documentation of additional program requirements.

Prospective graduate students who meet the eligibility criteria are encouraged to submit their online Graduate Assistantship Application concurrently with their Application for Admission to the office of Graduate Studies, though interested individuals may apply at any time throughout their graduate studies.

Award of a Graduate Assistantship

Applicants for a Graduate Assistantship are notified of their selection and offer of an assistantship by a letter from the Graduate Studies office. The Graduate Assistantship Award Letter will outline the details of the award.
Graduate Assistantships may be offered for an academic year, a semester (fall/spring), or a summer session, with award levels as follows:

- Full Graduate Assistantship (100 percent)
- Partial Graduate Assistantship (75 percent)
- Partial Graduate Assistantship (50 percent)

Typically, applicants will be notified of an offer for the fall semester or an academic year in May, June, July, or August; for the spring semester in November or December; and for the summer session in May or June. Late appointments may be made due to changes in award availability, resignations, or dismissals.

Upon receipt of an offer, applicants are expected to follow the guidelines, as stipulated in the award letter, to accept the offer. Failure to complete all requirements by the due dates will result in forfeiture of the offer of a graduate assistantship.

Finally, of important note, while graduate faculty in academic departments and administrators may recommend applicants for a graduate assistantship, only Graduate Studies can authorize the awarding of a graduate assistantship. Therefore, applicants should await an official offer letter from the Graduate and Extended Studies Office.

**Professional Duties**

The award of a graduate assistantship includes professional duties performed under the supervision of a graduate faculty or administrator. The Graduate Assistantship Award Letter will specify the name and position of the graduate faculty or administrator and the unit in which the duties are to be performed. The extent of hours will be specified, commensurate with the award level, as follows:

- Full Graduate Assistantship (100 percent) – 20 hours per week (600 hours per academic year; or 300 hours per semester)
- Partial Graduate Assistantship (75 percent) – 15 hours per week (450 hours per academic year; or 225 hours per semester)
- Partial Graduate Assistantship (50 percent) – 10 hours per week (300 hours per academic year; or 150 hours per semester)

Graduate assistants are expected to meet with their supervisor before the start of the assistantship to discuss professional expectations and work duties.

Graduate assistants are expected to perform assigned professional responsibilities and demonstrate good work habits. Additionally, graduate assistants are expected to maintain good academic standing and satisfactory progress toward their degree.

**Compensation**

Graduate assistantships provide financial compensation for the work or professional duties performed.

The total amount of the compensation correlates with the award level, as follows:

- Full Graduate Assistantship (100 percent) $5,004 per academic year; or $2,502 per semester
- Partial Graduate Assistantship (75 percent) $3,753 per academic year; or $1,876 per semester
- Partial Graduate Assistantship (50 percent) $2,502 per academic year; or $1,251 per semester

Graduate assistants are compensated for the work performed on an hourly basis, paid on a biweekly schedule.

**Tuition Waiver**

In addition to the compensation for the professional duties or functions performed, graduate assistantships offer a waiver of in-state tuition, commensurate with the award level, as follows:

- Full Graduate Assistantship (100 percent) 100 percent in-state tuition waiver (i.e., 9 credit hours/semester)*
- Partial Graduate Assistantship (75 percent) 75 percent in-state tuition waiver (i.e., 7 credit hours/semester)*
- Partial Graduate Assistantship (50 percent) 50 percent in-state tuition waiver (i.e., 4.5 credit hours/semester)*

In order to receive the tuition waiver specified for the award level, graduate assistants are required to perform the specified number of hours of work or professional duties. Graduate assistants are responsible for all non-tuition fees required of graduate students.

*Graduate assistants enrolled in a doctoral level program must register for a minimum of 6 credit hours of doctoral coursework per semester in order to qualify for a Graduate Assistantship. The award levels are:

- Full Graduate (Doctoral level only) Assistantship (100 percent) 100 percent in-state tuition waiver (i.e., 6 credit hours/semester)
- Partial Graduate (Doctoral level only) Assistantship (75 percent) 75 percent in-state tuition waiver (i.e., 4.5 credit hours/semester)
- Partial Graduate (Doctoral level only) Assistantship (50 percent) 50 percent in-state tuition waiver (i.e., 3 credit hours/semester)

**Academic Load**

During the academic year, all graduate assistants must register for a minimum of 9 credit hours of graduate coursework per semester. During the summer sessions, all graduate assistants must register for the specified credit hours of graduate work.

**Resignation or Dismissal**

Graduate assistants may resign a graduate assistantship position due to professional or personal reasons. However, customary with professional standards of practice, a letter of resignation and advance notice are preferred to allow for transition of the position. If the resignation occurs during the course of an academic semester, compensation and tuition waiver will be pro-rated to the date of the resignation. A student who resigns a graduate assistantship position in good standing may reapply and accept another award in the future if eligibility criteria are met. Graduate assistants are expected to follow all university policies and procedures in fulfillment of their work and academic responsibilities. Failure to perform professional duties, demonstrate good work habits, maintain good academic standing, or follow university policies and procedures will result in corrective or disciplinary measures, from mentoring and coaching to potential termination of the graduate assistantship award.

**Overview of the Graduate Student Worker Program**

East Stroudsburg University offers an excellent graduate student worker program. The primary purpose of the Graduate Student Worker Program is to provide university departments and units a student workforce in specific job areas and to support the students’ need to obtain practical work experience. Positions requested must reflect a need for a highly
specialized trained student with advanced knowledge of the work field. Graduate Student Workers need to possess a highly maintained set of technical skills and should be working in a field related to their academic pursuit. Graduate & Extended Studies is the designated unit on campus to offer Graduate Student Worker positions to departments and other units on campus. Graduate Student Worker positions do not include tuition waivers.

The Request for a Graduate Student Worker Position is a request for a GSW position for the current year only. If a unit is awarded a GSW position, then the review of graduate student worker applications or recommendation of a current graduate student for the position will follow. Once again, the office of Graduate Studies is the designated unit to make an official offer of a Graduate Student Worker to a student. To be eligible to receive a Graduate Student Worker position, graduate students must be admitted into a graduate program, enrolled in a minimum of 5 credits, and in academic good standing. New students who have not yet established academic standing in Graduate & Extended Studies are required to have a 3.00 GPA as an undergraduate, both overall and in their major.

A full-time Graduate Student Worker position offers a graduate student 20 hours of work experiences per week (300 hours per semester, or 600 hours per academic year) with a stipend between $8.34-$15.00/ an hour. A half-time Graduate Student Worker position offers a graduate student 10 hours of work experiences per week (150 hours per semester, or 300 hours per academic year) with a stipend between $8.34-$15.00/ an hour.

For Further Information
For further information about the Graduate Assistantship or Graduate Student Worker program at East Stroudsburg University, please contact the Graduate & Extended Studies office at 570-422-3336 or grads@esu.edu.
Academic Regulations

As a condition of enrollment in East Stroudsburg University, every student is required to comply with the academic regulations. Students are expected to familiarize themselves with these regulations, and any assertion of ignorance of their provisions cannot be accepted as a basis for an exception to them. No student or group of students should expect to be warned individually to conform to any of the regulations contained in this publication. Students are advised to pay special attention to all deadlines given in the academic regulations. Students who have questions or concerns about these regulations should consult with their academic advisor.

Academic Integrity Policy

East Stroudsburg University is committed to promoting a climate of openness and honesty among all members of the university community. In order to foster an environment suitable for the development of academic excellence, it is imperative that all members of the academic community uphold the principles of academic integrity in all scholarly endeavors.

Academic integrity implies that students are solely responsible for their work and actions while members of the ESU community. In accordance with this pursuit, students are responsible for knowing the rules and conditions under which university credit may legitimately be obtained. Violations of academic honesty will be viewed with the utmost seriousness and appropriate sanctions will be applied. It shall be deemed an academic offense if a student commits any of the following:

- During a test or examination, uses any material not authorized by the instructor.
- Provides or receives assistance in an examination, test, assignment, paper or project in a manner not authorized by the instructor.
- Buys, sells, engages in unauthorized exchange, or uses any tests or examinations in advance of their administration.
- Buys, sells, engages in unauthorized exchange or improperly using any assignments, papers or projects.
- Presents as his or her own, for academic credit, the ideas or works of another person(s), scholastic, literary or artistic, in whole or in part, without proper and customary acknowledgment of sources, and in a manner which represents the work to be his or her own.
- Falsifies or invents information, data, or research material.
- Obtains information in a way contrary to the stated policies of the course, and/or the university as stated herein.
- Attempts to bribe or coerce any university employee or student in order to gain academic advantage.
- Colludes with others in order to circumvent academic requirements.
- Substitutes for another student, or arranges for substitution by another student, or misrepresents oneself as another person during a test or examination whether in person or using electronic or telephonic communication.
- Alters, changes, or forges university academic records, or forges faculty, staff, or administrative signatures on any university form or letter.
- Submits any false record in pursuit of university credit.

Satisfactory Academic Progress

Two or more incompletes (i.e., grades of “I”) are not considered satisfactory academic progress towards the degree or certificate completion, regardless of cumulative grade point average. Students with two or more incompletes, and without a remediation and success plan developed with the graduate program coordinator -and approved by the department chair and college dean- in place to address the incomplete coursework, will be prohibited from registering for additional coursework in the program and will be placed on academic probation, with eligibility to be dismissed, if the incomplete coursework is not resolved within the allotted timeframe as outlined in the remediation and success plan.

Standards of Behavior

The mission and objectives of the university include a serious concern for the overall development of the individual. This philosophy implies that all students maintain high personal standards and conduct themselves in a manner, which manifests not only intellectual and emotional growth but also personal and social development. The basic standards of behavior are outlined in the Student Handbook, under the Judicial Process and Regulations and the Student Code of Conduct.

Academic Correspondence

Correspondence from the office of Graduate & Extended Studies to graduate students is mailed to the permanent address of record or university e-mail account. Therefore, graduate students are required to notify Graduate & Extended Studies of any changes in mailing address and other contact information on a timely basis.

Graduate Degree Policies

Academic Degrees Conferred

Graduate and Extended Studies at East Stroudsburg University offers graduate programs that prepare students for a complex, changing global society, with four master’s degree designations – Master of Arts, (M.A.), Master of Education (M.Ed.), Master of Public Health (M.P.H.), and Master of Science, (M.S.) – in more than 20 academic majors or fields of study and two doctoral degree designations - Doctorate in Education (Ed.D.) and a Doctorate in Health Sciences (D.H.Sc.)

The master’s degree programs traverse each of the university’s four colleges – College of Arts and Sciences, College of Business and Management, College of Education, and College of Health Sciences.

Credit Requirements

Most M.A., M.Ed., and M.S. degree programs require 30 to 36 credit hours of coursework beyond the baccalaureate level; however, the number of credit hours required for the master’s degree varies with the type of degree and whether the student is required to write a thesis. Some clinically-based Master of Science (M.S.) programs, and professional master’s degrees, such as the Master of Public Heath (M.P.H.), require 42 credit hours or more. Many of these degrees, however, do not require the student to complete a thesis.

Academic Major and Concentration

The academic major represents the sequence of courses and experiences constituting the major field of study and culminating in the master’s
degree. Some academic majors or programs of study offer the student the opportunity to select a concentration (e.g., focused area of study, track, specialization, emphasis) within the major field.

Program Option
Many of ESU’s master's degree programs offer the student the opportunity to select a program option, typically a thesis or non-thesis option.

Admission to Candidacy
All master's degree students who received an admission decision of Admission, Pre-Candidacy are expected to submit a Plan of Study before the completion of 12 credit hours.

Subsequent to submission of the Plan of Study, students are reviewed for Admission to Candidacy. To be admitted to candidacy, a student must be in Academic Good Standing and have fulfilled any requirements stated by the department.

Master's degree students who received an admission decision of Admission, with Conditions must first fulfill all conditions, as stated on the admission decision letter, and have their status upgraded to Admission, Pre-Candidacy in order to be reviewed for Admission to Candidacy. A master's degree candidate must remain in academic good standing in order to be eligible to graduate.

In-Residence and Transfer Credits
Individual graduate programs at ESU may establish requirements for credits taken "in residence" and transfer credits, allowing up to one-third of the credits meeting program requirements to be accepted as transfer credits. Graduate programs that wish to allow the acceptance of more than six transfer credits, up to one-third of the credits meeting program requirements, must follow the process for approval of program requirements/transfer credits to set the higher limit of transfer credits for the program.

Transfer credits must have been completed at a regionally accredited institution, within the past six years, and the grade earned must be at least a "B" or its equivalent. Transfer credits must be approved and incorporated in the Plan of Study.

Culminating Experiences
All master's degree programs at ESU require a culminating experience. This requirement may be met through a thesis, research project, or comprehensive examination, or in some cases this requirement can be met through integrative experiences, such as practicum, internships, and other field work that synthesize theory and practice.

Graduate & Extended Studies outlines the process and timeline for all culminating experiences. Failure to adhere to guidelines may delay a student’s graduation.

Application for Graduation
All candidates for the master's degree are required to submit a complete and approved Application for Graduation during the semester in which program completion and graduation are anticipated, as follows:

<table>
<thead>
<tr>
<th>Anticipated Graduation</th>
<th>Application Due Date</th>
</tr>
</thead>
<tbody>
<tr>
<td>May</td>
<td>February 15</td>
</tr>
<tr>
<td>August</td>
<td>May 9</td>
</tr>
<tr>
<td>December</td>
<td>September 15</td>
</tr>
</tbody>
</table>

Statute of Limitations
All program requirements for a master’s degree, including program credits earned or accepted by transfer, examinations, internships or field experiences, and research requirements must be completed within six years from the date of initial registration in the program. A leave of absence may be requested for professional or personal reasons; the time during the leave of absence does not count toward the maximum timeframe for completing degree requirements. An extension to the statute of limitation for program completion may be requested; the extension must be submitted and fully approved before the expiration of the six-year maximum timeframe.

Dual Graduate Degree
For awarding of dual graduate degrees at least 12 hours will be required beyond the minimal credit requirement for the degree program with the most required credits.

Second Masters Degree
Post-masters students returning for a second masters degree need to complete an additional 15 credits (regardless of number of earned credits for the first masters degree) and complete degree requirements in effect at time of matriculation for second masters degree.

Post-baccalaureate Students
Post-baccalaureate students are expected to earn a grade of "C" or higher in all coursework, graduate and undergraduate, in their post-baccalaureate career.

Post-baccalaureate students may repeat up to two courses for grade improvement. Each course may be repeated one time, for a total of two attempts. If a student has not earned a grade of "C" or higher after a second attempt, then the student will be dismissed from the post-baccalaureate program and Graduate & Extended Studies.

Credits for a repeated course will be counted only once, and the hours and grade earned when the course was last taken will be used to compute the grade point average. However, all attempts will continue to appear on the transcript.

Doctoral Students Taking One Credit
After entering candidacy status, a doctoral student may be considered half-time while enrolled in a 1 credit hour dissertation course. Doctoral candidates may maintain half-time status in this way until completion of the number of dissertation credit hours specified by their programs in The Graduate Catalog and designated on the plan of study.

Academic Standing

Academic Good Standing
Graduate and post-baccalaureate students at East Stroudsburg University are expected to maintain high academic standards. All graduate and post-baccalaureate students must maintain a cumulative grade point average (GPA) of 3.00 or higher in all coursework in order to be in academic good standing. In the first 6 credits of a graduate program (early pre-candidacy), an overall GPA of 2.50 or higher will be accepted as academic good standing. A graduate student must be in academic good standing to be admitted to degree candidacy and to graduate. Some graduate and post-baccalaureate programs may have more stringent requirements for academic good standing.
Academic Probation and Dismissal

Students who fall below academic good standing are placed on academic probation. Students placed on academic probation must raise their cumulative grade point average (GPA) to 3.00 or higher within the next nine credit hours.

Students who fail to raise their cumulative average to at least 3.00 by the end of their probation period will be dismissed from their program, as well as from Graduate & Extended Studies.

Academic Dismissal Return: All applicants seeking to be (re)admitted to graduate study after being previously dismissed must include a written statement explaining the reason(s) why their application for readmittance should be considered.

Registration and Schedules

Registration is the method of ensuring continuous matriculation in an academic program. Students register for courses each semester for a subsequent semester and a student’s course schedule is regarded as a contract that determines official enrollment.

Fall and Winter registration takes place in March/April. Spring/Summer registration takes place in October/November.

Academic Attendance

Students are required to actively participate in their courses and professors are asked to confirm a student’s class participation/attendance through the Course Roster Verification process. Each professor will determine a class attendance policy for each course including the attendance requirements on the course syllabus. Class attendance may impact a student’s course grade per the stated policy, a copy of which is kept on file in the department office. Students are required to actively participate in their courses and attendance may impact a student’s course grade per the stated policy, a copy of which is kept on file in the department office.

In some cases, if a student is unable to return to one or more of their classes, the Dean of Students can discuss enrollment options. Students or family members should contact the office at 570-422-3461 with questions.

Registration Period

When you register for classes each term, you agree to pay the fees and charges assessed by ESU. Fall/Winter registration takes place in March/April. Spring/Summer registration takes place in October/November. Course registration begins at different times for different groups of students.

1. Graduate Students
2. Priority Groups [Active Military, Veterans, ROTC, Honors Program, Student Athletes, etc]
3. Continuing Undergraduates [in order]
4. [Senior] More than 89.5 credits
5. [Freshman] Less than 29.5 credits
6. [Junior] Between 60 and 89.5 credits
7. [Sophomore] Between 30 credits and 59.5 credits
8. Non-degree/non-matriculated

Please see below for order and visit the Ready...Set...Register! Webpage for more information.

Changes to Academic Schedule

ADD/DROP PERIOD: Calendar Days 1 to 8
During the Add-Drop period, a student may adjust their class schedule by adding and dropping classes. The period provides students with one full week plus the weekend to add or drop courses without receiving a “W” grade. Courses dropped from the student’s schedule will not appear on the student’s transcript for that semester/term.

ADD COURSE: Courses may be added during the first eight calendar days for the Fall and Spring semesters through the MyESU student portal. Please check with the professor before adding a class online to make sure the student will be able to complete any coursework already assigned and to confirm that any course pre-requisites (if any) have been met.

A student attending a course without proper registration and payment of all tuition and fees does not constitute de facto enrollment. The university does not permit retroactive enrollment or payment for any courses once the term in which the course was offered ends.

WAITLISTS: Final waitlist processing occurs the week before the semester begins and if a student is still on a waitlist after this time there is no guarantee the student will be automatically enrolled in the course if a seat becomes available.

DROP COURSE: Courses may be dropped with no record on the student’s academic transcript during the first eight calendar days for the Fall and Spring semesters through the MyESU student portal.

WITHDRAW PERIOD: Calendar Day 9 to 10th Week
Students who withdraw from course(s) beginning on semester day nine through the 10th week of classes will receive a grade of “W” for the course(s) on their permanent academic record. Instructor permission may be required to withdraw from a course.

CHANGES AFTER THE 10TH WEEK
After the 10th week, a student may only withdraw due to extraordinary circumstances (e.g. illness, death in the family, etc.) and requires the appropriate dean’s approval. “W” grade is assigned for courses a student is passing and a “Z” grade is assigned for courses a student is failing. Any student who discontinues attendance in a course without formally withdrawing will be assigned an “E” as a final grade.
**Course Credit**

Course credit is measured in credits. A credit represents academic work equivalent to one hour per week in class plus two hours per week of outside studying for a semester. Class periods at East Stroudsburg are generally 50 minutes in length and are regarded as class hours. A semester is 15 calendar weeks. A credit is equivalent to 15 weeks of full-time study whether in class or outside of class. In some courses two hours of laboratory per week for a semester earns one credit, while in other courses three hours of laboratory or fieldwork per week for a semester earns one credit. For example, CHEM 353 Physical Chemistry (4) is a course in Chemistry which earns four credits.

---

**Academic Credit Hour Policy**

The credit hour serves as ESU’s common measure of instruction based on the expected number of contact hours of coursework during the semester/term. All credit hours awarded by East Stroudsburg University will conform with the definitions and guidance outlined by the U.S. Department of Education (CFR, Title 34: Education, Part 600 – Institutional Eligibility under the Higher Education Act of 1965, as amended, Subpart A-General, Section 600.2), the Pennsylvania State Board of Education Curricular Credit Policy (22 Pa. Code Chapter 31, §§ 31.21) and the Middle States Commission on Higher Education (Verification of Compliance with Accreditation-Relevant Regulations, 2016). One credit hour of instruction equals 15 hours over the term, forty-five hours for a three credit course. Please note that all of this instruction is necessarily conducted face-to-face with an instructor. Different types of courses require different amounts of contact time and may be delivered in multiple formats to students including but not limited to distance education, face-to-face, hybrid and interactive media.

A semester hour of contact time is defined as at least fifty minutes of contact each week in a standard semester. East Stroudsburg University follows the Pennsylvania System of Higher Education Academic Calendar (Board of Governor’s Policy 2002-04). The standard semester – fall and spring – includes 16 weeks where 14 weeks are used for instruction, one week for final examinations, and one week used for non-teaching days in the fall semester and spring break in the spring semester. In the absence of a Common Calendar, ESU will follow the USDOE guidance that defines a semester as having 15 weeks inclusive of 1 week for final examinations.

The following standards are intended to specify the minimum contact time for the assignment of one (1) semester / credit hour. Some courses may exceed these minimum standards.

<table>

Additional information regarding the Academic Credit Hour policy can be found online at [www.esu.edu/provost/faculty_resources.cfm](http://www.esu.edu/provost/faculty_resources.cfm)

**Dual-Level Courses**

Graduate students who enroll in dual-level courses as graduate credit should be aware that dual-level courses commonly require more advanced work and additional requirements than required of undergraduate students taking the same course. Dual-level courses with graduate credit taken while a student was an undergraduate may be approved for the graduate program if the course did not count toward the requirements for the baccalaureate degree.
Course Auditing
Graduate students may audit a course if permission has been granted by the course instructor (Permission to Audit card). Auditors must pay normal tuition and related fees. A change of registration from credit to audit or from audit to credit may occur only during the first week of the semester. An auditor will, with permission from the instructor, participate in class discussion, do practicum work, take examinations, and share generally in the privileges of a class member. If the student completes all course requirements, an "audit" notation is posted to the student’s academic record.

No student who is required to carry a certain number of credits may count among those credits the credit for an audited course.

Grade Reports
Student grade reports are available at mid-semester and at the end of the semester. Only the semester grades are entered on the student’s permanent records (transcript). Semester grade reports are available through the student portal myESU. Specific information about access to the student portal is mailed to each student upon his or her initial enrollment at East Stroudsburg University.

It is the responsibility of each student to check grade reports at mid-semester and at the end of the semester. Students are expected to check grade reports as they are available to be aware of academic performance in each course, to register for courses for the next semester, and to address issues related to course grades immediately. Grade reports are an important tool for assessing academic progress.

Quality Point System
In addition to meeting course and credit requirements for graduation, students must maintain a specified academic level throughout a given curriculum as measured by quality points. The minimum number of quality points required for graduation is twice the number of credits attempted. Pass/fail courses are not used in the computation of the quality point average. The required quality point average for graduation is 2.00 or higher. Some degree programs require a higher cumulative quality point average. Each credit grade is calculated as follows:

<table>
<thead>
<tr>
<th>Grade</th>
<th>Quality Points</th>
</tr>
</thead>
<tbody>
<tr>
<td>A</td>
<td>4.0</td>
</tr>
<tr>
<td>A-</td>
<td>3.667</td>
</tr>
<tr>
<td>B+</td>
<td>3.333</td>
</tr>
<tr>
<td>B</td>
<td>3.0</td>
</tr>
<tr>
<td>B-</td>
<td>2.667</td>
</tr>
<tr>
<td>C+</td>
<td>2.333</td>
</tr>
<tr>
<td>C</td>
<td>2.0</td>
</tr>
<tr>
<td>C-</td>
<td>1.667</td>
</tr>
<tr>
<td>D</td>
<td>1.0</td>
</tr>
<tr>
<td>E</td>
<td>0</td>
</tr>
</tbody>
</table>

The following grades are not counted in calculating a student GPA:

- F: Failure (Pass/Fail)
- I: Incomplete
- L: Audit – Complete
- M: Military Leave of Absence
- ML: Military Leave of Absence Completed
- N: Academically forgiven [appears before grade being forgiven]
- O: Ongoing
- P: Pass (Pass/Fail)
- R: Repeat (used prior to fall 2011)
- S: Satisfactory
- T: Transfer Course
- U: Unsatisfactory
- X: No Grade Reported
- Y: Audit – Incomplete
- W: Withdrawed Passing
- Z: Withdrawed Failing

Calculating Grade Point Average
Calculating of grade point average is done using the steps below.

1. Grade symbols are translated into quality points per credit as listed above.
2. The university recognizes that a good grade in a three-semester-hour course requires more work than in a two-semester-hour course. Owing to this, the university follows a system which recognizes both the quality and quantity of a student’s work. Under this system, the number of quality points for each letter grade (e.g. four points for an A) is multiplied by the number of semester hours of credit for the course. For example, an A in a three-semester-hour course earns a total of 12 quality points. To find out a student’s quality point average, divide the total number of quality points by the total number of semester hours scheduled. This average considers both the quality and quantity of work.
3. Quality points are awarded only for work completed at East Stroudsburg University. Work completed at other colleges and accepted as transfer credit is not considered in computing the quality point average.

Incompletes
The maximum time for completing course requirements to remove incomplete grades is one semester from the end of the session in which the “I” grade was assigned. After that time, the “I” grade will automatically be converted by the Registrar to an “E,” “F,” or “U,” based on the grade mode for the course. The student can then only earn credits for the course by registering for it again in another semester.

If a student applies for graduation in a session before the one semester period has expired, the course requirements must be completed by the end of that session, or the “I” grade will be converted by the Registrar to an “E,” “F,” or “U” based on the grade mode for the course.

Students who cannot complete the required coursework during the specified time period should notify the faculty member as soon as possible. A faculty member who chooses to deviate from this policy will require the student to sign a contract specifying conditions necessary for course completion, which may include a time period for completion of less than one year or other conditions. The faculty member will also notify the Registrar of any changes to the completion date.

Ongoing Grades
Students registered for thesis credits will be assigned the letter “O” (Ongoing) instead of “I” while completing their research.

Course Repeats
Graduate students are required to earn a grade of “C” or higher in all coursework in order to progress in their program of study and in Graduate
& Extended Studies, with a maximum of three grades of "C" across the program.

Students may repeat only one course for grade improvement for each graduate program. The course may be repeated one time, for a total of two attempts. If a student has not earned a grade of "C" or higher after a second attempt, then the student will be dismissed from the graduate program and Graduate & Extended Studies.

Credits for a repeated course will be counted only once, and the hours and grade earned when the course was last taken will be used to compute the grade point average. However, all attempts will continue to appear on the transcript. Some graduate programs may have more stringent requirements for course grades and course repeats.

**Graduation**

A student’s graduation application initiates his/her graduation clearance process. As designated by the Registrar, the Graduation Services team begins working with the student’s department and college to review and finalize the degree requirements.

Priority processing deadline dates for applying for graduation are December 2 for Fall 2022, December 16 for Winter 2023, February 6 for Spring 2023 and Summer 2023 degree conferral. The university holds commencement exercises at the end of the spring semester. Students graduating in the Fall, Winter and Summer terms may participate in the Spring commencement ceremony.

**Degree/Certificate Completion**

When students submit their “Intent to Graduate” by the established application priority deadline dates based on their completion semester, their academic record will be put through a graduation clearance process. This process requires a thorough review of the student’s academic record with the collaboration of their respective department, college dean and the Graduation Services team. This process is used to certify that students will meet their degree requirements by their intended graduation date. An audit of the student’s degree is performed twice during the graduation clearance process - after the "Intent to Graduate" has been declared and when all coursework is completed at the end of the semester or term. Correspondence will be sent to all students who have submitted their “Intent to Graduate” request after their degree audit has been reviewed to notify students of their graduation status.

If a student has met all the graduation requirements at ESU including the credit minimum (See Graduation Residency policy), the student will be notified and the degree or certificate will be conferred by the Graduation Services team. Degrees are conferred at the end of the fall, winter, spring and summer terms during the following months: December, January, May and August respectively.

Once a degree has been conferred, the academic record is final and sealed. Changes to enrollment, courses, grades and program of study associated with the degree conferral are not permitted to the academic record of a graduate. Students who do not meet their degree requirements for the semester/term they had intended upon graduating must declare another “Intent to Graduate” and create a revised plan to complete their degree requirements in a subsequent semester or term. The official degree conferral/graduation date is posted on the student’s permanent record (transcript) as the semester/term when all degree requirements have been completed and confirmed by the Registrar or the designee.

**Graduation Honors**

In order to qualify for graduation honors, a student must have completed at least 45 credits at East Stroudsburg University. These 45 credits can be accrued through any course, internship and/or field placement including student teaching in which a letter grade is assigned (A, A-, B+, B, B-, C+, C, C-, D or E) or a satisfactory grade is ascribed. The check for the 45-credit minimum includes in-progress courses during the student’s graduation semester. The check for the student’s cumulative grade point average is based on all graded coursework.

Students who have the appropriate cumulative grade point average at the time the honors designation is determined, and who will have met the 45-credit minimum once the final semester is completed, will be granted graduation honors as follows:

- **Summa Cum Laude**  Cumulative grade point average 3.80 or above
- **Magna Cum Laude**  Cumulative grade point average 3.60 to 3.799
- **Cum Laude**  Cumulative grade point average 3.40 to 3.599

Graduation honors for the publication of the Commencement Program are based on all graded and in-progress coursework at East Stroudsburg University by the deadline dates below. Please note that graded courses work contains final grades and not midterm grades.

- March 15 of the academic year for spring and summer graduation or
- November 1 for fall and winter graduation.

The official university transcript will carry the final honors designation based on all finalized grades completed at the university and the outcome of the final graduation clearance.

**Commencement**

East Stroudsburg University currently holds commencement ceremonies at the end of the spring semester to recognize graduates for their academic success at the institution. Students who have officially indicated their “Intent to Graduate”, registered for all remaining required coursework, or are in progress of making up incomplete (“I”) grades, may be eligible to participate in the commencement exercises.

To be eligible to participate in the commencement, students must complete or be on track to complete their degree requirements by the end of the spring term. Students who will complete an established internship and/or required coursework in the summer must be registered for summer before being considered eligible to participate in a commencement ceremony. Participating in the commencement ceremonies does not signify the completion of a student's degree program. The outcome of the final graduation clearance will determine if a student has met all university and program requirements to be considered a graduate.
Campus Life

Opportunities for participation in co-curricular activities at the university are virtually unlimited. Learning outside the classroom is considered to be an integral part of the student's personal growth and development.

Alumni Engagement

The Office of Alumni Engagement, as part of the East Stroudsburg University Foundation, works to support and engage a network of more than 45,000 ESU alumni. Membership into the East Stroudsburg University Alumni Association is solidified the moment a graduate crosses the platform during commencement.

Located in the Henry A. Ahnert Jr. Alumni Center, the office plans multiple events throughout the year, including the All Alumni Annual Tailgate and other regional events to connect and engage alumni with each other and the university. The office also produces the Alumni Herald (www.esualumni.org/herald), which is published twice per year and filled with information about classmates and alumni success stories.

The office looks to its network of alumni to show their support and commitment to ESU. Alumni and friends are encouraged to extend their support through the ESU Foundation Warrior Fund. Gifts to the Warrior Fund provide direct and immediate support to ESU and its programs. Gifts are used for student scholarships, enhancing academic and athletic programs and improving ESU's technology infrastructure. For more information about the office, the benefits of being a graduate of ESU, the Alumni Association, connecting with ESU alumni, or the ESU Foundation, visit www.esualumni.org.

Athletics

Intercollegiate

The intercollegiate athletic program at East Stroudsburg University provides a quality educational opportunity for skilled students to maximize their sport abilities by means of competition against other colleges and universities. This is complemented by the enrichment of student-life experiences and the promotion of alumni-community relations.

Schedules for 22 sport teams for men and women are arranged on a seasonal basis for fall, winter and spring:

**Fall**
- Men: Cross Country, Football, Soccer
- Women: Cross Country, Field Hockey, Volleyball, Soccer

**Winter**
- Men: Basketball, Indoor Track and Field, Wrestling
- Women: Basketball, Indoor Track and Field, Swimming, Wrestling

**Spring**
- Men: Baseball, Outdoor Track and Field
- Women: Acrobatics and Tumbling, Golf, Lacrosse, Softball, Tennis, Outdoor Track and Field

Athletic activities take place in and on a variety of campus athletic fields. The main outdoor athletic facility, Eiler-Martin Stadium, has an all-weather track, turf, lights and seating space for approximately 6,000 spectators. The LeRoy J. Koehler Fieldhouse is the main indoor facility and has an indoor track, pool, weight rooms, tennis, basketball and volleyball courts.

As part of the university's effort to ensure compliance with the Higher Education Act and Equity in Athletics Disclosure Act, the Gender Equity Survey Report is on file in the Offices of Intercollegiate Athletics and the Enrollment Services Office. This report contains information on participation and financial support as it pertains to East Stroudsburg University’s intercollegiate athletics program.

Campus Rec & Wellness Sport Activities

The Campus Rec & Wellness department offers league sports to students throughout the year. This enables participants to form teams in a seasonal format. The entire program is voluntary for those who are not regular members of varsity or junior varsity squads and does not require the intensified training or high degree of skill necessary for intercollegiate athletics. Sports offered during the year include flag football, soccer, volleyball, softball, and basketball, to name a few. Opportunities for participation are available in recreational and competitive leagues.

ATM Services

ATM services provided by Pennsylvania State Employees Credit Union (PSECU) are located just outside the ground floor of the University Center between the University Center and the Keystone Room, as well as in the lobby of Dansbury Commons.

Campus Activities Board (CAB)

The Campus Activities Board (CAB) is a student organization responsible for a wide variety of activities and events for the enrichment of the East Stroudsburg University community. The organization presents a diverse and unique program schedule of quality educational, cultural, social and recreational programs throughout the academic year.

CAB consists of nine executive board members who meet weekly during the semester to coordinate the various activities. The executive board consists of the four officers and five committee chairpersons. The four committees are: Big Events, Performances, Out and About, and Special Events. CAB is also involved with planning and promoting activities during Welcome Week, Family Weekend, Homecoming, and Global Week. Students who serve on the Campus Activities Board develop strong leadership skills and gain practical experience while having a great time and making new friends in the process.

Campus Card Center

The Campus Card Center, located on the ground floor of the University Center, provides ESU students and employees with both a campus identification card (E-Card) and a convenient, easy, and safe way to make purchases and use services on and off campus. The E-Card provides electronic access to a declining balance (debit) account that can be used for the payment of certain items/services in the bookstore, vending machines, library, and campus dining facilities. The off-campus sites that currently accept the E-Card include Burger King, Cluck-U Chicken, and CVS. Students may also use it to gain access to their residence hall and the Recreation Centers. Deposits may be made online, please visit esu.edu/ecard website or for further information, call 570-422-CARD or 1-800-556-8116.
Housing Information
The campus contains five traditional residence halls, three new suite-style residence halls, and the University Apartments complex. They are equipped with lounges, kitchens, laundry and vending facilities, as well as living areas. Specific rules and regulations governing the residence halls are published and made available each year in the Residence Halls Information and Policies brochure. All residence halls are smoke-free. Off-campus housing information for upper-class and graduate students is available on the Residence Life and Housing homepage.

New Student Programs
Academic Convocation
Academic Convocation is a ceremonial occasion which marks the formal opening of the academic year. It is the time when the university officially welcomes the new class of students and focuses on the academic mission. Academic Convocation introduces the new class to the dignity of university ceremonies and academic regalia, the organizational structure of the university and the individuals who serve in leadership positions, the president of the Faculty Association and faculty leadership, the president of the university and the individuals who serve in leadership positions, the president of the Student Senate and outstanding student leaders, and the Alma Mater and ESU Promise.

The highlight of the Convocation is the speaker, typically a recent graduate or current student, who speaks to the new class about academic achievement, scholarly opportunities, and expectations for new students. Academic Convocation brings the new class of students together for the first time to focus on academic excellence and scholarly engagement.

Standards of Behavior
The mission and objectives of the university include a serious concern for the overall development of the individual. This philosophy implies that all students maintain high personal standards and conduct themselves in a manner which manifests not only intellectual and emotional growth but also personal and social development. The basic standards of behavior are outlined in the Student Handbook under the Student Code of Conduct.

Student and Community Services
Academic Advisement
A faculty member, typically the graduate program coordinator, from the student’s major department serves as the academic adviser throughout the student’s career at the university.

Campus Rec & Wellness
ESU’s Campus Rec & Wellness department provides a safe, rewarding and educational environment designed to promote holistic lifestyles through physical fitness activity, formal and informal competition, leadership development, academic partnerships and opportunities for professional, social and career growth. Guided by Core Values, innovative and diverse programming, and state of the art facilities, the Center’s spirited and committed staff pride themselves in fostering an atmosphere of empowerment that leads to the healthy development of the whole person.

In addition to programming, the department employs over 75 students who are directly responsible for the operation of the facilities and programs.

Facilities: The Campus Rec & Wellness department operates two student recreation facilities on campus. Completed in August 2003, the Mattioli Recreation Center is a 58,000 square foot facility on the south side of campus. The building features a four-court arena for basketball, volleyball, and tennis; a fitness center with cardio, selectorized and free weight equipment; a multipurpose studio; elevated track; locker and shower facilities; an alternative fitness area that includes indoor rowers, Jacobs Ladder, and a boxing zone that features a speed bag and heavy bag; and racquetball courts. The second facility, RecB, is located in the lower level of Hawthorn Suites. The facility is open to all of campus and has a separate entrance from the main residence hall. The 15,000-square-foot fitness center was opened in February 2012 and features cardiovascular, selectorized and free weight equipment, functional training zone, multipurpose studio, indoor cycling studio, locker and shower facilities and a offices for personal training and wellness.

Group Fitness: Group Fitness Program is designed for Campus Rec & Wellness members who are looking for an organized workout. General classes are free of charge to members and on a first come first serve basis. The Center’s premier class, Warrior Cycling, is offered at a nominal fee. Every class is led by student instructors who have qualified to teach. A new group fitness schedule is published at the beginning and middle of each semester.

Special Events: Special events are designed for students to enjoy unique programs in a fun and social setting. Many of the special events are one-night tournaments that expose students to new and exciting sports as well as educational events to support healthy lifestyle choices. Some of the programs include racquetball, Late Night at the REC, wallyball, tennis, badminton, cornhole, Rec-Ex 5K, gaga ball and wiffleball.

Personal Training: A personal fitness service run by qualified fitness staff that will help you to identify priorities and achieve your health and fitness goals. A range of personal fitness services are offered at a nominal fee.

Wellbeing: This program serves as a resource to support individuals in their pursuit of optimal health and wellbeing. Through programs, events and presentation, the health and wellness needs of students, faculty and staff are proactively addressed.

Sports Activities: Please see the Athletics section.
For more information on programs, services, hours of operation, policies and procedures, visit esu.edu/therec or call the Mattioli Recreation Center’s Service Desk at 570-422-2970.

Campus Ministry and Spirituality
Campus Ministry and Spirituality at ESU is supported through the Office of Student Affairs. Campus Ministry and Spirituality (CM & S) is made up of a variety of religious, spiritual, and religious advocacy groups at the University. CM & S is a member of the Northeast Regional Ministry in Higher Education, and is a member of the Monroe County Clergy Association. Its mission, both ecumenical and interfaith in nature, fosters an environment conducive to spiritual growth and development. CM & S assists students in networking with local churches, places of worship, local clergy, and on-campus religious and advocacy groups.

CM & S helps the local community in the following areas:
- Big Brothers/Big Sisters
- Habitat for Humanity
- Local soup kitchens
- Food pantries
- Schools and youth groups

For more information, call 570-422-3463 or visit eu.edu/campusministry.
Career and Workforce Development

Located on the top floor of the University Center, the center provides career counseling and educational programs which will empower undergraduate and graduate students, and alumni, to make satisfying career choices, develop career plans and take action to achieve their professional preparation and career goals. Students should start their career planning during their first year and should contact the center to make an appointment or visit www.esu.edu/careerdevelopment. Services provided include career counseling, preparation of resumes and cover letters, and interviewing skills. An online career management system www.esu.edu/warriorcareers enables students and alumni to explore internships, and part-time and full-time professional job listings. Assistance is offered with graduate school applications, essays and personal statements. The center also coordinates workshops, career days, job fairs, and on-campus recruitment with employers. Innovative tools and educational materials are offered on the Career Development website.

Child Care Center

The Rose Mekeel Child Care Center, Inc. is accredited by the National Association for the Education of Young Children, a Keystone Star 4 program and licensed by the Department of Public Welfare. The center is available to students, faculty and staff of the university. The remaining spaces are filled by the community. The center is staffed by an Executive Director, Group supervisors, and assistant group supervisors. This facility is open from 7:45 a.m.-5 p.m. (Monday to Friday) during the fall, spring, and summer sessions.

The program is a hands-on, developmentally appropriate program for children between 12 months and 5 years of age. Call 570-422-3514 for information about enrollment and fees.

Counseling and Psychological Services (CAPS)

The Department of Counseling and Psychological Services offers a wide range of counseling services to facilitate and enhance the educational, psychological, and interpersonal well-being of the East Stroudsburg University student community. The services provided are designed to maximize students’ personal, psychological and educational functioning, to prevent and remediate emotional/social problems, to help students attain their educational goals, and to promote their professional competence.

Services offered include personal counseling/psychotherapy, vocational counseling, psychological and vocational testing, developmental and outreach programming, and consultation services, both individually and in a group setting when appropriate. CAPS actively promotes students’ cultural awareness and sensitivity toward diversity issues, particularly with outreach programming initiatives.

Some of the issues students often address through counseling include anxiety, career exploration/indecision, depression, suicidal thinking, difficulties in interpersonal relationships, eating disorders, family concerns, self-doubt, sexual concerns and substance abuse.

The Counseling and Psychological Services staff are licensed psychologists. Their professional training and experience prepare them to deal with a wide range of issues faced by university students. Currently enrolled students are eligible to receive services that are free of charge. All information shared by a client is kept confidential, and all client records are classified as confidential records. Without a client’s written permission, no information is released to anyone outside of CAPS, except as required by law.

The Counseling and Psychological Services office is located on the second floor of the Flagler-Metzgar Center. Normal hours of operation are 8 a.m. to 4:30 p.m. Monday through Friday. Services generally are offered by appointment and may be scheduled by stopping at the office in-person or by calling 570-422-3277. For additional information, visit esu.edu/caps.

Dance Program

The university provides several options for those interested in dance. The minor in dance is open to all students. The University Dance Company is a select group of 15-25 students, chosen by auditions, who produce a performance each semester with choreography by faculty, guest artists and students in ballet, contemporary, jazz, and other dance styles. The ESU Contemporary Dancers is a student organization open to all students regardless of background, and produces recitals choreographed and performed by students. The Dance Team performs hip-hop and jazz dance during sports events. All of these organizations are open to all students.

Educational Trips

Various departments, as well as clubs and organizations, sponsor field trips to points of interest in the surrounding area. The proximity to New York City and Philadelphia provides opportunities for students to enrich the activities of their curricula.

Fraternities and Sororities

The organizations that comprise the fraternity and sorority system provide a wide variety of educational, social, academic, philanthropic and leadership activities, events and programs for ESU students. The ESU fraternities and sororities are self-governing and work together to benefit and support the university and the surrounding community. The Interfraternity Council (IFC), College Panhellenic Council (CPH), and Cultural Greek Council (CGC) are the governing bodies that represent all fraternal organizations at ESU and provide cultural, social and educational programs and events for the ESU student community. At the beginning of each semester, fraternities and sororities conduct recruitment events for the purpose of selecting new members. University policy does not allow for first-time, full-time students (freshmen) to be recruited into or to join fraternities or sororities. For more information about FSL and a list of recognized fraternities or sororities eligible to extend invitations to membership, visit www.esu.edu/greek.

Gender and Sexuality Center

Founded in Fall 2018, the Gender and Sexuality Center is housed in the lower level of the University Center, room G-7. Complete with relaxing social and study space, staff offices, and a resource library, the Center’s mission is to encourage ESU community members to discuss and reflect upon the myriad ways that these two interrelated identities influence our lives.

Grounded in an intersectional perspective, the GSC’s programs and services range from the organization of campus-wide events such as LGBT History Month and Women’s History Month, training opportunities like the ESU Safe Zone program, and supporting different student organizations and groups to ensure that ESU is a warm and welcoming space for all individuals to engage.

Marching Band, Jazz Band and Concert Band Program

These large performing groups are open to all university and community instrumentalists with previous experience in high school or college ensembles. The ensembles rehearse for two hours one night a week and
will perform pieces of standard literature. Public performances will occur at the end of each semester.

Students involved in the Marching Band must participate in Band Camp the week prior to the beginning of the fall semester. The band performs at all home football games, select away games and marching exhibitions. For more information on Warrior Marching Band, students may contact the band’s Musical Director at (570) 422-3759, or contact the Marching Band student leadership through the organization’s Facebook page - ESU Warrior Marching Band.

**Office of Accessible Services Individualized for Students (OASIS)**

East Stroudsburg University of Pennsylvania believes that an individual’s access to opportunities for achievement and personal fulfillment must be determined solely on the basis of the person’s ability and interest. OASIS at East Stroudsburg University of Pennsylvania provides accommodations and services to students with documented disabilities (i.e., specific learning disabilities, attention-deficit/hyperactivity disorder, chronic illnesses, mobility impairments, deaf/hard of hearing, blind/low vision, psychiatric disabilities, traumatic brain injuries and other disabilities not specified) that result in substantial limitation of a major life activity.

The faculty members in OASIS provide basic services and facilities accommodations for eligible students with disabilities who self-identify with a disability, provide appropriate supporting documentation and request services.

Students who request accommodations are responsible for initiating the process with OASIS and for requesting academic or environmental accommodations. OASIS asks that individuals requesting services (accommodations and/or access) complete the self-disclosure and request for services form, including a description of the student’s disability, the disability’s likely impact on your educational experiences and the successful use of accommodations in the past. These forms are available online at the Office Of Accessible Services Individualized for Students (OASIS).

Academic accommodations allow equal access to academic programs and include classroom and assessment accommodations, and are based on the evaluation process, a student’s course of study and current functional limitations. The evaluation process includes a review of the self-disclosure and request form, supporting documentation, an interview with the student, and the assessment of the student’s program of study during the first semester the student requests services. In order to fully evaluate requests for accommodations or adjustments, East Stroudsburg University requests supporting documentation, which can be valuable in the deliberative process of providing accommodations and/or access to the educational environment. Supporting documentation can include medical records, psycho-educational testing, school records that specify the impact the disability has on physical, perceptual, cognitive, and behavioral activities, and/or past records of accommodations and services.

Intake interviews usually occur during the first semester the individual with a disability requests services and attends classes. During this interview, accommodations and assistive technology needs are determined. The Office of Disabilities Services also provides an Assistive Technologist, who is available to instruct students in various assistive technologies to help students with their academic studies. After the interview meeting with the faculty member in the Office of Disability Services, the student is given a letter of accommodation listing the academic accommodations and/or assistive technology the student is entitled to use for each class. The student is responsible to provide a copy of this letter of accommodation to the professor of each class at the beginning of the semester.

Some frequently used academic accommodations and assistive technology devices include, but are not limited to:
- Extended time on exam
- Student note taking
- Reader/scribe for exams
- Exams taken on computer
- Textbooks in alternative format
- Computer access programs

Environmental accommodations provide equal access to facilities and may include housing and parking accommodations. Environmental accommodations are based on a student’s current functional limitations and the evaluative process. Please review the procedure to receive services for more information.

All personal services (attendant care, transportation on / to campus, etc.) and equipment (e.g., wheelchairs, hearing aids) are the responsibility of each student and will not be provided by OASIS. East Stroudsburg University is the home of the Alpha Chapter of Delta Alpha Pi (DAP) International Honor Society, established in 2004. It is the first honorary designed specifically to recognize the academic accomplishments of college and university students with disabilities. Undergraduate students who have completed a minimum of 24 credits and earned a quality point average of 3.1 are eligible for membership in DAP. Delta Alpha Pi has 65 chapters nationwide.

OASIS is now located at Sycamore Suites in the lower level at 304 Normal Street. Normal hours of operation are 8 a.m. to 4:30 p.m. Monday through Friday. Services generally are offered by appointment and may be scheduled by stopping at the office in-person or by calling 570-422-3954. For additional information, visit OASIS. To receive services please submit self-disclosure form and supporting documentation to OASIS, fax (570) 422-3268 or email ods@esu.edu.

**Residence Hall Association**

The Residence Hall Association is comprised of a 9 member elected executive board. In addition, each residence hall has an elected community board that serve the interest of their students. Each board is responsible for sending representatives to the Residence Hall Association meetings. This representative group of men and women works toward enhancing residence life for students. It assists in formulating official standards and operational policies for residence halls, provides meaningful social activities, establishes programs of educational enrichment in the residence halls, and participates in various community service projects.

**Residential and Dining Services**

Residential and Dining Services oversees the functions of all campus housing and dining experiences at East Stroudsburg University The campus contains five traditional residence halls, three suite-style residence halls, the University Ridge, and the University Apartments complexes. They are equipped with lounges, kitchens, laundry and vending facilities, as well as living areas. Specific rules and regulations governing the residence halls are published and made available each year in the Residence Halls Information and Policies brochure. All residence halls are smoke-free.

First-year students are required to live on campus, unless they commute from their parent’s/legal guardian’s home within a 40 mile radius from campus. Housing on campus is provided on a combined room-and-board.
basis only (except for the University Ridge and the University Apartments, where a meal plan is not required.) On-campus housing is guaranteed for incoming transfer students who pay the Enrollment Fee and complete the on-line housing application by the published June 1 deadline. Beyond that, offers are made as space becomes available, and on a first-come, first-served basis.

All students are encouraged to consider signing up for one of our Learning Communities. Currently, students can participate in the following programs: Global Learning, Criminal Justice, Health Science, Honors/STEM, and Transfer Community. To learn more about these programs please contact Dave Campbell at 570-422-3460. Transfer students are highly encouraged to consider living in the Transfer Learning Community (TLC) housed in Sycamore Suites. TLC is a living and learning experience that focuses on creating a transitional community with ESU students that are new to the Warrior community. TLC connects residents to academic support resources, while helping integrate individuals into their residence hall and the greater ESU community. In partnership with Aramark, Residential and Dining Services provides on-campus hospitality to all members of the campus community.

Dining Facilities
Dansbury Commons is our all-you-care-to-eat facility at the heart of campus. Home cooked favorites: pizza, pasta, waffles, sandwiches, burgers and more. Dansbury Commons offers a number of monotony breakers throughout the semester, from Tasty Tuesdays featuring delicious tasting of new recipes at the front of Dansbury to Premium Nights that offer a wide variety of upscale entrees for guest to purchase. Theme Thursdays: Every Thursday at dinner, the staff at Dansbury is changing things up with a different theme.

Center Court
Center Court is located on the main level of University Center. Center Court has whatever you’re craving! Burger Studio, Topio’s Pizza, Warrior Wraps Sandwich Shack; or Greens to Go, homemade soups, baked goods and Grab and Go offerings.

Dansbury P.O.D.
Dansbury P.O.D. combines the corner store with the style of a modern market, featuring grab ’n go, hot entrees, snacks and bottled beverages.

Dansbury Starbucks
Dansbury Starbucks, located in Lower Dansbury Commons, Starbucks -Coffee is -the world's largest -specialty -coffee cha-in, offeri-ng more th-an 30 blen-ds and sin-gle-origin- coffees a-s well as -bakery goo-ds, sandwi-ches and merchandise-.

Food 4 Thought
Food 4 Thought is conveniently located in the Kemp Library. Enjoy a hand crafted espresso beverage, Tazo tea, or blended Frappuccino. You can also choose from a variety of top quality pastries and baked goods. Enjoy homemade soups, Grab & Go sandwiches, wraps, and parfaits, as well as a variety of snacks and bottled beverages for your convenience.

S. T. C. Cafe’
S.T.C. Cafe’ is in the Science and Technology Center. S.T.C. Cafe’ features quiet seating, fresh brewed Peet’s coffee, hot breakfast sandwiches bagels, and Grab & Go sandwiches, wraps & salads and daily homemade soups.

Center Court
Center Court is located on the main level of University Center. Center Court has whatever you’re craving! Burger Studio, Topio’s Pizza, Warrior Wraps Sandwich Shack; or Greens to Go, homemade soups, baked goods and Grab and Go offerings.

Social, Cultural Activities and Global Week
The university offers a variety of social activities and opportunities for the campus community. Programs are sponsored throughout the year to enhance the quality of student life. Guest speakers on contemporary topics or controversial messages often visit the campus. Theatrical events and recitals featuring students and faculty are produced annually. Films, comedy shows, and concerts are also held throughout the year. In addition, a wide variety of intercollegiate, Recreation Center league, and club sports are available. Finally, major events such as Welcome Week, Family Weekend, Homecoming, Community on the Quad and Greek Week round out the social calendar. Visit esu.edu/events for completing listing.

Speech and Hearing Center
The Speech and Hearing Clinic, located in Monroe Hall, is operated by the Department of Communication Sciences and Disorders in connection with its clinical training program. Students provide therapy while being supervised by faculty who hold appropriate clinical certification and licensure.

Services provided by the clinic include evaluation and therapy in the following areas:

- Speech/articulation disorders
- Developmental language disorders
- Aphasia resulting from head injury or stroke
- Voice disorders
- Laryngectomy
- Cleft palate
- Stuttering
- Foreign accent reduction
- Communication problems resulting from hearing loss

Complete audiologic evaluations are available. Therapy is conducted in rooms that are observable via a closed circuit system. Families of clients are encouraged to observe therapy so that they may better help the clients at home.

Clients at the clinic include members of the community, children attending the Mekeel Child Care Center, and students and employees of the university. Both evaluation and therapy are free with the exception of auditory process testing. Anyone interested in clinic services should contact the clinic director at 570-422-3247.

Stony Acres
Stony Acres, a 119-acre recreation area owned by the ESU Student Activity Association, is located just nine miles north of the university in Marshalls Creek. It is open from dawn to dusk for general use by the ESU community. A multipurpose lodge, six cabins, a climbing tower, a challenge course, a camping equipment program and a variety of activities including canoeing, camping, frisbee golf course, cross country skiing, ice skating, hiking, fishing, and picnicking have made Stony Acres a popular spot year round.

The Stony Acres lodge is available free to campus organizations for meetings, workshops and other programs. More information is also available on the Stony Acres website.

Student Government
The Student Government Association consists of elected student officials and represents the student body in issues related to campus life. Senators from each class serve on committees concerned with academic affairs,
social activities, clubs and organizations, student rights and responsibilities, etc.

**Student Organizations**

Approximately 100 clubs and organizations have been created as a result of student interest. Many of these groups are funded by the Student Activity Association. The scope of these organizations is widely varied, including publications, athletics, drama, music, service, social, academic/career related, cultural, recreation, and academic honors.

**Telecommunication Service**

Resident students are provided digital cable TV service, Internet, and wireless Internet. Students must provide their own digital TV and co-axial cable to hook up to the service. Students should bring an Ethernet cable to access the wired internet. Students are not permitted to bring routers or wireless printers.

**Transportation Options**

Commuter students have various transportation options at ESU. Students must register their personal vehicles with the University Police and receive a parking decal. This decal enables the student to park in designated parking areas for commuters.

Other options for travel to and from campus follow below:

- **University Shuttle** – A shuttle service is available on campus and operates Monday through Friday when classes are in session. It stops at University Ridge as well as other designated locations around the campus.

- **Local Bus Service** – The Monroe County Transit Authority (MCTA) has a local bus route that runs through campus and has various pick-up points and designated bus stops in East Stroudsburg, Stroudsburg, Tannersville, and Mount Pocono. The transit services extend as far as Snydersville and designated bus stops in East Stroudsburg, Stroudsburg, Tannersville, and Mount Pocono. The transit services extend as far as Snydersville and Effort. For more information on bus schedules, areas of transit and bus passes, contact MCTA at 570-839-6282 or stop by the Office of Commuter Student Services for schedule guides.

**Warrior Tutoring Center**

The University-Wide Tutorial Program provides individual, group, and walk-in peer tutoring, as well as Learning Assistants for high fail rate courses, for the entire university community. The program is located in the Warrior Tutoring Center in Rosenkrans East. The Center has tutoring spaces, a quiet study space with access to Smart Board technology, and an open computer lab.

**Student Health Services**

East Stroudsburg University strongly recommends that students submit the Report of Medical History form, which includes Immunization history prior to entrance to the university. The form can be downloaded from the Health Services website or Incoming Student Portal. There are many areas of study that will require this information including education, health sciences (such as nursing, psychology, speech and hearing, athletic training, and exercise science), and many internships and other academic experiential placements. It is highly recommended that students gather this important information and submit it to avoid postponements in class schedules.

The university has partnered with Lehigh Valley Hospital Network-Pocono which is part of the Lehigh Valley Health Network to provide student health services at a convenient location adjacent to campus. The services are provided as part of the student comprehensive health fee and can be accessed through a swipe of a student’s E-card. Basic services include medical evaluation; treatment for minor illnesses and injuries; referrals to off-campus health care specialists and support services; women’s health services; tuberculosis testing; physical examinations for employment; driver’s licenses and teacher certification; testing, treatment and education for sexual health concerns; and health education and information about illnesses. Chronic conditions or major health issues are referred to the student’s personal physician or to a local specialist. Serious accidents and injuries are referred to the LVHN-Pocono Emergency Room. In cases where referral is necessary to either the student’s physician, a specialist, the hospital emergency room or other medical facility, the costs incurred must be borne by the student. Fees for any medical treatment not provided in the center or diagnostic testing, such as lab tests, X-rays, etc. are also the responsibility of the student.

The East Stroudsburg University Health Services at Lehigh Valley Health Network-Pocono maintains a formulary where many routine prescription medications are available when ordered by the health care provider at reduced cost or free as part of the comprehensive health services fee. However, students are encouraged to bring a credit card to cover the nominal cost of elective services, supplies or prescription medications. Special prescriptions can be written when needed; however, costs for these must be borne by the student when filling prescription at the pharmacy. A self-care area with over-the-counter medications and supplies is also available at no additional fee.

Pennsylvania law requires all students residing in university owned housing to have received the meningitis vaccination or be informed of the risks and benefits of the vaccine. This is to be completed when submitting the housing application or during residence hall check in.

**Location:**

ESU Health Services at LVH-Pocono
Express Care Entrance
200 E. Brown Street
East Stroudsburg, PA

**Service Hours:**

ESU students only: Mon.-Fri.: 8 a.m.-5 p.m., Weekends: Noon-4 p.m.
ESU students and community patients: Mon.-Fri.: 5-8 p.m., Weekends: 8 a.m.-noon; 4-8 p.m.

**No appointment necessary**

**University Store**

The University Store is located on the ground floor of the University Center. The store sells a variety of quality goods and services at equitable prices to the students, faculty, staff and alumni of the university. The primary function of the store is to provide the university community with course books, new, used, digital, rental and course supplies that support the academic mission. The faculty and store cooperate in the process of making course books available to students. Store revenue helps support student groups, sports teams, and organizations.

The store offers the following products: general books, school supplies, computer supplies, special order laptops, stationery, campus apparel, gift cards, greeting cards, glassware, class rings, and assorted imprinted items. The store also offers the following services: fax, online textbook reservation, special orders for clothing, and imprinted giftware.

Store hours, during the academic year while classes are in session, are Monday through Friday, 8:00 a.m. - 5:00 p.m. and Saturday, 11:00 a.m. - 3:00 p.m. At the beginning of the semesters, the store is open additional evening hours to better serve the students’ needs. Please visit our website at www.esu.bncollege.com or call us at 570-422-BOOK.
Veterans Center

The ESU Student Veteran Center is a one-stop location where student veterans can get assistance with veteran benefits, transcripts, and financial aid. The Veterans Certifying Official, located in the ESU Veterans Center, has delegated authority to submit educational enrollment certifications and other certification documents and reports relating to veterans and their dependents that are eligible for Veterans Administration education benefits.

The center is located in Zimbar-Liljenstein Hall, Room 160. The Veteran Center is open Monday through Friday from 8:00 a.m. to 4:30 p.m. The center is open to all ESU veterans and their dependents. The center is equipped with comfortable furniture, TV, refrigerator, microwave, and computer work areas with Internet access.
For more information regarding veterans services, please visit our website at www.esu.edu/va, or call 570-422-2812

Writing Studio

Located on the first floor of Kemp Library, the Writing Studio helps students draft, revise, and complete their writing assignments, all in a comfortable, cozy environment.
Students will improve their writing through every stage of the writing process with:
- Guided practice
- Helpful tips and motivation
- Workshops
- One-to-one tutoring sessions
- Handouts and resources
Computers, quiet work space, and tutoring are all available. For more information, visit www.esu.edu/writingstudio.

Publications/Media

Calliope - ESU's Literary Magazine

Calliope produces ESU's student-edited literary magazine, as well as the Calliope online literary journal.

Radio Station (WESS FM)

Students have the opportunity to gain experience in radio by working at WESS (90.3 FM), the student-operated radio station. The station's format is "diversified" and includes vintage radio shows, BBC news, sports, talk shows, as well as many genres of music such as alternative, classical, rap, and modern rock.

Stroud Courier

The Stroud Courier is the student-funded campus newspaper. The staff consists of students interested in all facets of journalism, who are responsible for each aspect of publication including news writing and editing, feature writing, sports reporting, photography, and layout. The Stroud Courier covers issues, events, and activities on campus, the surrounding area, and the world.

Student Handbook

The Student Handbook, which is prepared bi-annually by the Office of Student Affairs, is a compendium of information about the various phases of life on campus. The handbook is available online and provides students with information concerning campus services, co-curricular groups and activities, as well as the official regulations, standards and policies of the campus.
ESU’s Graduate & Extended Studies programs prepare students for a complex, changing global society, with master’s degrees – Master of Education (M.Ed.), Master of Arts (M.A.), Master of Science (M.S.), and Masters of Public Health (M.P.H.) – in 21 fields of study.

Upon successful completion of an ESU master’s degree, students will have satisfied the following Core Thematic Learning Outcomes:

**Mastery of Specific Discipline**
- Demonstrate advanced knowledge and skills.
- Apply knowledge and skills in academic, professional, or research settings.

**Professional and Ethical Behavior**
- Demonstrate the standards of ethics and conduct in their profession.
- Comprehend the impact of their professional actions upon themselves and others while working diligently to achieve positive outcomes.

**Research**
- Be proficient in performing and/or understanding the research process.
- Read, analyze and write consistently within the standards of their field.

**Communication**
- Communicate effectively in a variety of modes as required in a discipline specific professional setting.

**Critical, Innovative, and Creative Thinking**
- Identify and analyze critical issues for holistic understanding.
- Challenge and evaluate information.
- Synthesize and integrate knowledge.
- Formulate new ideas.

Additionally, ESU offers the Doctor of Education (Ed.D.) in Educational Leadership and Administration and the Doctor of Health Sciences (D.H.Sc) in Health Sciences.

Finally, Graduate Studies, in cooperation with academic departments across the campus, offers more than 15 post-baccalaureate certification preparation programs.

The following is a current list of master’s degree, certificate of recognition, doctoral, and state and national certification preparation programs, with the ESU academic department in which they are housed:

### ESU Master’s Degree Programs
- Accounting, M.S.
- Athletic Training, M.S.
- Biology, M.S.
- Clinical Exercise Physiology, M.S.
- Communication, M.A.
- Communication Sciences & Disorders, M.S.
- Computer Science, M.S
- Elementary Education, M.Ed.
- Exercise Science, M.S.
- General Science, M.S.
- Geographic Information Systems / Remote Sensing (GIS / RS)
- Health Education, M.S.
- History, M.A.
- Instructional Technology, M.Ed.
- Management & Leadership, M.S.
  - Public Administration
  - Sport Management
  - Organizational Behavior
- Political Science, M.A.
- Professional and Digital Media Writing, M.A.
- Professional & Secondary Education, M.Ed.
- Public Health & Community Health, M.P.H.
- Reading, M.Ed.
- Special Education, M.Ed.
- Sport Management, M.S.

### Doctoral Degree Programs
- Educational Leadership & Administration, Ed.D.
- Health Sciences, D.H.Sc.

ESU also offers a program that prepares a teacher to become a National Board Certified Teacher (NBCT), available through the National Board for Professional Teaching Standards (NBPTS).

This certification preparation program is coordinated by the Department of Professional and Secondary Education with assistance from the Office of Graduate & Extended Studies.
Educational Leadership and Administration

Purpose of Degree:
The doctoral program in Educational Leadership and Administration is designed for current and aspiring K-16 school leaders. Additionally, eligible candidates may earn a Pennsylvania Superintendent’s Letter of Eligibility. The program offers a rich mix of theory and application. In addition to traditional coursework, the program promotes skills in conducting research.

Program Highlights:
- Doctoral candidates form a cohort group that remains together throughout the program.
- To better accommodate student work schedules, participants will complete two classes each semester (Fall, Spring, and Summer). The classes will meet five times per semester on a Friday and Saturday. All classes will be presented in a seminar format that combines theory and application.
- Students complete a culminating internship that provides application of theory to practice in a job-embedded setting. Completion of guided inquires and student portfolio provide artifacts documenting student learning.
- Candidates who successfully complete the required coursework and defend their dissertation receive a doctor of education (Ed.D.) degree from East Stroudsburg University.
- Candidates who satisfactorily complete the required coursework and superintendent internship may apply for the Superintendent’s Letter of Eligibility. The Pennsylvania State Department of Education also requires six years of educational experience with at least three years of those in an administrative position and a proficient score on the required state assessment.
PSED - Prof and Secondary Education

PSED 650 - School And Community (3 credits)
This course focuses on the development and maintenance of a purposeful program of communication between the school and the community through study of selection, organization, and functions of citizen advisory committees and cooperative use of various community services. Distribution: Advanced. Prerequisite: Admission to and satisfactory progress in a cohort group in the IUP Educational Leadership Program.

PSED 651 - Conflict Resolution (3 credits)
This is an applied course focusing on the resolution of conflict between groups and a third party. Specifically examined are the techniques of negotiation, mediation, and conciliation. Simulation and role-play are utilized as well as readings in theory and case study. Distribution: Advanced. Prerequisite: Admission to and satisfactory progress in a cohort group in the IUP Educational Leadership Program.

PSED 658 - School Law and Negotiations (3 credits)
A case study approach is utilized in this course where students read, present, and discuss cases reflecting current issues of interest in School Law. Case law, as opposed to statutory or administrative law, is emphasized in this approach. Students are expected to assume a leadership role in discussion of the cases they present. The course format features a high degree of student involvement, discussion, and interaction. Due to the non-traditional scheduling format of the course, preparation which must be completed between class sessions is typically much more extensive. Distribution: Advanced.

PSED 660 - School Finance (3 credits)
Budgeting procedures for large and small school districts are the focus of this course. School budgeting, accounting, bonding, and various monetary applications are presented as well as the various procedures for acquiring funds. Distribution: Advanced.

PSED 681 - Special Topics In Education (3 credits)
This course is designed for the advanced graduate student who wishes to do independent research in special area. Enrollment is limited to students enrolled in the IUP Doctoral Program in Administration and Leadership studies. Prerequisites: Admission to and satisfactory progress in a cohort group in the IUP Educational Leadership Program. Distribution: Advanced.

PSED 701 - Leadership Theory (3 credits)
The purpose of this course is to explore the concept of leadership and principles of learning. The student will develop a theoretical position regarding personal administrative style. Possible dissertation topics will be explored. Distribution: Advanced. Prerequisite: Admission to and satisfactory progress in a cohort group in the ESU Educational Leadership and Administration Program.

PSED 702 - Leadership: A Case Study Approach (3 credits)
This course examines cases of transition, reorganization, or redesign in order to gain insight into both the psychological and sociological aspects of successful leadership in changing environments. It exposes students to fundamental methods for data collection using case methodology. Distribution: Advanced. Prerequisite: Admission to and satisfactory progress in a cohort group in the ESU Educational Leadership and Administration Program.

PSED 703 - Leadership: Applied Practice (3 credits)
This course is designed to prepare doctoral students in leadership studies to develop and implement a field project that incorporates leadership and policy theories learned in previous courses. Various approaches and issues associated with design and implementation of a field project will be examined. Through an exploration of the literature, critique of theories, and direct hands-on exercises, students will be able to build competency in integrating leadership theories and research methods into their own field project. Distribution: Advanced. Prerequisite: Admission to and satisfactory progress in a cohort group in the ESU Educational Leadership and Administration Program.

PSED 705 - Curriculum Analysis (3 credits)
This course is designed to prepare doctoral students with a critical analysis of curriculum theory and research. Various approaches will be examined, with emphasis on the unique theoretical and methodological contributions of philosophical, psychological, and social approaches to the field of curriculum. Through an exploration of the literature, critique of theories, and direct hands-on exercises, the student will be able to build competency in integrating effective curriculum analysis into the student’s own educational praxis. Distribution: Advanced. Prerequisite: Admission to and satisfactory progress in a cohort group in the ESU Educational Leadership and Administration Program.

PSED 710 - Advanced Topics Human Development (3 credits)
Students will evaluate and apply development theory as it pertains to the adult learner in environments of complex decision-making. This course introduces students to adult development from a biopsychosocial theoretical framework and guides them to explore how these factors influence their personal development. Students will apply course readings to contemporary leadership issues. Distribution: Advanced. Prerequisite: Admission to and satisfactory progress in a cohort group in the ESU Educational Leadership and Administration Program.

PSED 715 - Writing for Professional Publication (3 credits)
Students will evaluate and apply development theory as it pertains to the adult learner in environments of complex decision-making. Students will apply course readings to contemporary leadership issues. Prerequisites: Admission to and satisfactory progress in a cohort group in the IUP Educational Leadership Program. Distribution: Advanced.

PSED 720 - Doctoral Seminar in Advanced Research Methods (3 credits)
This course is designed to provide doctoral students in educational leadership with basic knowledge and skills in quantitative and qualitative educational research. Student will be required to review and abstract research articles. The students will learn to read and write about educational research in a non-threatening, supportive manner. Through step-by-step, hands-on exercises, students will be able to build competencies in conducting research in the field of education leadership. Distribution: Advanced. Prerequisite: Admission to and satisfactory progress in a cohort group in the ESU Educational Leadership and Administration Program.

PSED 725 - Critical Analysis of Issues and Innovations in Education (3 credits)
This course examines current issues and innovations which are influencing reform in basic and post-secondary (K-16) education. Relationships between research, policy making, and implementation will be emphasized. The effects of the political, social, and cultural contexts on the reforms will be examined. Distribution: Advanced. Prerequisite: Admission to and satisfactory progress in a cohort group in the ESU Educational Leadership and Administration Program.
PSED 730 - Analysis of Effective Instruction (3 credits)
This course explores reflective practice as it relates to the design, implementation, and evaluation of instruction at all educational levels K-16. Emphasis is also placed on supervision responsibilities of educational leaders for faculty, administrators, and staff in educational institutions. Topics include contemporary models of supervision, generational and cultural differences, and research on supervision, teaching and learning at all levels K-16.
Distribution: Advanced. Prerequisite: Admission to and satisfactory progress in a cohort group in the ESU Educational Leadership and Administration Program.

PSED 750 - School and Community (3 credits)
This course focuses on the development and maintenance of a purposeful program of communication between the school and the community through study of selection, organization, and functions of citizen advisory committees and cooperative use of various community services. Prerequisite: Admission to and satisfactory progress in a cohort group in the ESU Educational Leadership and Administration Program.

PSED 751 - Conflict Resolution (3 credits)
This course provides students with an in-depth analysis of conflict resolution in many settings, primarily in employment relationships. Current theory in conflict resolution; the legal, ethical, and emotional issues that are common in disputes; and the format by which employment disputes are resolved will be examined. Students will also explore and define their own conflict resolution style. A seminar format, skill-building in the concepts and theories of conflict resolution and interest-based negotiation, analysis of readings, and experiential activities will be essential components of the class. Prerequisite: Admission to and satisfactory progress in a cohort group in the ESU Educational Leadership and Administration Program.

PSED 758 - School Law and Negotiations (3 credits)
This course is designed to help future school and university officials understand the sources of law governing educational institutions, the process of legal reasoning, basic concepts embodied in the First, Fourth, and Fourteenth Amendments to the U.S. Constitution and specific substantive law related to the operation of schools and universities. Prerequisite: Admission to and satisfactory progress in a cohort group in the ESU Educational Leadership and Administration Program.

PSED 760 - School Finance (3 credits)
Budgeting procedures for large and small school districts are the focus of this course. School budgeting, accounting, bonding, and various monetary applications are presented as well as the various procedures for acquiring funds. Prerequisite: Admission to and satisfactory progress in a cohort group in the ESU Educational Leadership and Administration Program.

PSED 781 - Special Topics in Education (3 credits)
This course is designed for the advanced graduate student who wishes to do independent research in special areas. Enrollment is limited to students enrolled in the ESU Doctoral Program in Educational Leadership and Administration. Prerequisite: Admission to and satisfactory progress in a cohort group in the ESU Educational Leadership and Administration Program.

PSED 782 - Research Instrument Design for Leadership Studies (3 credits)
This course is designed to provide doctoral students in educational leadership with basic knowledge and skills in quantitative and qualitative educational research. Students will be required to review and abstract research articles. The students will learn to read and write about educational research in a non-threatening, supportive manner. Through step-by-step, hands-on exercises, students will be able to build competencies in conducting research in the field of education leadership. Distribution: Advanced. Prerequisite: Admission to and satisfactory progress in a cohort group in the ESU Educational Leadership and Administration Program.

PSED 783 - Analysis of Qualitative Data in Leadership Studies (3 credits)
This course is designed to prepare doctoral students in leadership studies to conduct qualitative data analysis in dissertation research. Distribution: Advanced. Prerequisite: Admission to and satisfactory progress in a cohort group in the ESU Educational Leadership and Administration Program.

PSED 796 - Internship (3 credits)
This course is designed for the advanced graduate student who wishes to do independent research in special areas. Enrollment is limited to students enrolled in the ESU Doctoral Program in Educational Leadership and Administration. Distribution: Advanced. Prerequisite: Admission to and satisfactory progress in a cohort group in the ESU Educational Leadership and Administration.

PSED 950 - Dissertation (1 - 9 credits)
This course is designed for the advanced graduate student who wishes to do independent research in special areas. Enrollment is limited to students enrolled in the ESU Doctoral Program in Educational Leadership and Administration. Distribution: Advanced. Prerequisite: Admission to and satisfactory progress in a cohort group in the ESU Educational Leadership and Administration.

Health Sciences

Doctoral Program
College of Health Sciences
Department of Exercise Science

Health Sciences Graduate Faculty

Doctoral Coordinator:
Shala Davis, Ph.D., (sdavis@esu.edu)

College of Health Sciences
Exercise Science Department

Health Sciences D.H.Sc.

Purpose of Degree:
The D.H.Sc. will provide candidates with a rich mixture of theory and application through specifically designed courses and experiences. The curriculum is designed to equip and educate future leaders in the health sciences. The aim is to provide experienced professionals with a broad-based, interdisciplinary education that prepare graduates to teach, practice, and perform research across the continuum of healthcare. The focus of this degree is the development of transdisciplinary knowledge about the determinants of health, and the scientific and professional leadership skills to translate this knowledge into effective health interventions.

Graduates of D.H.Sc. program will develop and expand their knowledge and expertise in seven essential areas.
These include:
1. Scientific underpinnings for health sciences practice;
2. Organizational and systems leadership;
3. Clinically based scholarship and analytical methods for evidence-based practice;
4. Health care policy;
5. Inter-professional collaboration;
6. Clinically based health promotion and disease prevention; and
7. Mentoring and leadership in the respective disciplines.

Program Highlights:
The program will culminate with two concentration options which include: Health Management and Administration or Advanced Research Administration. The D.H.Sc.’s two concentrations are intended to offer advanced, discipline-specific, cognate courses to ensure that these practitioners are well versed in the most contemporary sciences related to their specific allied health disciplines. Following completion of a common core -- which will focus on communication, leadership theory, conflict resolution, and research fundamentals -- students will choose a specific concentration. The Health Management and Administration concentration focuses on health policy, management and financing; the Advanced Research Administration focuses on grantsmanship, professional writing, and contemporary technology. Culminating the nine-term course schedule, is an on-site professional internship and completion of a dissertation.

Subtotal: 51

Additional Requirements for Program Completion:

Program Progression Requirements:
1. A 3.00 GPA
2. Satisfactory completion of formal dissertation proposal

Program Exit Requirements:
1. Completion of all doctoral coursework
2. GPA of 3.00 or higher
3. Successful defense of culminating experience (dissertation)

Entrance Requirements:
The program entrance requirements require the applicant possess a Masters degree in a related field and will need to submit the following to the ESU Graduate College:

1. ESU application
2. Application fee
3. Official graduate transcripts
4.(2) Letters of Recommendation
5. Resume
6. Statement of Professional Goals including declaration of doctoral concentration

In addition there will be a required interview and the candidates must provide an academic writing sample at the end of the interview. A doctoral faculty committee will review the application and the writing sample in determining the most qualified candidates for potential admission.

1. Health Management and Administration Concentration
   * HLSC 741 - Health Organization Strategic Change Management & Quality 3
   * HLSC 742 - Health Economics and Finance 3
   * HLSC 743 - Health Policy & Law 3

Subtotal: 9

2. Advanced Research Administration Concentration
   * HLSC 750 - Advanced Technology within Health Sciences 3
   * HLSC 751 - Advanced Application of Statistics & Experimental Design 3
   * HLSC 752 - Grants and Professional Writing 3

Subtotal: 9

Choose one of the Concentrations below and complete the (9) credits in that concentration:
1. Health Management and Administration Concentration
2. Advanced Research Administration Concentration

HLSC - Health Sciences

HLSC 701 - Leadership Theory (3 credits)
The purpose of this course is to explore the concept of leadership and principles of learning. The student will develop a theoretical position regarding personal administrative style. Possible dissertation topics will be explored. This course is also offered as PSED 701.

Prerequisite: Admission into the Doctorate of Health Sciences in Health Sciences.

HLSC 702 - Leadership: A Case Study Approach (3 credits)
This course examines cases of organizations and individuals in the midst of transition, reorganization, or redesign in order to gain insight into both the psychological and sociological aspects of successful leadership in changing environments. This course is also offered as PSED 702.

Prerequisite: Admission into the Doctorate of Health Sciences in Health Sciences.

HLSC 703 - Advanced Topics in Health Sciences (3 credits)
This course will allow students to explore and develop an understanding of the contemporary health science research landscape and the process of managing research. Locating and appraising published research will be addressed across a variety of relevant topics. Emphasis will be on
conducting ethical research with human subjects and project planning and research management.
Prerequisite: Admission into the Doctorate of Health Sciences in Health Sciences.

HLSC 704 - Evaluation of Issues and Innovations in Health Sciences (3 credits)
This course provides an overview of the current principles and methods of program evaluation within the health sciences sector, to include assessment paradigms, program planning, evaluation designs, and use of such findings. Frequent tools in evaluation (surveys, focus groups, and interviews) will be discussed in depth. Students will have the opportunity to design and conduct an evaluation for an existing program within respective health sciences discipline to analyze and discuss real-world challenges/issues in the modern health care arena.
Prerequisite: Admission into the Doctorate of Health Sciences in Health Sciences.

HLSC 705 - Research Seminar in Health Sciences (3 credits)
This course will focus on discussions of contemporary research in the health sciences and health program evaluations. It introduces students to the development of structured questions to guide inquiry, bibliographic research to set inquiry in the context of the work of other scholars, and exposes students to differences in research methods and design. At the end of the course, students will have the advanced skills needed for the development of their own topics and interest specific research proposal.
Prerequisite: Admission into the Doctorate of Health Sciences in Health Sciences.

HLSC 706 - Epidemiology in Health Sciences (3 credits)
This course will present the quantitative principles and methods of epidemiologic research including study designs for use in chronic and infectious disease, investigations; development of data sources and use of electronic medical records in epidemiologic research; data analysis; and use of epidemiologic data in scientific communication, healthcare applications, and evaluation contexts.
Prerequisite: Admission into the Doctorate of Health Sciences in Health Sciences.

HLSC 710 - Cultural Respect within the Health Sciences Profession (3 credits)
This course focuses on the role cultural differences play in clinical health care practice and American society which constitutes a dynamic mixture of races, ethnicities, and beliefs. The emphasis is on defining cultural competency and recognizing the importance of cultural differences in healthcare.
Prerequisite: Admission into the Doctorate of Health Sciences in Health Sciences.

HLSC 715 - Analysis of Management within Health Sciences (3 credits)
This course will evaluate various management models within a variety of health care settings. Contemporary management strategies will be presented in case study format for evaluation of effectiveness and potential challenges. Utilization of guest speakers will provide advanced perspectives on everyday operational issues and importance of strategic planning.
Prerequisite: Admission into the Doctorate of Health Sciences in Health Sciences.

HLSC 720 - Doctoral Seminar in Research Methods (3 credits)
This course is designed to provide doctoral students in educational leadership/health science with basic knowledge and skills in quantitative and qualitative educational research. Students will be required to review and abstract research articles. The students will learn to read and write about educational research in a non-threatening, supportive manner. Through step-by-step, hands-on exercises, students will be able to build competencies in conducting research in the field of education leadership. This course is also offered as PSED 720.
Prerequisite: Admission into the Doctorate of Health Sciences in Health Sciences.

HLSC 725 - Special Topics in Health Sciences (3 credits)
This course will introduce students to different topics within the Health Sciences through the use of peer-reviewed articles and presentations provided by experts in the field. The topics covered in the course will include both traditional and emerging issues pertinent to the Health Sciences. The student will be encouraged to critically evaluate the issues presented and contribute to discussions of those issues.
Prerequisite: Admission into the Doctorate of Health Sciences in Health Sciences.

HLSC 730 - Administration and Management Internship (3 credits)
Students will be provided with the opportunity to integrate knowledge and skills learned throughout their program of study in a professional area or setting in healthcare administration/management. Students are expected to complete a minimum of 135 hours and will work with an on-site preceptor and faculty supervisor to evaluate performance throughout the experience. Professional development and outcome assessment will be incorporated in experience.
Prerequisite: Admission into the Doctorate of Health Sciences in Health Sciences.

HLSC 740 - Professionalism & Ethics for Health Sciences (3 credits)
The course will examine professional ethics as it applies to ethical decision-making by leaders in the Health Sciences. The focus is on ethical and moral theory, ethical principles and reasoning, professional ethics, and bioethics. Students will apply knowledge and skills to real life ethical dilemmas. Topics will include ethical issues such as informed consent, withholding or withdrawing treatment, physician-assisted suicide, reproductive health issues, research with human subjects, the right to health care, rationing of limited resources, health system reform and others.
Prerequisite: Admission into the Doctorate of Health Sciences in Health Sciences.

HLSC 741 - Health Organization Strategic Change Management & Quality (3 credits)
This course familiarizes students with strategy development and quality improvement across the health care continuum. Exploration of the process of strategy development and implementation in health organizations related to quality of care and enhanced productivity will be addressed. It examines the theories and analytical methods associated with assessing, planning, managing and measuring change.
Prerequisite: Admission into the Doctorate of Health Sciences in Health Sciences.

HLSC 742 - Health Economics and Finance (3 credits)
This course includes content that will evaluate the impact of economics and finance to guiding health care practices, policies and market demand. In addition, public health entitlement programs and other financial models will be analyzed for impact on health services, reimbursement and organizational restructuring. Alternative health care financing models and strategies will be presented.
Prerequisite: Admission into the Doctorate of Health Sciences in Health Sciences.

HLSC 743 - Health Policy & Law (3 credits)
This course provides a framework for understanding and analyzing the policy and legal foundations of health infrastructure in the United States. U.S. Health policy development and implementation, legal issues

HLSC 744 - Health Information Management (3 credits)
This course familiarizes students with strategies of improving patient outcomes through the use of health information technology. The course will include an introduction to various healthcare information systems and their role in supporting health care delivery. The focus is on effective use of electronic health records, decision support tools, and other information technologies in clinical practice.
Prerequisite: Admission into the Doctorate of Health Sciences in Health Sciences.

HLSC 745 - Health Information Technology (3 credits)
This course introduces the role of technology in the delivery of health care services. It examines the impact of technology on patient care, organizational operations, and health systems. Students will have the opportunity to explore various aspects of health information technology, including electronic health records, telemedicine, and data privacy and security.
Prerequisite: Admission into the Doctorate of Health Sciences in Health Sciences.

HLSC 746 - Health Information Management & Privacy (3 credits)
This course focuses on the management of health information in the context of privacy and security. It covers topics such as Health Insurance Portability and Accountability Act (HIPAA) regulations, patient privacy rights, and protection of sensitive information. Students will also learn about data governance and the ethical considerations involved in managing health information.
Prerequisite: Admission into the Doctorate of Health Sciences in Health Sciences.

HLSC 747 - Health Information Technology in Practice (3 credits)
This course applies the concepts learned in the introductory course to real-world health information technology scenarios. Students will engage in projects that require the development and implementation of health information technology solutions.
Prerequisite: Admission into the Doctorate of Health Sciences in Health Sciences.

HLSC 748 - Health Information Technology & Research (3 credits)
This course explores the role of health information technology in research. It covers topics such as electronic databases, data integration, and data analysis techniques. Students will have the opportunity to apply these concepts in the design and execution of a research project.
Prerequisite: Admission into the Doctorate of Health Sciences in Health Sciences.
in health care, including autonomy, privacy, liberty, and proprietary interests, from the perspective of the provider(s) and the patient, regulation of medical services will be addressed. In addition, standards of care, medical malpractice and liability, access to health care, health insurance, rights and obligations in medical decision-making will be presented.

Prerequisite: Admission into the Doctorate of Health Sciences in Health Sciences.

**HLSC 750 - Advanced Technology within Health Sciences (3 credits)**

This course will allow students to critically evaluate the use of various technologies in the assessment of patients/clients in health sciences research. Processes associated with measurements that influence the accuracy and precision of data drawn from technologies within the health sciences will be introduced and statistical methods for determining the validity and reliability of measurements will be illustrated with practical examples throughout the course.

Prerequisite: Admission into the Doctorate of Health Sciences in Health Sciences.

**HLSC 751 - Advanced Application of Statistics & Experimental Design (3 credits)**

This course emphasizes the selection and application of advanced statistical methods and experimental designs to answer research questions within the Health Sciences. There will be a focus on developing familiarity with common advanced statistical techniques encountered in the Health Sciences, with practical examples used to illustrate the concepts and methods. The student will design, analyze, present, and interpret quantitative information that will allow them to critically evaluate publications within the Health Sciences.

Prerequisite: Admission into the Doctorate of Health Sciences in Health Sciences.

**HLSC 752 - Grants and Professional Writing (3 credits)**

This course emphasizes professional writing for peer-reviewed academic journals, professional academic conferences, and developing significant and feasible grant proposals. Successful completion of this course will also provide the student with the necessary writing and organizational skills for completion of their dissertation. The student will be provided with multiple opportunities to write and edit documents.

Prerequisite: Admission into the Doctorate of Health Sciences in Health Sciences.

**HLSC 777 - Independent Study (3 credits)**

Under the auspices of a qualified member of the faculty, the student pursues a pattern of readings, study, and research to professional knowledge and understanding in health sciences. Topics should be established prior to enrollment.

**HLSC 780 - Dissertation (1-9 credits)**

This course is designed for the graduate student to complete independent research (dissertation) within Health Sciences. Enrollment is limited to students enrolled in the ESU Doctoral Program in Health Sciences.

Prerequisite: Admission into the Doctorate of Health Sciences in Health Sciences.

**HLSC 782 - Research Instrument Design for Leadership (3 credits)**

This course is designed to prepare doctoral students in leadership studies to critique and develop research instruments for their own dissertations. It will emphasize identifying the key issues associated with instrument reliability and validity analysis. Students will learn to critique and develop instruments through hands-on activities and individual projects. This course is also offered as PSED 782.

Prerequisite: Admission into the Doctorate of Health Sciences in Health Sciences.

**HLSC 783 - Analysis of Qualitative Data in Leadership Studies (3 credits)**

This course is designed to prepare doctoral students in leadership studies/health science to conduct qualitative data analysis in dissertation research. This course is also offered as PSED 783.

Prerequisite: Admission into the Doctorate of Health Sciences in Health Sciences.

**799 - Health Sciences Doctoral Transfer (3 credits)**

This course is designed to allow doctoral students with earned credits from another program to transfer those credits particularly when the course is not transferred as an equivalent to an ESU offering. As per PASSHE policy, a maximum of 20 credits may be transferred in from another institution.

## Accounting

### Accounting Graduate Faculty

**Graduate Coordinator:**

David Daniel, M.P.A. (ddaniel3@esu.edu)

**Assistant Professors:**

David Daniel, M.B.A., C.P.A.

Robert Thomas, M.B.A., C.P.A.

### Accounting M.S.

30 credits

**Purpose of Degree:**

The purpose of an M.S. degree in Accounting is to prepare students for careers as Controllers, Chief Financial Officers, government accountants, budget directors, and internal or external auditors. Completion of the M.S. degree in Accounting will provide students with the credits they need to sit for the CPA exam.

**Program Highlights:**

The M.S. in Accounting program provides students with the knowledge they need to sit for the CPA exam. The availability of the program in a 4+1 format enables students who graduate from ESU with undergraduate degrees in Accounting to complete their masters' degrees in one year.

**Additional Requirements**

3.0 GPA

**Entrance Requirements:**

24 credits in accounting, and 3 credits in finance and business law with an average of B or higher.
ACC - Accounting courses

ACC 518 - Advanced Auditing (3 credits)
Concepts of auditing theory and their relationship to recent developments in auditing practice, such as the expansion of management and advisory services, greater use of electronic data processing and computerized management information systems, are analyzed. The impact on the profession of professional pronouncements on auditing standards will be discussed.
Prerequisite: Admission to M.S. Accounting Program.

ACC 520 - Accounting Information Systems (3 credits)
This course is designed to present an understanding of accounting information systems and their role in the accounting environment. Particular attention is paid to transaction cycles and internal control structure. Topics to be covered include the software development cycle, contemporary technology and applications, control concepts and procedures, auditing of information systems, internet, intranets, electronic commerce, and the role of Information systems in a business enterprise. This course will cover accounting information systems both computerized and non-computerized with particular emphasis on internal controls.
Prerequisite: Admission to M.S. Accounting Program.

ACC 526 - Cost Accounting (3 credits)
An in-depth study of the analytical perspectives and tools of managerial/cost accounting with the objective of equipping the accountant to assist managers to improve organizational efficiency and effectiveness. Topics include: cost accounting systems, tools for planning and control, cost information for decision making, cost allocation, quality and JIT, capital budgeting and management control systems.
Prerequisite: Admission to M.S. Accounting Program.

ACC 528 - Advanced Accounting (3 credits)
This advanced accounting course adds depth of knowledge and analytical skills in understanding and analyzing consolidated financial statements, income taxes for such entities and treatment of Treasury activities in foreign currencies. The course will also include General Accepting Accounting Principles (GAAP) Principles for not-for-profit and governmental units.
Prerequisite: Admission to M.S. Accounting Program.

ACC 530 - Advanced Taxation and Research (3 credits)
This course is designed to teach the basics of federal tax research and federal tax administrative procedure. Student will create and execute an effective tax research plan. Participants will understand and articulate the Internal Revenue Code, determine tax problems, isolate the tax issues and defensible solutions with appropriate support documentation. Students will develop skills with tax research software. Rules, regulations and ethical considerations for practicing in front of the IRS will be covered in this course.
Prerequisite: Admission to M.S. Accounting Program.

ACC 532 - International Financial Reporting (3 credits)
This course is designed to provide an overview of international accounting as well as a focus on the accounting issues related to international business activities and reporting of foreign operations. Specific emphasis will be placed on the convergence between international financial reporting standards (IFRS) and U.S. Generally Accepted Accounting Principles (GAAP).
Prerequisite: Admission to M.S. Accounting Program.

ACC 536 - Financial Statement Analysis and Firm Valuation (3 credits)
This course explores the basic tools necessary to analyze financial statements primarily from a credit grantor's perspective. Examines ratio analysis, cash flow analysis, balance sheet and income statement analysis, and trend analysis. Emphasizes cash flow generation, liquidity, leverage, profitability, and asset utilization. Recommended for financial and credit analysts, bankers, and individuals who are involved in equipment or real estate financing or leasing, or trade credit analysis.
Prerequisite: Admission to M.S. Accounting Program.

Athletic Training

College of Health Sciences
Department of Athletic Training
Koehler Fieldhouse
570-422-3231
www.esu.edu/gradatep

Athletic Training Faculty

Graduate Coordinator:
Keith A. Vanic, Ph.D., ATC, (kvanic@esu.edu)

Associate Professors:
Gerard Rozea, Ph.D., ATC, Chair, (grozea@esu.edu)
Keith A. Vanic, Ph.D., ATC, (kvanic@esu.edu)

Assistant Professor:
Kelly Harrison, Ph.D., ATC, (kharrison@esu.edu)

Instructor:
Marguerite Carver, M.S., ATC (mcarver1@esu.edu)

Athletic Training M.S.

The Athletic Training Department offers the Master of Science in Athletic Training with two areas of study
- Professional Practice Program
- Advanced Clinical Practice

Graduate Assistantships

Graduate Assistantship (GA) positions are available through the department. Graduate Assistantships, including stipend and variable tuition waivers are available and will be awarded based on qualifications and experience. The GA position will be directly related to the academic course work and clinical preceptorship experience. The GA may work with a variety of allied health care professionals (i.e., orthopedists, physician extenders, emergency room personnel, and physical therapists) in diverse health care settings.

For more information, contact: Dr. Gerard D. Rozea at 570-422-3065 or by e-mail at grozea@esu.edu.

Admission requirements and deadlines
- Admission is limited to those meeting minimum admission standards. Student must complete admission application to the office of Graduate Studies.
- Bachelor's degree from a CaATe accredited institution
- Undergraduate grade point average of 2.50 Cumulative GPA, 3.00 Major GPA
- Statement of professional goals with resume or curriculum vitae
- Submission of scores on the Graduate Record Examination (GRE)
- Letter of Intent for the Master of Science in Athletic Training Advanced Clinical Practice Track
- BOC® certification or BOC® eligible (must have challenged examination once before enrollment)
- Three letters of recommendation (One from Athletic Training Program Director)
- Proof of professional liability insurance
- Proof of Act 34 & 151 and Fingerprinting (Criminal Record and Child Abuse Clearances)

Department of Athletic Training
College of Health Sciences
Graduate Coordinator, Dr. Gerard D. Rozea

570-422-3065

Instructor:
Kelly Harrison, Ph.D., ATC, (kharrison@esu.edu)

Assistant Professor:
Marguerite Carver, M.S., ATC (mcarver1@esu.edu)

Chair, Dr. Gerard D. Rozea, Ph.D., ATC

Graduate Assistantships

Graduate Assistantship (GA) positions are available through the Department of Athletic Training.

Graduate Assistantships

• Advanced Clinical Practice
• Professional Practice Program

Graduate Assistantships

Graduate Assistantship (GA) positions are available through the department. Graduate Assistantships, including stipend and variable tuition waivers are available and will be awarded based on qualifications and experience. The GA position will be directly related to the academic course work and clinical preceptorship experience. The GA may work with a variety of allied health care professionals (i.e., orthopedists, physician extenders, emergency room personnel, and physical therapists) in diverse health care settings.

For more information, contact: Dr. Gerard D. Rozea at 570-422-3065 or by e-mail at grozea@esu.edu.
Students must be capable of learning in a web-based and hybrid environment using a variety of innovative and traditional pedagogical methodologies. The didactic aspects of this program have been designed to be delivered in both online and campus classroom environments. Students must have access to a computer that meets the technological demands for web-based learning. Students enrolled in this program will work closely with a clinical preceptor who will assist the student in their efforts to integrate theory into practice. Students in the regional cohort must have reliable transportation and be able to meet the demands of traveling to Advanced Clinical Practice sites.

**PROGRAM OF STUDY**

**Required Undergraduate Prerequisites:** Candidates for the M.S. in Athletic Training must be a graduate of a CAATE-accredited Professional CaATe-accredited Entry-Level Athletic Training Program (Bachelor’s or Master’s Entry-Level) and be BOC®-eligible.

**Admission requirements and deadlines**

Admission is limited to those meeting minimum admission standards and student must complete admission application to the office of Graduate Studies.

- Bachelor’s or Master’s degree from a CaATe CAATE-accredited institution
- Undergraduate Cumulative GPA: 2.50
- Undergraduate Major GPA: 3.00
- Statement of professional goals with resume or curriculum vitae
- Submission of scores on the Graduate Record Examination (GRE)
- Letter of Intent for the Master of Science in Athletic Training Advanced Clinical Practice Track
- BOC® certification or BOC® eligible (must have challenged examination once before enrollment)
- Three letters of recommendation (One from the Athletic Training Program Director)
- Proof of professional liability insurance
- Proof of Act 34 & 151 and Fingerprinting (Criminal Record and Child Abuse Clearances)

**Outcome expectations of students and degree completion:**

Students enrolled in the Master of Science in Athletic Training: Advanced Clinical Practice Graduate Program will:

- Advanced knowledge and clinical proficiency in clinical anatomy, therapeutic agents, manual therapies, orthopedic practices and physician extender competencies is required
- Demonstrate through examinations, on-campus laboratories and clinical evaluations advanced knowledge and understanding of the learning objectives for each course.
- Demonstrate mastery and clinical proficiency of advanced skills in the affiliated clinical sites (advanced clinical practicums) with the support of qualified clinical preceptors
- Demonstrate knowledge and advanced clinical skills that will position them for career advancement and/or acceptance into graduate and/or professional degree programs
- Demonstrate the ability to design, construct and assess the results of meaningful, evidence-based research
- Demonstrate an understanding of the central issues and current evidence-based research in the field and effectively communicate this knowledge in both written and oral projects
- Demonstrate appropriate professional and ethical behavior in relation to the NATaCA Code of Ethics, BOC® Standards of Professional Practice and state regulations and statutes

**Special Resources/Conditions:**

The didactic aspects of this program have been designed to be delivered using a variety of innovative and traditional pedagogical methodologies. Students must be capable of learning in a web-based and hybrid classroom environment. Students must have access to a computer that

---

**Advanced Clinical Practice**

**Advanced Clinical Practice**

36 credits - Thesis Option
36 credits - Non-thesis Option

**Purpose of degree:**

The Advanced Clinical Practice Master of Science degree in Athletic Training is intended for individuals who are certified as athletic trainers by the Board of Certification® (BOC®) or individuals that have met eligibility requirements to challenge the BOC® certification examination.

A primary purpose is to enhance the quality of health care services for the physically active through the post-professional preparation of advanced practice clinicians and to make the student a potential candidate for specialty credentials through the National Athletic Trainers’ Association and other health, orthopedic, and fitness-related associations. Graduates of this program will be ideal candidates for leadership in clinical service, research, education, and administration.

**Outcomes expectations of students and degree completion:**

Students enrolled in the Master of Science in Athletic Training: Advanced Clinical Practice Graduate Program will:

- Advanced knowledge and clinical proficiency in clinical anatomy, therapeutic agents, manual therapies, orthopedic practices and physician extender competencies is required
- Demonstrate through examinations, on-campus laboratories and clinical evaluations advanced knowledge and understanding of the learning objectives for each course.
- Demonstrate mastery and clinical proficiency of advanced skills in the affiliated clinical sites (advanced clinical practicums) with the support of qualified clinical preceptors
- Demonstrate knowledge and advanced clinical skills that will position them for career advancement and/or acceptance into graduate and/or professional degree programs
- Demonstrate the ability to design, construct and assess the results of meaningful, evidence-based research
- Demonstrate an understanding of the central issues and current evidence-based research in the field and effectively communicate this knowledge in both written and oral projects
- Demonstrate appropriate professional and ethical behavior in relation to the NATaCA Code of Ethics, BOC® Standards of Professional Practice and state regulations and statutes

**Special Resources/Conditions:**

The didactic aspects of this program have been designed to be delivered using a variety of innovative and traditional pedagogical methodologies. Students must be capable of learning in a web-based and hybrid classroom environment. Students must have access to a computer that...
demonstrate entry-level competency as an athletic trainer while exhibiting scholarship and advanced competency in specific areas of the sports medicine community.

A primary outcome of the Professional Practice Program is to prepare the student to challenge credentialing as an athletic trainer through Board of Certification (BOC®) and appropriate state regulatory bodies. Furthermore, there may be opportunities to acquire other value-added knowledge and skills within the program that would allow for potential candidacy of specialty certifications through the National Athletic Trainers’ Association and other health, orthopedic, and fitness-related associations.

National accreditation(s) of the program:
The ESU Athletic Training – Professional Practice Program is accredited by the Commission on Accreditation of Athletic Training Education (CAATE) through the academic year 2029-2030.

Outcome expectations of students and degree completion:
A primary outcome of the Professional Practice Program is to prepare the student to challenge credentialing as an athletic trainer through the Board of Certification (BOC®) and appropriate state regulatory bodies.

- Demonstrate a sound evidence-based approach/understanding to (1) injury prevention and health promotion, (2) psychosocial strategies and (3) healthcare administration principles for best practice.
- Demonstrate a sound evidence-based approach/understanding to (1) orthopedic clinical examination and diagnosis, (2) acute care of injuries and illnesses, and (3) therapeutic interventions for best practice.
- Demonstrate appropriate professional and ethical behavior in relation to the NATA Code of Ethics, BOC® Standards of Professional Practice and state regulations and statutes.
- Demonstrate through a variety of clinical education experiences, athletic training knowledge, skills and clinical abilities that progress the student towards autonomous practice.
- Complete the eligibility requirements for the Board of Certification (BOC®) for Athletic Trainers.
- Demonstrate preparedness to become competent, marketable and highly effective health care providers who practice in the athletic training profession. Special Degree Offerings for the Non-traditional student:

The didactic aspects of this program (i.e. course sequencing and scheduling) have been designed with sensitivity for the post-professional learner. Courses may be delivered on ESU campus or at ESU’s Lehigh Valley Center in Bethlehem, PA. The program’s coursework will be delivered through the traditional academic semester. The Professional Practice Program contributes to an innovative, convenient and flexible pedagogical format aimed towards degree completion and certification eligibility as a certified athletic trainer.

PROGRAM OF STUDY

Admission Requirements:
Admission is competitive and is limited to those meeting minimum admission standards. Admission requirements for the M.S. in Athletic Training (Professional Practice Program) candidates are as follows:

- Bachelor’s degree from a regionally accredited four-year institution
- Official transcripts from all institutions provided on the admission application
- Minimum undergraduate GPA 2.75 (4.00 scale)
- Admission to the ESU Graduate Athletic Training Professional Practice Program
- Official Graduate Record Examination (GRE) scores

- Letter of intent and statement of professional goals with resume or curriculum vitae
- Three letters of recommendation
- Documentation of directed observation under the supervision of a Certified Athletic Trainer(s)
- For students who do not consider English as their primary language, official scores must be submitted from the IELTS/TOEFL examination
- Successful completion of the following pre-requisite coursework
  - Anatomy & Physiology with Lab (2 semester sequence)
  - General Biology
  - Chemistry
  - Physics
  - General Psychology
  - Exercise Physiology
  - Nutrition

Following official acceptance to the MS in Athletic Training – Professional Practice Program, student must complete the additional clearance requirements:

- Professional liability insurance
- Pennsylvania Act 34 & 151 (Criminal Record and Child Abuse Clearances) and Act 114 (Fingerprinting)
- Pennsylvania Act 24 Arrest/Conviction Report and Certification Form
- Drug Screening and immunization verification
- Other program clinical forms and documentation as required by the Athletic Training Department to meet accreditation mandates
- Possess reliable transportation
- Additional costs for clinical experience travel, uniforms, and athletic training equipment, as well as other related costs within academic plan (information available on AT program website).

Typical time to finish:
6 academic semesters (2 years)

</table>
1. The mental capacity to assimilate, analyze, synthesize, integrate concepts, and problem solve to formulate assessment and therapeutic judgments, and to be able to distinguish deviations from the norm.
2. Sufficient postural and neuromuscular control, sensory function, and coordination to perform appropriate physical examinations using accepted techniques; and accurately, safely, and efficiently use equipment and materials during the assessment and treatment of patients.
3. The ability to communicate effectively and sensitively with patients and colleagues, including individuals from different cultural and social backgrounds (in verbal and written form).
4. The ability to establish rapport with patients and communicate judgment and treatment information effectively.
5. The ability to understand and speak the English language at a level consistent with competent professional practice.
6. The ability to record the physical examination results and treatment plan clearly and accurately; the capacity to maintain composure and continue to function well during periods of stress.
7. The appropriate affective skills, flexibility and ability to adjust to changing situations and uncertainty in clinical situations, as well the demeanor, and conduct that relate to professional education and quality patient care.
8. The perseverance, diligence and commitment to complete the athletic training program as outlined and sequenced.

A student enrolled in the Athletic Training Program at East Stroudsburg University must possess the necessary intellectual, physical, emotional, social and communication skills to provide safe and effective athletic training services. The Athletic Training Program has established Technical Standards for students interested in pursuing a career in athletic training. In addition to specific academic criteria, these Technical Standards are considered necessary for students are considered necessary for students engaged in all phases of the Athletic Training Program at East Stroudsburg University.

Prior to clinical engagement, any student selected into the Athletic Training Professional Practice Program must demonstrate:

- The ability to establish rapport with patients and communicate judgment and treatment information effectively.
- The ability to record the physical examination results and treatment plan clearly and accurately; the capacity to maintain composure and continue to function well during periods of stress.
- The appropriate affective skills, flexibility and ability to adjust to changing situations and uncertainty in clinical situations, as well the demeanor, and conduct that relate to professional education and quality patient care.
- The perseverance, diligence and commitment to complete the athletic training program as outlined and sequenced.

A student enrolled in the Athletic Training Program at East Stroudsburg University must verify and understanding an ability to meet these Technical Standards, or, that with certain reasonable accommodations can meet these technical standards. In order to request accommodations to meet these technical standards, a student may make the appropriate request of the Office of Disability Services: 570-422-3954. The Office of Accessible Services Individualized for Students will evaluate a student who states he/she could meet the technical Standards with accommodations and confirm that the stated condition(s) qualifies as a disability under applicable laws. The Director of Disability Services, in consultation with the Director of the Athletic Training Program, and the student, will determine if the Technical Standards can be met with reasonable accommodations.

Clinical Education Plan
The Graduate PPP places equal emphasis on both the coursework and clinical fieldwork aspects of students’ education. The clinical fieldwork is a critical EDUCATIONAL requirement of the ATEP. Clinical fieldwork is where students learn to apply and refine the knowledge and skills they learn in their coursework. More importantly, clinical fieldwork is where they integrate all phases of Athletic training knowledge, skills, abilities and values to become competent practitioners. It is where students make the transition to clinical practice, develop a practice style and ultimately embrace the culture of the profession.

Clinical education will follow a logical progression that allows for increasing amounts of clinically supervised responsibility leading to autonomous practice upon graduation. The clinical education plan outlines the sequence of formal instruction and will provide students with authentic, real-time opportunities to practice and integrate athletic training (AT) knowledge, skills, and clinical abilities, including decision-making and professional behaviors required of the profession in order to develop proficiency as an Athletic Trainer.

Clinical education will allow the athletic training student (ATS) the opportunities to practice with different patient populations, health care providers, and in various health care settings relative to the ESU-GPP mission statement. Students enrolled in this program will be directly supervised by a clinical preceptor who will assist the student in their efforts to integrate theory into practice.

Athletic Training Professional Organization
The National Athletic Trainers’ Association (NATA) is the professional membership association for certified athletic trainers. Founded in 1950, the NATA has grown to more than 45,000 members worldwide today. The Eastern Athletic Trainers’ Association (EATA) formed in January 1949 when a few athletic trainers in the northeast decided to gather and share information. Today, the EATA encompasses all members of the National Athletic Trainers’ Association who reside in either District I or District II. The Pennsylvania Athletic Trainers’ Society (PATs) is a progressive organization of health care professionals who work under the direction of a licensed physician.

Certified athletic trainers working in the Commonwealth protect and enhance the health and welfare of our clients through prevention, recognition, management, and rehabilitation of injuries. For more information, contact: Dr. Keith A. Vanic at 570-422-3314 or kvanic@esu.edu.

**ATEP - Athletic Training**

**500 - Evidence-Based Practice in Athletic Training (2 credits)**
This course provides an overview of evidence-based practice and is designed to enable the athletic trainer’s clinical decision-making process in a manner that integrates clinical experience, patient values, and the best available evidence. This course will assist in providing the athletic trainer with strategies to enable them to search and appraise the evidence in an effort to promote better patient care.

**ATEP 501 - Foundations in Athletic Training Practice (3 credits)**
The course introduces the student to the foundational psychomotor skills necessary for injury recognition, evaluation and management. These skills are commonly utilized in the athletic training profession and are identified as fundamental competencies for the athletic training professional. Current enrollment in Athletic Training Graduate Program. Prerequisite: Acceptance into Graduate Athletic Training Program.

**ATEP 502 - Contemporary Issues in Athletic Training (2 credits)**
This course will integrate information from the students educational/clinical experiences to critically examine and discuss contemporary issues throughout the patient care process from an interdisciplinary perspective.

**ATEP 504 - Pharmacological Aspects in Physical Medicine (2 credits)**
This course examines the application of pharmacology in the management (indications, contraindications, precautions, interactions and documentation) of a variety of conditions. Specific discussion will emphasize medication and other therapeutic agents and the involved pharmacokinetics commonly used in physical medicine.
ATEP 505 - Psychosocial Aspects of Injury and Rehabilitation (2 credits)
Students in the course will gain a comprehensive understanding of the psychosocial impact of illness/injury and the rehabilitation process. Topics include, but are not limited to, psychosocial antecedents and emotional impact of illness/injury and the role that the healthcare provider plays in the rehabilitation process, not only physically, but psychosocially.

ATEP 510 - Clinically Oriented Anatomy (3 credits)
This course explores the identification and management of commonly encountered sport and occupational conditions through an in-depth study of the relevant anatomy. Common surgical and/or management techniques employed to correct these conditions are also discussed. The course is intended to advance the students' understanding of clinical anatomy through the use of anatomical models, software and dissections. Prerequisite: BOC Athletic Trainer Certification or eligibility, or, appropriate health care professional background.

ATEP 513 - Applied Statistics and Analysis in Athletic Training (3 credits)
This course will include a review of the basic statistical techniques used to analyze and interpret cognitive, psychomotor, and affective variables in athletic training and the sports medicine field. Use of these evaluative tools is applied to research samples from the discipline.

ATEP 515 - Pathomechanics of Musculoskeletal Disorders (3 credits)
This course is designed to enhance the student’s knowledge and understanding of pathomechanics by exploring the structure and movements available throughout the human body. This course and related experiences will increase the student’s understanding of structure, function, and dysfunction in order to improve orthopedic evaluation knowledge and skills. This course will enhance the students’ ability to identify impairments and their influence on function in an effort to improve treatment approaches and patient outcomes. Prerequisite: BOC Athletic Trainer Certification or eligibility, or, appropriate health care professional background.

ATEP 520 - Sports Medicine (3 credits)
This course is a survey of topics included under the broad umbrella of sports medicine, representing both scientific and clinical branches of the field. Emphasis is placed on factors which can enhance performance, promote, and protect the welfare of participants in exercise, dance, recreational, and competitive sports.

ATEP 521 - Industrial and Occupational Rehabilitation (1 credit)
This course will explore industrial and corporate rehabilitation settings. The implementation of injury prevention programs, ergonomic assessment, work-readiness conditioning, health and wellness programming, on-site physical rehabilitation, case management and return to work programs will be addressed. Prerequisite: BOC Athletic Trainer Certification or eligibility, or, appropriate health care professional background.

ATEP 522 - Imaging in Sports & Industrial Medicine (1 credit)
This course explores the fundamental clinical knowledge regarding commonly utilized diagnostic imaging techniques in sports medicine. The student will undergo a practical, in-depth review of imaging abnormalities in orthopedic sports injuries. Basic science and general managing principles in sports traumatology relative to topographic sports injuries will be addressed. An emphasis on evidence-based diagnostic imaging, outcomes, research and assessing the medical literature will be included. Prerequisite: BOC Athletic Trainer Certification or eligibility, or, appropriate health care professional background.

ATEP 525 - Advanced Clinical Practice: The Chest, Thorax, and Abdomen (1 credit)
This workshop is designed to enhance the certified athletic trainer’s ability to perform physical examination tasks relevant to the cardiovascular, pulmonary, gastrointestinal and genitourinary systems. This workshop primarily focuses on the refinement of the clinical skills essential to the practice of athletic training in the primary care sports medicine and clinical/industrial settings.

ATEP 526 - Orthopedic Appliances Workshop 1: Casting & Bracing (1 credit)
This workshop is designed to enhance the certified athletic trainer’s ability to perform physical examination tasks relevant to the cardiovascular, pulmonary, gastrointestinal and genitourinary systems. This workshop primarily focuses on the refinement of the clinical skills essential to the practice of athletic training in the primary care sports medicine and clinical/industrial settings.

ATEP 527 - Orthopedic Appliances Workshop 11: Advanced Casting & Bracing (1 credit)
This workshop is designed to enhance the certified athletic trainer’s ability to perform physical examination tasks relevant to the cardiovascular, pulmonary, gastrointestinal and genitourinary systems. This workshop primarily focuses on the refinement of the clinical skills essential to the practice of athletic training in the primary care sports medicine and clinical/industrial settings.

ATEP 528 - Orthopedic Appliances Workshop III: Orthotic Fabrication and Fitting (2 credits)
This workshop is designed to enhance the certified athletic trainer’s ability to perform physical examination tasks relevant to the cardiovascular, pulmonary, gastrointestinal and genitourinary systems. This workshop primarily focuses on the refinement of the clinical skills essential to the practice of athletic training in the primary care sports medicine and clinical/industrial settings.

ATEP 529 - Evaluation and Measurement of Lower Extremity Injuries (3 credits)
The primary focus of this course is to present a systematic process for accurately evaluating lower extremity musculoskeletal injuries and illnesses commonly seen in the physically active population. This course focuses on the athletic training competencies and proficiencies associated with lower extremity injury assessment and evaluation, risk management and injury prevention, and acute care of injuries and illness. Prerequisites: ATEP 100, 202, and 230.

ATEP 530 - Evaluation and Measurement of Upper Extremity Injuries (3 credits)
The primary focus of this course is to present a systematic process of accurately evaluating upper extremity musculoskeletal injuries and illnesses commonly seen in the physical activity population. This course focuses on the athletic training competencies and proficiencies associated with upper extremity injury assessment and evaluation, risk management and injury prevention, and acute care of injuries and illness. Prerequisites: ATEP 100, 202, and 230.

ATEP 531 - Organization and Administration in Athletic Training (3 credits)
This course is a requirement for students in athletic training. It deals primarily with the administrative competencies necessary to accomplish the successful day-to-day operation of an athletic training program and facility. Prerequisite: ATEP 101, 202, and 230.

ATEP 532 - Therapeutic Modalities in Sports Medicine (3 credits)
This course is required for students in athletic training. Information and experience are provided in the use of massage and in the use of the
physical agents of heat, cold, light, sound, and electricity in the treatment and rehabilitation of athletic injuries. Prerequisites: ATEP 100, 202, 230, 301; PHYS 110, 131, or 161.

ATEP 533 - Therapeutic Exercise in Sports Medicine (3 credits)
This course examines the various therapeutic modalities used in the practice of athletic training and related rehabilitation sciences. Laboratory experiences are provided in the use of heat, cold, light, sound, laser, electricity and body work/massage. Emerging technologies and their relationship to the rehabilitation process are also explored. Prerequisite: ATEP 202 AND ATEP 230 AND ATEP 330.

ATEP 535 - Differential Assessment of Musculoskeletal Injuries (3 credits)
This course is designed to differentiate between movement disorders and the diseases or pathologies diagnosed by a physician. Since some impairments are consequences of disease, the athletic trainer should be able to identify and recognize conditions which need to be referred to a physician. Prerequisite: ATEP 230m ATEP 301, ATEP 432 and ATEP 433.

ATEP 536 - Primary Care for the Athletic Trainer (3 credits)
The course is designed to examine the current medical practices used in the treatment and rehabilitation of physically active individuals. Students are introduced to the responsibilities and perspectives of various medical and allied medical personnel.

ATEP 537 - Acute Emergency Care in Athletic Training (2 credits)
Students will learn to recognize, assess, treat and refer traumatic injury and acute emergent illness. Prerequisite: ATEP 230 and ATEP 240.

ATEP 538 - Sports and Exercise Massage Techniques (2 credits)
This workshop is designed to provide athletic trainers and other allied health professionals with the knowledge and skills necessary to incorporate pre-event, post-event and specialty sports massage techniques into clinical practice. The indications and contraindications for use of sports and exercise massage techniques are demonstrated, practiced and assessed. Hands-on activities will focus primarily on the skills needed to appropriately execute pre-event ("quick") or post-event (slow) massage techniques. Prerequisite: BOC certification or eligibility, or, appropriate health care basic science required.

ATEP 540 - Functional Rehabilitation and Sport Specific Conditioning (3 credits)
This course focuses on the final stage of the rehabilitation process and concentrates specifically on the fundamental skills, sport specific training progressions, and testing and evaluation techniques necessary to safely return the injured back to physical activity.

ATEP 544 - Current Athletic Injury Prevention and Management (3 credits)
Techniques of prevention, examination, and rehabilitation of athletic injuries and current topics in sports medicine are all considered. This course also examines total care of the athlete, ethics, morals, and legal liability in sports.

ATEP 545 - Rehabilitation for Special Populations (3 credits)
This course is designed to provide athletic training students with the skills necessary to differentiate between movement disorders and non-musculoskeletal diseases, disorders or pathologies. Identification and referral as well as treatment and rehabilitation considerations are discussed.

ATEP 550 - Seminar in Athletic Training (3 credits)
This seminar is designed to focus on the study and discussion of recent experimental and clinical research areas within the athletic training and the rehabilitation sciences. A review and discussion of the various athletic training domains is reinforced through critical analysis and investigation of selected sports medicine topics.

ATEP 551 - Complementary and Alternative Therapies in Rehabilitation (3 credits)
This course is designed to present the student with an opportunity to explore complementary and alternative therapies. The CAM practices investigated will include interventions and techniques in three broad categories: natural products, mind body medicine, and manipulative and body-based practices. A systematic evidence-based approach will be used to evaluate the current literature related to the theoretical framework, physiological processes, benefits, and potential risks of these interventions and use in health care. Distribution: Advanced.

ATEP 552 - Orthopedic Specialist Workshop (3 credits)
This course explores the mastery of those select clinical proficiencies specific to the orthopedic setting by the healthcare practitioner. Designated competency will include the theoretical and practical skill's mastery in the areas of diagnostic imaging, ergonomic assessment, casting and orthopedic bracing. Distribution: Advanced.

ATEP 553 - Advanced Reconditioning and Corrective Exercise I (3 credits)
This graduate level advanced rehabilitation and reconditioning course is designed specifically for students with an increased interest in functional progressions and performance enhancements for the athletic population. This course will serve to enhance the student's knowledge of therapeutic exercise techniques as well as reinforce strength training and conditioning concepts. The focus of the class will pertain to the final stage of rehabilitation and concentrate specifically on reconditioning of athletes using a variety of techniques. Distribution: Advanced.

ATEP 554 - Advanced Conditioning and Corrective Exercise II (3 credits)
This advanced rehabilitation and reconditioning course will build on the knowledge and skills acquired in Advanced Reconditioning and Corrective Exercise I. This course will serve to enhance the student's knowledge of corrective exercise and performance enhancement strategies to decrease the risk of injury while reinforcing reconditioning and rehabilitation concepts. Distribution: Advanced. Prerequisite: ATEP 553.

ATEP 560 - Evidence-Based Rehabilitation (3 credits)
This course is designed to present the student with an evidence-based approach for integrating physical agents and therapeutic exercise into the rehabilitation. In addition, this course will further investigate the physiological processes and scientific theories as they apply to rehabilitative strategies and the treatment protocols. Prerequisite: BOC Athletic Trainer Certification or eligibility, or, appropriate health care professional background.

ATEP 570 - Introduction to Research (3 credits)
This course provides an orientation to graduate study and research in health education and movement studies and exercise science. This seminar is designed to acquaint the graduate student with the methods and materials of graduate study and scientific inquiry. It is required of all graduate students in the degree program.

ATEP 571 - Independent Research (1 credit)
This course utilizes selected research techniques to attack a specific professional or academic problem. It includes preparation and presentation of a formal report. Consult adviser well in advance of
ATEP 572 - Thesis Seminar (1 - 3 credits)
This course utilizes selected research techniques to address a specific professional or academic problem. It includes preparation and presentation of a formal report. Students must consult their advisor well in advance of registration. This course is required for all students in the research or project program, and it may be repeated with permission. Prerequisite: ATEP 570 and 574.

ATEP 574 - Research Practicum (3 credits)
This course will guide the student through the completion of a research project or thesis. Methodology, data collection, interpretation of results and the discussion of research findings is enhanced through an evidence-based approach. Measurement of treatment outcomes in clinical research and the need for the use of the disablement model is also emphasized. Prerequisite: ATEP 570.

ATEP 577 - Independent Study (3 credits)
Under the auspices of a qualified member of the faculty, the student pursues a pattern of readings, study, and research related to professional knowledge and understanding in health or physical education. Topics should be established prior to enrollment. Prerequisite: Permission of the faculty member and the department.

ATEP 586 - Field Experience & Internship (3 credits)
This course is designed to provide the student with practical experience with a federal, state, or private organization in some related aspect of physical education and/or sports medicine. Students will coordinate their course work acquired at East Stroudsburg University with specific field experience. This program will be supervised by a member of the Athletic Training Department. Prerequisite: Permission of the department.

ATEP 587 - Advanced Clinical Practicum I (3 credits)
This internship is designed to provide students with the opportunity to apply previously learned theories and skills in a specialized area of study related to athletic training and the rehabilitation sciences. The Advanced Clinical Practicum I is completed under the supervision of a faculty member and qualified clinical preceptor from the fields of orthopedics and rehabilitation. Prerequisite: BOC® Athletic Trainer Certification or eligibility, or, appropriate health care professional background.

ATEP 588 - Advanced Clinical Practicum II (3 credits)
This course is designed to provide students with the opportunity to apply previously learned theories and skills in a specialized area of study related to athletic training and the rehabilitation sciences. The Advanced Clinical Practicum II is completed under the supervision of a faculty member and qualified clinical preceptor from the fields of orthopedics and general medicine. Prerequisite: BOC® Athletic Trainer Certification or eligibility, or, appropriate health care professional background.

ATEP 594 - Athletic Training Clinical Laboratory I (1 credit)
This course is designed to provide graduate professional athletic education students with the opportunity to learn, practice and apply a variety of entry-level athletic training skills. Students are required to revisit and integrate level appropriate skills into a required field experience.

ATEP 595 - Athletic Training Clinical Laboratory II (1 credit)
This course is designed to provide professional phase athletic training major students with the opportunity to learn, practice and apply a variety of entry-level athletic training skills. Continued skill acquisition and mastery is expected. Students are required to revisit and integrate level appropriate skills into a required field experience.

ATEP 596 - Athletic Training Clinical Laboratory III (1 credit)
This course is designed to provide professional phase athletic training major students with the opportunity to learn, practice and apply a variety of entry-level athletic training skills. Continued skill acquisition and mastery is expected. Students are required to revisit and integrate level appropriate skills into a required field experience.

ATEP 597 - Athletic Training Externship (6 credits)
This course is designed to expose the student to new theories, concepts and challenges through completion of a fifteen-week clinical education experience at an approved affiliate clinical site. Students will revisit and integrate entry level athletic training skills from previous clinical laboratories into a full semester field experience.

ATEP 599 - Department Elective - Graduate (1 - 6 credits)
This course is designed to expose the student to new theories, concepts and challenges through completion of a fifteen-week clinical education experience at an approved affiliate clinical site. Students will revisit and integrate entry level athletic training skills from previous clinical laboratories into a full semester field experience.

ATEP 599T - Athletic Training Graduate Transfer (1 - 6 credits) (1 - 6 credits)
Athletic Training Transfer Course
ESU academic department decides how the course applies toward the degree.

Biology M.S.

30 credits --Thesis option
Purpose of the M.S. Program

The purpose of the M.S. program in biology is to provide students with a comprehensive foundational knowledge in their area of specialty, coupled with a high degree of competence in research design, methodology, analysis, interpretation and communication.

Student Learning Outcomes

- Understand the standards of ethics and conduct in their profession and behave in a manner consistent with these standards
- Comprehend the impact of their professional decisions and actions upon society, their employer, their profession, and themselves and work diligently to achieve positive outcomes
- Be proficient in performing research
- Read, analyze, interpret and write in a manner consistent with the standards of their field
- Communicate effectively in a variety of modes using emerging technologies as required in a discipline specific professional setting
- Identify and understand critical issues
- Challenge and evaluate information
- Synthesize and integrate knowledge
- Demonstrate advanced knowledge and skills and be able to apply your expertise in academic, basic or applied research settings.
- Formulate new ideas.

PROGRAM OF STUDY

Thesis Option — 30 Semester Credits required

Required

BIOL 572  Thesis I  3
BIOL 573  Thesis II  3

Six semester credits in the M.S. program may be earned in courses taken in related areas such as mathematics, chemistry, or physics.

Non-Thesis Option — 31 Semester Credits Required

BIOL 571  Independent Research  1 - 3

Six semester credits in the M.S. program may be earned in courses taken in related areas such as mathematics, chemistry, or physics.

Non-Research Option — 39 Semester Credits required

This program of study emphasizes the broader aspects of graduate studies in biology by requiring more courses in place of the thesis or research problem.

Required

Six semester credits in the M.S. program may be earned in courses taken in related areas such as mathematics, chemistry, or physics.

Undergraduate prerequisites required:
The student is strongly advised to have a statistics course before initiating the thesis or the research problem.

BIOL - Biology

BIOL 500 - Special Topics (3 credits)
This course is designed to provide the student with an opportunity to work with a faculty member in the student’s primary Arts and Sciences discipline during the student teaching experience. The course will enhance the student’s ability to understand and maximize the relationship between disciplinary subject matter and pedagogy.

BIOL 501 - Human Genetics (3 credits)
This course relates principles of both transmission and molecular genetics to the human organism. Particular stress will be placed on inborn errors such as Down’s Syndrome, Kleinfelter’s Syndrome, and Tay-Sach’s Disease.

BIOL 502 - Man & His Environment (3 credits)
This course is a study of the various environmental problems, such as air and water pollution, in relation to ecological principles. Viewpoints of ecologists, sociologists, political scientists, and engineers will be presented.

BIOL 504 - Developmental Genetics (3 credits)
This course is constructed to focus the energies of the student on the role of DNA during cell differentiation and to critically examine the evidence for the theme that differential gene function is the basis of cell differentiation, and consequently of embryonic development.

BIOL 506 - History Of Biology (3 credits)
This course is a study of the history and philosophy of biological science oriented toward case histories and salient developments in fields of scientific endeavor. This course is designed to offer the student an opportunity to gain an appreciation for the emergence of scientific theories and to present a basis for a conceptual view of the chosen area of specialization.

BIOL 507 - Organic Evolution (3 credits)
This course develops a synthetic theory of evolution, describes the causes of variability, organizes genetic variability in the population, and evaluates isolation, hybridization, and ploidy.

BIOL 508 - Biological Instrumentation (3 credits)
This course deals with the basic principles concerning the theory, methods and uses of instruments in biological analysis.

BIOL 510 - The Physical Environment and Community Health (3 credits)
This course reviews traditional and evolving public health concerns related to the physical environment. Major areas of concern are solid waste, housing, water, air, accidents, food sanitation, overpopulation, and global concerns.

BIOL 511 - Histology (4 credits)
This course is a study of the microscopic anatomy of cells, tissues and organs. Correlations between structure and function at the microscopic and submicroscopic levels are primary functions of the course. Laboratory experiences will supplement the lectures and provide students with the opportunity to develop the ability to recognize the microscopic anatomy of cells, tissues, and organs.

BIOL 512 - Plant Anatomy (3 credits)
This course consists of studies of the external and internal structure of vascular plants with emphasis on development of the mature plant and its functional security. Attention to primary and secondary plant bodies; xylem, phloem and cambium; leaf, stem, and root.

BIOL 513 - Predator-Prey Relationships (3 credits)
Predator-prey relationships are prime examples of coevolution and evolutionary arms races. The study of such relationships provides insight into evolutionary and ecological mechanisms of animal interactions. These interactions will be looked at within the framework of Optimal Foraging Theory.

BIOL 514 - Pathogenic Microorganisms (3 credits)
This course is a study of the pathogenic microorganisms. The emphasis is on bacteria, rickettsia, and chlamydia. The morphological, biochemical, serological, and pathological characteristics of these organisms will be
addressed. This course will focus on important nosocomial and outbreak associated etiological agents

BIOL 515 - Protozoology (3 credits)
This is a course in the pathogenic protozoa of man and domestic animals. Particular emphasis will be on developing proficiency in recognition of forms and morphological characteristics. The natural history and economic importance will be stressed as well as selected life cycle studies.

BIOL 516 - Introduction to Molecular Biotechnology (3 credits)
The course will provide students with an overview of modern molecular biology and the growing field of biotechnology. The laboratory component will allow students to use some of the major techniques and instrumentation widely used in molecular biology research. Guest lecturers will present key projects that illustrate the application of biotechnology to problems of disease prevention and vaccine production.

BIOL 517 - Helminthology (3 credits)
This is a laboratory and lecture course designed to acquaint the student with the parasitic helminth of man and animals. Emphasis will be upon identification and life cycle studies. Individual projects encouraging in-depth study of a particular parasitological phenomenon are an integral part of the course.

BIOL 518 - Cytology (3 credits)
This course acquaints the student with the subject of cellular structure, gives the students an understanding of the more modern concepts of cellular organization, and brings to students the modern techniques of investigation of the detailed structure and processes of the cell. Offered on demand.

BIOL 519 - Virology (3 credits)
This course includes a study of the aspects of systematics, serology, immunology, vaccines and genetics of viruses. Representative viral diseases along with their mechanism for pathogenicity are studied.

BIOL 520 - Biology Of Aging (3 credits)
This course covers the biological aspects of aging. Theories of aging as well as the actual physiological changes that occur on the molecular, cellular, and systemic levels are discussed. Biology majors may not use this course to fulfill their Biology major requirements. This course is one of the required courses for students in Gerontology.

BIOL 521 - Introductory Mycology (3 credits)
This course is a survey of higher and lower fungi, including field collections of fleshy fungi with laboratory physiological studies and identification. Emphasis on fleshy basidiomycetes and fungi imperfecti.

BIOL 522 - Plant Physiology (4 credits)
This course is a study of the functions of higher plants, including water relations, photosynthesis, respiration, nutrition, and the control of plant growth and development. The practical applications of plant physiology are also discussed.

BIOL 523 - Plant Ecology (3 credits)
This course is designed to instill knowledge of the principles of fundamentals of plant ecology and the methods of vegetation analysis.

BIOL 524 - Mechanisms of Disease I (3 credits)
This course will discuss the mechanisms contributing to disease and representative diseases affecting the various body systems. Readings, Kodachrome slides, and selected, preserved organs/tissues will be used to graphically illustrate the diseases.

BIOL 525 - Herpetology (3 credits)
This course will review the biology of the vertebrate classes Amphibia and Reptilia from an organismic perspective. The topics of focus will include evolution, systematics, ecology, and behavior. Field research techniques will also be emphasized.

BIOL 526 - Wildlife Biology (3 credits)
A management approach to wildlife resource biology, the emphasis is on life histories, investigative techniques, and field research methods. Most North American game species are included.

BIOL 527 - Natural History of Western Fauna (6 credits)
This program provides a graduate and undergraduate course that gives the student a unique opportunity for field study across the country. Although the focus will be on animal life in the Pacific Northwest, adequate attention will be given to wildlife on principal refuges found along the route both to and from the Northwest. (Offered during Main Summer Session).

BIOL 528 - Biogeography (3 credits)
This course deals with the geographical distribution of organisms. It examines the pattern of these distributions and the underlying causes for them. The question of what present distributions of organisms indicate about past climates and environments is considered. A secondary area of examination is ecology of invasions which include present day translocation of organisms from former to new habitats.

BIOL 529 - Human Physiology (3 credits)
This course is an in-depth study of human physiology. Emphasis is placed on the function and interrelationship of the nervous, circulatory, respiratory, and excretory systems.

BIOL 530 - Applied Microbiology (4 credits)
This course stresses the applications of principles learned in general microbiology. Emphasis will be placed on specific microbiological techniques as they apply to pathogenic microorganisms, agriculture, and the environment.

BIOL 531 - Ecological Physiology (3 credits)
Various physiological processes such as temperature control, and salt and water balance will be studied by examining the modifications that make specific animals better adapted for survival in a particular environment.

BIOL 534 - Comparative Hematology (4 credits)
This course introduces the student to basic and advanced concepts of hematology and hemostasis in animals. Emphasis will be placed on the hematologic cell series, anemias, leukemias, and other blood dyscrasias. Normal values and basic hematologic testing will be stressed. The student will learn to evaluate normal and abnormal cellular morphology and integrate these findings to the clinical picture. Students will be introduced to the principle of electronic counting and will learn to interpret scatterplots or other graphical material. The concepts of hemostasis will be developed through laboratory exercises, case studies, and classroom discussion.

BIOL 535 - Endocrinology (3 credits)
This course is a study of the embryology, histology, and function of the chemical integrating system — the endocrine system — of animals, with particular emphasis on the vertebrates.

BIOL 536 - Endocrinology of Sexual Reproduction (3 credits)
Comparative anatomy and physiology of the vertebrate reproductive systems and the chemistry and action of hormones concerned with reproduction will be studied.

BIOL 537 - Immunology (3 credits)
A course designed to develop a basic understanding of the immune system and its relationship to disease. Everyday immunologic problems, penicillin and ragweed allergy, myeloma and lymphomas, serologic tests involving antigen antibody reactions, immunization, etc. will be
BIOL 538 - Physiological Biochemistry (3 credits)
This course is a study of the properties and interrelations of the major biochemical processes such as the Kreb's cycle, electron transport system, glycolysis, urea cycle, and photosynthesis. Also studied are the properties and synthesis of proteins, amino acids, lipids, carbohydrates, and nucleic acids as well as enzyme kinetics and thermodynamics.

BIOL 541 - Ecology of Water Pollution (3 credits)
This course is a study of the effect of various types of pollution on the freshwater, estuarine, and salt-water ecosystems. Monitoring of polluted and unpolluted situations will be conducted in the field, and bioassay techniques will be shown in the laboratory. Various indices of the extent of water pollution will be discussed.

BIOL 542 - Biology of Aquatic Macrophytes (3 credits)
This course considers the identification, ordination, morphology, physiology, and ecology of the larger vascular and non-vascular aquatic plants.

BIOL 543 - Stream Ecology (3 credits)
Stream Ecology is a course designed to study the biological parameters of rivers and streams with special emphasis on trophic dynamics, invertebrate-vertebrate communities, and seasonal changes. The effects of pollution on various aspects of streams will also be a major consideration. Field investigations will be used to examine differing streams and their particular characteristics. A variety of sampling techniques will be used in the field to give students experience with different methods of answering ecological questions.

BIOL 544 - Biology of Water and Wastewater (3 credits)
This course is a study of fungi, bacteria, algae, protozoa, insects, and worms as they are used in the treatment of wastewater and as they affect or interfere with the purification of drinking water. Physical, chemical, and biological factors that affect these organisms in the respective facilities will be monitored and various tests of the efficiency of the treatment will be introduced. Field trips to a variety of water and wastewater facilities will be taken.

BIOL 545 - Ecology Of Fishes (3 credits)
This course emphasizes the taxonomic, physiological, ecological, and behavioral aspects of fishes; laboratory and field trips are an integral part of the course.

BIOL 546 - Limnology (3 credits)
This course provides basic principles of physical limnology in relation to several types of communities in lakes and streams; laboratory and field trips are an integral part of the course.

BIOL 547 - Biology Of Plankton (3 credits)
This course covers the pelagic organisms in lakes and oceans and the factors that control their distribution and production. Planktonic plants and animals (e.g. algae, protozoa, rotifers, crustacea, and fish larvae) and the part they play in the economy of natural waters are studied; laboratory and field trips are an integral part of the course.

BIOL 549 - Cell Biology (3 credits)
This course will provide an in-depth examination of cell structure and function and the interrelationship between the two. Special attention will be given to membranes, cytoskeleton, and cell surface structures. The function of these structures in the coordination of activities occurring within and among cells will be stressed.

BIOL 550 - Field Entomology (3 credits)
This course is an introductory taxonomic approach to insects, coupled with field collection and identification. Study includes ecology, morphology, systematics, and lab techniques.

BIOL 551 - General Entomology (3 credits)
This course is the study of insects with respect to morphology, physiology, taxonomy, and ecology; insects of economic importance are used as examples. This is a basic course leading to several aspects of entomology such as insect morphology, economic entomology, insect physiology, medical entomology, etc.

BIOL 554 - Medical Entomology (3 credits)
This course is the study of arthropods that affect the health of man and animals. The study includes a brief account of introductory entomology and that of the ticks, insects, and sites of medical importance, both as vectors and as the causal agents of pathological conditions. Seeks understanding of the principle of the vector-host relationship.

BIOL 557 - Behavioral Ecology (3 credits)
Behavioral Ecology is designed to introduce students to animal behavior within an ecological and evolutionary context. The subject matter deals with ways in which an organism’s behaviors are influenced by the environment, especially with regard to resource distribution. Course is offered regularly at ESU and occasionally at the Marine Science field station at Wallops Island, VA.

BIOL 558 - Wildlife Diseases (3 credits)
This course includes a study of the occurrence, principles, concepts and significance of disease in wildlife. Representative diseases along with their mechanism for pathogenicity will be studied.

BIOL 559 - Wildlife Disease Laboratory (1 credit)
This course is designed to demonstrate the immunological and biochemical factors in disease diagnosis. Common laboratory tests in hematology, blood chemistry, and microbiology will be employed. Birds, fish, and mammals will be the subjects examined.

BIOL 560 - Marine Ecology (3 credits)
This course is a study of the physical constants of the marine environment as it interrelates with marine organisms. The ecological interactions of the organisms with each other will be emphasized. The effect of pollution and excessive exploitation on marine organisms will be discussed.

BIOL 561 - Mechanisms of Disease Laboratory (1 credit)
This course focuses on basic mechanism of disease (the processes). The main thrust is directed toward identification of the changes in the human body at cellular, tissue, and system levels when insulted by a disease. Glass microscopic slides, 35 mm slides, organ and tissue specimens, images from the Internet and DC-ROM programs will be utilized in this course.

BIOL 562 - Mammalogy (4 credits)
An overview of the vertebrate Class Mammalia, this course is designed to help the student develop a basic understanding of the anatomy, diversity, ecology, fossil record, and geographical distributions of mammals. Students will be exposed to the modern and fossil mammals of the world – with a focus on the regional fauna – through a combination of classroom discussion, lecture, laboratory work with preserved specimens, field trips, and field work.

BIOL 563 - Conservation Biology (4 credits)
This course will synthesize topics relating to the conservation of animals and plants, including extinction, genetics, demography, insularization, threats to biodiversity, conservation economics, environmental ethics, and strategies for conservationists.
BIOL 564 - Population Genetics (4 credits)
This course will cover the basics of population genetics. Stress will be placed upon understanding the basic processes of evolutionary genetics. The initial part of the course will cover the basic models of population genetics; the second half will deal with contemporary controversies or problems. The laboratory will emphasize data analysis.

BIOL 565 - Immunology Laboratory (1 credit)
This course is designed to provide the students with hands-on laboratory experimentation using basic immunological techniques. The course will include methods and techniques of: Immunization and bleeding of mice, antigen and antibody purification and characterization, immunoelectrophoresis, western blot, ELISA procedures, immunoprecipitation, immunocytochemistry, identification of cellular antigens by immunofluorescence, and isolation of mouse lymphoid tissue (spleen and thymus).

BIOL 566 - Marine Ichthyology (3 credits)
This course is a study of the internal and external structure of fishes, their systematic and ecological relationships, and their distribution in time and space. This course is periodically offered at the Marine Science field station at Wallops Island, Va., only during a summer session.

BIOL 567 - Fish Health Management (3 credits)
The maintenance of fish health in enclosed, recycling water systems will be studied. The chemical, physical, and biological processes of these enclosed systems will be related to the health of various species of fish. Nutrition, fish handling, and diagnosis of diseases will also be emphasized.

BIOL 568 - Principles of Systematics (3 credits)
This course focuses on the practice of classifying organisms utilizing modern systematic techniques. Particular emphasis is placed on the reconstruction of evolutionary histories of organisms using both molecular and morphological characters. Topics include species concepts, delineation of taxonomic groups, and methods of inferring phylogenies.

BIOL 569 - Introduction to Bioinformatics (3 credits)
The aim of this course is to provide a basic introduction to bioinformatics for students in molecular biology or genetics with no particular training in mathematics, statistics or informatics. The students will get an overview of the different databases from around the world that are available on the internet, and will be presented with practical applications of computer-based methods for the analysis of DNA sequences and protein structures.

BIOL 570 - Independent Research (1 - 3 credits)
This course is designed to acquaint the student with recent methods of research in particular areas of investigation, to instruct in the writing of acceptable research reports, and to acquaint the student with the literature directly related to a particular problem.

BIOL 571 - Thesis I (3 credits)
This course is designed to acquaint the student with recent methods of research in particular areas of investigation, to instruct in the writing of acceptable research reports, and to acquaint the student with the literature directly related to a particular problem.

BIOL 572 - Thesis II (3 credits)
This course is designed to acquaint the student with recent methods of research in particular areas of investigation, to instruct in the writing of acceptable research reports, and to acquaint the student with the literature directly related to a particular problem.

BIOL 573 - Thesis II (3 credits)
This course is designed to acquaint the student with recent methods of research in particular areas of investigation, to instruct in the writing of acceptable research reports, and to acquaint the student with the literature directly related to a particular problem.

BIOL 574 - Introduction to Oceanography (3 credits)
This course is designed to familiarize the student with the marine environment and current developments in the marine sciences. Topics for study will include the physical parameters of the ocean, ocean basin topography, life in the sea, and resources in the ocean. This course is periodically offered at the Marine Science field station in Wallops Island, Va., only during a summer session.

BIOL 577 - Independent Study (1 - 12 credits)
Under the auspices of a qualified member of the faculty of the Graduate School, the student pursues a pattern of readings, study, and research related to professional knowledge and understanding in biological science. Topics should be established prior to enrollment.

BIOL 579 - Forensic Biotechnology (3 credits)
This course is designed to familiarize the students with an understanding of scope and use of biotechnological techniques in forensic sciences, which include criminal investigation, civil cases (paternity testing), and wildlife conservation and management (endangered species), diagnosis of inherited diseases, tissue and organ transplantation, personal and organism identification. This course will be conducted as both lecture and laboratory exercises. The students will learn how to collect, preserve, analyze and interpret biological evidence in forensic contexts: hair, blood, saliva, semen, tooth pulp, and other tissues. It provides an overview of the techniques and problems related to application of biotechnology in different fields. Major topics will be addressed, such as categories of biological evidence, DNA fingerprinting, blood and serology, hair and fiber analysis, fingerprinting, forensic pathology. Current and historical cases will be used to illustrate examples of good and poor quality investigations and updates to new technologies and breakthroughs will be emphasized.

BIOL 581 - Insect Systematics (3 credits)
This course provides an in-depth examination of insect diversity at the order and family level with an emphasis upon identification of adults. Topics will include taxonomy, evolutionary relationships, approaches to classifications, nomenclature, zoogeography, ecology, morphology, and techniques of collection. One or more field trips may be required.

BIOL 583 - Research Design and Data Analysis for Biologists (3 credits)
This course covers methods of experimental design and analysis in biological research, with special emphasis on common experimental design issues and sampling methods encountered in laboratory and field studies. The course also introduces modern computing techniques for data management and statistical analysis in biology.

BIOL 584 - Experimental Immunology (1 credit)
This is a laboratory course designed to complement lectures and provide the student with experience in immunological methods.

BIOL 585 - Virology Laboratory (1 credit)
This course includes the study of the handling and infection of laboratory animals with viruses. The use of cell or tissue cultures in virology will be reviewed. To study viral replication, laboratory exercises in phage activity, bacterial virus growth curves and animal virus growth curves will be performed.

BIOL 586 - Field Experience and Internship (1 - 12 credits)
An integral part of the field experience and internship requires that the student work under supervision with a federal, state, or private organization in some biologically related aspect of the respective organization. Students will coordinate their course work acquired at East Stroudsburg University with specific field experiences. A formal written report must be submitted at the culmination of the experience.

BIOL 591 - Behavioral Ecology Lab (1 credit)
Laboratory topics will introduce students to experimental design, data acquisition, and behavioral observation techniques under laboratory and field conditions using a variety of invertebrate and vertebrate organisms and plants. Some Saturday laboratories will be required.
BIOL 592 - Mechanisms of Disease II (3 credits)
This course is a continuation of Mechanisms of Disease I. The mechanisms of diseases affecting the organ system will be studied; namely, to provide a concise account of important aspects of the pathology of human disease.

BIOL 593 - Biology of Tropical Ecosystems (3 credits)
This course will impart a thorough understanding of tropical ecology through introductory lectures, student presentations, and an intensive two-week field experience. The field experience will provide research opportunities for students on ecological and behavioral aspects of selected organisms and/or concepts. Destinations include Costa Rica, Ecuador, or Kenya. The course will be offered on demand during appropriate winter, spring, or summer sessions.

BIOL 597 - Pathogenic Microbiology Laboratory (1 credit)
A course designed to develop a basic understanding of the immune system and its relationship to disease. Everyday immunologic problems, penicillin and ragweed allergy, myeloma and lymphomas, serologic tests involving antigen antibody reactions, immunization, etc. will be considered. Graduate students will be expected to write a paper and complete a project.

BIOL 598 - Molecular Biology (3 credits)
This course is intended to provide in-depth coverage of the principles of molecular biology. The structure of nucleic acids and proteins will be reviewed. The process of DNA replication, transcription, and translation in both prokaryotes and eukaryotes will be covered. The control of gene expression in several representative systems will be discussed in detail. Current methodologies in recombinant DNA research will be emphasized.

BIOL 599 - Molecular Biology Lab (1 credit)
This course is intended as an adjunct to BIOL 598 Molecular Biology. This course will provide students with hands-on experience using techniques for molecular biology research including DNA isolation, Southern blotting, and PCR (polymerase chain reaction).

BIOL 599T - Biology Graduate Transfer (1 - 6 credits)
Biology Transfer Course.
ESU academic department decides how the course applies toward the degree.

BIOM - Marine Science

BIOM 501 - Biological Oceanography (3 credits)
The interactions between biological communities and the oceanic environment are studied with emphasis on the distributions of coastal plankton, fishes, and benthic invertebrates. This course is periodically offered at the Marine Science Consortium field station at Wallops Island, Va., only during a summer session.

BIOM 502 - Marine Evolutionary Ecology (3 credits)
This course will study the ecological mechanisms underlying evolutionary processes. It is broad in scope and requires that students synthesize both evolutionary and ecological concepts and theory into an understanding of how organisms adapt to their environment. This course is periodically offered at the Marine Science Consortium field station in Wallops Island, Va., only during a summer session.

BIOM 503 - Comparative Physiology of Marine Organisms (3 credits)
This course is an introduction to the physiology of marine organisms utilizing a comparative approach. A wide range of marine organisms will be used to demonstrate the variety of mechanisms and strategies that allow them to physiologically adapt to their specific environments. This course is periodically offered at the Marine Science Consortium field station in Wallops Island, Va., only during the summer session.

BIOM 504 - Research Diver Methods in Marine Science (3 credits)
Students in this course will study the marine environment with the use of SCUBA as a research tool. SCUBA will be used to collect samples, to measure the distribution of the flora and fauna, and to evaluate the productivity and biomass of select benthic communities. This course is periodically offered at the Marine Science Consortium field station in Wallops Island, Va., only during a summer session.

BIOM 505 - Scanning Electron Microscopy: Marine Application (3 credits)
Students in this course will study the marine environment with the use of SCUBA as a research tool. SCUBA will be used to collect samples, to measure the distribution of the flora and fauna, and to evaluate the productivity and biomass of select benthic communities. This course is periodically offered at the Marine Science Consortium field station in Wallops Island, Va., only during a summer session.

BIOM 558 - Coastal Environmental Oceanography (3 credits)
This course examines the interaction of biological, chemical, physical, geological, and ecological ocean processes as applied to coastal environments. Emphasis is placed on environmental management issues of the coastal zone. Topics include water quality analysis, barrier island geology and ecology, estuarine pollution, beach defense and biological implications in areas of coastal up welling and coastal fronts. Specific cases in coastal pollution will be examined from coastal environments around the U.S.

BIOM 559 - Advanced Methods in Coastal Ecology (3 credits)
This course covers the wide area of methods of data collection, study designs, and analyses used in ecology. Emphasis is placed on understanding the strengths and weaknesses of different ecological methods and analyses in the study of coastal environments. Lecture, fieldwork, and laboratory are integrated, and students gain practical computer experience by analyzing ecology data from the field using software that performs analyses introduced in lecture.

BIOM 560 - Marine Ecology (3 credits)
This course is a study of the physical constants of the marine environment as it interrelates with marine organisms. The ecological interactions of the organisms with each other will be emphasized. The effect of pollution and excessive exploitation on marine organisms will be discussed.

BIOM 561 - Marine Botany (3 credits)
The taxonomy, physiology, ecology, and economic importance of marine and coastal plants, as exemplified by those found in the Lewes, Delaware, area, will be considered. Laboratory techniques will include collecting, preserving, identifying, and analyzing plants and plant materials; appropriate instrumentation will be used. Emphasis will be given to both in-the-field studies and laboratory analyses. This course is periodically offered at the Marine Science field station at Wallops Island, Va., only during a summer session.

BIOM 562 - Marine Invertebrates (3 credits)
The course is a study of the life history, habits, origin, development, physiology, anatomy, and taxonomy of the main phyla of invertebrates. A phylogenetic sequence is followed to show interrelationships among the phyla. Special emphasis is given to the Atlantic marine invertebrates. Laboratory and fieldwork deal with collection, preservation, and identification of local species. This course is periodically offered at the Marine Science field station at Wallops Island, Va., only during a summer session.

BIOM 563 - Marine Biology Cruise (3 credits)
This course consists of a three-week session involving detailed planning and preparations for an oceanographic research cruise of approximately eight days, actual execution of the cruise plan aboard an ocean research...
vessel, and data-processing and reporting of the cruise results. Shipboard sampling techniques and instrumentation used by biological oceanographers are introduced. This course is periodically offered at the Marine Science field station at Wallops Island, Va., only during a summer session.

**BIOM 564 - Developmental Biology of Marine Organisms (3 credits)**
This course deals with the principles of development and differentiation in marine organisms at the molecular and supramolecular levels of organization. The laboratory will include both descriptive and experimental embryology. This course is periodically offered at the Marine Science field station at Wallops Island, Va., only during a summer session.

**BIOM 565 - Management of Wetland Wildlife (3 credits)**
This course deals with the ecology and management of wetland wildlife with emphasis on the management of wetlands as ecological systems. This course is periodically offered at the Marine Science field station at Wallops Island, Va., only during a summer session.

**BIOM 566 - Marine Ichthyology (3 credits)**
This course is a study of the internal and external structure of fishes, their systematic and ecological relationships, and their distribution in time and space. This course is periodically offered at the Marine Science field station at Wallops Island, Va., only during a summer session.

**BIOM 567 - Marine Pollution Research Cruise (3 credits)**
Investigations are conducted before, during, and after a pollution episode; the fate and behavior (dispersion and degradation) of the pollutants are followed. Bioassays and other toxicity studies will also be conducted. Procedures, techniques, and equipment will be prepared and standardized prior to the cruise and a final project report prepared and submitted for the course grade. This course is periodically offered at the Marine Science field station at Wallops Island, Va., only during a summer session.

**BIOM 568 - Marine Ornithology (3 credits)**
Ornithology at the Wallops Island station introduces the student to the avian fauna of the seacoast and at the same time enables comparison with inland species to be found near the laboratory. In addition to the fieldwork providing visual and vocal identification, lecture material will include information on distribution behavior, physiology, and anatomy. This course is periodically offered at the Marine Science field station at Wallops Island, Va., only during a summer session.

**BIOM 569 - Field Methods in Oceanography (3 credits)**
This course provides students with a general background for a working knowledge of investigative techniques that are used to study the physical, biological, geological, and chemical parameters of the marine environment. Students learn to appreciate the scope of field studies through active participation in group projects and individual research efforts; those projects include planning and execution, analysis and interpretation of data, and presentation (written and verbal) of the results. This course is periodically offered at Wallops Island, Va., only during a summer session.

**BIOM 570 - Marine Biology (3 credits)**
This course is a study of plant and animal life in the marine environment. Emphasis will be placed upon physical and chemical factors that affect the marine environment and the ways in which various organisms have become adapted for exploiting marine resources. This course is periodically offered at the Marine Science field station at Wallops Island, Va., only during a summer session.

**BIOM 572 - Coral Reef Ecology (3 credits)**
This course investigates coral reef structure, formation, types and the relationship of reef organisms to their environment. Emphasis will be given to species diversity/identification, symbiosis, and effects of temperature, salinity, light, nutrient concentration, current predation, and competition on the abundance and distribution on coral reef organisms. This course will be offered at the Marine Science Consortium at Wallops Island, Va., with a portion taught in Honduras.

**BIOM 573 - Marine Mammals of the Atlantic (3 credits)**
The distribution, population size, physiology, evolution, adaptation, and ecological relationships of marine mammals will be studied. Laboratory and fieldwork will include an off-campus field trip to facilities studying marine mammals (Baltimore Aquarium and Woods Hole). This course will be offered at the Marine Science Consortium at Wallops Island, Va., during a summer session.

**BIOM 574 - Introduction to Oceanography (3 credits)**
This course is designed to familiarize the student with the marine environment and current developments in the marine sciences. Topics for study will include the physical parameters of the ocean, ocean basin topography, life in the sea, and resources in the ocean. This course is periodically offered during the summer sessions at the Marine Science field station at Wallops Island, VA.

**BIOM 575 - Behavior of Marine Organisms (3 credits)**
Discussion and observations are conducted on the influences of external and internal factors on the regulation and coastal behavior of organisms living in the marine coastal environment. This course is periodically offered during the summer sessions at the Marine Science field station at Wallops Island, VA.

**BIOM 576 - Marine Microbiology (3 credits)**
This course provides a survey of methods and concepts of marine microbiology. Attention will be given to technical aspects of sample collection, microbial ecology of the marine environment, enrichment culturing, methods of enumeration and identification, with emphasis on marine bacteria. This course is periodically offered during summer sessions at the Marine Science field station at Wallops Island, Va.

**BIOM 578 - Anatomy of Marine Chordates (3 credits)**
The basic structures of marine chordates will be studied by dissection in order to trace the important trends (and their functional significance) in the evolution of these structures within the various groups of marine chordates. This course is periodically offered at the Marine Science field station at Wallops Island, Va., only during a summer session.

**BIOM 579 - Ecology of Marine Plankton (3 credits)**
This course is a study of the phytoplankton and zooplankton in marine and brackish environments. Qualitative and quantitative comparisons will be made between the planktonic population of various types of habitats in relation to primary and secondary productivity. This course is periodically offered at the Marine Science field station at Wallops Island, Va., only during a summer session.

**BIOM 580 - Oceanography (3 credits)**
This course is an introduction to the physical, chemical, biological, and geological processes and interactions in the oceans. Topics include history of oceanography, charts and navigation, the physical and chemical properties of seawater, instrumentation and at-sea measurements, marine geology, beach processes, theory of continental drift, air-sea interactions, waves and ocean circulation, tides, plant and animal life in the seas, and marine ecology. This course is periodically offered at the Marine Science field station at Wallops Island, Va., only during a summer session.

**BIOM 581 - Marine Micropaleontology (3 credits)**
This course is designed for students majoring in either biological or geological sciences. The course will deal with modern, living representatives of microorganisms important in the fossil record.
Particular emphasis will be placed on the taxonomy, morphology, evolution, and ecologic affinities of the foraminifer (Sarcodina), but other groups, including the Radiolaria, Diatoms, and Ostracoda, will also be considered. Laboratory and field aspects of the course will include sample collection preparation and analysis. This course is periodically offered at the Marine Science field station at Wallops Island, Va., only during a summer session.

BIOM 582 - Field Studies in Oceanography (3 credits)
This is a three week session involving detailed planning and preparation for an oceanographic research cruise of approximately one week duration, the actual research cruise on board the R. V. “Annandale,” and the data-processing and final reporting of results. Demonstration of various shipboard sampling techniques and instrumentation will be given. Each cruise will deal with different aspects of marine science, i.e., 1) general oceanography, 2) marine biology, 3) marine geology, and 4) marine pollution and waste disposal. This course is periodically offered at the Marine Science field station at Wallops Island, Va., only during a summer session.

BIOM 583 - Wetland Ecology (3 credits)
This structure and function of coastal wetland ecosystems are emphasized. The ecological impact of humans on these wetlands is interrelated with management strategies. Field exercises are stressed. This course is periodically offered at the Marine Science field station at Wallops Island, Va., only during a summer session.

BIOM 587 - Tropical Invertebrates (3 credits)
Tropical Invertebrates emphasizes the systematics and ecology of tropical communities. A variety of collection and observation methods are used to sample tropical inshore and reef areas. This course is periodically offered at the Marine Science field station at Wallops Island, Va., only during a summer session.

BIOM 588 - Coastal Vegetation (3 credits)
The vegetation under the marine influence is identified, and the factors limiting and controlling the distribution of this vegetation is determined. This course is periodically offered during the summer at the Marine Science field station at Wallops Island, Va.

BIOM 589 - Physiology of Marine Invertebrates (3 credits)
Mechanisms and regulation of organ function in invertebrates with emphasis on homeostasis will be studied using live specimens from the marine environment. The unique adaptations of the marine invertebrates will be compared with general physiological principles. This course is periodically offered at the Marine Science field station at Wallops Island, Va., only during a summer session.

BIOM 590 - Marine Aquaculture (3 credits)
This course will include the theory and the practice of raising organisms for food and for the aquarium trade. Techniques of raising economically important organisms from the egg stage to marketable size and their food supplies will be studied. This course is periodically offered at the Marine Science field station at Wallops Island, Va., only during summer sessions.

BIOM 594 - Biology Of Molluscs (3 credits)
The Mollusca is the second largest group of animals and perhaps the most diverse in terms of morphological, ecological, and behavioral variations. This course offers an evolutionary, functional, and ecological approach to studying this important group of organisms. This course is periodically offered at the Marine Science field station at Wallops Island, Va., only during a summer session.

BIOM 599T - Marine Biology Graduate Transfer (1 - 6 credits)
Marine Biology Transfer Course.

ESU academic department decides how the course applies toward the degree.

**Clinical Exercise Physiology M.S.**

45 credits

**Purpose of Degree**
The purpose of the Clinical Exercise Physiology program is to provide classroom and laboratory experiences that take full advantage of current knowledge and trends in rehabilitation of populations with cardiac, pulmonary and metabolic disorders through assessment and exercise programming.

The M.S. in Clinical Exercise Physiology is offered in conjunction with six area medical centers, and offers traditional classroom and laboratory experiences as well as specialized clinical experiences. The Clinical Exercise Physiology program is typically restricted to the top 25 qualified applicants.

**National Accreditation**
The M.S. in Clinical Exercise Physiology is accredited by the Commission on Accreditation of Allied Health Educational Programs (CAAHEP).

### Admission Requirements

Please see the Exercise Science Department web page for information on specific admission requirements for this program.

### Final Graduation Requirement

Students must pass a written comprehensive examination at the conclusion of coursework.

### CEXP - Clinical Exercise Physiology

**CEXP 530** - Electrocardiography, Non-Invasive Cardiac Evaluations, and Implications in Exercise and Rehabilitation (3 credits)  
Basic electrocardiographic concepts of the normal EKG, arrhythmias, conduction defects, ischemia, infarction, hypertrophies, exercise, drug effects, and rehabilitation are discussed and demonstrated. Noninvasive procedures of echocardiography and thallium scanning and their importance in diagnosis and rehabilitation are presented. Clinical Exercise Physiology students only/permission of instructor.

**CEXP 531** - Clinical Exercise Physiology Laboratory I (3 credits)  
This lecture/lab experience is conducted in the Human Performance Lab and prepares students to participate in a variety of multidisciplinary clinical environments. Development of pertinent skills and discussion of relevant concepts pertaining to cardiac rehabilitation and exercise for other special populations are presented to prepare students for experiences at area hospitals and medical facilities. Clinical Exercise Physiology students only.

**CEXP 532** - Clinical Exercise Physiology Laboratory II (3 credits)  
This lecture/lab experience is conducted in the Human Performance Lab and continues the discussion and development of skills necessary to continue preparation of Clinical Exercise Physiology students for clinical rotations at area hospitals and medical facilities. Clinical Exercise Physiology students only.

**CEXP 533** - Health and Fitness Clinical Laboratory III (3 credits)  
Students observe and experience the programmatic, organizational, and administrative aspects of the Health and Fitness Program at Pocono Medical Center. The “wellness” concept is stressed by learning evaluation and measurement techniques as well as participation in educational and counseling settings.

**CEXP 536** - Organization & Administration of Cardiac Rehabilitation & Primary Prevention Programs (3 credits)  
This course analyzes general principles and procedures of cardiac and primary prevention programs. The organization and administration of specific programs will be discussed.

**CEXP 537** - Exercise Testing and Programming (3 credits)  
An in-depth analysis of exercise stress testing for cardiac patients, symptomatic and asymptomatic, is presented along with principles and practices of exercise programming. Traditional as well as more recently developed exercise testing and programming procedures are discussed. Clinical Exercise Physiology students only/permission of instructor.

**CEXP 538** - Pathophysiology of Sedentary Lifestyle in Chronic Disease (3 credits)  
The role of exercise in evaluation and treatment of chronic diseases will be presented in this course. Exercise's effect as an adjunct therapy on the pathophysiological characteristics of cardiac, pulmonary and metabolic diseases will be the primary focus. Traditional and newer drugs and their pharmacological actions are presented as they relate to rehabilitation and treatment. Clinical Exercise Physiology students only/permission of instructor.

**CEXP 539** - Coronary Heart Disease: Its Medical Diagnosis and Management (3 credits)  
This course presents a broad overview of coronary heart disease etiology, diagnosis, treatment, and prognosis related to cardiac rehabilitation. Students will be introduced to material that will serve as a foundation for advanced courses in pathophysiology, electrocardiography, stress testing, and clinical laboratories. Clinical Exercise Physiology students only/permission of instructor.

**CEXP 540** - Interventional Exercise for Special Populations (3 credits)  
Adaptations to the basic principles of exercise testing and programming for special populations with specific physical, physiological and/or mental challenges will be explored in this course. Identification of priority elements within the exercise and health domains derived from client/patient medical histories and development of appropriate exercise testing evaluations will be used to develop individualized exercise prescriptions that result in measurable positive outcomes.

**CEXP 558** - Clinical Exercise Specialist Workshop (1 credit)  
The Clinical Exercise Specialist Workshop will provide structured experiences in the classroom, laboratory, and gymnasium to improve knowledge and understanding of graded exercise testing, exercise prescription, and physical activities as used in prevention and rehabilitation. A review of the knowledge, skills, and objectives for the American College of Sports Medicine’s (ACSM) Exercise Specialist and Registered Clinical Exercise Physiologist certifications are covered.

**CEXP 586** - Clinical Internship I (3 credits)  
This course, offered in the Fall semester, is designed to provide the Clinical Exercise Physiology graduate student with practical, clinical skills/experiences in a variety of internship sites. Prerequisite: Permission of the department.

**CEXP 587** - Clinical Internship II (3 credits)  
This course, offered in the Fall semester, is designed to provide the Clinical Exercise Physiology graduate student with practical, clinical skills/experiences in a variety of internship sites. Prerequisite: Permission of the department.

**CEXP 588** - Clinical Internship II (3 credits)  
This course, offered in the Spring semester, is designed to continue the development of basic practical skills introduced in Clinical Internship I and to provide the student with the opportunity to practice advanced skills in clinical exercise physiology in a controlled medical setting. Prerequisite: Permission of the department.

**CEXP 595** - Clinical Exercise Physiology Seminar (3 credits)  
This course focuses on current concepts, controversies, and issues in clinical exercise physiology. The lecture-discussion format utilizes appropriate literature as sources for dialogue and pre-requisite courses serve as a basis for analyzing relevant theoretical and practical concerns. Clinical Exercise Physiology students only.
CEXP 599T - Clinical Exercise Physiology Graduate Transfer (1 - 6 credits)
Clinical Exercise Physiology Transfer Course
ESU academic department decides how the course applies toward the degree.

Communication
College of Arts and Sciences
Department of Communication
Monroe Hall

Assistant Professors:
Sarah Everett, Ph.D. (severett4@esu.edu)
Kristopher R. Weeks, Ph.D., (kweeks3@esu.edu)

Communication M.A.
ESU’s Master of Arts Degree in Communication is designed for working professionals seeking to advance in their careers, and for holders of bachelors’ degrees seeking to become college instructors or continue on for a doctorate.

Communication as an academic discipline is the study and practice of communication in all contexts including organizational communication, group communication and interpersonal communication, as well as social media, mass media, and public speaking.

Our M.A. in Communication builds on the history of the discipline—from the study of rhetoric in Greek and Roman Antiquity up through current scholarship—to prepare graduates for leadership positions requiring the mastery of communication skills and concepts.

Our M.A. enables graduates to excel in a wide variety of fields:
- Marketing
- Sales
- Social and Human Services
- Human Resources
- Social Media
- Publishing
- Start-up companies
- Government
- College/University Instruction
- Management Positions across All Fields

Several features of our M.A. allow students to customize their course selections and course schedules to fit their workplace and family needs:
- Rolling enrollment
- Online courses and face-to-face courses
- Degree completion in 15 months (with full-time status) or longer (with part-time status)
- Required Completion of Either a Master’s Thesis or a Master’s Project
- Optional Independent Study with a Professor in a Research Area of the Student’s Choice
- Optional Two Masters’ Courses from Another Department

PROGRAM OF STUDY
Option 1 (with Thesis): 30 credits
Option 2 (with Project): 33 credits

Entrance Requirements:
1. Three letters of recommendation
2. Writing sample - students applying for degree programs in Communication are required to submit a writing sample. The writing sample should demonstrate skills at sentence construction, spelling, interpretation, analysis and original thinking. Applicants can submit either an academic paper (minimum of 2400 words, maximum of 4000 words) or a professional writing sample (for example, from a web page, marketing campaign, department report, training manual, etc.). All submitted work must be the work of the applicant.
3. Interview with faculty

Option 1 (with Thesis): 30 credits
Option 2 (with Project): 33 credits

CMST 572 Master’s Professional Experience 3

One Master’s courses (3 credits total) either from Communication or from an outside department.

Subtotal: 6

Required Courses for Options 1 and 2:
CMST 510 Comparative Media 3
CMST 529 Rhetoric and Advocacy 3
CMST 540 Dialogue and Social Media 3
CMST 541 Law for Communication Professionals 3
CMST 545 Mass Media & Communication Ethics 3
CMST 560 Communication Theory 3
CMST 570 Quantitative Communication Research 3

Subtotal: 24

Additional Requirements:
Must maintain 3.00 GPA.

NOTE: CMST 572 is currently a Pass/Fail course.

15-MONTH PLAN FOR M.A. IN COMMUNICATION
Students can enroll in the program full time (9 credits per semester) or part time (at least 3 credits per semester). Students can complete the M.A. in 15 months by following the 15-Month Plan of Study.

Fall
CMST 545 Mass Media & Communication Ethics 3
CMST 560 Communication Theory 3
CMST 570 Quantitative Communication Research 3

Spring
CMST 510 Comparative Media 3
CMST 529 Rhetoric and Advocacy 3
CMST 577 Independent Study in Communication Studies 3

Summer 2
Option 1:
CMST 571 Thesis 1 - 6

Option 2:
CMST 572 Master’s Professional Experience 3

Plus two Master’s courses (6 credits total) either from Communication or from an outside department with approval from the student’s Master’s Degree Advisory Committee.
CMST 541 - Law for Communication Professionals (3 credits)
This course will expose students to media from around the world. Students will learn how to compare media content, formats, systems, and ownership structures in an effort to better understand underlying assumptions that help shape our perceptions of the world.

CMST 550 - Organizational Communication (3 credits)
This course explores different conceptualizations of organizations and their impacts on the structures, modes and contents of communication within various organizations. It also examines the effects of communication on an organization's decision making process, conflict management, and organizational change. Critical issues such as gender, race, technology and globalization are discussed within organizational contexts with the goal of preparing students to function effectively in an increasingly diverse and globalized work environment.

CMST 550 - Organizational Communication (3 credits)
This course will expose students to media from around the world. Students will learn how to compare media content, formats, systems, and ownership structures in an effort to better understand underlying assumptions that help shape our perceptions of the world.

CMST 551 - Communication Contexts (3 credits)
This course will examine one or more communication contexts to define the characteristics and understand the nature, meaning, and influence of communication within that specific context. Students will apply communication theories to understand communication contexts including but not limited to instructional, risk, crisis, public relations, health, political, sport, gender and sexuality, leadership, and environmental communication. Selected contexts will vary with each offering of the course based upon the professor's expertise.

CMST 569 - Qualitative Communication Research (3 credits)
This course will introduce graduate students to the standard practice of qualitative research in the communication discipline. Students will design and conduct a qualitative study related to their academic and/or professional interests. This course will address the following qualitative methods: Ethnography, narrative, phenomenological, grounded theory, and case study. Students will apply the standards that guide the discipline's understanding of research ethics and validity.

CMST 570 - Advanced Communication Research (3 credits)
This course allows the student, under the direction of a faculty member, to conduct a self-directed research project. A formal report of the project and findings will be submitted. This course is required for all students in the Master of Arts in Communication degree program. There are currently two grading options for this course: Pass or Fail. Mandatory by The Graduate College will be closely adhered to. Students may repeat this course for a maximum of six credit hours.

CMST 571 - Thesis (1 - 6 credits)
Under close supervision of a faculty advisor, students will engage in a rigorous scholarly endeavor that involves independent research, data analysis, report writing and the oral defense of a thesis. Guidelines mandated by The Graduate College will be closely adhered to. Students may repeat this course for a maximum of six credit hours.

CMST 572 - Master's Professional Experience (3 credits)
This course allows the student, under the direction of a faculty member, to design and implement a project examining an aspect of, or issue related, to human communication. A formal report of the project and findings will be prepared and submitted. This course is required for all students pursuing the non-thesis option. Prior completion of required coursework in the Master of Arts in Communication degree program is required. There are currently two grading options for this course: Pass or Fail. Prerequisite: CMST 510, CMST 529, CMST 541, CMST 545, CMST 550, CMST 560, CMST 570, CMST 577, and two additional graduate courses offered by departments other than the Department of Communication.

CMST 577 - Independent Study in Communication Studies (3 credits)
Under the direction of a qualified member of the departmental faculty, the student will pursue an advanced program of reading, study, and research related to the understanding and knowledge of communication studies.

Communication Sciences and Disorders
College of Health Sciences
Monroe Hall
570-422-3247
www.esu.edu/sppa

Communication Sciences and Disorders Faculty
Professor:
LuAnn Batson-Magnuson, Ph.D., CCC-SLP, (Imagnuson@esu.edu) - Graduate Coordinator
Associate Professors:
LuAnn Batson-Magnuson, Ph.D., CCC-SLP, (Imagnuson@esu.edu)
Communication Sciences and Disorders M.S.

59 credits

Purpose of degree:
The Department of Communication Sciences and Disorders offers a Master of Science in Communication Sciences and Disorders. The academic and clinical components of this degree are designed to meet the requirements of the American Speech-Language-Hearing Association’s Certificate of Clinical Competence in Speech-Language Pathology (CCC-SLP). Students will also become eligible for a Pennsylvania license in speech-language pathology. In addition, students may choose to complete requirements for the Instructional I Certificate (Teacher of the Speech-Language Impaired) in Pennsylvania schools (with the completion of certain education courses, a student teaching semester, and required state testing). The choice of the school certification option may lengthen the student’s degree program.

National accreditation
The Master of Science education program in Communication Sciences and Disorders at East Stroudsburg University is accredited by the Council on Academic Accreditation in Audiology and Speech-Language Pathology of the American Speech-Language-Hearing Association, 2200 Research Boulevard #310, Rockville, Maryland 20850, 800-498-2071 or 301-296-5700.

Outcome expectations of students and degree completion:
To meet the minimum competencies required by the Knowledge and Skills Assessment (KASA) of ASHA, and, upon completion of degree, to successfully pass the Praxis examination in speech-language pathology.

Mission statement of the department:
The mission of the Graduate Program in Communication Sciences and Disorders is to provide an academic and clinical education program that prepares graduates to earn the ASHA CCC-SLP, and serve as a clinical and professional resource to the community.

Special resources of the department:
- Twelve fully equipped therapy rooms
- A state of the art audiology suite
- Observation rooms for both parents and students
- State of the art voice and swallowing labs
- Dedicated clinical computer labs
- Class and study rooms

PROGRAM OF STUDY

Required Undergraduate Prerequisites:
- Child development or developmental psychology
- Statistics
- Speech science
- Introduction to audiology
- Introduction to communication disorders
- Speech and language development
- Phonetics or phonology
- Anatomy and physiology of speech/hearing mechanism

- Advanced Speech and Language Disorders
- Neurologic bases of communication (course or competency)
- Natural sciences (six credits), including 3 credits in biological science, the study of living organisms, and 3 credits in chemistry or physics
- Behavioral sciences (six credits)
- Composition/writing
- College level math course

Students who do not meet all of the criteria listed under undergraduate prerequisites above may gain conditional admission but must remedy any deficiencies before filing a plan of study with the Graduate School.

Typical time to finish:
Full-time students will complete the program in four semesters and two summer terms, which includes the first and second summer. Students choosing to complete the Pennsylvania Department of Education certification option are required to complete a 12-week externship in a school setting and SPPA 582 Management of School Programs.

Cohort
The class of full-time students which enters each fall semester moves through the program as a cohort.

NOTE: SPPA 550 Advanced Clinical Practicum (2 credits) must be taken at least 3 times for a total of 6 credits.

ILLUSTRATIVE PLAN OF STUDY:
The academic course work requirements are designed to meet the ASHA requirements for the CCC-SLP. Students may transfer up to six credit hours of appropriate graduate course work from another ASHA accredited program, subject to department approval.

No more than three graduate credits of course work with a grade of B- or lower may be on the transcript in order to be eligible for the degree. No more than one SPPA course may be repeated to improve the grade. SPPA 550 or SPPA 586 MUST be repeated if a student receives a grade of B- or lower. Further, any course in which a student earns a grade of “C” or lower must be repeated.
Plan of study for a full-time student
All below classes are required unless designated an elective.

Each student is required to meet the clinical education requirements for the ASHA CCC-SLP (400 hours of clinical observation and practicum) in order to receive the degree. All students will complete at least three practicum experiences at the ESU Speech and Hearing Center (through SPPA 550 Advanced Clinical Practicum) and two different off-campus practicum experiences (through SPPA 586 Advanced Clinical Externship). A variety of clinical externship sites are available. The program faculty must approve all off-campus practicum sites. Students who pursue the teacher certification option must complete two full-semester off-campus externships (one in the adult setting and one in the school setting).

Final graduation requirement
Submission of a portfolio documenting achievement of competencies required by the KASA.

Admissions requirements and deadlines
Students should apply through the Graduate & Extended Studies website at www.esu.edu. Application deadline is Feb. 1 for fall admission. All application documents, transcripts, and supporting material must be received no later than this date for consideration for admission. Spring admission is not offered. Admission decisions are generally made in March.

The following admission criteria will be applied:
- Bachelor’s degree, undergraduate prerequisites as listed above
- QPA 3.00 overall; QPA 3.00 in undergraduate major
- GRE scores
- Three letters of recommendation
- Statement of professional goals

Graduate Assistantships
Graduate assistantships are available through the department. These are awarded based upon merit and achievement to full-time students in the graduate program.

Graduate assistants do not teach classes, but complete projects and tasks assigned by professors.

The graduate assistantship is awarded for the first year of full-time study, with the possibility of extension through the first summer. Prospective students may wait to apply for graduate assistantships until offered acceptance for admission.

SPPA - Communication Sciences and Disorders

SPPA 500 - Special Topics (2 credits)
These courses are specific to current issues in the field of speech-language pathology. They are offered on a trial basis to determine the demand for and value of introducing them as part of the university curriculum.
Distribution: Advanced.

SPPA 521 - Augmentative/Alternative Communication (2 credits)
This course will address the issues surrounding the selection of augmentative/alternative communication for populations unable to communicate using speech due to motor, mental, or language disabilities. Various augmentative devices will be presented.
Distribution: Advanced.

SPPA 534 - Clinical Audiology (2 credits)
This course is designed to familiarize graduate-level speech pathology students with pathological processes of the peripheral and central auditory systems and how these affect communication. Students will know how to interpret audiometric test data. Prerequisite: SPPA 231, Introduction to Audiology.
Distribution: Advanced.

SPPA 535 - Auditory Based Communication Disorders (3 credits)
This course will address methods for educating children and adults with hearing losses and investigate current surgical and assistive intervention strategies. This will include a survey of hearing aids. Prerequisites: SPPA 231 or 534.
Distribution: Advanced.

SPPA 536 - Children and Adults with Cochlear Implants (2 credits)
This course explores speech and language, academic, and psychosocial outcomes for children and adults using cochlear implant technology. Students will explore the technology, history, expansion in candidacy requirements, current research, expected outcomes, parental support, collaborative models, assessment measures and intervention methods appropriate to each discipline’s scope of practice. This course is appropriate for teachers in general education, special education and deaf/hard of hearing specialization; audiologists and speech pathologists.
Distribution: Advanced.

SPPA 541 - Speech Sound Disorders (3 credits)
The course will focus on the practical application of phonological theory to techniques and procedures used for the assessment and intervention of
This course will address the nature, etiology, and clinical management of
language disorders in children from birth to age 21 years.  Distribution: Advanced.  Prerequisite: SPPA 101 or equivalent.

SPPA 543 - Language Disorders in Adults (2 credits)
This course will address the nature, etiology, and clinical management of
adults with acquired language disorders, with primary emphasis on
aphasia.  Prerequisite: SPPA 101 or equivalent.  Distribution: Advanced.

SPPA 544 - Fluency Disorders (2 credits)
This course is designed to provide a comprehensive analysis of the
theories of fluency disorders, diagnostic procedures, and treatment
strategies.  Behaviors related to fluency disorders will be examined.  Current
research literature for the management of fluency disorders will be
included.  Distribution: Advanced.

SPPA 545 - Acquired Cognitive-Communication Disorders (2 credits)
This course will address the nature, etiology, and clinical management of
individuals with acquired cognitive-communication disorders, with
primary emphasis on traumatic brain injury and dementia.

SPPA 546 - Voice Disorders (3 credits)
This course will address the nature, etiology, and clinical management
techniques for individuals who have voice disorders resulting from both
hyperfunctional and organic etiologies.  Alaryngeal communication also
will be addressed.  Prerequisite: SPPA 214.  Distribution: Advanced.

SPPA 550 - Advanced Clinical Practicum (2 credits)
This course is designed to provide supervised, advanced clinical practice in
applying diagnostic procedures and intervention strategies to
preschoolers through adults who have speech, language, and/or hearing
disorders.  Specific communication disorders may include phonology,
articulation, fluency, voice, language, and hearing.  Developing skills to
work with diverse linguistic populations will also be emphasized.  Clinical
experience will be available at the University Speech and Hearing Clinic.
Students must take this course at least three times for credit.  If a student
earns a grade of "C" or lower, this course must be repeated and a "B" or
better earned.  Anyone earning a second "C" will be dismissed from the
program.  Prerequisites: concurrent enrollment in SPPA 541, 549.
Distribution: Advanced.

SPPA 560 - Diagnostic Procedures (3 credits)
This course addresses the methods used for assessment procedures in
speech language pathology.  The student will gain experience in testing,
observation, decision making, and report writing.  Practice in writing and
interpreting a variety of reports used in the field of speech-language
pathology.  Planning goals for therapy from these reports will also be
emphasized.  Distribution: Advanced.

SPPA 562 - Dysphagia (3 credits)
This course addresses the nature, etiology, and clinical management of
dysphagia (swallowing disorders).  Distribution: Advanced.

SPPA 564 - Pediatric Dysphagia (2 credits)
This course addresses the nature, etiology, and clinical management of
swallowing disorders in pediatric clients.  Prerequisite: SPPA 562.
SPPA 584 - Research Methods & Materials (2 credits)
The course addresses research methodologies and problem solving related to speech pathology and audiology and its literature with an emphasis on application. Distribution: Advanced.

SPPA 586 - Advanced Clinical Externship (3 - 6 credits)
This course is designed to provide supervised, advanced clinical practice at off-campus sites, in applying diagnostic procedures and intervention strategies to preschoolers through adults who have speech, language, and/or hearing disorders. Specific communication disorders may include phonology, articulation, fluency, voice, language, and hearing. Developing skills to work with diverse linguistic populations will also be emphasized. This course may be repeated for credit. No student may graduate with a "C" in this course. If a student earns a "C" or lower, this course may be repeated only one time to improve the grade. A grade of "B" or better must be earned in this course for a student to be approved for graduation. Prerequisites: SPPA 550, (3) times; SPPA 560 and 562, completion of 30 credits in the Graduate SLP program.

SPPA 599T - Speech-Language Pathology Graduate Transfer (1 - 6 credits)
Communication Sciences and Disorders Transfer Course
ESU academic department decides how the course applies toward the degree.

Assistant Professor:
Jeyaprakash Chelladurai, Ph.D. (jchellandur@esu.edu)
MD Minhaz Chowdhury, Ph.D., (mchowdhur1@esu.edu)

Computer Science M.S.

30 credits – Thesis track
33 credits – Non-thesis track

Purpose of degree
The purpose of the degree is to prepare students for technical leadership roles which requiring greater knowledge, skills and responsibility than would the bachelor’s degree. The program provides advanced, in-depth instruction on cutting-edge computer science areas such as machine learning, parallel computing, and computer security. It develops skills, such as the ability to perform independent research, which are essential to success in the computer technology field. The program also provides excellent preparation for those wishing to enter a Ph.D. program.

Mission statement of the department
The mission of the Computer Science Department is to prepare students to become successful computer science problem solvers.

Special resources of the department
The Computer Science Department has modern, well-equipped laboratories and an active externally funded research program.

ILLUSTRATIVE PLAN OF STUDY

There are two options for the Master of Science in Computer Science: a thesis option and a non-thesis programming language option. For either option, the degree candidate must select a minimum of 18 credits of courses open only to graduate students.

Option I- Thesis Option
30 credits

Thesis Option: 30 credits
Required:

<table>
<thead>
<tr>
<th>Course</th>
<th>Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>CPSC 530</td>
<td>Software Engineering</td>
<td>3</td>
</tr>
<tr>
<td>CPSC 542</td>
<td>Operating System Design</td>
<td>3</td>
</tr>
<tr>
<td>CPSC 562</td>
<td>Theory of Computation</td>
<td>3</td>
</tr>
<tr>
<td>CPSC 570</td>
<td>Introduction to Research</td>
<td>3</td>
</tr>
<tr>
<td>CPSC 598</td>
<td>Thesis I</td>
<td>3</td>
</tr>
<tr>
<td>CPSC 599</td>
<td>Thesis II</td>
<td>3</td>
</tr>
</tbody>
</table>

For thesis option: in addition to the required courses, 12 credits of graduate CPSC electives (numbered 500 or higher) must be taken. Program must culminate in a successful research thesis defense.

Option II – Non-Thesis Option
33 credits

Project Option: 33 credits
Required:

<table>
<thead>
<tr>
<th>Course</th>
<th>Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>CPSC 530</td>
<td>Software Engineering</td>
<td>3</td>

<td>Research Project</td>
<td>3</td>
</tr>
</tbody>
</table>

For project option: in addition to the required courses, 18 credits of graduate CPSC electives (numbered 500 or higher) must be taken. Program must culminate in a successful research project presentation and a comprehensive oral exam.

Additional requirements
1. For either option, at least 50% of coursework (excluding CPSC 574, 577, 598, and 599) must be graduate only courses or cross-listed (undergraduate/graduate) courses with the majority of students in the course obtaining graduate credits.
2. If the student has taken CPSC 430 as an undergraduate, one of the following courses must be substituted for CPSC 530: CPSC 531, 533, 535 or 547.
3. Admissions requirements and deadlines: Graduate school requirements and deadlines apply.
4. The undergraduate prerequisite courses for full admission into the program are: CPSC 130, 131, 141, 144, 230, 232, 250, 321, 330, 340; MATH 140, 141, 220, 311, and 320.

No graduate student who has an A, B, or incomplete grade in a graduate course may re-enroll for credit in the course for a second time without approval of the department chair and the department graduate coordinator.

Admission requirement and deadlines
Graduate school requirements and deadlines apply.
**CPSC 523 - Discrete Optimization Algorithms (3 credits)**
This course introduces students to dynamic, linear, and integer programming algorithms. There will be programming practice involving the design, construction, and management of complex software systems. Top-down, structured design and programming will be emphasized. There will be practice in the construction of a large software system. This course is usually offered in the Fall. This is a programming intensive course.

**CPSC 525 - Expert Systems (3 credits)**
This course covers a number of advanced topics in the Internet and web programming domain including: client-server architectures, web services, service-oriented architectures, cloud computing, and mobile web applications. This is a programming intensive course which focuses on applying these technologies to design a web based application, with emphasis on optimizing the performance of the end product. The student will be required to write a term paper or execute a project which reflects deeper investigation of the topics covered in the course.

**CPSC 528 - Artificial Intelligence and Heuristic Programming (3 credits)**
This course is an introduction to artificial intelligence and heuristic programming techniques. Search strategies, games, heuristic mechanisms, and automated deduction will be studied. There will be programming practice. For graduate credit, a student will be required to write a term paper or execute a project which reflects deeper investigation of the topics covered in the course.

**Graduate Independent Study**
You may take Graduate Independent Study to fulfill part of your electives, which allows the student to pursue special topics beyond regular courses. It cannot cover the same topic as your project or thesis. The application must include a study plan and objectives, and needs to be approved by a supervising fulltime faculty member and the department.

**Graduate Assistantships**
Graduate Assistantships (GAs) are available through the department. These are awarded based upon merit and achievement to full-time students in the graduate program. GAs do not teach classes, but complete projects and tasks assigned by professors. The GA is awarded for the first year of full-time study, with the possibility of extension through the first summer. Prospective students should apply for a graduate assistantship at the time of original application to the program, using the application form online. For more information, contact the department chair and/or graduate coordinator at 570-422-3666.

**CPSC - Computer Science**

**CPSC 500 - Special Topics (3 credits)**
This course consists of involvement in ongoing network security tactics, techniques and procedures under direct professional supervision. This course may not be used as an elective in either the Computer Security major or the Computer Science major.

**CPSC 521 - Computer Graphics (3 credits)**
This course is an introduction to computer graphics. Basic principles for design, use, and understanding of graphics systems will be studied. Algorithms for creating and manipulating graphic displays and a standard programming language for their implementation will be presented. There will be programming practice. Prerequisite: Ability to program in "C" or "C++".

**CPSC 523 - Discrete Optimization Algorithms (3 credits)**
This course introduces students to dynamic, linear, and integer programming algorithms. There will be programming practice involving these algorithms.

**CPSC 525 - Expert Systems (3 credits)**
This course is an introduction to knowledge-based systems. Basic concepts, characteristics, architectures, and tools will be studied. Major paradigms for synthesis and analysis class systems, and exact and inexact reasoning systems will be discussed. Computational and knowledge engineering issues will be treated by case studies and there will be programming practice.

**CPSC 527 - Robotics (3 credits)**
This course is an introduction to robotics on a technical level. The history of robotics, computer-aided manufacturing, robot components, sensors, programming systems, applications, and future implications of robotics technology will be studied. There will be hands-on experience with a robot.

**CPSC 528 - Artificial Intelligence and Heuristic Programming (3 credits)**
This course is an introduction to artificial intelligence and heuristic programming techniques. Search strategies, games, heuristic mechanisms, and automated deduction will be studied. There will be programming practice. For graduate credit, a student will be required to write a term paper or execute a project which reflects deeper investigation of the topics covered in the course.

**CPSC 529 - Machine Learning (3 credits)**
This course is an introduction to techniques which enable software to improve its performance over time. History and classic experiments will be presented. Programs will be studied which perform rote learning, learn by being told, learn by analogy, learn from examples (induction), and learn by observation and discovery. There will be some programming practice.

**CPSC 530 - Software Engineering (3 credits)**
This course is a study of the principles of software engineering and various programming methodologies as applied to the development of large, complex software systems. Top-down, structured design and programming will be emphasized. There will be practice in the construction of a large software system. This course is usually offered in the Fall. This is a programming intensive course.

**CPSC 531 - Advanced Topics in Software Engineering (3 credits)**
This course will introduce the students to the current theoretical models and approaches used in the design, construction, and management of large, complex systems with long life cycles. Topic areas include requirements specification, design, configuration management, technical reviews, quality assurance, testing, and metrics. Case studies will be undertaken to compare the various approaches.

**CPSC 532 - Natural Language Processing (3 credits)**
This course is an introduction to natural language processing in Computer Science. There will be a review of elementary text, tree, and graph processing, and an introduction to syntactic and semantic processing. For syntax, Backus-Naur form grammars, sentence generation/recognition, augmented transition networks, and parsing strategies will be studied. For semantics, case grammar theory, and parsing strategies will be studied. There will be case studies of current systems as well as programming practice. For graduate credit, a student will be required to write a term paper or execute a project.

**CPSC 533 - Compiler Construction (3 credits)**
This course is an introduction to the methods and techniques involved in translating high-level languages, such as "C," into executable machine code. Lexical scanning, parsing, symbol table construction, object code generation, and optimization will be studied and a compiler will be written. For graduate credit, a student will be required to write a term paper or execute a project which reflects deeper investigation of the topics covered in the course.

**CPSC 534 - Compiler Construction II (3 credits)**
This course is an introduction to the methods and techniques involved in translating high-level languages, such as "C," into executable machine code. Lexical scanning, parsing, symbol table construction, object code generation, and optimization will be studied and a compiler will be written. For graduate credit, a student will be required to write a term paper or execute a project which reflects deeper investigation of the topics covered in the course.

**CPSC 535 - Parallel Computing (3 credits)**
This course is an introduction to parallel computing, a rapidly growing area of computer science. Principles of parallel computer architecture and parallel algorithms for various applications will be studied. There will be practice in parallel programming.

**CPSC 537 - Advanced Internet and Web Programming (3 credits)**
This course covers a number of advanced topics in the Internet and web programming domain including: client-server architectures, web services, service-oriented architectures, cloud computing, and mobile web applications. This is a programming intensive course which focuses on applying these technologies to design a web based application, with emphasis on optimizing the performance of the end product. The student program, using the application form online.
will be required to implement a team project using one or more of these technologies.
Distribution: Advanced.

**CPSC 541 - Computer Architecture (3 credits)**
This course involves the study of computer systems structure, organization, implementation, and performance. Von-Neumann machines, from the early EDVAC to current microprocessors will be considered. Parallel processors and other specialized architectures will also be studied.

**CPSC 542 - Operating System Design (3 credits)**
This course will thoroughly examine the principles of the design of computer operating systems. Emphasis will be placed on process allocation and scheduling, concurrent programming, memory management, device management, file management, and protection. How the principles are implemented in an existing operating system will be examined.

**CPSC 543 - Mobile Computing (3 credits)**
This course provides students with an introduction to the state of art in mobile computing. Topics will include the fundamentals of mobile computing: architecture and devices, operating systems, wireless networks, algorithms and protocols, location-aware and context-aware services, etc. The students are expected to design, develop, implement and evaluate mobile computing applications.
Distribution: Advanced.

**CPSC 544 - Real Time Systems (3 credits)**
This course is an introduction to the problems, concepts, and techniques involved in computer systems which must monitor and control external devices or events. This includes techniques and hardware for data collection and control functions. Applications discussed will include microprocessor-controlled intelligent devices and process control. For graduate credit, a student will be required to write a term paper or execute a project which reflects deeper investigation of the topics covered in the course.

**CPSC 545 - Networking and Data Communications (3 credits)**
This course gives students a foundation in the study of data communications and computer networking. Topics covered will include basic data communications, Open Systems Interconnect (OSI) Model, Local Area Networks (LAN) and common communications standards. For graduate credit a student will be required to write a term paper or execute a project which reflects deeper investigation of the topics covered in the course.

**CPSC 546 - Embedded Systems (3 credits)**
This course provides students with an introduction to contemporary aspects of embedded-system hardware and software. Topics will include the fundamentals of embedded systems: hardware and software architectures, design methodologies and tools, communication algorithms and protocols. The students are exposed to case-studies of various embedded applications: vehicle networks, space system, networked sensors, personal computing devices and home appliances, etc.
Distribution: Advanced.

**CPSC 547 - Distributed Object Programming (3 credits)**
This course is intended for students who are interested in understanding and developing application projects with an object-oriented programming language such as Java in distributed computing environments. The course begins with a brief introduction to object technology with programming and introduction to computer networking, and is followed by understanding and developing programs in the server/client model, Remote Method Interface (RMI), and Common Object Request Broker Architecture (CORBA). For graduate credit a student will be required to write a term paper or execute a project which reflects deeper investigation of the topics covered in the course.

**CPSC 550 - Algorithmic Graph Theory (3 credits)**
This course is an algorithmic approach to the mathematical theory of graphs and their applications. Path problems, covers, network flows and other problems will be formulated in graph theoretical terms and solutions will be programmed. This course is usually offered in alternate years. This is a programming intensive course.

**CPSC 553 - Database Systems (3 credits)**
This course is an introduction to the management of large volumes of interrelated data through integrated database management software. Topics discussed will include relationships between data items, effects of redundancy and database design. Representative examples of the relational and network approaches to database management will be examined. For graduate credit, a student will be required to write a term paper or execute a project which reflects deeper investigation of the topics covered in the course.

**CPSC 554 - Data Structures and Algorithm Analysis (3 credits)**
This course will analyze a variety of algorithms from the standpoint of what data structures are used and how they are implemented. Students will be introduced to the classes of NP-hard and NP-complete problems and to the theories of complexity analysis.

**CPSC 556 - Theory of Computation (3 credits)**
This course will analyze a variety of algorithms from the standpoint of what data structures are used and how they are implemented. Students will be introduced to the classes of NP-hard and NP-complete problems and to the theories of complexity analysis.

**CPSC 557 - Independent Study (3 credits)**
This course consists of doing research for and writing of a report concerning a topic of interest in computer science. The student will investigate an area or problem and assimilate, integrate, and present the findings in a scholarly seminar. This course may be taken more than once with approval of the department.

**CPSC 571 - Computer Cryptography (3 credits)**
This course provides a study of security in communications and electronic computing for graduate students. Topics include symmetric and asymmetric ciphers, cryptographic data integrity algorithms, and network and internet security.

**CPSC 572 - Theory of Abstract Languages (3 credits)**
This course is an introduction to sets of strings of symbols, their representations, structures, and properties. Abstract languages, formal grammars, productions, the Chomsky hierarchy, generation and recognition mechanisms for languages, and the relationship of formal languages to automata will be studied.

**CPSC 574 - Research Project (3 credits)**
This course will introduce the student to the professional (open) literature as well as other sources in computer science. The student will investigate an area or problem and assimilate, integrate, and present the findings in a scholarly seminar. This course may be taken more than once with approval of the department.

**CPSC 574 - Research Project I (3 credits)**
This course is a continuation of CPSC 574 Research Project I

**CPSC 577 - Independent Study (3 credits)**
Under the auspices of a qualified member of the faculty, the student pursues study and research related to professional knowledge and
understanding in Computer Science. Topics must be established prior to enrollment.

**CPSC 580 - Advanced Data Science (3 credits)**

This course provides an exposure to advanced methods and technologies in data science, including exploratory data analysis, validation strategies, data leakage, metrics optimization, hyperparameter optimization, advanced feature engineering, and ensembling. Students will develop a project involving real-world data on a large scale, and communicate the results to a non-technical audience. For graduate credit a student will be required to write a term paper which reflects deeper investigation of the topics covered in the course.

**CPSC 598 - Thesis I (3 credits)**

This course consists of doing research for the writing of a thesis concerning a significant problem in computer science. Under the guidance of an advisor, the student will analyze, design, evaluate, and apply new research findings or technological advances, develop a final product, and present the work in a formal oral presentation. Distribution: Advanced. Prerequisite: CPSC 570.

**CPSC 599 - Thesis II (3 credits)**

This course is a continuation of the research work done in CPSC 598. Distribution: Advanced. Prerequisite: CPSC 598.

**CPSC 599T - Computer Science Graduate Transfer (1 - 6 credits)**

Computer Science Transfer Course

ESU academic department decides how the course applies toward the degree.

**Elementary Education**

**College of Education**
Department of Early Childhood & Elementary Education
Stroud Hall 209
570-422-3356
www.esu.edu/gradeled

**Early Childhood and Elementary Education Faculty**

**Graduate Coordinator:**
Craig Wilson, Ph.D. (cwilson@esu.edu)

**Professors:**
- Alberto Alegre, Ph.D., (aalegre@esu.edu)
- Craig Wilson, Ph.D., (cwilson@esu.edu)

**Associate Professors:**
- Nurun Begum, Ed.D., (nbegum@esu.edu)
- Alison Rutter, Ed.D., (arutter@esu.edu)
- Andrew Whitehead, Ed.D, Chair, (awhitehead@esu.edu)

**Assistant Professor:**
Laureen E. Nelson, Ph.D., (lnelson5@esu.edu)

**Masters of Education in Elementary Education**

**Purpose of Degree:**
The M.Ed. in Elementary Education is designed for early childhood, elementary, and middle level teachers who want to advance their careers and enhance their classroom instruction. Teachers who already have their graduate degrees are also welcome to take selected courses in the program for professional development. Participants in this comprehensive program will collaborate with other professionals as they learn how to create engaging learning environments based on current research, theory and practice. The entire program may be taken online or on campus, depending on student preference.

**PROGRAM REQUIREMENTS:**

This program requires 30 credits for the Master of Education Degree, including 9 credits of core courses, 12 credits of ELED elective courses, and 9 credits of elective courses. All of the core courses and all of the ELED elective courses are taught through dual delivery, which allows students to choose either the online classroom or the campus classroom. The campus sections of the fall and spring semester courses are taught in Bethlehem at the Lehigh Valley Center, while the campus sections of the summer courses are taught in East Stroudsburg on the main campus. Many of the elective courses are also offered online, allowing students to complete the entire program via distance education.

**PLAN OF STUDY:**

30 credits

*Required Core Courses - 9 credits required*

Students are required to take the three Core Courses listed below. These courses are designed to address foundational topics related to teaching in early childhood, elementary, and middle level classrooms.

<table>
<thead>

**Subtotal: 12**

*Additional Elective courses - Select 9 credits (3 courses)*

Select any three courses from ELED, PSED, SPED, REED and/or DMET, 500 level or above.

*(Students select any two graduate courses from Elementary Education, Professional and Secondary Education, Special Education, Reading, and/or Digital Media Technology departments. The Graduate Coordinator will help you select the courses that are most closely matched to your needs and interests.)*

**Subtotal: 6**

**GRADUATE ASSISTANTSHIPS:**

Graduate assistantships are available through the department. These are awarded based upon merit and achievement to full-time students in the graduate program. Graduate assistants do not teach classes, but complete projects and tasks assigned by professors. The graduate assistantship is awarded for the first year of full-time study, with the possibility of extension through the first summer. Prospective students should apply for a graduate assistantship at the time of original application to the program, using the application form online. Full consideration will be given to those students who meet the application deadlines. Candidates will be selected and interviewed by the department chair and/or graduate coordinator.
Entrance Requirements:
Candidates must have a minimum overall GPA of 3.0 and a minimum 3.0 GPA in the major in their undergraduate program. Candidates must submit a Graduate College Application, a Professional Goals Statement, and two professional letters of recommendation in order to be accepted into the program.

Contacts:
For more information regarding program advising or program admission, please contact the individuals listed below:

Program Advising
Dr. Craig Wilson, Graduate Coordinator,

Program Admission
Mr. Kevin Quintero
Associate Director of Graduate & Extended Studies
kquintero@esu.edu

ELED - Elementary Education

ELED 500 - Special Topics (3 credits)
Designed as another route to teacher certification, the program offers a full year of field experience in elementary and middle schools. Student professionals in the program are assigned to schools as full-time interns and in addition participate in group seminars, field trips, and a program of various assignments planned in cooperation with the program coordinator.

ELED 502 - Understanding the Developing Child (3 credits)
This course deals with the principles and theories of human development; dimensions of growth; cognitive, social, and personality development of the child; the impact of sociocultural change on the home and school as these relate to the developing child.

ELED 505 - Managing the Learning Environment (3 credits)
The course will emphasize classroom management from the viewpoint of effective teaching. Specific discipline models will be analyzed and evaluated. Students will assess their philosophies in regard to classroom management practices and discipline models.

ELED 506 - Second Language Acquisition and Development (3 credits)
This course reviews the field of second language acquisition (SLA) in order to provide students with an understanding of the way in which second languages are learned and acquired. The course will survey various theories of second language acquisition. The course will also examine the impact of internal and external variables on second language acquisition and development. Some topics include: the role of learning environment for language acquisition, explanations for different success among second language learners, variations in second language use, and the effect of classroom instruction in second language acquisition.

ELED 507 - Developing Cultural Awareness and Sensitivity (3 credits)
This course focuses on the principles of cultural diversity including: second language acquisition, historical and current sociocultural theories, language and cultural sensitivity and issues related to cultural interaction and communication in school and community. Topics addressed include basic competencies of culturally and linguistically effective programs and instructional strategies appropriate for multicultural student populations. Distribution: Advanced.

ELED 508 - Applied Linguistics for ESL Teachers (3 credits)
This course is designed to acquaint students with fundamental knowledge of general linguistics in order to teach English language learners in K-12 setting. It introduces the origins and nature of language, examines the language systems, and how meaning is structured. In particular, the course will focus on the core areas of linguistics and interdisciplinary aspects. The core linguistics will include phonetics (the study of speech sounds), phonology (the sound system of languages), morphology (the internal structure of words), syntax (the sentence structure), and semantics (the study of word and sentence meanings). The interdisciplinary areas will incorporate language and sociolinguistics (language in social contexts meanings). The interdisciplinary areas will incorporate language and sociolinguistics (language in social contexts).
Distribution: Advanced. Prerequisite: ELED 506 AND ELED 507.

ELED 509 - Instructional Methods, Materials, and Assessments for ELL (3 credits)
This course will offer an overview of a variety of materials that will benefit ELL students in the acquisition of the English language as well as in gaining knowledge in the content areas. This course will be an in-depth study of how to design ESL reading and writing classes and how to create instruction and assessment materials for these classes based on sound pedagogical principles. Much of the course will include hands-on experience, discussion, and practical application of course topics. A key component of the course is the student’s participation in volunteer ESL teaching.
Distribution: Advanced. Prerequisite: ELED 506 AND ELED 507 AND ELED 508.

ELED 510 - English Language Learner (ELL) Family and Community Matters (2 credits)
This course will explore the development of effective community partnerships and the integral role of English Language Learner (ELL) families within communities and schools. Discussion will include the different community contexts of ELL families and how they affect family functioning. This course will emphasize the understanding of how ELL students’ learning is influenced by individual experiences, talents, disabilities, gender, language, culture, family, and community values. The students will be challenged to apply knowledge of the richness of contributions from our diverse linguistic and cultural society to your teaching field.
Distribution: Advanced. Prerequisite: ELED 506 AND ELED 507 AND ELED 508 AND ELED 509.

ELED 511 - State and Federal Issues Regarding ELL Students (2 credits)
This course will include specific local, state, and federal laws governing ESL programs and services that will be discussed in detail. The impact, application of the laws, and strategies for complying with them in the K-12 setting are major areas of focus. Students will explore the various ways in which issues of language intersect with issues of the law. We will study, through the analysis of specific pieces of legislation and specific court cases, how issues related to the ELL students are answered. The course will also focus on the ways in which legislation, policy and jurisprudence affect minority language cultures in the US schools.
Distribution: Advanced. Prerequisite: ELED 506 AND ELED 507 AND ELED 508 AND ELED 509 AND ELED 510.

ELED 512 - Integrating the Arts into Elementary Education (3 credits)
This course deals with integrating all the arts into the elementary school curriculum with or without arts specialists. It concerns itself with education in, through, and about the arts for aesthetic and motivational purposes.
ELED 515 - Individualizing Instruction in Elementary Education (3 credits)
This course will examine individual differences, types of learning styles, and various strategies which are used to individualize instruction. Students will work on individual projects which can be applied directly to their own teaching assignment. Although emphasis is placed on elementary education, many topics will apply to the K-12 classroom.

ELED 517 - Creative Teaching Methods for the Advanced Student (3 credits)
This course examines current research in creativity. Students are encouraged to investigate their own creative process and develop strategies for enriching teaching strategies. Best teaching practices for enhancing creativity in the classroom are studied.

ELED 520 - Current Trends in Elementary School Language Arts (3 credits)
This course examines current elementary school language arts curricula, newer approaches to organization of elementary schools and classrooms for implementation of learning in the language arts; modern techniques of teaching, listening, speaking, and written communications; investigation of research studies in elementary school language arts.

ELED 521 - Children's Literature for Advanced Students (3 credits)
This course presents a critical evaluation of materials which will meet the needs of teachers and children in the use of literature in the curriculum. Special attention is paid to the social and personal issues in the child's life and the use of bibliotherapy in the elementary classroom. Emphasis is also placed on building a literature-based classroom curriculum.

ELED 523 - Diversity in Children’s Literature (3 credits)
This course enhances the learners’ knowledge of the uses of children’s literature within the elementary classroom. Literature representative of diverse cultural and ethnic groups will be explored, evaluated, and utilized. Prerequisite: Completion of an undergraduate or graduate course in children’s literature or permission of the professor.

ELED 525 - Creative Drama (3 credits)
This course develops knowledge and skills in using creative drama and theatre activities with children to enhance and assess dramatic learning ability. Dramatic behaviors, theatre skills, imagery ability, imagination, group skills, and the connection between imagination and action are actively explored.

ELED 530 - Constructivist Approach to Teaching Science (3 credits)
An advanced course which will enable teachers of PreK-8th grade science to update their content backgrounds and enhance their teaching of science through the use of inquiry-oriented activities. Students will participate in model lessons and then design and field test their own unit of instruction.

ELED 531 - Life Science Workshop for Elementary Teachers (3 credits)
This course is designed to enhance the teaching of life science concepts in the elementary schools. Participants will experience a variety of hands-on activities and develop a set of activity-based materials for use in their own classrooms. Instruction in environmental education will also be provided. (Workshop Course)

ELED 532 - Physical Science Workshop for Elementary Teachers (3 credits)
This course is designed to enhance the teaching of physical science concepts in the elementary schools. Participants will experience a variety of hands-on activities and develop a set of activity-based materials for use in their own classrooms. There will also be opportunities to explore the use of emerging technologies such as microcomputer-based laboratories and interactive multimedia. (Workshop Course)

ELED 533 - Designing and Implementing Programs for Professional Development (3 credits)
This workshop will emphasize the knowledge and skills needed for teachers to participate in designing and facilitating their own professional development programs. Teaching styles and activities will be explored, while participants utilize self-assessment to evaluate their needs and establish goals. Strategies for implementation will be discussed. (Workshop Course)

ELED 534 - Seminar in Elementary School Science (3 credits)
Current issues, problems, research, and theoretical and philosophical aspects of elementary science education are discussed. Prerequisite: Approval of instructor.

ELED 535 - Classroom Diversity (3 credits)
This course encourages educators to identify their own values, prejudices, and goals; to examine their thoughts and/or misconceptions about culturally diverse communities. Designed to help them create school climates that celebrate diversity and meet the needs of students of different races, ethnicities, gender, and ability levels.

ELED 538 - Workshop for Elementary Teachers to Teach the Metric (SI) System (3 credits)
This course encourages educators to identify their own values, prejudices, and goals; to examine their thoughts and/or misconceptions about culturally diverse communities. Designed to help them create school climates that celebrate diversity and meet the needs of students of different races, ethnicities, gender, and ability levels.

ELED 540 - Constructivist Approaches to teaching Mathematics (3 credits)
This course places emphasis on recent developments in the teaching of PreK-8th grade mathematics. Additional emphasis will be placed on standards-based teaching and the evaluation of mathematics programs.

ELED 542 - Current Trends in Elementary School Mathematics (3 credits)
An investigation and analysis of current local, state, and national mathematics projects and their implications are made. Prerequisite: ELED 540 Mathematics in the Elementary School.

ELED 544 - International Collaborative Learning Project (1 - 3 credits)
This course enables students to participate in a unique learning event in a foreign country. Students will have the opportunity to experience different styles in teaching and learning, how reflective teaching practice can become an integral part of the teaching process, and how teacher education reform occurs in different contexts through seminars and observations. The class will deal with exploring differences and similarities between cultures and philosophies. Prerequisite: Permission of instructor.

ELED 545 - Bookarts (3 credits)
This course examines the history of writing, paper and book making and the current artistic form of BookArts. Students will create a wide assortment of books as they explore the unique relationship between visual and verbal literacies. Instructional strategies to connect, set up, integrate, document and evaluate BookArts in the classroom will be delineated.

ELED 548 - Reality Therapy in the Classroom (3 credits)
The workshop provides opportunities for teachers to explore the reading process from a variety of current viewpoints and to help the participants develop their own personal classroom teaching programs to put these ideas into practice. The course is designed to stimulate new thinking, to have participants experience activities that can be used with students, and to give participants confidence in creating personalized reading activities.
and materials for their own students. Prerequisites: ELED/PSED 581 or ELED/PSED 582. (Workshop Course)

ELED 549 - Reducing Classroom Conflict (3 credits)
This workshop is designed to provide participants with skills in developing pathways to build strength and success in themselves and their students. It focuses on specific classroom activities that will help develop a climate for effective self-discipline and positive classroom interaction. Prerequisite: ELED 581. (Workshop Course)

ELED 550 - Current Trends in Elementary School Social Studies (3 credits)
Participants in this course will review current research in social studies education and discuss current trends in relation to national standards. Participants will also utilize social studies learning strategies and develop activities consistent with current literature.

ELED 553 - Teaching and Motivation (3 credits)
The course provides educators with the theory and skills to motivate students to learn and to accelerate their academic achievement. Brain function and dominance will be reviewed in light of how these processes result in different student learning styles. Participants will build teaching strategies to deal with learning styles. (Workshop Course)

ELED 555 - The Clinical Supervision of Elementary Student Teachers (3 credits)
Course participants will examine the objectives of the student teaching program and relate them to the specific roles and needs of both student teachers and cooperating teachers. The primary emphasis of the course will be on developing the skills necessary to work with student teachers using the clinical supervision model. Participants will become effective at accurately collecting data on classroom verbal interaction, teacher non-verbal behavior, questioning techniques, movement patterns, student involvement, student behavior, time allocation, classroom management, and teacher effectiveness.

ELED 556 - Cooperative Learning - Learning Teams in Action (3 credits)
This course allows educators to explore methods useful in establishing cooperative learning in the classroom. Cooperative learning provides the educators with a framework for maximizing student achievement through the use of critical thinking, problem solving skills, and teamwork. The course will introduce the educator to the fundamentals of control theory as it applies to cooperative learning, and will provide the educator with the opportunity to develop a teaching plan or implementing cooperative learning in the classroom. (Workshop Course)

ELED 557 - Reducing Stress in the Classroom (3 credits)
This course explores ways to manage stress, establish realistic goals, and develop relaxation techniques so that stress is minimized through creative thinking and effective classroom management. The course provides techniques for reducing classroom stress in both teachers and students. Prerequisites: PSED 161, 242. (Workshop Course)

ELED 559 - Enhancing Self-Esteem (3 credits)
This course will introduce educators to elements of self-esteem and how those elements can be used to establish an atmosphere where high self-esteem and motivation can flourish. This course takes theory of self-esteem and translates it into practice. It also emphasizes basic human relations and interpersonal skills necessary to create a classroom environment conducive to the teaching/learning process. (Workshop Course)

ELED 560 - Adaptive Education for Exceptional Students (3 credits)
This course is designed for the teacher of the non-specialized class. Emphasizes the skills and understanding necessary for the following: recognition of various forms of exceptionality in children; establishment of good interpersonal relationships; selection and adaptation of suitable curriculum materials, content, and methodology; and awareness of proper procedures in referring exceptional students for specialized help.

ELED 569 - Research Laboratory in Early Childhood and Elementary Education (1 credit)
The preparation of the research proposal includes the development of purpose and design of the proposed research problem or thesis. This course must be repeated until "satisfactory" grade is earned; failure to design an acceptable proposal results in "no record" which carries no credit or penalty. Prerequisite: Completion or concurrent enrollment in ELED 570.

ELED 570 - Introduction to Research (3 credits)
This course is an introduction to the basic principles and major methods used in investigation of educational problems. Attention is given to the significant steps involved in compiling a research proposal. Required of all graduate students in the degree program. In compliance with the Graduate School policies, students are advised to complete this course early in their program. Prerequisite: ELED 502 — Elementary Education majors only.

ELED 571 - Research Problems (1 credit)
This course involves the solution of a problem that requires the utilization of research methodology. Emphasis is placed upon the kinds of problems that frequently confront the elementary school teacher in the normal teaching situation. Required of all students in the Non-Thesis program. It may be repeated with permission of the chair of the program faculty. It requires prior completion of ELED 570.

ELED 572 - Thesis I (3 credits)
This focuses on the procedure, analysis, and writing of the thesis and includes an extensive study of a problem that merits the utilization of thesis-level investigative skills.

ELED 573 - Internship Elem Chi Ed (6 credits)
This focuses on the procedure, analysis, and writing of the thesis and includes an extensive study of a problem that merits the utilization of thesis-level investigative skills.

ELED 574 - Problems and Issues in Early Childhood Education (3 credits)
This course consists of a review of recent research in early childhood education and an examination of current controversial issues, with an attempt at synthesis.

ELED 575 - Graduate Seminar (3 credits)
This course explores models of assessment and evaluation in education. It also develops the framework and focus for graduate students' degree program comprehensive evaluation. Prerequisites: ELED 570 and completion of at least 18 graduate credits. Prerequisite: ELED 570 and 18 credits.

ELED 577 - Independent Study (3 credits)
Under the auspices of a qualified member of the faculty of the Graduate School the student pursues a pattern of readings, study, and research related to professional knowledge and understanding in elementary education. Topics should be established prior to enrollment. Prerequisite: Approval of the department chair.

ELED 582 - Discipline in the Classroom (3 credits)
This workshop is designed for participants to take part in learning activities that will enable them to develop positive techniques for preventing and handling student behavior problems. (Workshop Course)
ELED 585 - Planning For Change (3 credits)
The goals of quality education will be analyzed as a basis for curriculum change. The relationship between affective education and cognition will be reviewed and assessed through a group process. Systems for change will be developed utilizing personal influence and power. The workshop also helps participants acquire additional skill in expanding their knowledge and use of Reality Therapy in the educational environment.

ELED 589 - Organization and Administration of Early Childhood Programs (3 credits)
This course emphasis is on organization and administration of high-quality preschool programs; including supervising, staffing, housing, equipment, programs, records, financing and budgeting, and parent involvement. The course is directed toward prospective early childhood teachers and day care center personnel.

ELED 592 - Curriculum Approaches and Design (3 credits)
This course will center on a survey of approaches to curriculum with emphasis on alignment and fundamental principles of curriculum design. Historical and contemporary materials related to the curriculum approaches will be used to illustrate trends and innovations.

ELED 599T - Elementary Education Graduate Transfer (1 - 6 credits)
Elementary Education Transfer Course
ESU academic department decides how the course applies toward the degree.

Exercise Science

College of Health Sciences
Department of Exercise Science
Koehler Fieldhouse
570-422-3302
www.esu.edu/gradexsc

Exercise Science Graduate Faculty
Graduate Coordinator:
Chad Witmer, Ph.D., (cwitmer@esu.edu)

Professors:
Donald M. Cummings, Ph.D., (dcummings@esu.edu)
Shala E. Davis, Ph.D., Chair, (sdavis@esu.edu)
Gregory B. Dwyer, Ph.D., (gdwyer@esu.edu)
Gavin Moir, Ph.D., (gmoir@esu.edu)
Chad Witmer, Ph.D., (cwitmer@esu.edu)

Associate Professors:
Matthew Miltenberger, Ph.D., (mmiltenber@esu.edu)
Shawn Munford, Ph.D., (smunford@esu.edu)

Instructor:
Brandon Snyder, M.S., (bsnyder16@esu.edu)

Exercise Science M.S.

Purpose of Degree
The M.S. program is available to those students who wish to pursue study of a specialized focus within the body of knowledge underlying Exercise Science. Two options are available to students: a thesis option or an internship option.

The thesis option is designed to provide students with valuable experience in the design and implementation of research within the field of Exercise Science with the goal of subsequently pursuing doctoral study.

The internship option supplements classroom and laboratory studies with an extensive internship that allows students to experience applied aspects of Exercise Science. The internship option is designed for those students who wish to become practitioners in the field of Exercise Science.

National Accreditation
The M.S. in Exercise Science is accredited by the Commission on Accreditation of Allied Health Educational Programs (CAAHEP).

PROGRAM OF STUDY

Required courses
- EXSC 511 Motor Learning and Control 3
- EXSC 513 Evaluation and Applied Statistics in Exercise Science 3
- EXSC 524 Advanced Biomechanics Laboratory Techniques 1
- EXSC 525 Psychology of Human Performance 3
- EXSC 526 Biomechanics of Human Performance 3
- EXSC 527 Physiology of Human Performance 3
- EXSC 528 Advanced Exercise Physiology Laboratory Techniques 1
- EXSC 547 Advanced Topics in Sports Nutrition and Exercise 3
- EXSC 565 Seminar in Strength and Conditioning 3
- EXSC 570 Introduction to Research 3
- CEXP 536 Organization & Administration of Cardiac Rehabilitation & Primary Prevention Programs 3

Thesis Option
- EXSC 563 Neuromuscular Adaptations to Exercise 3
- EXSC 572 Thesis Seminar 3

Internship Option
- EXSC 510 Advanced Exercise Assessment and Programming 2
- EXSC 586 Field Experience and Internship 1 - 6

NOTE: Additional coursework may be selected above aforementioned requirements to support research interests.

Admission Requirements
Please see the Exercise Science Department web page for information on specific admission requirements for this program.

Final Graduation Requirement
Completion of a thesis or internship is required, and all graduate students in the Exercise Science Department are expected to demonstrate computer literacy.

Graduate Assistantships
Graduate assistantships are available through the department. These are awarded based upon merit and achievement to full-time students in the graduate program. Graduate assistants do not teach classes, but complete projects and tasks assigned by professors. The graduate assistantship is awarded for the first year of full-time study, with the possibility of extension through the first summer. Prospective students should apply for a graduate assistantship at the time of original application to the program, using the application form online.

Advanced Sport Performance Certificate

PROGRAM OF STUDY

Required courses
- EXSC 591 Advd Philosophy of Performance Training & Coaching 3
- EXSC 592 Advd Principles of Performance Enhancement for Performance Coaching 3
- EXSC 594 Advanced Seminar in Sport Performance Coaching 3
EXSC 595 - Advance Sport Performance Coaching Practicum 3
Students outside of the major may be advised to complete additional coursework.

EXSC - Exercise Science

EXSC 510 - Advanced Exercise Assessment and Programming (2 credits)
This course will address exercise assessment and programming for healthy and special populations (ie: children, elderly, and individuals with cardiovascular disease, hypertension, metabolic syndrome, dyslipidemia, etc.). Established advanced exercise assessment methodology and techniques commonly used in exercise science will be presented. Case studies focusing on healthy individuals and diseased populations will be reviewed to enhance understanding.
Distribution: Advanced.

EXSC 511 - Motor Learning and Control (3 credits)
This course is designed to provide the student with a conceptual model of motor learning and control developed within a multidisciplinary framework. The theoretical aspects of motor learning and control drawn from the extant literature will provide a foundation upon which the student can build and apply directly to practical examples from exercise science to develop appropriate practices that optimize motor skill learning.
Distribution: Advanced.

EXSC 513 - Evaluation and Applied Statistics in Exercise Science (3 credits)
This course will include statistical techniques for analyzing and interpreting cognitive, psychomotor and affective variables in the exercise science. Use of these evaluative tools will be applied to the field of human movement.

EXSC 516 - Advanced Kinesiology and Pathokinetics (3 credits)
This course will address basic statistical techniques for analyzing and interpreting cognitive, psychomotor and affective variables in the exercise science literature. These evaluative tools will be applied to program evaluation, competency-evaluation, and outcome assessment.

EXSC 520 - Sports Medicine (3 credits)
This course is a survey of topics included under the broad umbrella of sports medicine, representing both scientific and clinical branches of the field. Emphasis is placed on factors which can enhance performance, promote, and protect the welfare of participants in exercise, dance, recreational, and competitive sport

EXSC 524 - Advanced Biomechanics Laboratory Techniques (1 credit)
This course is a survey of topics included under the broad umbrella of sports medicine, representing both scientific and clinical branches of the field. Emphasis is placed on factors which can enhance performance, promote, and protect the welfare of participants in exercise, dance, recreational, and competitive sport

EXSC 525 - Psychology of Human Performance (3 credits)
This course treats the research and theoretical consideration of the psychological variables in human performance, with special reference to the body self in movement, and the psychology of sport

EXSC 526 - Biomechanics of Human Performance (3 credits)
This course focuses on the study of basic physical laws relative to human motor performance. Factors such as equilibrium, linear motion, angular motion, ballistic movement, and fluid mechanics are considered as they affect internal body mechanics of the human and his/her interaction with environmental objects

EXSC 527 - Physiology of Human Performance (3 credits)
Emphasis is given to study of metabolism and cardiovascular and respiratory human physiology.

EXSC 528 - Advanced Exercise Physiology Laboratory Techniques (1 credit)
The course is designed to provide exercise physiology laboratory experiences related to the metabolic, cardiovascular and respiratory systems. Laboratory experiences will include advanced measurement techniques in maximal exercise testing, supramaximal exercise, lactate and glucose measurement, and anaerobic assessment.

EXSC 541 - Environmental Exercise Physiology (3 credits)
This course includes a study of the physiological responses of the human body to maximal and submaximal exercise in various environmental conditions including: heat, cold, varying humidity, air pollution, altitude (hypobaria), and hyperbaria. Focus will be on general and specific mechanisms of adjustment of circulation, respiration, fluid regulation, and metabolism. Both theoretical and laboratory experiences will be provided.

EXSC 547 - Advanced Topics in Sports Nutrition and Exercise (3 credits)
This course is designed to provide the student with the advanced knowledge and understanding of contemporary topics in sports nutrition and exercise metabolism as they relate to sports and exercise performance. Topics will include macronutrients, micronutrients, sports drinks, hydration, disordered eating, herbal and commercial nutritional supplements, meal planning, and exercise metabolism as they relate to sports competition and physical activity

EXSC 551 - Aerobic Fitness Workshop (2 credits)
This workshop provides a theoretical and practical framework for measurement and evaluation of aerobic fitness across the lifespan. Field tests that can be administered by exercise professionals are practiced, analyzed, discussed, and validated by laboratory demonstration and participation. Concepts and application of aerobic fitness principles are viewed in light of present-day and future needs.

EXSC 552 - Exercise and Weight Control Workshop (2 credits)
This workshop will focus on the role of exercise in regard to its positive influences on weight control. The hazards and implications of being overweight will be studied. Techniques for evaluating energy balance and planning for weight loss programs are discussed in light of established scientific principles and procedures. Exercise along with its dietary counterpart are analyzed to determine their relative importance in the weight-loss regime. Facts and fallacies are discussed, and opportunities for self-evaluation of leanness and fitness provides practical as well as theoretical experience.

EXSC 553 - Reducing Coronary Heart Disease Workshop (2 credits)
This workshop examines exercise as a means of evaluation, prescription, and diagnosis of the major threat to health in the United States today: heart disease. Recent studies with their findings and implications will be reviewed. The scientific basis for recommended exercise and associated behavior will provide information with regard to children and adults of both sexes on reducing heart disease risk. Rehabilitative exercise programs for heart victims will focus on accepted training principles and the necessity for changing life styles. Prevention rather than treatment for heart disease will be stressed.

EXSC 554 - Anaerobic Training Workshop (2 credits)
This workshop provides a theoretical and practical framework for measurement and evaluation of anaerobic conditioning, flexibility, strength training, and plyometrics. Field and laboratory tests that can be administered by athletic coaches, teachers, and fitness professionals are practiced, analyzed, and discussed.
EXSC 556 - Certified Strength and Conditioning Specialist Workshop (1 credit)
This workshop will provide structured experiences through instruction in the specific theoretical and practical concepts of strength and conditioning as they relate to the National Strength and Conditioning Association certification requirements. Upon completion of the workshop the student will be eligible to take the Certified Strength and Conditioning Specialist exam offered through the NSCA.

EXSC 557 - Physical Activity as Medicine Workshop (2 credits)
Students will learn to be “Exercise is Medicine” coaches. This workshop will focus on strategies for increasing physical activity of those individuals with several “hypokinetic” diseases including diabetes, pulmonary disease and heart disease.
Distribution: Advanced.

EXSC 560 - Physical Activity Across the Lifespan (3 credits)
This course will explore the scientific evidence relating the role of physical activity and exercise across the lifespan. The risks and benefits of physical activity from birth to death will be explored. The developmental processes of maturation and aging will be considered. The role of physical activity in various health and disease processes associated with development and maturation will be discussed.

EXSC 561 - Experimental Exercise Physiology (3 credits)
This course will explore the scientific evidence relating the role of physical activity and exercise across the lifespan. The risks and benefits of physical activity from birth to death will be explored. The developmental processes of maturation and aging will be considered. The role of physical activity in various health and disease processes associated with development and maturation will be discussed.

EXSC 563 - Neuromuscular Adaptations to Exercise (3 credits)
This course is designed to study skeletal muscle physiology as it relates to exercise, and the physiological adaptations that occur following alterations in mechanical loading. Advanced concepts relating to skeletal muscle adaptation during exercise training and inactivity are treated.

EXSC 565 - Seminar in Strength and Conditioning (3 credits)
The relationship of exercise, rest, fatigue, nutrition, and heredity to physical performance is studied. Current methods of physical conditioning will be discussed. Programs for fitness and athletic conditioning are developed and discussed.

EXSC 570 - Introduction to Research (3 credits)
This course provides an orientation to graduate study and research in health education and movement studies and exercise science. This seminar is designed to acquaint the graduate student with the methods and materials of graduate study and scientific inquiry. It is required of all graduate students in the degree program. Permission of Graduate Coordinator

EXSC 571 - Independent Research Problem (1 credit)
This course utilizes selected research techniques to investigate a specific professional or academic problem. It includes preparation and presentation of a formal report. The student must consult adviser well in advance of registration. This course is required for all students in the research or project program and it may be repeated with permission.

EXSC 572 - Thesis Seminar (3 credits)
This course utilizes selected research techniques to address a specific professional or academic problem. It includes preparation and presentation of a formal report. Students must consult their adviser well in advance of registration. This course is required for all students in the research or project program and it may be repeated with permission.

EXSC 574 - Research Laboratory (1 credit)
The preparation of the research proposal including the development of the purpose and design of the proposed research problem or thesis is the focus. This course must be repeated until “satisfactory” grade is earned.

EXSC 575 - Advanced Program Design for Sports Performance (2 credits)
This class will provide the students with knowledge of designing training programs for athletes involved in strength and power sports, repeat-sprint/intermittent sports, and endurance sports. The scientific principles underlying the design of training programs will be identified and implementation of long-term training programs will be presented using real world examples from specific sports. The students will be able to design long-term training programs that are both safe and effective for a variety of athletes.

EXSC 577 - Independent Study (3 credits)
Under the auspices of a qualified member of the faculty, the student pursues a pattern of readings, study, and research related to professional knowledge and understanding in health or physical education. Topics should be established prior to enrollment.

EXSC 586 - Field Experience and Internship (1 - 6 credits)
This course is designed to provide the student with practical experience with public or private organization in some related aspect of physical education and/or sports medicine. Students will coordinate their course work acquired at East Stroudsburg University with specific field experience. This program will be supervised by a member of the Exercise Science Department.

EXSC 591 - Advanced Philosophy of Performance Training & Coaching (3 credits)
This course is designed to highlight the essential administrative roles of the athletic performance coach. The focus of this course will include the following: theories related to performance training and coaching, effective communication skills, implementation of various strategies for teaching skills, and recognizing ethical behavior related to multiple situations related to sport.

EXSC 592 - Advanced Principles of Performance Enhancement for Performance Coaching (3 credits)
This course is designed to provide the performance coach with advanced principles related to enhancing athletic performance through scientific methodologies. The focus of this class will include the following: physiology of exercise specifically metabolic pathways for energy, classification of sport and exercises by metabolic pathways, concepts to improve speed, agility, power, strength, endurance, and flexibility, periodization planning for sport specific training, valid and reliable testing procedures for evaluating performance, and practical techniques for sport training.

EXSC 593 - Advanced Therapeutic and Physiological Foundations for the Coach (3 credits)
This course is designed to reinforce advanced anatomical and physiological principles related to athletic performance. The focus of this class will include the following: structural kinesiology specifically function of muscles, bones, and joints of the human body in relation to sport performance, development and growth of athletes across the lifespan, biomechanical analysis of sport in relation to performance and injury prevention, and evaluation and treatment techniques for common injuries associated with sport.

EXSC 594 - Advanced Seminar in Sport Performance Coaching (3 credits)
This course is designed to explore current advanced topics in performance coaching and serves as a research based class to allow students to
discover acts of best practice and use an evidence based approach (current research, student’s skills, athlete capabilities) to deliver the most effective outcomes related to performance enhancement. This class will be student driven with discussions and related research presentations on current topics within sport performance coaching.

EXSC 595 - Advance Sport Performance Coaching Practicum (3 credits)
This course is designed to provide students with a practical performance coaching experience, and some basic coaching theoretical foundations in the sport of their choice. The student will be afforded the opportunity to explore specific performance tactics related to contest and practice management, and develop specific practice strategies to develop sports performance related skills.

EXSC 599T - Exercise Science Graduate Transfer (1 - 6 credits)
Exercise Science Transfer Course.
ESU academic department decides how the course applies toward the degree.

General Science

General Science Faculty

Geography
Dr. Shixiong Hu, Ph.D., Graduate Program Coordinator, (shu@esu.edu)

Biological Sciences
Dr. Terry Master, Ph.D. (TMaster@esu.edu)

Chemistry
Dr. Michael Doherty, Ph.D., Chair, (derb@esu.edu)

Physics
Dr. Robert Cohen, Ph.D., Chair, (robert.cohen@esu.edu)

General Science M.S.

Purpose of Degree
The Master of Science in General Science degree program (Application of GIS & RS concentration) will provide a unique opportunity for students to combine Geotechnology, the environmental sciences and other related fields in the context of multidisciplinary study. It will also train the students with professional skills they need in career development, such as environmental communication, written communication, project management, and leadership.

The students should expect to learn the latest Geotechnology (GIS, RS and GPS) and how to apply this technology to the environment-related fields and careers. Students in this program will gain hands-on skills via field data collection, laboratory analysis, environmental modeling, and internship experiences for future careers. Job opportunities are growing and diversifying as geospatial technologies prove their value in areas such as environmental science. The degree will meet the increasing demands of geotechnology in related governmental agencies, the private sectors and local, regional and national NGOs.

National Affiliation
The M.S. in General Science - Application of GIS/RS in Environmental Science has received national affiliation as a Professional Science Master’s (PSM) degree.

PROGRAM OF STUDY
30 credits — Thesis Program
34 credits — Non-thesis Program
36 credits — Concentration in Application of Geographic Information System/Remote Sensing (GIS/RS) in Environmental Science

Thesis Option — 30 Semester Hours
Required
GSCI 570 Introduction to Research 3
GSCI 572 Thesis I 3
XXX ___ Major Field and Related Electives 24

Non-Thesis Option — 34 Semester Hours
Required
GSCI 570 Introduction to Research 3
GSCI 571 Independent Research 1 - 6
XXX ___ Major Field and Related Electives 29-30

Concentration in Application of Geographic Information Systems/Remote Sensing (GIS/RS) in Environmental Science — 36 Semester Hours
A. Physical and Environmental Science (9 - 12 Semester Hours):
Two from the following courses:
BIOL 528 Biogeography 3
BIOL 543 Stream Ecology 3
BIOL 563 Conservation Biology 4
BIOM 502 Marine Evolutionary Ecology 3
BIOM 560 Marine Ecology 3
BIOM 565 Management of Wetland Wildlife 3
BIOM 583 Wetland Ecology 3
GEOG 522 Watershed Hydrology 3
GSCI 543 Environmental Quality 4
GSCI 549 Environmental Science 3

1-2 free electives within Physical and Environmental Sciences
B. Geo-Technology (9 Semester Hours):
GEOG 502 Applied Geographic Information Science (GIS) 3
GEOG 503 Advanced Geographic Information Science (GIS) 3
GEOG 511 Introduction to Remote Sensing 3

C. Professional Skills (9 Semester Hours)
Oral and Written Communication skill course:
ENGL 515 Computers And Writing 3

One from the following Leadership and Team Building skill courses:
POLS 501 Public Administration: Theory, Scope and Methods 3
POLS 537 Problems in Public Administration 3
POLS 566 Budgeting & Finance 3
POLS 567 Public Personnel Administration 3
MGT 502 Organizational Strategy 3
MGT 503 Organizational Leadership 3

Or
Other approved electives
D. Internship (6 - 9 Semester Hours)
One or more of the following:
BIOL 586 Field Experience and Internship 1 - 12
Or
BIOM 569 Field Methods in Oceanography 3
Or
BIOM 582 Field Studies in Oceanography 3
Or
GEOG 586 Field Experience and Internship 3 - 9

Additional Requirements:

Admission Requirements:
• B.A or B.S degree in environmental studies, geography, GIS, earth science, marine science, environmental chemistry, recreation and leisure, and any other environment-related major.
• Test of English as a Foreign Language (TOEFL) or International English Language Testing Systems (IELTS) scores are required for all international students unless their undergraduate degree is from an English language institution. (It must be documented that English is the only language of instruction in the institution.) The required scores on the TOEFL are 560 (paper-format test), 220 (computer-format test) or 83 (internet based test).

Completion Requirements:
Successful completion of GRE (i.e. 450 for verbal, 650 for quantitative, and 4 for writing)

GSCI - General Science

GSCI 500 - Special Topics (3 credits)
This course is designed to provide an introduction to different components of the hydrologic cycle at the watershed scale. The emphasis will be on surface processes and watershed responses to perturbations such as climate change and land use/land cover change. This course will cover the fundamental principles of hydrology and their applied uses. The ultimate goal of this course is to help students understand and learn how to mitigate water-related environmental problems, such as floods, droughts and water pollution.
Distribution: Advanced.

GSCI 501 - Laboratory and Classroom Techniques (3 credits)
This course is designed toward the practical aspects of effective science instruction. It deals with the means and devices employed in the instructional process. Simulated classroom situations are developed and prepared by the student representative of imaginative science teaching.
Distribution: Advanced.

GSCI 502 - Contemporary Topics in Science (3 credits)
This course deals with the nature and theoretical basis of recent noteworthy advances in science. Interdisciplinary in design, the course draws its content from the various disciplines of the natural sciences. Emphasis is placed on topics being reported on in professional journals in advance of their textbook presentations.
Distribution: Advanced.

GSCI 504 - Introductory Astrophysics (3 credits)
This is a course in modern astrophysics stressing the application of physical concepts to the study of the heavens. Topics will include radiative transfer, astrophysical radiative processes, stellar structure and evaluation, compact stars and black holes, galactic and extragalactic astrophysics, and cosmology. Prerequisites: PHYS 121, PHYS 361, and MATH 141.
Distribution: Advanced.

GSCI 512 - Contemporary Topics in Biochemistry (3 credits)
This course will elaborate on the chemical principles fundamental to understanding biochemical processes and their regulation. Topics covered may include enzyme mechanisms and kinetics, molecular aspects of signal transduction, organization and maintenance of the genome and regulation of gene expression and recombinant DNA techniques. Reading of current journal articles, class discussions, and oral presentations will be integral components of this course. As a contemporary topics course, students may take this course during a different semester for an additional three credits. Prerequisite: Students should have had a previous course in biochemistry, such as CHEM 315 or 317.
Distribution: Advanced.

GSCI 515 - Computational Physics (3 credits)
This course will elaborate on the chemical principles fundamental to understanding biochemical processes and their regulation. Topics covered may include enzyme mechanisms and kinetics, molecular aspects of signal transduction, organization and maintenance of the genome and regulation of gene expression and recombinant DNA techniques. Reading of current journal articles, class discussions, and oral presentations will be integral components of this course. As a contemporary topics course, students may take this course during a different semester for an additional three credits. Prerequisite: Students should have had a previous course in biochemistry, such as CHEM 315 or 317.
Distribution: Advanced.

GSCI 520 - The Development of Modern Physical Science (3 credits)
This course examines the past works and philosophical thought of noted physical scientists. Emphasis is placed on the nature of scientific discovery and the processes of science.
Distribution: Advanced.

GSCI 522 - Thermal Physics (3 credits)
This course deals with heat and thermodynamics and application to special systems; kinetic theory of gases and statistical mechanics; fluctuation and transport processes.
Distribution: Advanced.

GSCI 523 - Advanced Electronics (4 credits)
This course deals with heat and thermodynamics and application to special systems; kinetic theory of gases and statistical mechanics; fluctuation and transport processes.
Distribution: Advanced.

GSCI 524 - Physical Measurement (3 credits)
This course is designed for those in industry and for students whose responsibilities include or will include measurement (inspection, design, etc.) and for in-service teachers whose work will be enhanced by greater insight into these areas which are included in the syllabus.
Distribution: Advanced.

GSCI 525 - Electromagnetic Theory (4 credits)
An application of Maxwell’s equations to problems in electrostatics and electrodynamics, including boundary value problems with dielectrics and conductors is presented.
Distribution: Advanced.

GSCI 526 - Electromagnetic Theory II (4 credits)
Students study the propagation of electromagnetic waves, wave guides, antenna theory, and physical optics.
Distribution: Advanced.

GSCI 528 - Theoretical Physics (3 credits)
Students study the propagation of electromagnetic waves, wave guides, antenna theory, and physical optics.
Distribution: Advanced.

GSCI 530 - Energy Resources (3 credits)
This course develops the history of present energy dependence of the United States and some foreign countries. It will also develop the underlying physics concepts. A number of future scenarios are
investigated numerically and carefully. Use is made of the WAES report and the ECOMSETS computer projections.
Distribution: Advanced.

GSCI 531 - Organic Chemistry (3 credits)
This course deals with the theoretical and practical aspects of mechanisms and stereochemistry as applied to the reactions and syntheses of organic compounds.
Distribution: Advanced.

GSCI 533 - Physical Organic Chemistry (3 credits)
This course is a survey of physical organic chemistry including reaction mechanisms, structure reactivity correlations, and organic photochemistry. Laboratory experiments will stress the use of modern instrumental techniques in the elucidation of structures and mechanisms.
Distribution: Advanced.

GSCI 536 - Medicinal Chemistry (3 credits)
This course is a survey of the various classes of pharmacological agents being utilized in the treatment of various disorders. Included are considerations of mode of action, design and synthesis, and current efforts in the field of development of new drugs. Graduate students will be required to complete a paper in addition to other assignments.
Distribution: Advanced.

GSCI 541 - Analytical Chemistry I: Quantitative (4 credits)
This course is a study of the theories and methods of gravimetric and volumetric analysis with a brief introduction to the use of some modern analytical instrumentation. Precision and accuracy in laboratory work and training in chemical calculations are emphasized.
Distribution: Advanced.

GSCI 542 - Inorganic Chemistry (3 credits)
Structural and bonding principles, type of reactions, reaction mechanisms and their chemical interpretation will be introduced. The descriptive chemistry of selected elements and their inorganic compounds will be discussed.
Distribution: Advanced.

GSCI 543 - Environmental Quality (4 credits)
This course deals with the chemical aspects of environmental quality. Emphasis is placed on the identification, chemical characterization, and controls of pollutants. Topics include air, water, pesticides, food additives, and solid waste.
Distribution: Advanced.

GSCI 546 - Seminar: Curricular Trends in Science (3 credits)
This course is a study of the current effort in science curriculum design. Major curricular projects in the various sciences are explored in terms of philosophy, objectives, and content selection. Research and pertinent periodical literature in the curricular aspects of instruction in the sciences are examined.
Distribution: Advanced.

GSCI 547 - Workshop in Science Teaching (1 credit)
This course is directed toward the practical aspects of effective science instruction, providing for firsthand participation in real or simulated teaching situation. The course is characterized by an updating of the student’s background in specific areas of science teaching and the development of the skills, theory, and techniques necessary to implement recent curricular developments.
Distribution: Advanced.

GSCI 548 - Teaching Science for Involvement (3 credits)
This is an activity-oriented course aimed toward the development of competence and confidence in the science underlying practical applications. A major concern is the development of science literacy through group interaction and experience with practical equipment. The course is designed for those interested in both secondary and elementary school science teaching.
Distribution: Advanced.

GSCI 549 - Environmental Science (3 credits)
This course deals with the chemical and physical aspects of the identification, characterization, and controls of pollutants. Topics include air, water, radiation, pesticides, food additives, solid waste, and toxic substances. Prerequisites: CHEM 124, 126 or equivalent.
Distribution: Advanced.

GSCI 551 - Selected Topics: Chemistry (3 credits)
This course deals with the chemical and physical aspects of the identification, characterization, and controls of pollutants. Topics include air, water, radiation, pesticides, food additives, solid waste, and toxic substances. Prerequisites: CHEM 124, 126 or equivalent.
Distribution: Advanced.

GSCI 552 - Selected Topics: Physics (3 credits)
This course deals with the chemical and physical aspects of the identification, characterization, and controls of pollutants. Topics include air, water, radiation, pesticides, food additives, solid waste, and toxic substances. Prerequisites: CHEM 124, 126 or equivalent.
Distribution: Advanced.

GSCI 553 - Selected Top Biology (3 credits)
This course deals with the chemical and physical aspects of the identification, characterization, and controls of pollutants. Topics include air, water, radiation, pesticides, food additives, solid waste, and toxic substances. Prerequisites: CHEM 124, 126 or equivalent.
Distribution: Advanced.

GSCI 554 - Selected Topics: Earth Science (3 credits)
Emphasis is placed upon the development of scientific content and theory. The course work will include coverage of traditional course offerings from within the disciplines most relevant to the contemporary aspects of the science, complemented by a critical view of certain of the discipline’s basic tenets.
Distribution: Advanced.

GSCI 555 - Physical Chemistry (3 credits)
This course is a study of selected topics in theoretical chemistry including quantum mechanics, group theory and symmetry, and chemical bonding including molecular orbital theory. The use of computer programs in the illustration of chemical principles will be emphasized. Cross-listed as CHEM 452. Graduate students must complete a research paper or project. Prerequisite: CHEM 353 or permission of instructor.
Distribution: Advanced.

GSCI 561 - Analytical Chemistry II: Instrumental (4 credits)
This course is a study of principles and applications of modern analytical methods with emphasis on physiochemical measurements. Topics include potentiometry, polarography, chromatography, conductometry, and spectroscopy.
Distribution: Advanced.

GSCI 565 - Polymer Chemistry (3 credits)
The basic concepts of polymer chemistry are introduced in this course. Topics included will be the mechanics and kinetics of polymerization, the synthesis of polymers and the relationships between molecular structure, conformation and morphology of polymers and their chemical and physical properties.
Distribution: Advanced.
**GSCI 570 - Introduction to Research (3 credits)**
This course is an orientation to graduate study and research designed to acquaint the student with the methods and materials of graduate study. It is required of all graduate students in a degree program.
Distribution: Advanced.

**GSCI 571 - Independent Research (1 - 6 credits)**
This course deals with the utilization of selected research techniques to attack a specific problem. Preparation and presentation of a formal report. It is required of all students in the non-thesis program. Requires prior or concurrent completion of GSCI 570.
Distribution: Advanced.

**GSCI 572 - Thesis I (3 credits)**
This course focuses on the development of the thesis problem and design of experiment, collecting of data, analysis, and organization of data and writing of the formal thesis report. Requires prior or concurrent completion of GSCI 572.
Distribution: Advanced.

**GSCI 573 - Thesis II (3 credits)**
This course deals with the utilization of selected research techniques to attack a specific problem. Preparation and presentation of a formal report. Requires prior or concurrent completion of GSCI 572.
Distribution: Advanced.

**GSCI 577 - Independent Study (3 credits)**
Under the auspices of a qualified member of the faculty of the Graduate School, the student pursues a pattern of readings, study, and research related to professional knowledge and understanding in general science. Topics should be established prior to enrollment. Prerequisite: Permission of the chair of the graduate faculty in general science.
Distribution: Advanced.

**GSCI 580 - Radioisotopes (3 credits)**
Studies of the origin of nuclear emissions, properties of nuclear radiation will be discussed. Measurements of their properties such as absorption and attenuation coefficients will be made. Skill in the use of the single and multichannel analyzers will be developed and used in determining nuclear spectra. Reading of current publications in the field will be essential to the essence of this course. An experimental project or paper will be required of all graduate students.
Distribution: Advanced.

**GSCI 581 - Quantum Physics (3 credits)**
The wave nature of the universe and its probabilistic interpretation are considered. Topics include postulates of Quantum mechanics, the one-dimensional oscillator, the hydrogen atom, the Pauli principle, and atomic spectroscopy.
Distribution: Advanced.

**GSCI 591 - Special Problems in Physics (3 credits)**
This course introduces the student to detailed and complete treatments in problems which require expertise from several areas.
Distribution: Advanced.

**GSCI 593 - Atomic & Nuclear Phys (3 credits)**
This course examines the quantum-mechanical basis of atomic and nuclear structure, and studies the phenomena of atomic and nuclear transitions. Topics covered: Nuclear models, nuclear decay, nuclear reactions, elementary particles.
Distribution: Advanced.

**GSCI 599T - General Science Graduate Transfer (1 - 6 credits)**
General Science transfer course.
ESU academic department decides how the course applies toward the degree.
1. A Bachelor’s degree from an accredited college or university.
   a. Candidate must submit official transcripts to the Graduate School.
2. An undergraduate minimum grade point average of 2.50 (out of a possible 4.00) and a 3.00 in the area of specialization during the junior and senior years. Students who do not meet these standards or who have not completed a minimal undergraduate health education curriculum may be required to complete additional qualifying work. **Conditional admission will be granted if the candidate does not meet requirements for full admission. Continuation of graduate study is dependent upon completion of stated deficiencies.**

The Graduate faculty for the MS in Health Education are committed to using multiple sources of information to ensure fairness in the admissions process. In conjunction with a Bachelor’s degree from an accredited college or university and aforementioned required GPA, for a complete admissions file, students must also submit the following items in order to be considered for full-time admissions status:

1. Submit 3-5 verifiable professional or scholarly references
   a. References should be able to speak to characteristics important for success in graduate study, including, but not limited to, the following: reasoning, critical thinking, and the ability to communicate effectively. References might also include knowledge about relevant and related professional experiences.
2. Submit a professional resume describing relevant experiences and skills.
3. Submit a personal letter indicating why you are interested in obtaining a MS in Health Education, your professional goals, and why or how you believe this program will assist you in meeting those professional goals.

**Graduate assistantships**

Graduate assistantships are available through the department. These are awarded based upon merit and achievement to full-time students in the graduate program. Graduate assistantships are also available throughout the university.

Graduate assistants do not teach classes, but engage in experiences related to advanced learning, research and scholarship, or professional service and leadership in the field.

The graduate assistantship is awarded for the first year of full-time study, with the possibility of extension through the first summer (maximum of four semesters of study). Prospective students should apply for a graduate assistantship at the time of original application to the program, using the application form provided by the Graduate School or apply online.

**HLTH - Health**

**HLTH 500 - Special Topics (3 credits)**

This course is designed to provide the candidate with an opportunity to work with a Health Education Content Specialist during the student teaching experience. The course will enhance the candidate’s ability to understand and maximize the relationship between the disciplinary subject matter and pedagogy. The candidate will implement units of instruction that are supportive of all students

**Distribution: Advanced.**

**HLTH 501 - Public Health Preparedness (3 credits)**

This course addresses public health preparedness and response to various natural disasters and emergencies, including, public health infrastructure, risk communication, chemical biological, nuclear, radiological and explosives, terrorism threats and health policy and legislation.

**Distribution: Advanced.**

**HLTH 505 - Non-Medical Healing Arts (1 credit)**

This course examines the role of Osteopathy, Acupuncture, Faith Healing, and other health services which deviate from or compete with "Medicine" in relation to health education. The social and legal issues concerning these services, reliability of sources of information about the services, and the role of the health education in utilization of these services are studied. Focus of the course will be on the development of guidelines for utilization of these services.

**Distribution: Advanced.**

**HLTH 506 - Analysis of Health Information (1 credit)**

This course is an overview of the use and misuse of statistics, the manipulation of human needs and drives, and the provision of false and misleading information by providers and suppliers of health products and services. All major sources of information related to consumer health will be examined for inherent biases and common forms of misinformation.

**Distribution: Advanced.**

**HLTH 507 - Trends In Dieting (1 credit)**

This course is a study of the issues surrounding popular health foods and diets. The desirable and undesirable qualities of "natural" and "organic" foods, "exotic" foods, and nutrient enriched foods are examined. The advantages and disadvantages of diets emphasizing specific nutrients or types of foods, crash diets, drug aided diets, and diets for specific purposes are also studied. Focus of the course is on development of guidelines for evaluating information and sources of information.

**Distribution: Advanced.**

**HLTH 508 - Women’s Health Concerns (3 credits)**

This course is designed to address unique health concerns of women in today’s society. Specific topics such as alcoholism, anorexia nervosa, pre-menstrual syndrome (PMS), domestic violence, child abuse, rape, menopause and many others will be included.

**Distribution: Advanced.**

**HLTH 509 - Skills for Applied Community Health Practice (2 credits)**

The purpose of this course is to provide public health education professionals with a broad set of research and communication skills and techniques needed to practice culturally competent public health education, communicate effectively with communities and conduct community based participatory research.

**Distribution: Advanced.**
HLTH 515 - Determinants of Disease (3 credits)
This course will analyze the variables that impact the health of a population. It explores this dynamic by analyzing the multi-factorial relationship between diseases and biological, behavioral, socioeconomic and cultural factors. Emphasis is placed on the role(s) health professionals play in addressing this complex relationship.
Distribution: Advanced.

HLTH 530 - Public Health Nutrition (3 credits)
The purpose of this course is to provide the knowledge and tools necessary for future public health practitioners to assist public and private agencies with nutrition program development, implementation and evaluation.
Distribution: Advanced.

HLTH 531 - Instructor Training for Classroom Emergency Care (3 credits)
This course provides educators with the necessary basic skills and knowledge to appropriately respond to emergency situations that might arise within the classroom and other school environment. In addition to technical skill development, the focus of this course is on teacher training skill development. Information and materials are provided to enable educators to implement emergency care content into related health areas. There is also an opportunity to become certified in standard first aid and instructor authorization in CPR.

HLTH 532 - Death And Dying Education (3 credits)
This course is designed to increase awareness and develop appropriate values, attitudes, and behaviors concerning death. Special emphasis will be placed on providing educators with information and materials which will enable them to implement death and dying content into related health areas.
Distribution: Advanced.

HLTH 533 - Alcohol, Drugs and Narcotics Education (3 credits)
This course probes the significance of substance use and abuse in society as a behavioral health problem, with particular attention to the pharmacological, psycho-social, and legal dimensions of substance use and abuse. The course topics also include alternatives to substance use, and existing community resources for prevention and rehabilitation including community organizations, school curriculum, and media resources. The course culminates with an exploration of the principals for evaluating successful community education programs.
Distribution: Advanced.

HLTH 534 - Sex Education In Schools (3 credits)
The development, present status, and trends of sex education in school programs and in the community with reference to social values and attitudes are presented. It includes attention to the development of organized programs, resources, and materials.
Distribution: Advanced.

HLTH 536 - Seminar Health Education (3 credits)
The course is an individual and group study of problems and materials in personal, school, and community health.
Distribution: Advanced.

HLTH 537 - Community Health Practice for Health Educators (3 credits)
The course is a study of the theory and principles of community health practice and the application of those principles to contemporary health organization and problems. Approaches to successful community health practice are examined with the various factors that influence or are influenced by community health education programs.
Distribution: Advanced.

HLTH 538 - Health Policy and Administration (3 credits)
This course is designed to provide the student with a comprehensive background in public health legislation, organization, and programming. Emphasis is placed on the dynamic nature of public health within the total physical, social, economic and political context.

HLTH 539 - Methods in Health Education Workshop (3 credits)
This course analyzes the development and implementation of health education intervention strategies applicable to a multitude of settings. The students will research, examine and apply "Best Practices" in the design and application of health promotion strategies aimed at individual health improvement.

HLTH 540 - Behavior Modification in Health Education (3 credits)
This course is an overview of the major principles of behavior modification as they relate to health education in both theory and practice. It examines theory in relation to current issues of education in general and health education in particular. Applications of principles are studied in the context of health programs specifically designed as behavior modification programs and in the context of health programs, which contain behavior modification principles but were not designed with these principles in mind.
Distribution: Advanced.

HLTH 541 - Health and Media Literacy: Challenges and Strategies (3 credits)
This course explores and analyzes the relationship between health status, health literacy and the media. The influence of media on content-specific health topics and issues will be explored. Primary emphasis will be placed on developing an informed and critical understanding of the nature of media and its impact on both personal and societal health.
Distribution: Advanced.

HLTH 542 - Human Sexuality and Reproductive Health (3 credits)
This course provides a comprehensive overview and analysis of human sexuality and reproductive health as it relates to information, perceptions, and behaviors. The course explores various sexuality education paradigms and theories. Historical influences and cultural variation, the development of sex roles and their influence on sexual behavior will also be discussed. The development toward a positive physical, emotional and social viewpoint of sexuality will be emphasized.

HLTH 544 - Health Promotion Programs and Aging (3 credits)
This course will emphasize health promotion programming for elderly populations. Social and demographic factors will be addressed in regard to health education's role in the aging process. Healthful aging will be examined and discussed from a public health and social health perspective with a primary focus on developing and implementing programs that enhance the health of the elderly.
Distribution: Advanced.

HLTH 546 - Leadership and Advocacy in Health Education and Health Promotion (3 credits)
This course will examine the concepts and theories of leadership, and current leadership challenges faced in the practice environment. The course will explore the research and applications of the theories and concepts that aim to influence, inform and lead change that will result in health improvements in target populations and communities. Content areas will include leadership theory, advocacy skills, coalition building, communication, lobbying, collaboration, team building, ethics, and conflict management/resolution.
Distribution: Advanced.

HLTH 550 - School Health Administration and Curriculum (3 credits)
The purpose of this course is to assist the student in more thoroughly understanding the administration of the school health program and the...
content, structure, and development of the health education curriculum. Emphasis is placed upon a comparison of the conceptual approach to other approaches for curriculum development.
Distribution: Advanced.

**HLTH 551 - Health resources and Service Planning and Management (3 credits)**
Students are introduced to the principles, logic, and history of health resource allocation and health services planning, and the fundamentals of health systems management. Each student learns how to use appropriate health data tracing systems, and to apply and evaluate these systems in practical settings.
Distribution: Advanced.

**HLTH 552 - Health Budgeting and Fiscal Management (3 credits)**
Students will become acquainted with macro- and micro-economic factors influencing the health care industry, and how these factors influence health budgeting and fiscal management of health service organizations. Students learn budget making and the budgetary process in public and private health services; capital development and planning; and the procedures of fiscal management as administrative control.
Distribution: Advanced.

**HLTH 553 - Health Ethics Policy & Law (3 credits)**
The students learn how professional, ethical, constitutional, legal, and governmental aspects of health influence the administration of health service organizations, the formation of health policy, and the planning of health services.
Distribution: Advanced.

**HLTH 555 - Health Education Evaluation (3 credits)**
This course is designed to familiarize students with the methods of evaluation used in health education and the implications for student evaluation and program planning. A strong emphasis is placed on the development of various types of instruments of evaluation used in health education. Prerequisite: Statistics
Distribution: Advanced.

**HLTH 556 - Qualitative Methods in Research and Evaluation (3 credits)**
This course is a review of the use of qualitative methodology in research and evaluation of Health Education. Emphasis of the course is on the use of these methodologies to enhance student understanding of the physical and social dynamics (ecology) which influence Health Education planning and implementation. The course will also include skill development for selected techniques.
Distribution: Advanced.

**HLTH 557 - Computers Applications in Health Education (3 credits)**
This course provides health education professionals with selected PC-compatible software packages that are being used in a variety of professional settings where community and school-based health education and promotion are being conducted. Particular emphasis will be placed on the application of various health promotion software packages to conduct health risk appraisals, stress assessment and reduction, nutrition assessment and life skills training. In addition, the course will provide an introduction to the application of spreadsheets and statistical software in assessing program effectiveness of community and school-based health education intervention.
Distribution: Advanced.

**HLTH 560 - Scientific Foundations of Health Behavior (3 credits)**
This course is designed to familiarize students with the health sciences related to health education and promotion, and to provide experiences in the use of the literature related to the health sciences. The primary focus of the course is on human behavior as it influences health and is influenced by health education and promotion programs.

**Distribution: Advanced.**

**HLTH 561 - Epidemiology (3 credits)**
This course is a study of the principles and methods of epidemiological investigations for human health problems. The incidence and prevalence of both infectious and non-infectious health problems are covered. Emphasis of this course is on student application of the principles of epidemiology.
Distribution: Advanced.

**HLTH 562 - The Physical Environment and Community Health (3 credits)**
This course is a basic study of traditional and evolving public health concerns related to the physical environment including an overview of water, air and sanitation safety and global health concerns. Special emphasis will be placed on environmental health topics central to health services administration and public health practice including an introduction to the built environment and its impact on population health.
Distribution: Advanced.

**HLTH 563 - Public Health Measurement Sciences (3 credits)**
This purpose of this course is to develop applied statistical skills commonly used in public health measurement science. Students will develop statistical literacy, including the use of SPSS to solve research questions and hypotheses testing commonly found in public health practice and public health administration.
Distribution: Advanced.

**HLTH 565 - Occupational Health Education (3 credits)**
The course is an application of health education and promotion strategies to the work place. Emphasis is placed in developing student skills for design of programs in occupational settings. An overview of existing programs is included. Students will be expected to apply course material to a specific industrial situation.
Distribution: Advanced.

**HLTH 570 - Introduction to Research (3 credits)**
This course is an orientation to research in public health practice including health education. The emphasis is on developing and interpreting research projects with particular concern for the implications of design, methods and procedures. Students are expected to demonstrate research skills by developing a research proposal and presenting the proposal in a scholarly manner. This course is an orientation to research in health education. The emphasis is on developing and interpreting research projects with particular concern for the implications of design, methods and procedures. Students are expected to demonstrate research skills by developing a research proposal and presenting the proposal in a scholarly manner.
Distribution: Advanced.

**HLTH 571 - Health Education Research Problem (1 - 3 credits)**
This experience is designed to acquaint the student with recent methods of health research. Tasks will include the completion of an acceptable research report. Prerequisite: HLTH 570.
Distribution: Advanced.

**HLTH 572 - Health Education Thesis (3 credits)**
This experience consists of doing research for and writing of a thesis concerning a significant problem in health education. Prerequisite: HLTH 570.
Distribution: Advanced.
HLTH 573 - Global Public Health (3 credits)
This experience consists of doing research for and writing of a thesis concerning a significant problem in health education. Prerequisite: HLTH 570.
Distribution: Advanced.

HLTH 577 - Independent Study (3 credits)
With the guidance of a member of the graduate faculty of the Health Department, the student pursues a pattern of readings, study, and research related to professional knowledge and understanding in health science. Topics should be established prior to enrollment. Prerequisite: Health Department graduate faculty approval.
Distribution: Advanced.

HLTH 580 - State Level Cardiopulmonary Resuscitation Instructor’s Training (1 credit)
This course is designed to train the student in proper techniques and procedures in emergency measures in cardiopulmonary resuscitation. The course is recognized by the American Heart Association, Pennsylvania Affiliate.
Distribution: Advanced.

HLTH 582 - Public Health Applied Practice Seminar (3 credits)
This required course serves as an opportunity to demonstrate, apply, and integrate required field-based public health competencies. Further, this seminar aims to bolster each student’s leadership capacity while reinforcing the skills to participate in transdisciplinary research and effective public health practice. Class readings and discussion will reinforce student understanding of the ecological factors that contribute to public health through examination of biological, genetic, behavioral (individual), interpersonal/social community, organizational and environmental factors that affect the outcomes of public health cases while field-based service learning experiences will enable application of these concepts within our community.
Distribution: Advanced. Prerequisite: (C) or higher in HLTH 538, HLTH 560, HLTH 562, HLTH 570.

HLTH 586 - Field Experience and Internship (3 - 12 credits)
This course consists of the practical experiences obtained through supervised work in the school or community. The credits and hours of the experience shall be based on the student’s experience and programmatic needs; however, no more than 3 credits may be applied to health education degree programs.
Distribution: Advanced.

HLTH 599T - Health Graduate Transfer (1 - 6 credits)
Health transfer course. ESU academic department decides how the course applies toward the degree.

Public History Concentration

History M.A.

Purpose of degree:
To develop the analytical, literary, and verbal skills of students and to familiarize them with historical literature. Thesis students will learn to conduct original research and they will learn to organize large amounts of information into presentable form.

Outcome expectations of students and degree completion:
Students will attain a better understanding of history. They will become familiar with historical methodology and literature. They will improve their verbal and written communication skills.
Most of our M.A. graduates teach in the high schools; some have obtained Ph.D.’s and teach on the college level; others work for historical societies, museums, publishing houses, and the National Park Service.

Undergraduate prerequisites required:
A bachelor’s degree in history is preferable. Students with fewer than 15 credits in history can be admitted on a conditional basis.

Typical time to finish:
Full-time students can finish in 1 1/2 to 2 years.

HIST 570: offered only in the fall semester

Electives:
- 15-21 credits in history.
- Students must elect at least 9 credits in either:
  Group A – United States History
  Group B – European History.
- At least 3 credits in each of the two remaining groups, including Group
  C – Area Studies.
- Related areas (other social sciences) are optional – 0-6 credits.

Final graduation requirements

HIST - History

HIST 500 - Special Topics (3 credits)
This course is designed to provide the student with an opportunity to work with a faculty member in the student's primary Arts and Sciences discipline during the student teaching experience. The course will enhance the student's ability to understand and maximize the relationship between disciplinary subject matter and pedagogy.
Distribution: Advanced.

HIST 501 - Colonial America (3 credits)
This course is a study of the founding and growth of English, Spanish, and Dutch colonies in North America. Special attention will be given to motives behind European expansion and the development of institutions and trends, which later contributed to the formation of the new nation.
Distribution: Advanced.

HIST 502 - Era of Jacksonian Democracy (3 credits)
This course is an intensive study of the age of Jackson, 1818-1848: expansion, sectionalism, social and political reform; emphasis on analysis of original documents.
Distribution: Advanced.

HIST 504 - Normalcy and New Deal (3 credits)
This course is a study in depth of American domestic trends during the contrasting "Prosperity" and "Depression" decades with special attention to the changing socioeconomic scene. The rich primary source materials available for this period will be used in individual projects.
Distribution: Advanced.

HIST 505 - Rise of the New Nation (3 credits)
This course is a study of the War of Independence, and the political, social, and economic foundations of the new nation.
Distribution: Advanced.

HIST 507 - History of American Ideas (3 credits)
This course consists of readings about selected ideas that motivated American thought and action from the colonial period to the present day. Changes in meaning of older American ideas will be examined.
Distribution: Advanced.

HIST 509 - US Constitutional Hist & Law (3 credits)
This course investigates distinguishing aspects of the American constitutional system: judicial processes and decisions of major cases of the Marshall and Taney courts; interpretation of the fourteenth and other amendments; and evaluation of the contemporary court.
Distribution: Advanced.

HIST 510 - Colonial History (3 credits)
This course consists of research in selected topics related to the coming of the Civil War, military and diplomatic phases of the Civil War, and the Presidential Reconstruction. Students will become familiar with the practical and theoretical aspects of public history through readings, lectures and classroom discussions.
Distribution: Advanced.

HIST 511 - Seminar: Pennsylvania History (3 credits)
This course is an intensive study of Pennsylvania as a colony and a state; its economy, politics, society, and culture; emphasis is on research and analysis.
Distribution: Advanced.

HIST 517 - French Revolution & Napoleon (3 credits)
This course will cover the "ancient Regime" and the forces that led to its destruction, the revolution's impact upon Europe, and the change effected by Napoleon in France and Europe.
Distribution: Advanced.

HIST 519 - Nationalism and Democracy in 19th-Century Europe (3 credits)
This course analyzes the impact of the liberal and nationalist movements on the political, economic, and social institutions of 19th-century Europe.
Distribution: Advanced.

HIST 520 - Area Studies I (3 credits)
(A specific area will be announced). This course examines selected problems of historical and political development in major world areas. Emphasis is placed on political institutions -- their background, development, and significance.
Distribution: Advanced.

HIST 521 - Area Studies II (3 credits)
Same as Area Studies I.
Distribution: Advanced.

HIST 522 - Foreign Travel and Study (6 credits)
This course is a trip abroad. Study at foreign colleges and universities will focus on the history and government of the countries visited, and their economic growth and integration. Emphasis is placed on formal and informal discussion and analysis of contemporary indigenous problems.
Distribution: Advanced.

HIST 527 - US Since 1940 (3 credits)
This course examines political, economic, and social changes in the United States from 1940 to the present. World War II, the Cold War, the Vietnam War, and cultural changes of the 1960s and 70s are the foci of this course.
Distribution: Advanced.

HIST 530 - Seminar in Public History (3 credits)
This course explores the world of public history. Museum studies, archiving, grant writing, and historic preservation are among the topics discussed. Students will become familiar with the practical and theoretical aspects of public history through readings, lectures and classroom discussions.
Distribution: Advanced.

HIST 533 - Britain in the Age of Discovery and Revolution 1485-1715 (3 credits)
The course will present a detailed study of the political, diplomatic, economic, and social aspects of British society between 1471 and 1714. Particular emphasis will be placed on the monarchy, Parliament, the Revolutions of the 17th century, and the emergence of Britain as a Great Power.
Distribution: Advanced.

HIST 537 - Europe in Crisis 1914-1939 (3 credits)
This course is a study of World War I, the problems related to war-guilt and responsibility, peace making in Paris, the League of Nations era, and the rise of authoritarian ideologies and governments -- Bolshevism, Fascism, and Nazism.
Distribution: Advanced.
HIST 539 - Europe in Crisis 1939-1975 (3 credits)
This course is a study of the origins and conduct of World War II, division of Europe by the Iron Curtain, Cold War politics, dissolution of the European colonial empires, Common Market and unification of Europe, break-up of the Soviet orbit, and the era of detente.
Distribution: Advanced.

HIST 541 - 20th Century Imperialism (3 credits)
A study of the "New Imperialism" of the late-19th and early-20th century and its decline after World War II. The course will also focus on the military, social, and economic nature of imperialism and the emergence of a neo-imperialism since 1945.
Distribution: Advanced.

542 - History Through Film (3 credits)
This course strives to understand and comprehend major events, topics and themes of 19th and 20th century American and global history through the medium of film. The medium of film will be examined to enhance students historical perspective of the past through analyzing the construction and presentation of that past as created in narrative.

543 - Modern South Asian History (3 credits)
This course will primarily examine the British colonial encounter in the Indian subcontinent in the period roughly from the 18th through the middle of the 20th century. We will explore the nature of this encounter and its impact on the subcontinent, particularly the emergence of modern nationalism(s) and the making of the modern South Asian nation states of India and Pakistan. We will critically analyze a variety of forms in which this encounter has been represented.

544 - Vietnam and Southeast Asia (3 credits)

HIST 545 - China in Revolution (3 credits)
After a brief examination of traditional China, the course deals with the Revolutionary upheaval that has followed the overthrow of the Empire in 1912. The development of the Kuomintang movement, the rise of the Chinese Communists, and the struggle for power. Particular emphasis is placed on the People's Republic since 1949 and its problems, failures, and accomplishments.
Distribution: Advanced.

HIST 570 - Introduction to Research (3 credits)
This course is about renowned historians, research techniques in history, training in the critical handling of primary and secondary resource materials, and formal presentation of research. It is required of all graduate students in history degree programs.
Distribution: Advanced.

HIST 571 - Independent Research (1 - 3 credits)
This course utilizes selected historical research techniques to attack a specific problem. A formal report is prepared and presented. It is required for all students in the non-thesis program.
Distribution: Advanced.

HIST 572 - Thesis I (3 credits)
This course consists of development of a thesis topic, gathering of information, organization of material, evaluation of data, and writing of a formal thesis report.
Distribution: Advanced.

HIST 573 - Thesis II (3 credits)
See HIST 572. This course consists of completion of the thesis. Emphasis on originality, depth of research, and contribution to knowledge.
Distribution: Advanced.

HIST 577 - Independent Study (3 credits)
Independent study is designed to provide in-depth coverage of subject matter not covered in courses offered by the department and must meet a specific need. A student wishing to take independent study should discuss the plan first with his adviser and then with a member of the department. If a faculty member agrees to supervise the study, the proposal will be submitted to the chair of the department. The chair, after acting on the proposal, shall present it to the department for action. It will then be transmitted to the dean of the faculty. (Requires permission of the chair of the graduate faculty in order to be included for credit in the degree program.)
Distribution: Advanced.

HIST 586 - Field Experience and Internship (3 - 6 credits)
This internship will give students the opportunity to practically apply what they are learning in the classroom. The course is designed to promote professional development, to acquaint students with career opportunities outside of academia and to provide a challenging and valuable learning experience.
Distribution: Advanced.

HIST 599T - History Graduate Transfer (1 - 6 credits)
History Transfer Course
ESU academic department decides how the course applies toward the degree.

Instructional Technology

College of Education
Department of Professional and Secondary Education
Stroud Hall
570-422-3363
www.esu.edu/gradit

Mission of Instructional Technology
The Instructional Technology portfolio and internship based programs prepare Instructional Technology leaders to participate in social, cultural and economic transformation. The learning environment fosters the preparation of practitioners who utilize critical reflection, research, and collaboration to produce and implement innovative technologies to address the evolving needs of learners in a global society.

Special Resources of the Department
The Instructional Technology master’s program is housed with the Digital Media Technologies Department, which uses professional design software and media technologies. Students complete an internship in their desired area of expertise. Internships include local schools, corporate or medical environments and higher education institutions. Through learning experiences, students can take face-to-face and distance education classes, providing a multi-delivery environment for greater learning flexibility.

Many courses are offered in the traditional face-to-face method and through distance education. If a course is designated DE+ the course is offered both traditionally and online.

Instructional Technology Faculty

Graduate Coordinator:
Carol Walker, Ph.D., (cwalker@esu.edu)

Professor:
Beth Rajan Sockman, Ph.D. (bsockman@esu.edu)

Assistant Professors:
Carol Walker, Ph.D., (cwalker@esu.edu)
Instructional Technology M.Ed. with Pennsylvania Certification in Instructional Technology

33 credits

Purpose of Program
The Master of Education (M.Ed.) in Instructional Technology program is designed to prepare instructional technologists who are catalysts for integrating technology into various learning environments. These learning environments include but are not limited to schools, higher education, distance and hybrid learning, medical and/or corporate training situations. Individuals may then serve in one or more of the following roles: e-learning specialist, instructional designer, distance educators, learning technologies, technology coordinators, intermediate unit technology administrators, classroom teachers, educators using technology in edu-business and medical or corporate trainers.

Outcome Expectations
Students completing the Master of Education (M.Ed.) program in Instructional Technology will be proficient in the selection and implementation of instructional technologies into the specific learning environments of focus.

PROGRAM OF STUDY
Maximum time to finish: Four years

Required Foundation Courses - 6 credits
- DMET 520 Selection and Application of Learning Technologies 3
- ELED 570 Introduction to Research 3

Required Major Courses - 12 credits
- DMET 526 Organization and Admin of Instructional Technology 3

and three courses (9 credits) from the following or adviser-approved related coursework:
- PSED 516 Learner & the Learning Process 3
- DMET 501 Current Applications 1
- DMET 510 Online Tools and Strategies for Learner-Centered Instruction 3
- DMET 530 Instructional Design for Effective Learning 3
- DMET 532 Digital Photography and Still Images 3
- DMET 536 DE: Internet For Educators 3
- DMET 538 Desktop and Digital Publishing for Learning 3
- DMET 540 Multimedia I 3
- DMET 542 Multimedia II 3
- DMET 543 Multimedia III 3
- DMET 545 Interactive Media 3

Required Capstone options - 9 credits
Option A
- DMET 580 Research Project I: Action Research Design 3
- DMET 581 Research Project II: Action Research Implementation 3
- DMET 585 Internship 3

Option B
- DMET 585 Internship 3
- DMET 589 Thesis 3 - 6

Electives - 6 credits
DMET courses or other department courses discussed with adviser.

Final Graduation Requirement
Submission of comprehensive portfolio with internship.

Instructional Technology M.Ed.

33 credits

Purpose of Program
The Master of Education (M.Ed.) in Instructional Technology program is designed to prepare instructional technologists who are catalysts for integrating technology into various learning environments. These learning environments include but are not limited to schools, higher education, distance and hybrid learning, medical and/or corporate training situations. Individuals may then serve in one or more of the following roles: e-learning specialist, instructional designer, distance educators, learning technologies, technology coordinators, intermediate unit technology administrators, classroom teachers, educators using technology in edu-business and medical or corporate trainers.

Outcome Expectations
Students completing the Master of Education (M.Ed.) program in Instructional Technology will be proficient in the selection and implementation of instructional technologies into the specific learning environments of focus.

Option B
- DMET 585 Internship 3
- DMET 589 Thesis 3 - 6

Electives - 6 credits
DMET courses or other department courses discussed with adviser.

Ahmed Yousef, Ph.D. (ayousef@esu.edu)
Final Graduation Requirement
Submission of comprehensive portfolio with internship.

Instructional Technology M.Ed. with Concentration in Technology Integration

33 credits

Purpose of Program
The purpose of the Master of Education (M.Ed.) in Instructional Technology with a concentration in Technology Integration is to address the classroom teacher that desires to integrate technology in order to meet diverse learning needs with creativity and innovation. Using instructional design principles in multimedia, with an emphasis in assessment, classroom instructors across a range of academic disciplines expand pedagogy and skills that drive effective integration.

Outcome Expectations
Students completing the Master of Education (M.Ed.) program with a concentration in Technology Integration will be proficient in the selection and implementation of instructional technologies for student learning within the classroom.

PROGRAM OF STUDY
Maximum time to finish: Four years

Required Foundation Courses - 6 credits
DMET 520 Selection and Application of Learning Technologies 3
DMET 530 Instructional Design for Effective Learning 3

Required Major Courses - 18 credits
DMET 526 Organization and Admin. of Instructional Technology 3
DMET 540 Multimedia I 3
DMET 542 Multimedia II 3
DMET 580 Research Project I: Action Research Design 3
DMET 585 Internship 3

and three credits from the following:
DMET 510 Online Tools and Strategies for Learner-Centered Instruction 3
DMET 532 Digital Photography and Still Images 3
DMET 534 Video Production 3
DMET 536 DE: Internet For Educators 3
DMET 538 Desktop and Digital Publishing for Learning 3
DMET 545 Interactive Media 3

Required Capstone options - 3 credits
Option A
DMET 581 Research Project II: Action Research Implementation 3

Option B
DMET 589 Thesis 3 - 6

Electives - 6 credits
DMET courses or other department courses discussed with adviser.

Pennsylvania Instructional Technology Specialist Certification
Compliance with Pennsylvania Department of Education Instructional Technology Specialist Certification Standards and/or 24 credits.

Purpose of Certification
The instructional technology specialist certification is a non-instructional certification permitting the holder to function in a support role for K-12 classroom and school activities.

PROGRAM OF STUDY

Required Foundation Courses - 6 credits
DMET 520 Selection and Application of Learning Technologies 3
ELED 570 Introduction to Research 3

Required Major Courses - 12 credits
DMET 510 Online Tools and Strategies for Learner-Centered Instruction 3
DMET 526 Organization and Administration of Instructional Technology 3
DMET 530 Instructional Design for Effective Learning 3
DMET 585 Internship 3

Electives - 12 credits
DMET 501 Current Applications 1
DMET 532 Digital Photography and Still Images 3
DMET 534 Video Production 3
DMET 536 DE: Internet For Educators 3
DMET 538 Desktop and Digital Publishing for Learning 3
DMET 540 Multimedia I 3
DMET 545 Interactive Media 3
PSED 516 Learner & the Learning Process 3

Admissions Requirements
For admission to the Master of Education (M.Ed.) in Instructional Technology program, applicants will need to meet with the graduate coordinator to schedule an interview or portfolio review. For admission to the certification program, applicants should contact the graduate coordinator for additional admission information to comply with Pennsylvania Department of Education requirements.

Graduate Assistantships
Graduate assistantships are available through the department. These are awarded based upon merit and achievement to full-time students in the graduate program. Graduate assistants do not teach classes, but complete projects and tasks assigned by professors. The graduate assistantship is awarded for the first year of full-time study, with the possibility of extension through the first summer.

Prospective students should apply for a graduate assistantship at the time of original application to the program, using the application form online. The graduate assistant is expected to actively participate and demonstrate leadership by showing initiative in support of the graduate activities of the department. The graduate assistant is expected to demonstrate willingness to learn, to apply his or her skills in the design of media, and to actively participate in production activities. This is a hands-on assistantship. We expect and encourage the graduate assistant to acquire new skills, to seek mentoring from faculty and staff of the department and to demonstrate skill enhancement. Most course work can be completed face-to-face or through distance education.

Applicants are encouraged to check with Dr. Carol Walker, graduate coordinator, for a current description at cwalker@esu.edu.

DMET- Digital Media Technologies

DMET 501 - Current Applications (1 credit)
This course will provide an introduction to future and current issues and topics in the application of media communication and technology. To highlight communication issues, students will be exposed whenever possible to varied presentation strategies. The application of media
communication and technology to academic and business situations will be demonstrated. This course may be taken for credit more than once if a student wishes to study another current issue. Distribution: Advanced.

DMET 510 - Online Tools and Strategies for Learner-Centered Instruction (3 credits)
In this class, students will increase technological pedagogical content knowledge to create lessons in various online learning environments. Application of digital tools will include but are not limited to CMS and LMS strategies and the collaborative web in order to develop learner-centered lessons by using an understanding of differentiation, extension, and global awareness for the 21st century. By collaborating with classmates and in other online environments, the students will extend their personal learning network beyond the class. Distribution: Advanced.

DMET 520 - Selection and Application of Learning Technologies (3 credits)
In this course, students will formulate the skills needed to integrate learning technologies based on understanding an array of technologies, theories and practices. Through discussion, planning, and knowledge of universal design, class participants will acquire the proficiencies needed to create diverse projects that evaluate ideal learning environments and enable incorporation of technology for learners. Distribution: Advanced.

DMET 526 - Organization and Administration of Instructional Technology (3 credits)
This course defines the organization, administrative and management roles, responsibilities and tasks of an instructional technologist. Also this course provides an introduction to and overview of the challenges, opportunities, and issues to instructional technologists who serve as administrators and managers in academic and business/industry settings.

DMET 530 - Instructional Design for Effective Learning (3 credits)
Instructional design is a systematic process used to analyze learner needs, and then, develop, design, and evaluate instructional materials. In this introductory course, students will create a learning unit based on student identified learning goals. Distribution: Advanced.

DMET 532 - Digital Photography and Still Images (3 credits)
This course will provide students with an overview of many different methods for selection, production, manipulation, utilization, and presentation of still images for instructional applications. Students will learn varied techniques of locating, acquiring, and producing digital and non-digital still photographic images. Distribution: Advanced.

DMET 534 - Video Production (3 credits)
This course will cover the aspects of video production used by educators and trainers to produce quality motion media. A review of research, pre-production organization, production techniques, and post-production editing will be included. Students will have the opportunity to produce motion media in this course. Distribution: Advanced.

DMET 536 - DE: Internet For Educators (3 credits)
Students will be introduced to the fundamentals of using the Internet to access and share information with emphasis being given to how this technology can be used as a classroom tool. Project design, commercial services, free services, and online procedures will also be emphasized. Distribution: Advanced.

DMET 538 - Desktop and Digital Publishing for Learning (3 credits)
Students will apply the basics of designing print and digital publications for learning. With an understanding of design principles, use of creativity and visual intelligence, students will complete hands-on activities to produce effective media. Topics include: publication options, use of type in print and digital environments, imagery, visual layout, linear and non-linear progression. Distribution: Advanced.

DMET 540 - Multimedia I (3 credits)
This is the introductory course in the Multimedia series, which provides introductory multimedia production skills within instructional design and learning theory. Students will learn introductory skills while using instructional design principles to plan and produce multimedia for effective classroom instruction. Topics include the integration of media literacy, instructional design implementation, assessment, and media production techniques. Distribution: Advanced.

DMET 542 - Multimedia II (3 credits)
This is an intermediate course in Multimedia series, which increases the skill level of the student in production, and applying learning theory to the instructional materials. The course builds upon the instructional design, learning theory, and skills gained in other courses. Students create multimedia productions using instructional design process and professional tools so that instruction can be delivered on multiple digital devices.

DMET 543 - Multimedia III (3 credits)
This is an advanced media production that builds upon instructional design and skills gained in Multimedia II. Students will fully integrate digital still, digital motion, digital sound, and digital animation using instructional professional programs. Productions will provide an interactive experience with understanding of learning theory and implementation of unit planning. Focused attention will be given to diversity and learning accommodations. Distribution: Advanced. Prerequisite: DMET 542.

DMET 545 - Interactive Media (3 credits)
This course is designed to introduce the student to the technology of interactive media. Special emphasis is placed on the various applications for interactive media. Students will gain practical experience in creating interactive media programs. Distribution: Advanced.

DMET 580 - Research Project I: Action Research Design (3 credits)
Designing appropriate learning opportunities requires the application of research techniques in order to improve resources for learning and productivity in a technology enhanced environment. Using research-based instructional theories and extant data, students create a proactive research action plan. Distribution: Advanced.

DMET 581 - Research Project II: Action Research Implementation (3 credits)
In this second research course, students will implement their action research design in order to make positive change in a learning environment. While doing systematic research, students learn to create an observation tool, analyze the limitations of a study, or do data analysis to interpret the data. The final product will be a research summary based on a synthesis of the student's research and extant data. Distribution: Advanced. Prerequisite: DMET 580.

DMET 585 - Internship (3 credits)
Students will work in an environment that provides professional experiences related to the student's field of interest and study, be
Management and Leadership

College of Business and Management

Public Administration – Sport Management

This is an interdisciplinary program encompassing faculty and coursework from three departments:
- Department of Business Management
- Department of Political Science
- Department of Sport Management

Management and Leadership Faculty

Graduate Coordinators:
Organizational Behavior Concentration
Douglas Nay, D.P.S., (dnay@esu.edu)

Public Administration Concentration
Adam McGlynn, Ph.D., (amclynn@esu.edu)

Sport Management Concentration
Jaedeock Lee, Ph.D., (jaedeock@esu.edu)

Professors:
Kimberly Adams, Ph.D., (kadams@esu.edu)
Johan Eliasson, Ph.D., (jeliasm@esu.edu)
Ko Mishima, Ph.D., (kmishima@esu.edu)

Minkyo Lee, Ph.D., (mlee17@esu.edu)

Program of Study

Management and Leadership M.S.

33-37 credits

Purpose of Degree
The intent of the Master of Science degree program in Management and Leadership is to provide graduate level instruction to enhance the management, leadership and decision-making abilities of graduates of the program, in preparation for the dynamic, technology-driven work force in the private, public, and non-profit sectors.

The Master of Science in Management and Leadership offers graduate level instruction based on theory while providing opportunities to apply competencies in practical settings. The program is committed to developing competent managers and leaders capable of excelling in the constantly changing business environment that surrounds today's private marketplace and public sector.

Student Learning Outcomes
Students graduating from the M.S. in Management and Leadership program will be able to:
1. Comprehend leadership models and theories and apply them to professional practice.
2. Understand the group dynamics of professional organizations and utilize leadership skills to set and achieve organizational goals.
3. Competently manage in a dynamic, technology driven economic environment.
4. Examine issues that relate to achieving business excellence, valuing human diversity, effecting change, using technology, and demonstrating social responsibility.
5. Demonstrate managerial competencies associated with managing employees, facilitating groups and communicating effectively.
6. Apply management skills and theory through a culminating experience.

Program of Study

Based on the student learning outcomes established above, the following coursework was established for fulfillment of the common area requirements. All students must complete the common area requirements.

Due to the unique structure of the program, in addition to completion of the common area, students can choose to complete the curriculum requirements established by each of the different departments involved in the proposal. The curriculum consists of 33 to 37 credit hours including a common area of study in management and leadership philosophy and techniques.

The program offers students concentrations in the following areas:
1. Organizational Behavior
2. Public Administration
3. Sport Management

Students with one or more years managerial experience or currently employed in a full-time managerial position, may substitute an elective for the internship. Prior permission is required, and must be approved on the plan of study.

Admissions Requirements and Deadlines

Undergraduate Prerequisite Coursework or Competencies

Applicants are expected to possess a common body of knowledge essential for advanced study in management and leadership. This body of knowledge typically includes undergraduate coursework or life experience contributing to a foundation of knowledge in the following areas: marketing, law, management fundamentals, finance/economics, and computer applications. Applicants with an undergraduate degree in business or management will likely have taken coursework-providing competencies in these areas. Applicants with non-business undergraduate degrees will usually lack at least some of these competencies, and therefore, will need to satisfy them through alternative means, including but not limited to:

- Submission of a portfolio/dossier, including an updated vita or demonstration of work product generated during the course of employment and/or other professional experiences,
- Successful completion of undergraduate coursework. (Note: The faculty intend to work toward offering coursework to satisfy these competencies via alternative delivery methods), or
- Passing the relevant graduate level coursework with a grade of “B” or higher.

The alternative means described above for satisfying the prerequisite requirements are typical for programs in the management area.

Application Deadline

Applicants for admission are strongly encouraged to apply by March 15 before the academic year for which they are seeking admission.

Time for Degree Completion

Students enrolling in the program on a full-time basis will have an opportunity to complete the required common area and co-requisite area coursework within a full academic year and, depending on their internship and other program requirements, will typically complete all their degree requirements in three full semesters.

Graduate Assistantships

The M.S. in Management and Leadership program offers a variety of graduate assistantships. These are awarded based upon merit and achievement to full-time students in the graduate program. Graduate assistants do not teach classes, but complete projects and tasks assigned by professors.

The graduate assistantship is awarded for the first year of full-time study, with the possibility of extension through the first summer. Prospective students should apply for a graduate assistantship at the time of application to the program, using the application form online. Graduate Assistants have positions across the campus, including, but not limited to, the Department of Intercollegiate Athletics, Office of Admission, Student Enrollment Center, and the office of Graduate Studies. For more information, contact the office of Graduate Studies.

MGT- Management courses

MGT 501 - Organizational Behavior (3 credits)

This course examines the individual and group behaviors that impact organizational performance. Individual processes and attributes such as perception, learning, personality, emotional intelligence, ethics, motivation, and stress are examined in organizational settings. Team processes such as communications, decision-making, power, conflict, and negotiation are also considered. This course concludes with a consideration of the organization-wide processes of learning, change, and structural design.

Distribution: Advanced.

MGT 502 - Organizational Strategy (3 credits)

This course presents the tools and techniques of organizational strategic planning, including internal organizational analysis of strengths and weaknesses and external scanning of the stakeholders and trends in the environment that the organization inhabits. Students will practice strategic analysis and the formulation of appropriate strategies through comprehensive real organization and/or simulation cases in this capstone course that integrates all the functional areas of management. The course concludes with a consideration of strategy implementation issues and techniques.

Distribution: Advanced.

MGT 503 - Organizational Leadership (3 credits)

This course presents traditional (trait and behavioral theories) and contemporary models (contingency, participative, charismatic, transformational) of leadership. The course considers the sources and uses of power and influence as well as the phenomenon of leader emergence. The course includes leadership skills assessment and training exercises. Case of effective and ineffective leadership will be utilized extensively throughout the course.

Distribution: Advanced.

MGT 504 - Organizational Control Systems (3 credits)

This course presents the theoretical and practical tools essential to effective management control including financial statement analysis, cost measurement and control, budgeting, the balanced scorecard, total quality management, value chain analysis, theory of constraints, productivity, and capacity. The course is a survey of some of the most
useful management control topics from financial accounting, managerial (cost) accounting, operations management, and systems theory.

**MGT 510 - Legal Environment of Business (3 credits)**
This course provides an overview of the legal, political, regulatory and ethical environment of business. Legal cases involving partnerships, corporations, business ethics, and other issues are analyzed and their impacts are evaluated with regard to compliance with local, state, federal, and emerging international regulations.

Prerequisite: Admission to M.S. Accounting Program.

**MGT 570 - Introduction to Business Research (3 credits)**
The course provides students an opportunity to apply knowledge of research methods to address a business problem or research question in far greater depth than a traditional research paper. This course introduces the students to conducting business research on a more advanced level. Students will have the opportunity to develop the research question(s), read extensively in the academic literature, gather and analyze data, and thereby extend learning from prior coursework in a research setting.

**MGT 586 - Internship in Management**
This course is designed to provide the student with practical experience in a commercial or not for profit setting and apply the theoretical and practical aspects of organizational behavior and leadership.

Distribution: Advanced (ADVD). Prerequisite: Permission of the graduate coordinator.

**MGT 599T - Management Graduate Transfer (1 - 6 credits)**
This course presents the theoretical and practical tools essential to effective management control including financial statement analysis, cost measurement and control, budgeting, the balanced scorecard, total quality management, value chain analysis, theory of constraints, productivity, and capacity. The course is a survey of some of the most useful management control topics from financial accounting, managerial (cost) accounting, operations management, and systems theory.

**Graduate students** can focus their program of study on questions of a theoretical nature, the role and performance of political institutions and political systems, or the behavior of individuals and groups.

**Student Learning Outcomes:**
- **Students will demonstrate an in-depth knowledge of the schools of thought, theories, models, and issues within the political science discipline.**
- **Students will demonstrate an understanding of multiple research designs and methodologies, both quantitative and qualitative, and have the ability to conduct political science research involving the development of research questions, a research design, quantitative and qualitative analysis, and presenting the results in a logical and professional manner.**
- **Students will demonstrate critical thinking skills in understanding and evaluating theories, ideas, and issues across the four subfields of political science: American Government and Public Administration, Political Theory, Comparative Government, and International Relations.**
- **Students will demonstrate professional and academic ethics.**
- **Students will demonstrate an ability to work in a diverse, multicultural environment.**
- **Students will demonstrate an ability to communicate effectively through their written work.**
- **Students will be prepared to pursue public or non-profit sector work, and/or doctoral studies in political science or law school.**

**Special resources of the department:**
The department provides internship opportunities for students who are interested in exploring employment in the public or private sectors.

**PROGRAM OF STUDY**

**Political Science Electives (15-21 credits)**

Students must elect at least one course from each group:
- **Group A - American Politics and Public Administration**
- **Group B - International Relations**
- **Group C - Comparative Government and Regional Studies**
- **Group D - Political Theory**

**Related Electives (3-6 credits)**

Students may select up to six credits from related areas: history, economics, sociology, geography, or other approved electives.

**Language requirement**
A knowledge of the fundamentals of one foreign language is required unless waived under the provisions set forth in the Graduate Catalog.

**Final graduation requirement**
In addition to the required courses, students must pass a comprehensive examination.

**Admissions requirements and deadlines**
The department follows the requirements of the office of Graduate Studies for admission.
POLS - Political Science

POLS 500 - Special Topics (3 credits)
This course examines major theories and problems in the study of politics. A paper will also be written on the basis of independent political research. Distribution: Advanced.

POLS 501 - Public Administration: Theory, Scope and Methods (3 credits)
Public Administration: Theory, Scope, and Methods is an introductory course concerned with American government planning, organizing, and operation necessary for governance on the national, state, and local levels. This course provides the student with a graduate level overview of: the historical foundations of public administration; the nature of governmental activity; governmental structure, bureaucracy, and organizational theory; public personnel management; public budgeting and financial management; administrative law; and administrative ethics.

POLS 514 - Seminar on Local Government (3 credits)
This seminar will provide students with an opportunity to examine the operation and concerns of local government in detail. The focus will be on the challenges caused by rapid population growth and economic development. Students will examine the juxtaposition of local government in the American system, the adequacy of local government structures, land-use policy, taxing practices, and environmental and social issues. There will be interaction with local government officials. Distribution: Advanced.

POLS 516 - Administrative Law (3 credits)
Administrative Law is concerned with the administrative agencies. It studies the powers of agencies, the limits on their powers, the rules that bind agency action, and the remedies available to those injured by administrative power. For the purpose of this course, administrative law is the law governing the creation of, powers of, and limitations upon public bureaucracies, not the regulations they produce. Distribution: Advanced.

POLS 518 - Political Communications (3 credits)
This course explores the role of the news media in both domestic and international politics. This course is designed to be accessible to both Political Science and Communications students. An emphasis is placed upon recent research and the exploration of current topics in this area.

POLS 520 - ASI: Area Studies I (3 credits)
(A specific area will be announced). This course investigates selected problems of historical and political development in major world areas. Emphasis is placed on political institutions-their background, development and significance.

POLS 522 - Foreign & Travel Study (3 credits)
This course involves travel and possibly study at foreign colleges and universities. The focus will be the history and government of the countries visited, and their economic growth and integration. Emphasis is placed on formal and informal discussion and analysis of contemporary indigenous problems. Distribution: Advanced.

POLS 523 - Seminar in American Public Policy (3 credits)
In this course students will analyze the competing proposals and contemporary research addressing the major public policy issues affecting the United States today. Students will be required to critically analyze and debate the course readings with an eye towards identifying the best policies to adopt. Policy topics to be covered in the course include: education, the environment, immigration, entitlement programs and health care reform. The topics covered will change based on the significant policy issues being addressed by policymakers at the time the course is offered. Distribution: Advanced.

POLS 525 - Seminar: Middle East (3 credits)
This course will offer an advanced study and analysis of selected Middle East states. Emphasis will focus on political culture, modernization efforts and nationalism both in terms of regional identity and in terms of its broader international consequences. Distribution: Advanced.

POLS 526 - Environmental Policy & Management (3 credits)
This course addresses both the analytical and empirical components of domestic and international environmental policies and politics. Topics will be examined from both a domestic and international lens including: climate change, biodiversity and environmental management.

POLS 528 - Comparative Policy Analysis (3 credits)
This seminar concentrates on the theory, techniques, and content of a body of research broadly concerned with factors that determine the variation in patterns of public policy across jurisdictions and over time. Students read materials that focus on how cultures, economic systems, and political institutions differ and how these differences affect public policies. Distribution: Advanced.

POLS 529 - International Political Economy (3 credits)
International political economy (IPE) is concerned with the mutual interactions of political decisions and economic transactions, the so-called market place, in the modern world. This course provides an overview of how political, social, and economic actors and events, domestic and international, public as well as private, shape policies and economic developments. It also covers research methods and theories of international political economy, and asks participants to assess current developments using these theories and methods. We probe why certain policies are adopted and how they affect the economies of major industrialized and developing nation-states.

POLS 531 - Contemporary Political Thought (3 credits)
This course is a study of Twentieth Century thought concerning the role of the state in society. It includes discussion of ethical as well as pragmatic considerations, analysis and appraisal of liberal, conservativism, fascism, socialism, communitarianism, multiculturalism, feminism, and other ideologies. Political structures and functions are considered in connection with social values and objectives. Distribution: Advanced.

POLS 532 - Seminar in Parties & Politics (3 credits)
This course analyzes political parties as a part of the political process, political parties as an integral force in society, the transformation of societal values into public policy through the operation of the party system, electoral systems and their relationship to the political system, voting behavior, changing styles in party strategy, campaigning, and suggestions for electoral reform. Distribution: Advanced.

POLS 533 - The Presidency (3 credits)
This course is an analysis of the presidency; its nature in both its personal and institutional dimensions; the growth of the office; the politics and problems of seeking the office of the presidency; the President's roles as chief executive, party leader, legislative leader, and leader in the international political system. Since this course is also offered for undergraduate credit, differentiation of course requirements may be made.
POLS 534 - Presidential & Elections Politics (3 credits)
This course is a study of the presidential elections of unusual significance in U.S. history; pre-election politics, partisan maneuvers, the platform and selection of candidates; examination of the campaign and election process; discernment of distinguishing characteristics as well as common patterns; evaluation and comparison of results and future applicability. Distribution: Advanced.

POLS 535 - Inter-Governmental Relations (3 credits)
This course examines the distribution of powers between the federal government and the states. It includes a review of the historic development of American federalism as well as its current trends and conflicts. Emphasis in the course is placed on evaluating the administrative processes that bind federal, state, and local governments together.

POLS 536 - Readings in Civil Liberties (3 credits)
Attention is given to changed conditions and new influences affecting American liberty in the twentieth century. It includes an analysis of issues in economic, social, and political liberties. Emphasis is on constitutional logic and change and on evaluation of the role of the state and the responsibility of the citizen in defining civil liberties. Selections of issues are adapted to student interest and timeliness of problems. Distribution: Advanced.

POLS 537 - Problems in Public Administration (3 credits)
This course is a survey and analysis of the major contributions in traditional and contemporary organization theory; examination of decision making, leadership, and human behavior in complex organization; the study of Public Administration as an integral part of the public policy process; problems in budgetary politics; and personnel administration, administrative law, and democracy in the administrative state.

POLS 538 - United States Foreign Policy (3 credits)
This course examines the Constitutional basis of U.S. foreign affairs, foreign policy, separation of powers, the mechanics of foreign relations, significant principles, tenets and trends as revealed in United States diplomatic history, treaties and executive agreements, traditional and new diplomatic practices, foreign policy and international organization, and the extent of democratic control of foreign affairs. Distribution: Advanced.

POLS 539 - Political Behavior (3 credits)
This course looks at the theories used to explain international interactions between states, but also organizations and increasingly corporations and individuals. National interests, foreign policy and the changing international order are examined using dominant theories to help us understand why something happens, and why decisions are made in certain ways.

POLS 540 - Comparative Politics (3 credits)
This course consists of a comparative analysis of Western European political systems with special emphasis upon the environmental factors that have shaped these systems and the identification of relevant categories, such as ideology and the organization of political authority, from which generalizations may be derived.

POLS 541 - Seminar on International Security (3 credits)
Placed in the context of globalization, this course investigates new security threats to states and people globally. The course looks at contemporary international debates on social and political sources of violent acts, international and domestic laws on terrorism and counter-terrorism, the balance of security versus individual rights, and organizations involved in security issues. Distribution: Advanced.

POLS 542 - International Relations: Theory and Practice (3 credits)
This course is a study of the development of international institutions from the 19th century public unions to the more recent specialized agencies; procedures for settlement of disputes; development of law in and outside the community of nations; and the study of international organizations as a political phenomenon of the 20th century. Distribution: Advanced.

POLS 543 - Seminar in American Political Thought (3 credits)
An in-depth exposure to major segments of American political thought, with a special emphasis on the emergence of Liberalism. This evolution would be considered in successive courses, as determined by the professor. A possible breakdown might be as follows; relevant English, revolutionary, Constitutional and Whig thought; transcendentalism, the Civil War and individualism, pragmatism; New Deal Liberals and other recent writings.

POLS 544 - The Politics of Developing Nations (3 credits)
This course is a comparative analysis of political development in the Third World with particular focus upon the role of revolutionary warfare and politics, charismatic leaders, military elites and ideology.

POLS 545 - Legislative Process (3 credits)
This course concentrates on the United States Congress, its role in the evolution of the American political process, the internal workings of the Congress, the environment in which Congress functions, and an assessment of Congressional effectiveness.

POLS 546 - Budgeting & Finance (3 credits)
This course treats budget as a policy instrument that sets priorities for government. Students study the politics of the budget process as well as its procedures. Attention is also given to fiscal and monetary policies and to using computer simulations in budgeting. This course provides graduates with an overview of the budgeting process from revenue sources to expenditure controls. Special emphasis is placed on systematic budgeting techniques such as ZBB and MBO. It requires each student to become acquainted with accounting techniques used in public agencies.

POLS 547 - Political Behavior (3 credits)
This course is an examination of the formation and causes of cleavages and consensus in the political system; the study of political attitude formation, leadership performance, small group relationships; and the effects of political myth, ideology, communication and political power on these processes.

POLS 548 - International Relations: Theory and Practice (3 credits)
This course views the discipline of international relations or political science. It includes challenges resulting from legislation, collective bargaining, and changing demographics in the workforce.

POLS 549 - Introduction to Research: Scope and Method (3 credits)
This course is an orientation to graduate study and research. This seminar is designed to acquaint the graduate student with the methods and materials of graduate study and scientific inquiry in Political Science. The course is required of all graduate students in the degree programs.

POLS 550 - Independent Research (1 credit)
This course utilizes selected social science research techniques to attack a specific problem. A formal report is prepared and presented. The course is
required for all students in the non-thesis program. Requires prior or concurrent completion of POLS 570.
Distribution: Advanced.

POLS 572 - Thesis I (3 credits)
Under the direction of a thesis adviser, this course consists of the development of a thesis topic, gathering data, organization of material, evaluation of data, and writing a formal thesis report.

POLS 573 - Thesis II (3 credits)
See POLS 572 Completion of Thesis.

POLS 577 - Independent Study (3 credits)
Under the auspices of a qualified member of the departmental faculty, the student pursues a pattern of reading, study, and research related to professional knowledge and understanding in political science. Topics should be established prior to enrollment. Prerequisite: Departmental approval; permission of the chairperson of the department.
Distribution: Advanced.

POLS 586 - Field Experience and Internship (1 - 6 credits)
This course is designed to provide the student with practical experience in a governmental agency or other organization with local, state, or national governmental or political concerns. Prerequisite: A minimum of 6 credits completed on the graduate level in political science with at least a "B" average. Enrollment in department graduate program.
Distribution: Advanced.

POLS 599T - Political Science Graduate Transfer (1 - 6 credits)
This course is designed to provide the student with practical experience in a governmental agency or other organization with local, state, or national governmental or political concerns. Prerequisite: A minimum of 6 credits completed on the graduate level in political science with at least a "B" average. Enrollment in department graduate program.

Professional and Digital Media Writing

College of Arts and Sciences
Department of English
Stroud Hall 309
570-422-3398
www.esu.edu/english

The English Department offers an M.A. degree in Professional and Digital Media Writing. All of the M.A. coursework is taught online, making the program convenient for the employed graduate student. The program gives future professional writers, as well as those seeking to update skills, a strong background in professional research, writing for organizations, digital document design, and copyediting and publishing. Course electives permit the student the opportunity to explore various professional writing disciplines, such as journalism, creative writing, and corporate communications.

English Faculty

Laura Kieselbach, Ph.D., (lkieselbac@esu.edu)
Jasmine Villa, Ph.D., (jvilla@esu.edu)

Professional and Digital Media Writing, M.A.

30 credits
Program is 100% online.

PROGRAM REQUIREMENTS:

Required courses:
ENGL 501 Seminar in Professional Writing Styles and Approaches 3
ENGL 510 Introduction to Professional Writing Research Methods 3
ENGL 514 Advanced Grammar and Copyediting 3
ENGL 520 The Professional Document 3
ENGL 590 Thesis in Professional and New Media Writing 1-3

Subtotal: 15

CHOOSE 15 ADDITIONAL CREDITS FROM THE BELOW:

ENGL 530 Theory and Craft of Writing 3
ENGL 531 Professional Writing for the Web 3
ENGL 532 Public Relations and Organizational Writing 3
ENGL 533 Professional Writing About Places 3
ENGL 534 Visual Rhetoric in Professional Writing 3
ENGL 536 Administrative and Technical Writing 3
ENGL 537 Freelance Writing 3
ENGL 540 Theories of Electronic Writing 3
ENGL 541 Studies in Journalistic Literature 3
ENGL 542 Currents in American Journalism 3

Subtotal: 15

In addition, the English Department continues to offer graduate coursework in support of teaching certification and Masters of Education programs, in conjunction with other requirements of the Department of Professional and Secondary Education.

Those graduate courses in English are geared toward new and continuing teachers in the middle and high school levels.

ENGL - English

ENGL 500 - Special Topics (6 credits)
This course is designed to provide the student with an opportunity to explore various professional writing disciplines, such as journalism, creative writing, and corporate communications.
ENGL 503 - Shakespeare: Advanced Studies (3 credits)
This course is intended to enhance the student’s knowledge of comedies, tragedies, and histories of Shakespeare besides those taught and retaught in our schools. Students will also study recent Shakespearean criticism.

ENGL 510 - Introduction to Professional Writing Research Methods (3 credits)
This course combines an introduction to traditional academic research, historiography, source-review, and archival analysis practices with the appraisal of and practice in using some of the cutting-edge, technology, driven methods of research (data mining, crowdsourcing, online research tools, etc.) employed by professional writers working in senior-level and/or advanced corporate, governmental, and non-profit contexts. Distribution: Advanced.

ENGL 512 - Teaching Writing in the Secondary and Middle Schools (3 credits)
This course will briefly survey the history of the teaching of writing in American secondary schools, intensively review writing process theory and research of the past two decades, and critically consider the implications of writing process theory and research for classroom practice. Also listed as PSED 512. Prerequisites: Graduate standing.

ENGL 513 - Seminar in Writing Pedagogy and Instructional Practices (6 credits)
This is an intensive four-week summer course for teachers of all disciplines and grade levels that focuses on three related activities: (1) teacher demonstrations of classroom practice; (2) study of current theory and research in writing, thinking, diversity, and teaching; and (3) practice in writing and responding. Prerequisites: B.A. or B.S. in any academic discipline and consent of instructor.

ENGL 514 - Advanced Grammar and Copyediting (3 credits)
This course will prepare writers to make informed decisions about grammar, usage, style and punctuation in professional manuscripts. Following a review of the concepts and terminology specific to the field, the course will include practice in writing and proofreading both on-line and paper texts designed for a variety of publications, as the requirements vary from one medium and genre to another. Distribution: Advanced.

ENGL 515 - Computers And Writing (3 credits)
Computers and Writing will examine the impact that the new forms of electronic writing have had and will have on conventional print-based writing. We will analyze various forms of electronic writing such as the World Wide Web, e-mail, listservs, newsgroups, and MOOs.

ENGL 520 - The Professional Document (3 credits)
This course focuses on current editorial document production in order to prepare students for editorial jobs in news, magazine, and online media. Workplace writing production and the effective combined use of written text and image in a variety of formats, including brochures, magazine layouts, book design, web pages, PowerPoints, instructional texts, and advertisements will be discussed. Students will use industry standard tools and techniques associated to current editorial processes. Distribution: Advanced.

ENGL 530 - Theory and Craft of Writing (3 credits)
This course focuses on the theory and craft of writing in one of the following genres: poetry, fiction, creative nonfiction, journalism, screenwriting, web-based writing, public relations writing, advertising, etc. Emphasis will be on the historical and theoretical underpinnings of craft as they apply to the particular genre or mode of discourse. Distribution: Advanced.

ENGL 531 - Professional Writing for the Web (3 credits)
This course will focus on web writing, design and site-evaluation and provide students with opportunities to carry out a range of sophisticated web-based writing projects for regional non-profits, from creating entire websites to writing select content or revamping existing websites. The course assumes no prior knowledge of programming languages, but all students within the first month will be expected to gain a working knowledge in HTML, XML, and CSS languages, as well as knowledge of scripting languages. Distribution: Advanced.

ENGL 532 - Public Relations and Organizational Writing (3 credits)
This course will focus on case study analyses of current corporate and non-profit public relations and corporate documents. A major emphasis of the course will be on best practices in public relations and corporate writing. Distribution: Advanced.

ENGL 533 - Professional Writing About Places (3 credits)
This course will examine travel writing, travel journalism, public relations initiatives for institutions such as universities, corporations, school districts, living complexes. Emphasis will be placed on creating original documents in various genres. Distribution: Advanced.

ENGL 534 - Visual Rhetoric in Professional Writing (3 credits)
This course will cover the history and theory of visual rhetoric and its relationship to print. Students will research, read, analyze, and write about rhetorical images and their social, cultural and political implications. Students will also create visual text for varied rhetorical purposes. Distribution: Advanced.

ENGL 536 - Administrative and Technical Writing (3 credits)
This course focuses on theories and application of administrative and technical writing in print and electronic media. Students will explore the various purposes, genres, styles, and contexts for writing within a corporate, business, government, and/or technical workplace and will create their own administrative and technical documents. Distribution: Advanced.

ENGL 537 - Freelance Writing (3 credits)
This course focuses on freelance writing as a career, with topics such as how to determine a specialty, how to come up with topics, where to find freelance jobs, how to bid on jobs, how to file taxes, how to market oneself, and how to keep inspiration coming. Distribution: Advanced.

ENGL 540 - Theories of Electronic Writing (3 credits)
This course will cover the history and theory of electronic writing spaces and how computers, the Web and mobile devices are transforming print based writing. Students will read a wide range of books and articles focused on the evolution and development of the various theories of electronic writing and compose original work in both print and electronic media. Distribution: Advanced.

ENGL 541 - Studies in Journalistic Literature (3 credits)
Students will analyze and engage with a wide variety of literature written by journalists, covering crucial world events and political situations, exploring intersection of journalistic reportage and creative nonfiction. Distribution: Advanced.

ENGL 542 - Currents in American Journalism (3 credits)
This course provides an overview of the history of American journalism in newspaper and magazine writing. The course examines American journalism across several distinct phases: the colonial era; the Revolutionary War and early Republic period; the antebellum and post-
Civil War periods; late nineetneth-century and early twentieth-century yellow journalism and muckraking; the twentieth-century syndication of the press; and the evolving multimedia age. The course will discuss the interaction between American journalism and the rise of American Literature and art.

ENGL 554 - Topics in British Literature (3 credits)
This graduate course will provide new perspectives for the study of British literature. The new perspectives will include recent critical theories, fresh contexts, and reconceived canons. The emphasis and period(s) considered may vary each semester the course is offered. Students may take this course for credit more than once if they wish to study more than one approach or period.

ENGL 562 - Topics in American Literature (3 credits)
This graduate course will provide new perspectives for the study of American literature. The new perspectives will include recent critical theories, fresh contexts, and reconceived canons. The emphasis and period(s) considered may vary each semester the course is offered. Students may take this course for credit more than once if they wish to study more than one approach or period.

ENGL 563 - Studies in Contemporary Literature (3 credits)
This graduate course will consider the major intellectual and aesthetic developments in recent literature. Each semester it is offered, the instructor will choose one particular genre, group of writers, or new literary development to concentrate on for intensive study.

ENGL 564 - Contemporary Literary Theory for Teachers (3 credits)
This course will consider major developments in recent literary theory and seek to apply them to realistic pedagogical methodology concerning the reading and writing of literature in public schools.

ENGL 565 - Topics in World Literature (3 credits)
This course is an examination of literature other than British and American, such as African, Asian, Native American, Middle Eastern, Classical, South American, Caribbean, and European. The instructor may choose to examine a particular literary tradition, the literary points of view of a region, a theme running through several literary traditions, or a particular way of reading and responding to a body of literature. Students may take this course for credit more than once if they wish to study more than one tradition or period.

ENGL 566 - Teaching Multicultural Literature (3 credits)
The English/Education major will utilize a seminar setting to focus on a detailed consideration of current multicultural subject matter, theory, and strategy that may be effective in the multicultural classroom.

ENGL 567 - Literature And Film (3 credits)
This course is designed to enhance critical analysis of popular classical texts. This course will examine specific literature and the film versions of these texts throughout the years. Students will extend their knowledge of the literature by examining how the essence of the text transfers to various film versions of the original literature. Students will produce personal, comparative, and research-based writings in this course.

ENGL 577 - Independent Study (3 credits)
Under the auspices of a qualified member of the department faculty, the student pursues a pattern of reading, study, and research related to the understanding and knowledge of English.

ENGL 586 - Internship in Professional and Digital Media (3 credits)
Professional writing internships at the graduate level prepare students for careers in the field. The critical component of field experience offers students an opportunity to apply coursework knowledge in a professional setting. Internships enhance employment prospects and deepen disciplinary expertise. Professional writing internships enable students employed or volunteering in an internal or external professional internship to gain college credit in the MA program for this experience. Prerequisite: Admission to the graduate program in the M.A. in Professional and Digital Media Writing. Completion of English 501, plus a B or higher GPA in the M.A. Program in Professional and Digital Media Writing.

ENGL 589 - Current Topics in Professional and Digital Media (3 credits)
This seminar will focus on a genre or skill for professional/digital media writers developing and preparing material for print or electronic media. The course will provide students with a range of opportunities for the intensive study of writing in various occupational or disciplinary fields, as well as in varied approaches to the writing process. May be repeated for credit once with a different topic. Prerequisite: Admission to an ESU Graduate Program.

ENGL 590 - Thesis in Professional and New Media Writing (1-3 credits)
Students taking thesis hours develop and complete a written professional, scholarly, and/or artistic capstone project in professional and new media writing in consultation with their thesis committee chairperson. Planned field experiences in professional and/or new media writing may also comprise all or part of this capstone project. Distribution: Advanced.

ENGL 599T - English Graduate Transfer (1 - 6 credits)
Students taking thesis hours develop and complete a written professional, scholarly, and/or artistic capstone project in professional and new media writing in consultation with their thesis committee chairperson. Planned field experiences in professional and/or new media writing may also comprise all or part of this capstone project.

Professional and Secondary Education
College of Education

Graduate Coordinator:
M. Elizabeth Azukas (mazukas@esu.edu)
Professors:
Beth Sockman, Ph.D., Co-chair, (bsockman@esu.edu)
Assistant Professors:
Mary (Liz) Azukas, Ph.D., (mazukas@esu.edu)
Diane Holben, Ph.D., (dholben1@esu.edu)
Donna-Marie Cole-Mallott, PhD. (dcolemalot@esu.edu)

Professional and Secondary Education M.Ed.
Purpose of Degree
This master’s degree is designed for professional educators and K-12 certified school teachers who wish to further develop the knowledge, skills, and attitudes necessary for growth in teaching effectiveness (Track 1), to seek Pennsylvania K-12 principal certification, or New Jersey principal or supervisory certificates (Track 2), to seek National Board Certification (Track 3), or to seek an M. Ed. with a concentration in Advanced or Adapted Physical Education (Tracks 4 and 5).

National Accreditation
National Council for Accreditation of Teacher Education
Special Resources of the Department

The Department of Professional and Secondary Education is composed of faculty members who have had a wide range of experiences that enrich the program. Faculty members have served as elementary and secondary school teachers, supervisors, elementary and secondary school principals, and superintendents of schools.

PROGRAM OF STUDY

All graduate students pursuing a Master of Education degree in Professional and Secondary Education are required to take 36 credits - 21 credits from core requirements and 15 credits from one of five tracks:

- **Track 1: Professional Education**
- **Track 2: Educational Leadership** (successful completion prepares candidates for Principal Certification)
- **Track 3: Advanced Pedagogy** (successful completion prepares candidates for National Board Certification)
- **Track 4: Advanced Physical Education**
- **Track 5: Adapted Physical Education** (can lead to National Certified Adapted Physical Education Certificate)

Note: It is also possible to arrange for the transfer of six graduate credits from an accredited institution with pre-approval from the Graduate Program Coordinator.

Note: Candidates must earn certification before awarding of Master's Degree.

Admission Requirements:

- Bachelor's degree from accredited college or university
- Minimum GPA of 3.0 from bachelor's degree or 15 credit hours of prior graduate coursework
- Teacher certification and all required Pennsylvania clearances

Completion Requirements:

- Professional portfolio
- Oral review

Secondary Education Certification Preparation

All requirements are subject to change based on changes in requirements to Teacher Certification code in respective state level Departments of Education.

Purpose of Program

The programs for certification in secondary education are designed for individuals who have successfully completed an undergraduate degree in an area other than education. The programs are planned and supervised by the Department of Professional and Secondary Education and by the department responsible for the academic major.

PROGRAM OF STUDY

Certification areas are the following:

- Biology
- Chemistry
- Earth and Space Science
- English
- French
- General Science
- Mathematics
- Physics
- Social Studies
- Spanish

Students are urged to meet regularly with advisers, one from Professional and Secondary Education, and another from the discipline department to ensure receiving certification in the most efficient manner.

PLAN OF STUDY

A total of 27 credits of professional course work are required plus a semester of Student Teaching which includes Practicum support sessions and Internship (13 credits).

Students must achieve and maintain the minimum requirements for admission to, and retention in, the certification programs as specified by the departments and the Teacher Education Council.

Required Courses:

- PSED 510 Teacher, School and Community 3
- PSED 516 Learner & the Learning Process 3
- PSED 524 Teaching English Language Learners in the Diverse Classroom Setting 3
- REED 528 Teaching Content Area Reading to Diverse Learners 3
- SPED 550 Nature and Needs of Exceptional Individuals 3
- SPED 551 Inclusionary Practices 3

Secondary Education Methods Courses

The appropriate secondary education methods courses (below) should be taken one or two semesters before enrolling in Student Teaching. Some Methods courses are not offered every semester so it is critical to work with both the PSED adviser and the academic content area adviser to ensure completing the program in the most efficient manner.

Students are encouraged to take Seminar I before or concurrently with the “Teaching of ...” courses. Seminar I and II may not be taken concurrently.

- PSED 506 Teaching of English in the Secondary Schools 3
- PSED 517 Teaching of Foreign Language 3
- PSED 520 Seminar Secondary Education I 3
- PSED 521 Seminar Secondary Education II 3
- PSED 536 Teaching of Mathematics in the Secondary Schools 3
- PSED 546 Teaching of Science in the Secondary Schools 3
- PSED 566 Teaching of Social Studies in the Secondary School 3

Student Teaching

Student teaching may be taken as graduate level credits but may not be used to fulfill master’s of education degree requirements.

- PSED 518 Student Teaching in Secondary Education: Middle School-Junior High 6 credits
- PSED 519 Student Teaching in Senior High School 6 credits

The two student teaching experiences will include a required support program called practicum. It also includes support from the academic department in the following course:

- BIOL 499 Student Teaching Internship
- CHEM 499 Student Teaching Internship
- ENGL 499 Student Teaching Internship
- HIST 499 Student Teaching Internship
- PHYS 499 Student Teaching Internship
- MATH 499 Student Teaching Internship
- MLNG 499 Student Teaching Internship

Final Completion Requirements

Graduates who complete the required courses in one of the majors listed above, the professional education courses, the university requirements, and the state requirements are eligible to be recommended for certification to teach in their major in grades 7-12. Applications for certification are obtained online from the Pennsylvania Department of Education.

Secondary Education Certification - Professional Development School

Periodically opportunities are available to be part of the Secondary Professional Development School Program. Check with the PSED chair or your adviser to determine semester this is offered.

Teacher Intern Program

Program Purpose

The Teacher Intern Program is an opportunity for college graduates to enter the teaching profession in the secondary schools of Pennsylvania, by allowing candidates to earn student teaching credits while teaching under supervision and on full salary. This hands-on approach to earning teaching credentials has been designed as an attractive alternative for the teaching profession.

Program Requirements

After admission to the graduate studies and the Teacher Certification Program at East Stroudsburg University, successfully passing the PRAXIS Specialty Examinations, meeting professional and academic requirements outlined by the Department of Professional and Secondary Education, and having a clear background records check, one may seek employment in the secondary schools of Pennsylvania.

If offered employment by a school district, one must immediately apply at the university (Dean, School of Education) and the Pennsylvania Department of Education for the Intern Certificate. From the time one gains employment and receives the Intern Certificate, one has three years to complete the required education credits (course work).
If one does not gain employment while holding the letter of candidacy, then teacher certification is available through the traditional route. After these steps are successfully completed one receives the Instructional I Certificate.

Certifications available are the following: Biology, Chemistry, Earth and Space Science, English, Foreign Language (French, Spanish), General Science, Mathematics, Physics, and Social Studies.

**Principal Certification Elementary and/or Secondary (K-12 program)**

Variable up to 36 credits

**Program Purpose**

The program has been designed for and will accept students who:

- Have enrolled in the Master's Degree in Professional and Secondary Education program at ESU OR
- Need additional course work to meet certification standards in Pennsylvania or other states and meet all entrance requirements.
- Desire enrichment, professional education requirements for other degree programs, or for other certification requirements and do not necessarily plan to seek certification as a principal.

Graduate credits already earned will be evaluated and accepted when applicable. Each student will have an adviser who will assist in planning the program in view of the students’ needs and interests.

To receive endorsement for a Pennsylvania Certificate, students will need to complete either a Master’s Degree or an add-on certificate program with a minimum of 18 hours completed at ESU.

New Jersey’s requirement that a candidate have a master’s degree in administration, leadership, or management can be completed at ESU by developing a master degree plan of study based on the Pennsylvania approved principal’s certification program.

An individual Plan of Study is developed for all candidates dependent upon their career path and state requirements for professional certification.

This program has been approved by the Educational Leadership Constituent Council’s Association for Supervision and Curriculum Development, the national organization for administration and leadership.

For all degree programs described above, the candidate must select a Development, the national organization for administration and leadership.

**Admission Requirements and Deadlines**

(see Admission Requirements)

Standards for admission are as follows:

**Admission, Pre-candidacy (Full)**

1. Bachelor’s degree from an accredited college or university.
2. Three completed Recommendation Forms from persons who have taught or supervised you. All recommendations must be sealed and bear the signature of the author.
3. An overall undergraduate minimum grade point average of 3.00 (4.00 basis).
4. A one-page professional resume.
5. A 250-300 word Professional Goal Statement (see Graduate Admissions Requirements).

**Admission, with Conditions**

1. Completion of all requirements listed above
2. If the applicant does not meet the GPA requirements listed above but has an overall undergraduate grade point average of at least 2.50, he/she may request admission with conditions.
3. The conditions the applicant must fulfill are stated at the time of application to a degree program. They may be corrected by taking:
   a. required undergraduate or graduate courses
   b. proficiency examinations
   c. auditing of specific courses
4. The student is required to fulfill all deficiency requirements in his/her program and to have achieved a 3.00 quality point average and a "B" or better in all courses in his/her graduate work by the time he/she has completed nine to 12 graduate credits. At this time, FULL ADMISSION is achieved when the Plan of Study is submitted and approved.

**Initial Teacher Certification Admission**

Students entering a program for initial teacher certification, either with or without the master’s degree option, are required to fulfill additional requirements for entry and matriculation in the teacher education program.

1. Students must be formally admitted to the teacher education program before or upon completion of 12 graduate credits. Admission to the teacher education program requires:
   a. Completion of a faculty interview with portfolio demonstration
   b. Earn a minimum overall ESU QPA as identified by PA law (3.00)
   c. Have incidence-free FBI clearance, Criminal Check (Act 34), and Child Abuse clearance (Act 151)
   d. Any other specific departmental requirements or prerequisites and, being recommended by departmental faculty and approved by the Teacher Education Council.

   Students must be accepted to the Graduate College, which includes the review of all undergraduate course work.

**Graduate Assistantships**

Graduate assistantships are available through the department. These are awarded based upon merit and achievement to full-time students in the graduate program.

Graduate assistants do not teach classes, but complete projects and tasks assigned by professors.

The graduate assistantship is awarded for the first year of full-time study, with the possibility of extension through the first summer. Prospective students should apply for a graduate assistantship at the time of original application to the program, using the application form online.

Graduate Assistants must maintain satisfactory academic progress and meet all requirements stipulated by the Graduate College.

**PSED - Prof and Secondary Education**

**PSED 502 - Comparative Education (3 credits)**

This course deals with current educational systems throughout the world, and an analysis of the forces which have influenced these systems.

Distribution: Advanced.

**PSED 503 - Comparative Education Abroad (3 credits)**

This overseas fieldwork permits one to gain experience in his/her professional area overseas. One is assigned to a counterpart teacher/administrator abroad for three weeks. During this time one may engage in independent teaching, team teaching, small-group work, individualized instruction and assistance with activities in the host school.

Time should be available to discuss with staff in the overseas school such things as program, teaching methods and materials, organization of schools, and problems of education and curriculum.

Distribution: Advanced.

**PSED 504 - Philosophy Of Education (3 credits)**

This course is concerned with the philosophical consideration of the rights and duties of the child, the parent, the school, and the society. It examines the purpose of education in a democratic society from the varying views...
of modern schools of philosophy. Problems related to the organization, administration, and methods of teaching are explored in their philosophical context. Distribution: Advanced.

**PSED 505 - Classroom Management and Discipline Models (3 credits)**
The course will emphasize classroom management from the viewpoint of effective teaching. Specific discipline models will be analyzed and evaluated. Students will assess their philosophies in regard to classroom management practices and discipline models. Distribution: Advanced.

**PSED 506 - Teaching of English in the Secondary Schools (3 credits)**
Teaching of English deals with teaching methods and techniques and the organization and presentation of material through the various media of communication by planning units, evaluating instruction, collecting materials, and observing teaching. Prerequisites: PSED 510, 516. Distribution: Advanced.

**PSED 509 - History Of Education (3 credits)**
The course will examine, evaluate, and analyze American educational history from colonial times to the present day with recognition of pioneer efforts and people who have played an important part in the development of the American education process. Distribution: Advanced.

**PSED 510 - Teacher, School and Community (3 credits)**
This course analyzes a wide spectrum of human relations within the broad area of basic education. Common professional problems are discussed. It also includes an examination of the values and beliefs of the community as related to the public school.

**PSED 511 - Educational Sociology (3 credits)**
This course is a study of the public school in its strategic position in society and the social changes that directly affect the educational system and process. Community social service organizations that complement the role of the schools are explored and examined. Distribution: Advanced.

**PSED 512 - Teaching of Writing in the Secondary and Middle Schools (3 credits)**
This course will briefly survey the history of the teaching of writing in American secondary and middle schools, intensively review writing proves theory and research of the past two decades, and critically consider the implications of writing process theory and research for classroom practice. Prerequisites: Completion of 90 credits; consent of instructor. Distribution: Advanced.

**PSED 513 - Seminar in Writing Pedagogy and Instructional Practices (6 credits)**
This is an intensive four-week summer course for teachers of all disciplines and grade levels that focuses on three related activities: (1) teacher demonstrations of classroom practice; (2) study of current theory and research in writing, thinking, diversity, and teaching; and (3) practice in writing and responding. Prerequisite: B.A. or B.S. in any academic discipline and consent of instructor. Distribution: Advanced.

**PSED 514 - Educational Statistics (3 credits)**
This course includes an introduction to the statistical method including descriptive statistics and an introduction to statistical inference; frequency distributions in one and two variables; measures of central tendency and variability; dispersion; regression and correlation; the binominal and normal distribution; randomness; estimation of parameters; standard errors; testing hypotheses about means and differences between means, type I and type II errors; "T," chi-square, "F" distributions; and analysis of variance. Distribution: Advanced.

**PSED 515 - Educational Data (3 credits)**
This course presents an overview of quantitative and qualitative data relevant to educational leadership, student achievement, equity and school improvement. Authentic, semester-long research projects lead students to a more complete understanding of the types of educational data available for collection and analysis as well as how data can be collaboratively transformed into actionable knowledge to meet the challenges of professional decision-making, teaching and learning. Distribution: Advanced.

**PSED 516 - Learner & the Learning Process (3 credits)**
A review of various views (humanistic, behavioral, cognitive) of the learner and learning theorists (Skinner, Rogers, Bruner, Piaget). Case studies of actual teaching learning problems are brought to the class by the participants for examination and discussion by the group. Completion of PSED 510 is considered preferable prior to enrollment in this course. Distribution: Advanced.

**PSED 517 - Teaching of Foreign Language (3 credits)**
This course is designed for persons who wish to teach foreign languages in the schools, grades K-12. Students are provided with a theoretical foundation for teaching techniques and opportunities are provided for lesson presentations, preparation of teaching materials, planning units, evaluating instruction, and observing teaching. Prerequisites: PSED 510, 516, and six hours of 300- and 400-level courses in the target language area. Distribution: Advanced.

**PSED 518 - Student Teaching in Secondary Education: Middle School-Junior High School (6 credits)**
This course is part of a guided teaching experience in the secondary schools which typically consists of PSED 518 and 519 for a full semester. This field experience is designed to provide the opportunity to demonstrate the competencies and understandings of the teaching/learning process in the middle/junior high school. This course will not be permitted to fulfill M.Ed. requirements. Prerequisites: 1) students must meet all requirements described under the Student Teaching section, 2) students must have approval of the adviser and department chair in the major field, 3) students must have the approval of the Department of Professional and Secondary Education, and 4) students must have completed at least 24 credits in the major field.

**PSED 519 - Student Teaching in Secondary Education - Senior High School (6 credits)**
This course is part of a guided teaching experience in the secondary schools which typically consists of PSED 518 and 519 for a full semester. This field experience is designed to provide the opportunity to demonstrate the competencies and understandings of the teaching/learning process in the high school. This course will not be permitted to fulfill M.Ed. requirements. Prerequisites: 1) students must meet all requirements described under the Student Teaching section, 2) students must have approval of the adviser and department chair in the major field, 3) students must have the approval of the Department of Professional and Secondary Education, and 4) students must have completed at least 24 credits in the major field.

**PSED 520 - Seminar Secondary Education I (3 credits)**
This seminar includes the study and application of lesson planning, teaching strategies and style, and questioning skills. Seminar includes a required field experience (amounting to 30 hours) in the course. Students taking this course must sign up one semester in advance. Permission of
instructor required for enrollment. Prerequisites: Foundations of Education/ Educational Psychology (or graduate equivalent), permission of instructor. Distribution: Advanced.

PSED 521 - Seminar Secondary Education II (3 credits)
Students will examine the knowledge, skills, attitudes and behaviors that are necessary to teach in a culturally diverse and linguistically diverse and inclusive setting. Students will learn to respond to secondary student individual needs and apply appropriate evidence-based instructional and non-academic recommendations and interventions. This course requires a 30-hour field component in an inclusive classroom and incorporates experiences with English Language Learners. Distribution: Advanced.

PSED 522 - Foundations of Online Learning in K-12 Environments (3 credits)
This course will introduce the emerging pedagogy of online learning to K-12 interested professionals. Students will explore the requirements needed for successful online learning and teaching. After focusing on the unique characteristics of the online learner, students will explore how to create engaging online learning environments. While there will be significant focus on class design, there will also be references to the developing research about current best practices. Finally, the ethical issues associated with online learning will be considered. Distribution: ADVD.

PSED 523 - Assessing Students in K-12 Online Learning Environments (3 credits)
This course presents the key concepts with regard to design and implementation of appropriate assessment in K-12 online learning environments. Students will demonstrate competencies in creating and implementing assessments in online learning which include projects and assignments that assess learning progress by measuring student learning through both formative and summative assessments.

PSED 524 - Teaching English Language Learners in the Diverse Classroom Setting (3 credits)
This course provides the understandings and appreciation for linguistic and cultural diversity, and enhances the knowledge and skills of teachers working with culturally and linguistically diverse students in the classroom. The areas of emphasis include: a) the legal, historical and cultural implications of ELLs in the mainstream classroom and differences among home and school cultures, especially as they relate to language; b) a brief overview of first and second language acquisition theories; c) developmentally appropriate teaching strategies to enhance English language proficiency and academic success of ELLs; and d) Pennsylvania standards and the Pennsylvania ELL assessment systems. (This course is not part of the ESL Specialist endorsement). Distribution: Advanced. Prerequisite: PSED 516 AND PSED 510.

PSED 525 - Classroom Behavior of the Secondary School Student (3 credits)
This course explores ways to manage stress, establish realistic goals, and develop relaxation techniques so that stress is minimized in creative thinking and effective classroom management. The course will exhibit symptoms of job stress and worker burnout. The course will also present ways to effectively manage stress, establish realistic goals, and understand effective teaching styles. Prerequisites: PSED 161, 242. Distribution: Advanced.

PSED 527 - Virtual School Mission (1 credit)
This course is designed for current or aspiring educational leaders and focuses on the development of a mission and vision for a virtual school or program. While the course will address the importance of developing a mission and vision as well as the basic "how-to" create a mission and vision for your organization, the focus is on special considerations for virtual contexts.

PSED 528 - Ethics & Professional Norms (1 credit)
This course is designed for current or aspiring educational leaders and focuses on some of the unique aspects of ethics and professional norms when leading a virtual school and program. The course will address characteristics of effective virtual leaders, ethical considerations for leaders, teachers, and counselors in the online environment, and establishing professional norms that will promote teacher well-being and student success.

PSED 529 - Equity & Culture Online (1 credit)
This course is designed for current or aspiring educational leaders and focuses on promoting equity and culturally responsiveness in online programs. The course will address culturally responsive teaching and leadership, implicit bias, opportunity gaps, and special education in the online environment, and closing the digital divide.

PSED 530 - Workshop in Emotional Intelligence: Implications for the Classroom Teacher (3 credits)
This course provides general human relations training as related to enabling teachers to enhance the social and emotional development of elementary and secondary students. The course will provide teachers with the knowledge, skills, and strategies for developing their students' emotional intelligence competencies, e.g., impulse control, persistence, zeal, self-motivation, and social deftness. (Workshop Course) Distribution: Advanced.

PSED 531 - Advanced Workshop in Affective Education (3 credits)
The workshop offers participants preparation for the utilization of a humanistic, positive communication system in the classroom. Three themes, Awareness, Mastery, and Social Action, are utilized in facilitating student learning via improved communications and problem-solving techniques. (Workshop Course) Distribution: Advanced.

PSED 532 - Yo Puedo (3 credits)
This course is specifically designed for educators who work with bilingual/bicultural Spanish students at the junior and senior high level. Experiential activities are utilized to get participants in touch with the rich, complicated, and sometimes confusing world of the bilingual/bicultural student. Participants learn to help students build and strengthen leadership skills in an environment of positiveness, acceptance, and responsibility. Prerequisite: Undergraduate or graduate sociology or anthropology course. (Workshop Course) Distribution: Advanced.

PSED 533 - Designing and Implementing Programs for Professional Development (3 credits)
This course will emphasize the knowledge and skills needed for teachers to participate in designing and facilitating their own professional development programs. Teaching styles and activities will be explored, while participants utilize self-assessment to evaluate their needs and establish goals. Strategies for implementation will be discussed. (Workshop Course) Distribution: Advanced.

PSED 535 - Classroom Diversity (3 credits)
This course encourages educators to identify their own values, prejudices, and goals; to examine their thoughts and/or misconceptions about culturally diverse communities. Designed to help them create school climates that celebrate diversity and meet the needs of students of different races, ethnicities, gender, and ability levels. (This course is offered both as a Workshop Course and a non-workshop graduate class.)
PSED 536 - Teaching of Mathematics in the Secondary Schools (3 credits)
This course deals with new mathematics programs and evaluations, trends, and research in the teaching of mathematics, routine procedures in the mathematics classroom, lesson plans, and teaching units, and effective techniques applied to selected topics in mathematics. Prerequisites: PSED 510, 516. Distribution: Advanced.

PSED 537 - Online Professional Community (1 credit)
This course is designed for current or aspiring educational leaders and focuses on how to foster a professional community of teachers and other professional staff to promote each student's academic success and well-being when working in the online environment.

PSED 538 - Community of Care and Support (1 credit)
This course is designed for current or aspiring educational leaders in the online environment. Participants will examine the ways to build student community with various cultural identities and stakeholder groups. With trust and respect at the forefront, leaders will utilize coherent systems of academic and emotional-social support to create plans that promote communities of care and a sense of belonging for students.

PSED 539 - Engage Families and Communities (1 credit)
This course is designed for current or aspiring educational leaders to focus on engaging families and communities in online programs. Participants will reflect on beliefs and assumptions that impact cross cultural communication to prepare for authentic dialogue. Utilizing digital tools, leaders create family and community engagement plans that recognize strengths to achieve common goals.

PSED 541 - Introduction to Schools Without Failure (3 credits)
This program is built on involvement, relevance, and thinking. Much time is devoted to attitudinal change, communication skills, group processes, and problem solving. The focus is on meeting the needs of the individual school. Its purpose is to assist principals and teachers in developing a positive, personal philosophy of education; to present a process for developing classroom skills and procedures; to implement a success-oriented curriculum and to provide ways for building constructive communication within the school and between the school and the community. (Workshop Course) Distribution: Advanced.

PSED 542 - Discipline In The Classroom (3 credits)
This program is designed for participants to take part in learning activities that will enable them to develop positive techniques for handling student behavior problems. This course is aimed at training teachers to use Reality Therapy as a tool in the classroom. It addresses one of the major concerns of the public school’s classroom control and behavior change. (Workshop Course) Distribution: Advanced.

PSED 543 - Theory and Practice of Schools Without Failure I (3 credits)
This course offers participants an opportunity to investigate the effects of school success and failure on the life of a child. Study of these concepts will be taken from the points of view of William Glasser, M.D., in his books Schools Without Failure, Identity Society, and Reality Therapy. (Workshop Course) Distribution: Advanced.

PSED 544 - Theory and Practice of Schools Without Failure II (3 credits)
Educators will gain experience in conducting diagnostic class meetings and in providing the educational climate necessary for self-discipline. Curriculum planning related to self-directed learning will be explored. Recent advancements in brain research, psychology, and theory will be presented. (Workshop Course) Distribution: Advanced.

PSED 545 - Planning For Change (3 credits)
The goals of quality education will be analyzed as a basis for curriculum change. The relationship between affective education and cognition will be reviewed and assessed through a group process. Systems for change will be developed utilizing personal influence and power. The workshop will also help participants acquire additional skill in expanding their knowledge and use of Reality Therapy in the educational environment. (Workshop Course) Distribution: Advanced.

PSED 546 - Teaching of Science in the Secondary Schools (3 credits)
This course examines those aspects of teaching that are peculiar to the secondary science classroom, including science safety, avenues for obtaining science education resources, science-specific standards and guidelines, the nature, context and concepts of science and pedagogical methods of supporting science in the secondary classroom. This course will require a field experience of about 10 hours in a secondary setting. Distribution: Advanced.

PSED 547 - Success-Oriented Reading: Whole Language Development (3 credits)
This course will provide opportunities for participants to explore the reading process from a variety of current viewpoints to help the participants develop their own personal classroom teaching programs and to put these ideas into practice. Prerequisite: ELED/PSED 581 or 582. (Workshop Course) Distribution: Advanced.

PSED 548 - Reality Therapy in The Classroom (3 credits)
This workshop is designed to increase proficiency in the use of Reality Therapy in the classroom. (The course presumes an understanding of philosophy and basic steps.) Emphasis will be placed on acquiring the skills in the implementation of the Reality Therapy approach in the educational environment. Prerequisite: ELED/PSED 582. (Workshop Course) Distribution: Advanced.

PSED 549 - Reducing Classroom Conflict (3 credits)
This workshop is designed to provide participants with skills in developing pathways to build strength and success in themselves and their students. It focuses on specific classroom activities that will help develop a climate for effective self-discipline and positive classroom interaction. Prerequisite: PSED 581. (Workshop Course) Distribution: Advanced.

PSED 552 - Together: Mainstreaming in the Schools (3 credits)
The purpose of the workshop is to cause meaningful interaction of special and regular educational teachers. Their interaction enables teachers to review and to develop positive models for their particular schools that allow for exceptional and non-exceptional children to learn together and respect and know each other. A major emphasis will be to devise, through group interaction, a plan for implementation of mainstreaming in the particular schools. The course is cross-listed with ELED 552 and SPED 552. (Workshop Course) Distribution: Advanced.

PSED 553 - Teaching & Motivating (3 credits)
The course provides educators with the theory and skills to motivate students to learn and to accelerate their academic achievement. Brain function and dominance will be reviewed in light of how these processes result in different student learning styles. Participants will build teaching...
strategies to deal with learning styles. Prerequisites: ELED 232/PSED 242.
Graduate Prerequisites: ELED 581, PSED 541.
Distribution: Advanced.

PSED 554 - Foundations of Curriculum Construction (3 credits)
This course is designed for teachers, chairs, or supervisors who are interested in shaping curriculum development (K-12) and responsible for its evaluation. The theory for planning change in curriculum and evaluating the effects of curriculum will be viewed with concern being given to gathering evidence of need for change, research in change, models for initiating change, and models/theories for evaluating present and changing curriculum. Prerequisite: Graduate standing. Not for general education.
Distribution: Advanced.

PSED 555 - Practicum in Curriculum Development (3 credits)
This course is designed to permit individuals or groups (K-12) to work on specific problems in curriculum development and/or implementation, including curriculum planning, selection and construction, implementation of new courses, curriculum and programs, development of proposals for change, and in-service projects. Teams from schools are encouraged to enroll. (Class hours arranged)
Distribution: Advanced.

PSED 556 - Co-Operative Learning (3 credits)
The course is designed to provide skills to implement learning teams in the classroom. The course content develops a basic understanding of control theory as it applies to cooperative learning. Class experiences produce new teaching plans based on control theory and demonstrate that learning teams can provide top achievement, and provide methodology for critical thinking and problem solving. (Workshop Course)
Distribution: Advanced.

PSED 557 - Reducing Stress in the Classroom (3 credits)
This course explores ways to manage stress, establish realistic goals, and develop relaxation techniques so that stress is minimized in creative thinking and effective classroom management. The course will exhibit symptoms of job stress and worker burnout in the educational setting and present ways to effectively manage stress, establish realistic goals and understand effective teaching styles. Prerequisites: PSED 161, 242.
(Workshop Course)
Distribution: Advanced.

PSED 559 - Enhancing Self-Esteem (3 credits)
This course will introduce educators to elements of self-esteem and how those elements can be used to establish an atmosphere where high self-esteem and motivation can flourish. This course takes theory of self-esteem and translates it into practice. It also emphasizes basic human relations and interpersonal skills necessary to create a classroom environment conducive to the teaching/learning process. (Workshop Course)
Distribution: Advanced.

PSED 560 - Seminar in Research in Curriculum and Instruction (3 credits)
This is a graduate seminar in current research developments in the field of curriculum and instruction. The techniques and literature of research will be employed to analyze the stability and direction of developmental trends in curriculum and instruction.
Distribution: Advanced.

PSED 565 - Curriculum Development Middle School (3 credits)
Designed to meet the needs of teachers who are developing programs and materials for the middle school, emphasis is placed upon the process of curriculum planning; objectives of education, diagnosis of curriculum development, selection of curriculum experiences, organization, and evaluation of curriculum content.
Distribution: Advanced.

PSED 566 - Teaching of Social Studies in the Secondary School (3 credits)
This course deals with the analysis and evaluation of current trends in curriculum, teaching methods, techniques, resources, and materials in teaching social studies in the secondary schools. Stress is placed on new developments in the field and on experience in applying concepts and methods learned. Prerequisites: PSED 510, 516.
Distribution: Advanced.

PSED 570 - Field Assessment Education (3 credits)
This course is a performance-based assessment of proficiency in education in which observations are made of specified professional skills in actual classroom situations. It includes interaction analysis, videotaping, and conferences. Prerequisite: Completion of 15 graduate credits. (Class hours arranged)
Distribution: Advanced.

PSED 571 - Independent Research Problem (1 credit)
This course is designed to assist students in the selection of an important problem in secondary education. Using recent methods in research techniques, the student will complete a faculty-approved research project. Prerequisite: ELED 570.
Distribution: Advanced.

PSED 572 - Seminar in Secondary Education III (1 credit)
This course is designed to provide teacher education certification candidates with the opportunity to design and conduct an action research project or an appropriate alternative research activity to enhance the required field experience with PSED 521 – Seminar in Secondary Education II. This experience will provide students with the opportunity to select an appropriate research model and design a research project that will enhance pedagogical practice. Students enrolled in PSED 572 will implement the plan and evaluate results for application in the classroom. Prerequisite: Concurrent enrollment in PSED 521 and successful completion of PSED 520.
Distribution: Advanced.

PSED 573 - Field Experience in Educational Leadership (3 credits)
The professional field experience in educational leadership is designed to provide administration certification candidates with advanced level theory seminars and 120 hours of practical experience in a school setting during which the candidate will develop administrative leadership competencies based on the standards recommended by the Interstate School Leaders License Consortium and the NJ/PA Departments of Education. The candidate will be supervised by an ESU faculty person and a field-based administrator. A portfolio is required at the completion of the course.
Distribution: Advanced. Prerequisite: PSED 516 AND PSED 554 AND PSED 515 AND PSED 584 OR ELED 592 OR PSED 588 OR PSED590 OR PSED 510 OR PSED 595 OR PSED 596.

PSED 574 - Field Experience in School Organization and Management (3 credits)
The professional field experience in educational leadership is designed to provide administration certification candidates with advanced level theory seminars and 120 hours of practical experience in a school setting during which the candidate will develop administrative competencies in school organization and management based on the standards recommended by the Interstate School Leaders License Consortium and the NJ/PA Departments of Education. The candidate will be supervised by an ESU faculty person and a field-based administrator. A portfolio is required at the completion of the course.
PSED 575 - Field Experience in Curriculum and Student Achievement (3 credits)
The professional field experience in educational leadership is designed to provide administration certification candidates with advanced level theory seminars and 120 hours of practical experience in a school setting during which the candidate will develop administrative competencies in curriculum development and the relation of curriculum to student achievement based on the standards recommended by the Interstate School Leaders License Consortium and the NJ/PA Departments of Education. The candidate will be supervised by an ESU faculty person and a field-based administrator. A portfolio is required at the completion of the course.
Distribution: Advanced.

PSED 576 - Teaching Strategies for Secondary Teachers (3 credits)
Endeavors to redesign instruction in order to make maximum learning more accessible to every pupil. Methods for developing a personal instructional system which fits the subject and the pupils will be outlined.
Distribution: Advanced.

PSED 577 - Independent Study (1 - 12 credits)
Under the auspices of a qualified member of the faculty of the Graduate School, the student pursues a pattern of readings, study, and research related to professional knowledge and understanding in Professional or Secondary Education. Topics should be established prior to enrollment.
Prerequisite: Approval of the department chair.
Distribution: Advanced.

PSED 579 - Current Trends in Secondary Education (3 credits)
This course serves as a basic and comprehensive source on current trends and innovative practices in the secondary schools. New opportunities and responsibilities for students, modifications of the traditional organization, alternative high schools, and places for learning beyond the schoolhouse are but a few areas that are discussed.
Distribution: Advanced.

PSED 580 - Professional Assessment in Secondary Education (3 credits)
Professional Assessment is designed to cause and to facilitate self-assessment coupled with assessment from the field (where the educator is employed) and assessment by the university. The student will become thoroughly involved in the procedure of self-assessment and will in fact be introduced to degree program competencies (master teacher competencies). The self and external professional assessment will lead to individualized professional development, competency mastery, and to degree obtainment.
Prerequisite: Undergraduate degree; admission to graduate school. (Class hours required)
Distribution: Advanced.

PSED 584 - Middle and High School Curriculum (3 credits)
This course deals with the overriding educational philosophy which governs curriculum formation. The decision-making process in curriculum improvement will be evaluated; processes for curriculum improvement will be reviewed and/or developed; and evaluative techniques will be identified.
Distribution: Advanced. Prerequisite: PSED 554.

PSED 585 - Educational Administration (3 credits)
An introduction and overview of the public school system and its management. The course provides for the orientation of prospective and current educational administrators for their roles of leadership. The course also requires field experiences in administration.
Prerequisite: Graduate standing.
Distribution: Advanced.

PSED 586 - Teaching of Communications in the Secondary Schools (3 credits)
Teaching of Communications addresses the presentation of methods and materials in the planning, teaching, and evaluating of learning activities in the cognitive, affective, and psychomotor realms of communication behavior, and observation of teaching in the secondary schools.
Prerequisites: PSED 510, 516.
Distribution: Advanced.

PSED 587 - School Community Relations (3 credits)
This course presents public relations as a comprehensive concept of interpretation for the public schools. Tenets, means, agents, and agencies to produce increased social understanding and appreciation of the educational function among school personnel and the general public are discussed.
Distribution: Advanced.

PSED 588 - School Law (3 credits)
This course is an analysis of the legal rights, responsibilities, and liabilities of student, parent, teacher, administrator, and school board. Consideration is given to the statutes, school code, and court decisions which affect education and all persons related to the education process.
Distribution: Advanced.

PSED 589 - Supervision Student Teachers (3 credits)
Attention is focused on an analysis of the various functions of the cooperating teacher while working with elementary or secondary student teachers. Emphasis is placed upon new techniques for working with student teachers, systems for recording, analyzing and reporting classroom teaching behavior, understanding the needs of student teachers, and individualizing student teaching experiences.
Prerequisite: Bachelor's degree and a teaching certificate.
Distribution: Advanced.

PSED 590 - Supervision of Instruction (3 credits)
This course is an introduction to the theory and function of supervision in the modern public school system, K-12. Application of emerging concepts and principles of modern school supervision to practical situations in which administrators, supervisors, coordinators, and teachers are working are presented.
Distribution: Advanced.

PSED 591 - Elementary School Administration (3 credits)
This course is an introduction to the theory and function of supervision in the modern public school system, K-12. Application of emerging concepts and principles of modern school supervision to practical situations in which administrators, supervisors, coordinators, and teachers are working are presented.
Distribution: Advanced.

PSED 592 - The Middle School (3 credits)
This course deals with administrative problems and practices related to the organization, operation, and program of the middle school and the junior high school.
Distribution: Advanced.

PSED 593 - Teaching Techniques in the Middle School (3 credits)
This course is designed to meet the needs of faculties, which are making a transition to the middle school program. Emphasis is placed upon developing programs and materials for a middle school. Topics include open-concept teaching; individualizing and personalizing instruction; team approaches; a review of IPI, PLAN, CPL and CAI models; preparing learning centers and developing learning activity packets and evaluating student progress.
Distribution: Advanced.
PSED 594 - Secondary School Administration  (3 credits)
This course is designed to meet the needs of faculties, which are making a transition to the middle school program. Emphasis is placed upon developing programs and materials for a middle school. Topics include open-concept teaching; individualizing and personalizing instruction; team approaches; a review of IPI, PLAN, CPL and CAI models; preparing learning centers and developing learning activity packets and evaluating student progress. Distribution: Advanced.

PSED 595 - Elementary and Secondary Educational Leadership  (3 credits)
An overview of the elementary and secondary school principalship. This course addresses the philosophical, social, and educational context in which the school and the principal function. The role of the principal, position responsibilities, professional trends, and opportunities for professional growth are examined. Students may not take both this course and PSED 591/594 for degree or certification credit. Prerequisites: PSED 585 and PSED 588

PSED 596 - School Finance (3 credits)
This is an introduction to the principles and structure of financing public education. The theory and practice of educational finance are examined from the point of view of problems of the local budget, the state's responsibility, taxation, and the effect of financial support upon the quality of the educational program. New concepts and emerging trends of public school finance are studied. Distribution: Advanced.

PSED 597 - School Plant (3 credits)
This course involves a study of problems involved in the planning construction, operation, and maintenance of the school plant. Distribution: Advanced.

PSED 598 - Trends in Secondary Mathematics Education  (3 credits)
This course will examine current and proposed secondary mathematics curricula and models of teaching and learning mathematics. Major foci will be mathematical problem-solving and integrating technology into the mathematics curriculum. Distribution: Advanced.

PSED 599 - Teaching Mathematics Using Technology  (3 credits)
Designed for in-service secondary mathematics teachers. Participants will learn how to use graphing calculators and computer algebra and geometry systems, how to incorporate them into their classrooms and how the mathematics that they teach will change as a result of the availability of technology.

PSED 599T - Professional and Secondary Education Graduate Transfer (1 - 6 credits)
Designed for in-service secondary mathematics teachers. Participants will learn how to use graphing calculators and computer algebra and geometry systems, how to incorporate them into their classrooms and how the mathematics that they teach will change as a result of the availability of technology.

PSED 650 - School And Community (3 credits)
This course focuses on the development and maintenance of a purposeful program of communication between the school and the community through study of selection, organization, and functions of citizen advisory committees and cooperative use of various community services. Distribution: Advanced. Prerequisite: Admission to and satisfactory progress in a cohort group in the IUP Educational Leadership Program.

PSED 651 - Conflict Resolution (3 credits)
This is an applied course focusing on the resolution of conflict between groups and a third party. Specifically examined are the techniques of negotiation, mediation, and conciliation. Simulation and role-play are utilized as well as readings in theory and case study. Distribution: Advanced. Prerequisite: Admission to and satisfactory progress in a cohort group in the IUP Educational Leadership Program.

PSED 658 - School Law and Negotiations  (3 credits)
A case study approach is utilized in this course where students read, present, and discuss cases reflecting current issues of interest in School Law. Case law, as opposed to statutory or administrative law, is emphasized in this approach. Students are expected to assume a leadership role in discussion of the cases they present. The course format features a high degree of student involvement, discussion, and interaction. Due to the non-traditional scheduling format of the course, preparation which must be completed between class sessions is typically much more extensive. Distribution: Advanced.

PSED 660 - School Finance (3 credits)
Budgeting procedures for large and small school districts are the focus of this course. School budgeting, accounting, bonding, and various monetary applications are presented as well as the various procedures for acquiring funds. Distribution: Advanced.

PSED 681 - Special Topics In Education (3 credits)
This course is designed for the advanced graduate student who wishes to do independent research in special area. Enrollment is limited to students enrolled in the IUP Doctoral Program in Administration and Leadership studies. Prerequisites: Admission to and satisfactory progress in a cohort group in the IUP Educational Leadership Program. Distribution: Advanced.

PSED 701 - Leadership Theory (3 credits)
The purpose of this course is to explore the concept of leadership and principles of learning. The student will develop a theoretical position regarding personal administrative style. Possible dissertation topics will be explored. Distribution: Advanced. Prerequisite: Admission to and satisfactory progress in a cohort group in the ESU Educational Leadership and Administration Program.

PSED 702 - Leadership: A Case Study Approach (3 credits)
This course examines cases of transition, reorganization, or redesign in order to gain insight into both the psychological and sociological aspects of successful leadership in changing environments. It exposes students to fundamental methods for data collection using case methodology. Distribution: Advanced. Prerequisite: Admission to and satisfactory progress in a cohort group in the ESU Educational Leadership and Administration Program.

PSED 703 - Leadership: Applied Practice (3 credits)
This course is designed to prepare doctoral students in leadership studies to develop and implement a field project that incorporates leadership and policy theories learned in previous courses. Various approaches and issues associated with design and implementation of a field project will be examined. Through an exploration of the literature, critique of theories, and direct hands-on exercises, students will be able to build competency in integrating leadership theories and research methods into their own field project. Distribution: Advanced. Prerequisite: Admission to and satisfactory progress in a cohort group in the ESU Educational Leadership and Administration Program.
**PSED 705 - Curriculum Analysis (3 credits)**
This course is designed to prepare doctoral students with a critical analysis of curriculum theory and research. Various approaches will be examined, with emphasis on the unique theoretical and methodological contributions of philosophical, psychological, and social approaches to the field of curriculum. Through an exploration of the literature, critique of theories, and direct hands-on exercises, the student will be able to build competency in integrating effective curriculum analysis into the student's own educational praxis. Distribution: Advanced. Prerequisite: Admission to and satisfactory progress in a cohort group in the ESU Educational Leadership and Administration Program.

**PSED 710 - Advanced Topics Human Development (3 credits)**
Students will evaluate and apply development theory as it pertains to the adult learner in environments of complex decision-making. This course introduces students to adult development from a biopsychosocial theoretical framework and guides them to explore how these factors influence their personal development. Students will apply course readings to contemporary leadership issues. Distribution: Advanced. Prerequisite: Admission to and satisfactory progress in a cohort group in the ESU Educational Leadership and Administration Program.

**PSED 715 - Writing for Professional Publication (3 credits)**
Students will evaluate and apply development theory as it pertains to the adult learner in environments of complex decision-making. Students will apply course readings to contemporary leadership issues. Prerequisites: Admission to and satisfactory progress in a cohort group in the IUP Educational Leadership Program. Distribution: Advanced.

**PSED 720 - Doctoral Seminar in Advanced Research Methods (3 credits)**
This course is designed to provide doctoral students in educational leadership with basic knowledge and skills in quantitative and qualitative educational research. Student will be required to review and abstract research articles. The students will learn to read and write about educational research in a non-threatening, supportive manner. Through step-by-step, hands-on exercises, students will be able to build competencies in conducting research in the field of education leadership. Distribution: Advanced. Prerequisite: Admission to and satisfactory progress in a cohort group in the ESU Educational Leadership and Administration Program.

**PSED 725 - Critical Analysis of Issues and Innovations in Education (3 credits)**
This course examines current issues and innovations which are influencing reform in basic and post-secondary (K-16) education. Relationships between research, policy making, and implementation will be emphasized. The effects of the political, social, and cultural contexts on the reforms will be examined. Distribution: Advanced. Prerequisite: Admission to and satisfactory progress in a cohort group in the ESU Educational Leadership and Administration Program.

**PSED 730 - Analysis of Effective Instruction (3 credits)**
This course explores reflective practice as it relates to the design, implementation, and evaluation of instruction at all educational levels K-16. Emphasis is also placed on supervision responsibilities of educational leaders for faculty, administrators, and staff in educational institutions. Topics include contemporary models of supervision, generational and cultural differences, and research on supervision, teaching and learning at all levels K-16.

**PSED 750 - School and Community (3 credits)**
This course focuses on the development and maintenance of a purposeful program of communication between the school and the community through study of selection, organization, and functions of citizen advisory committees and cooperative use of various community services. Prerequisite: Admission to and satisfactory progress in a cohort group in the ESU Educational Leadership and Administration Program.

**PSED 751 - Conflict Resolution (3 credits)**
This course provides students with an in-depth analysis of conflict resolution in many settings, primarily in employment relationships. Current theory in conflict resolution; the legal, ethical, and emotional issues that are common in disputes; and the format by which employment disputes are resolved will be examined. Students will also explore and define their own conflict resolution style. A seminar format, skill-building in the concepts and theories of conflict resolution and interest-based negotiation, analysis of readings, and experiential activities will be essential components of the class. Prerequisite: Admission to and satisfactory progress in a cohort group in the ESU Educational Leadership and Administration Program.

**PSED 758 - School Law and Negotiations (3 credits)**
This course is designed to help future school and university officials understand the sources of law governing educational institutions, the process of legal reasoning, basic concepts embodied in the First, Fourth, and Fourteenth Amendments to the U.S. Constitution and specific substantive law related to the operation of schools and universities. Prerequisite: Admission to and satisfactory progress in a cohort group in the ESU Educational Leadership and Administration Program.

**PSED 760 - School Finance (3 credits)**
Budgeting procedures for large and small school districts are the focus of this course. School budgeting, accounting, bonding, and various monetary applications are presented as well as the various procedures for acquiring funds. Prerequisite: Admission to and satisfactory progress in a cohort group in the ESU Educational Leadership and Administration Program.

**PSED 781 - Special Topics in Education (3 credits)**
This course is designed for the advanced graduate student who wishes to do independent research in special areas. Enrollment is limited to students enrolled in the ESU Doctoral Program in Educational Leadership and Administration. Prerequisite: Admission to and satisfactory progress in a cohort group in the ESU Educational Leadership and Administration Program.

**PSED 782 - Research Instrument Design for Leadership Studies (3 credits)**
This course is designed to provide doctoral students in educational leadership with basic knowledge and skills in quantitative and qualitative educational research. Students will be required to review and abstract research articles. The students will learn to read and write about educational research in a non-threatening, supportive manner. Through step-by-step, hands-on exercises, students will be able to build competencies in conducting research in the field of education leadership. Distribution: Advanced. Prerequisite: Admission to and satisfactory progress in a cohort group in the ESU Educational Leadership and Administration Program.
**PSED 783 - Analysis of Qualitative Data in Leadership Studies (3 credits)**

This course is designed to prepare doctoral students in leadership studies to conduct qualitative data analysis in dissertation research.

Distribution: Advanced. Prerequisite: Admission to and satisfactory progress in a cohort group in the ESU Educational Leadership and Administration Program.

**PSED 797 - Superintendency Internship (3 credits)**

This course is designed to provide authentic application of leadership and management theory in an authentic field placement setting. Students will implement the internship proposal developed in PSED 703. The requirements for this internship experience fulfill the requirements for the PA Superintendent's Letter of Eligibility. Enrollment is limited to students enrolled in the ESU Doctoral Program in Educational Leadership and Administration and completion of an approved internship proposal in PSED 703.

Prerequisite: Internship Proposal approved by PSED.

**PSED 798 - Internship (3 credits)**

This course is designed for the advanced graduate student who wishes to do independent research in special areas. Enrollment is limited to students enrolled in the ESU Doctoral Program in Educational Leadership and Administration.

Distribution: Advanced. Prerequisite: Admission to and satisfactory progress in a cohort group in the ESU Educational Leadership and Administration.

**PSED 799 - Doctoral Transfer Course (3 credits)**

This course is designed to allow doctoral students with earned credits from another program to transfer those credits particularly when the course is not transferred as an equivalent to an ESU offering. As per PASSHE policy, a maximum of 20 credits may be transferred in from another institution.

**PSED 950 - Dissertation (1 - 9 credits)**

This course is designed for the advanced graduate student who wishes to do independent research in special areas. Enrollment is limited to students enrolled in the ESU Doctoral Program in Educational Leadership and Administration.

Distribution: Advanced. Prerequisite: Admission to and satisfactory progress in a cohort group in the ESU Educational Leadership and Administration program.

**Masters in Public Health and Community Health**

**42 credits**

**Purpose of Degree**

The master of Public Health (MPH) graduate program, with a focus in Community Health Education, prepares students to enter the dynamic and challenging field of public health as research practitioners working in the prevention of disease and improving the quality of life in communities. Through a well-integrated program of study, students receive instruction in the core public health disciplines of:

- Biostatistics
- Environmental Health
- Epidemiology
- Public Health Administration
- Social & Behavioral Sciences

The MPH program provides students with a variety of opportunities to study the intersection of the social behavioral sciences, information technology, human behavior, organizational and community systems, and policy development.

With the focus in Community Health Education, graduates are eligible to sit for the Certified Health Education Specialist (CHES) exam. This certification indicates that they have the requisite skills in developing, planning, implementing and evaluating programs. Our MPH program is accredited by CEPH; thus, students are also eligible to sit for the Certification in Public Health (CPH) exam.

**National Accreditation**

The MPH program is accredited by the Council on Education for Public Health (CEPH) through 2020.

CEPH is the independent agency recognized by the U.S. Department of Education to accredit schools of public health and certain public health programs. CEPH accreditation attests to the quality of an educational program that prepares professionals for entry into the public health field. Accreditation also provides assurance to students that the school or program has been evaluated and has met accepted quality standards established by and within the profession. Our accreditation provides potential employers with assurances that our training program covers the essential public health skills and knowledge needed for achieving success in today’s public health arena.

**Mission Statement**

The faculty are heavily involved in scholarly service to the field of public health as well as conducting research to facilitate solving public health problems. Faculty members conduct this work at the national, state and local level.

Examples of faculty research include: social marketing strategies and tobacco control; the use of social marketing and social media in improving health literacy; evaluating asthma and diabetes prevention programs; providing technical assistance and evaluation/outcomes research in chronic disease prevention; conducting community-based substance abuse prevention initiatives; using health informatics and information technology applications in public health and prevention, to name a few. Faculty members are actively engaged in research and seek to collaborate with graduate assistants and other students. A number of these students,
some supported by research assistantships, are integrally involved in these projects.

PROGRAM OF STUDY
The Master of Public Health degree in Public Health and Community Health is a 42-credit program that includes a six-credit (300 hours) internship requirement and a requirement to conduct research resulting in a publishable quality paper.

Because the program combines traditional public health course work with professional training in community health education, graduates are well prepared to work in a variety of public health settings, or continue on for doctorate work.

Graduates work in program development, implementation, and evaluation of population based prevention programs to promote healthy behaviors and prevent disease as well as developing health policies that protect citizens from risk factors associated with negative health outcomes.

Students who enter the program typically have backgrounds in a variety of social service occupations with undergraduate and/or graduate degrees in the social behavioral sciences (such as health education, psychology, anthropology or sociology), as well as nursing, medicine, biology, and various other fields. No specific undergraduate degree is required for admission.

Entrance Requirements:

- Bachelor's degree
- Undergraduate minimum GPA of 3.00 or above
- Minimum of two letters of reference
- Personal statement
- GRE Scores: The GRE requirement is waived for any student with an undergraduate GPA of 3.50 or above.
- For all other applicants, while the program takes a portfolio approach to admissions, scoring 143 or higher on both the verbal and quantitative sections (new scale) of the test or a minimum total score of 285 is desired (concordant scores on the old scale will also be accepted). MCAT or GMAT can be used in lieu of GREs, with a minimum MCAT score of 19.0 or a minimum GMAT score of 400 required. For students completing the Public Health Certificate with grades of at least a "B" in all requirements, do not require GRE scores. TOEFL Scores are required for International Students (580 for paper; 233 for computer test; 90 for Internet test). Minimum IELTS Scores: Band Score = 7.

Final graduation requirement:

- Presentation of HLTH 571 project and achieving average committee review score of at least 2.5 out of 4.

Graduate Assistantships
Graduate assistantships are available through the department and other departments and programs on campus. These are awarded based upon merit and achievement to full-time students in the graduate program.

Graduate assistants do not teach classes, but complete projects and tasks assigned by professors. Graduate assistantships are awarded for the first and/or second year of full-time study. Graduate assistants are evaluated each semester, with continuation contingent on acceptable performance. Prospective students should apply for a graduate assistantship at the time of original application to the program, using the application form provided by the Graduate College.

Reading M.Ed.

36 credits

Program Purpose
The Reading Department of East Stroudsburg University offers an online graduate program of study leading to a Master of Education (M.Ed.) in Reading, which qualifies students for the Pennsylvania Reading Specialist Certificate. This certificate enables a teacher to provide reading instruction in kindergarten through grade 12. Out-of-state graduates will need to check with their state’s Department of Education to see if this program will fulfill the requirements for similar certificates/endorsements.

The mission of the Master of Education in Reading is to create a diverse community of educators dedicated to continuously advancing the teaching of reading, emerging literacies, and research in an ever-changing global society. Essential components, which are embedded in the Mission, include knowledge of the foundational components of reading, varied research and creative opportunities, integration of traditional and emerging technologies, challenging and contemporary curricula, and culturally responsive teaching, leadership, and service.
**National Accreditation**
National Council for Accreditation of Teacher Education (NCATE)

**Student Learning Outcomes**
Upon completion of the Master of Education in Reading, graduates will be able to:
- Base their teaching on the major theories of reading and their relationship to various models of literacy instruction.
- Use formative and summative assessment to diagnose and provide effective instruction for struggling readers.
- Plan and implement instruction based on best practices supported by current research, focusing on phonemic awareness, phonics, fluency, vocabulary, and comprehension.
- Develop a personal philosophy of literacy development and instruction.
- Teach reading to K-12 students.
- Work cooperatively and collaboratively with other professionals in planning programs to meet the needs of diverse populations of learners.
- Put literacy theory into practice in a variety of educational contexts.
- Integrate reading, writing, speaking, listening, and viewing across the curriculum.
- Differentiate instruction based on students’ needs.
- Use multiple, appropriate procedures to assess and evaluate students’ effort, progress, and achievement in literacy.
- Investigate and implement research on current practices in literacy instruction.
- Use technology and new digital literacies as natural components of teaching and learning.
- Provide leadership in student advocacy.
- Communicate and work collaboratively with parents, teachers, administrators, and community personnel in a literacy program.

Please note: Beginning in September 2013, in compliance with a directive from Pennsylvania Department of Education, all candidates are required to complete (or submit official transcripts to document that they have completed) the “9+3” Chapter 49 requirements. This means that candidates will need to complete 9 credits that address specific Special Education competencies and 3 credits that address English Language Learner competencies.

Please note-The Reading Department’s “9+3” courses are:
- REED 520 Teaching Reading to Students with Disabilities
- SPED 550 Nature and Needs of Diverse Learners
- SPED 551 Inclusionary Practices
- REED 521 Reading and Language Development for Diverse Learners

Please discuss your “9+3” status with your graduate adviser at the start of your program.

**PLAN OF STUDY**

**Required Courses:**
- REED 521 Reading and Language Development for Diverse Learners 3
- REED 522 Theoretical Models and Literacy Processes 3
- REED 523 Analysis of Instructional techniques in Reading 3
- REED 524 Reading Clinic Practicum 6
- REED 526 Organization, Implementation, and Evaluation of School Reading Programs 3
- REED 528 Teaching Content Area Reading to Diverse Learners 3
- REED 529 Assessment and Evaluation of Literacy 3
- REED 580 Research Problems in Reading 3

**Additional courses for students who have met SPED competencies**
9 credits of electives from the following, or other elective(s) approved by the Graduate Coordinator.
- REED 520 Teaching Reading to Students with Disabilities 3
- REED 530 Teaching Reading through Young Adult Literature 3
- REED 533 Early Literacy 3
- REED 575 Reading Colloquium 3

**Additional courses for students who do not have the required SPED competencies**
- REED 520 Teaching Reading to Students with Disabilities 3
- SPED 550 Nature and Needs of Exceptional Individuals 3
- SPED 551 Inclusionary Practices 3

**Final Program Requirement:**
**Electronic Portfolio and Research Paper**

Graduate students in the master’s degree program, which includes Reading Specialist Certification, must complete the requirements established by the faculty that meet the standards of the Pennsylvania Department of Education for the Pennsylvania Reading Specialist Certificate and the National Council for Accreditation of Teacher Education (NCATE). This information is documented in an electronic portfolio that is completed throughout the program. All students also complete an action research project, focusing on a literacy topic of importance in their own teaching.

**Typical time to finish**
As a full-time student, a candidate for the Master of Education can usually complete the program in one calendar year. Part-time students must complete the program within six-years. The program’s classes are offered synchronously and asynchronously to accommodate graduate students’ busy schedules.

**Reading Specialist Certification Preparation**

**Purpose of Program**
The Reading Department of East Stroudsburg University offers an online graduate program of study leading to the Pennsylvania Reading Specialist Certificate. This certificate enables a teacher to provide reading instruction in kindergarten through grade 12. Out-of-state graduates will need to check with their state’s Department of Education to see if this program will fulfill the requirements for similar certificates/endorsements.

The mission of the Reading Specialist Certificate Program is to create a diverse community of educators dedicated to continuously advancing the teaching of reading, emerging literacies, and research in an ever-changing global society. Essential components, which are embedded in the Mission, include knowledge of the foundational components of reading, varied research and creative opportunities, integration of traditional and emerging technologies, challenging and contemporary curricula, and culturally responsive teaching, leadership, and service.

**PLAN OF STUDY**
The Reading Specialist consists of 27 credit hours of required course work. Candidates for Pennsylvania Reading Specialist Certification also complete the Pennsylvania Department of Education’s Chapter 49 requirements, which includes nine credits of Special Education, or a total of 36 certification credits. The nine credits of Special Education include: REED 520 Teaching Reading to Students with Disabilities, SPED 550 Nature and Needs of Exceptional Individuals, SPED 551 Inclusionary Practices. Please note that Chapter 49 also requires three credits of teaching English...
learners, which is fulfilled when candidates take REED 521 - Reading and Language Development for Diverse Learners.

**Final Program Requirement:**

Electronic Portfolio

**Admissions Requirements**

For admission into the Master of Education (M.Ed.) in Reading, candidates must meet Graduate Studies admission requirements and deadlines. Additionally, admission into the Reading Specialist Certification Preparation program requires an Instructional I Pennsylvania teaching certificate and a GPA of 3.00. The Department of Reading allows students to begin their program in any semester.

**Graduate Assistantships**

Graduate assistantships are available through the department. These are awarded based upon merit and achievement to full-time students in the graduate program. Graduate assistants do not teach classes, but they assist with research and complete projects assigned by professors. Responsibilities of the graduate assistant may include conducting research, assisting with preparing class materials, and proofreading. Graduate assistantships are awarded for the first year of full-time study, with the possibility of extension through the first summer. Prospective students should apply for a graduate assistantship at the time of original application to the program, using the application form provided by Graduate Studies or online.

**REED - Reading**

**REED 500 - Special Topics**

This course consists of directed research and study on an individual basis. Distribution: Advanced.

**REED 520 - Teaching Reading to Students with Disabilities**

This course prepares teachers to use explicit, scaffolded instruction to effectively teach reading to students with disabilities. The course emphasizes research-validated literacy interventions and evidence-based instructional practices. It focuses on the components of reading and writing that pose challenges for students with disabilities.

**REED 521 - Reading and Language Development for Diverse Learners**

This course examines the nature of reading and language development in the context of cultural and linguistic diversity. A variety of methods for developing language and teaching reading to culturally and linguistically diverse learners are also emphasized. Distribution: Advanced.

**REED 522 - Theoretical Models and Literacy Processes**

In this course, students consider the historical perspective, the current theories, and the future directions of reading instruction. Participants examine diverse approaches to reading, engage in productive discussion, and explore the research knowledge base from which reading educators work. Distribution: Advanced.

**REED 523 - Analysis of Instructional techniques in Reading**

This course is a survey of the major areas of difficulty in the reading process, a study of the methods suitable for attaining desired goals in reading, and an evaluation of teaching materials. Distribution: Advanced.

**REED 524 - Reading Clinic Practicum**

This course consists of a guided and supervised practical application of principles and theories of assessing and teaching reading. Competency prerequisites. Distribution: Advanced.

**REED 525 - Research Seminar Reading**

This course provides an understanding of the best methods to use in interpreting and using research reports. It includes a study and evaluation of available research in the field of reading. Competency prerequisites. Distribution: Advanced.

**REED 526 - Organization, Implementation, and Evaluation of School Reading Programs**

This course addresses the various roles of literacy professionals and delineates the responsibilities of reading specialists. It focuses on organizing, implementing, and evaluating reading programs. It also emphasizes professional development and reading curriculum analysis. Distribution: Advanced.

**REED 527 - Reading Content Areas**

This course focuses on how teachers can help students understand content area texts and related materials. Reading as a thinking process, comprehension skill and strategy instruction, and the evaluation of instructional materials are emphasized in this course. Distribution: Advanced.

**REED 528 - Teaching Content Area Reading to Diverse Learners**

This course provides opportunities for graduate students to learn how to respond to the literacy needs of diverse learners in all content areas. There is a focus on formal and informal assessments and appropriate instructional techniques. Pre-service teachers become knowledgeable about literacy issues associated with specific content areas using a variety of types and levels of text. Distribution: Advanced.

**REED 529 - Assessment and Evaluation of Literacy**

This course is designed to provide practice in the use of formal and informal assessments in appraising a child's abilities in reading and related areas. The creation of a Literacy Profile, which includes assessment results and diagnostic information serves as the basis for instructional practices. Competency prerequisites. Distribution: Advanced. Prerequisite: REED 523.

**REED 530 - Teaching Reading through Young Adult Literature**

Participants in the course will examine how to engage young adults in the reading process through literature-based instruction. Among the topics to be addressed will be teaching reading through thematic units, the shared stages of reading and writing, literature-response methods, and developing reading strategies through a variety of literary genres. Distribution: Advanced.

**REED 532 - The Essentials of Literary Coaching**

This is a foundational course designed to provide opportunities to learn about the numerous roles and responsibilities of literacy coaches.
Emphasis is placed on topics such as coaching assessments, data collection and analysis, and matching students with appropriate instructional materials. Prerequisite: REED 524. Distribution: Advanced.

REED 533 - Early Literacy (3 credits)
This is a foundational course designed to prepare candidates to effectively teach literacy to children from birth to age 8. It includes a research-based theoretical framework and practical ideas for teaching emergent literacy. Topics emphasized include motivation and engagement, phonemic awareness, phonics, fluency, vocabulary, reading comprehension, and assessments.

REED 534 - Literary Coaching and Professional Development (3 credits)
In this course, candidates learn how to deepen their understanding of literacy coaching. Emphasis is placed on topics such as providing professional development on reading topics such as phonemic awareness, phonics, fluency, vocabulary, and comprehension, a major responsibility of literacy coaches. Prerequisite: REED 532. Distribution: Advanced.

REED 575 - Reading Colloquium (3 credits)
This course addresses contemporary issues in reading. Designed to be taught in an interactive workshop format, Reading Colloquium emphasizes learning, application, and performance assessment. Distribution: Advanced.

REED 577 - Independent Study in Reading (3 credits)
Under the auspices of a professor in the Reading Department, the student pursues a pattern of reading, study, and research related to professional knowledge and understanding in reading. Topics should be established prior to enrollment. Distribution: Advanced.

REED 580 - Research Problems in Reading (3 credits)
The course is designed to assist the student in identifying important problems in the field of reading, critically analyzing available research, and synthesizing possible solutions. Competency prerequisites. Distribution: Advanced.

REED 598 - Reading Supervisor Field Experience (3 credits)
This course is a field experience that focuses on candidates demonstrating what they have learned in the program under the guidance of reading supervisors in cooperation with a member of the ESU Reading Department Faculty. The candidates will (1) observe the reading supervisors in all phases of their work; (2) assist the Reading Supervisor as requested; and (3) assume responsibilities as the Reading Supervisor deems feasible. Distribution: Advanced.

REED 599T - Reading Graduate Transfer (1 - 6 credits)
This course is a field experience that focuses on candidates demonstrating what they have learned in the program under the guidance of reading supervisors in cooperation with a member of the ESU Reading Department Faculty. The candidates will (1) observe the reading supervisors in all phases of their work; (2) assist the Reading Supervisor as requested; and (3) assume responsibilities as the Reading Supervisor deems feasible.

Special Education M.Ed.

Purpose of Degree
The M.Ed. in Special Education is designed for the candidate who holds certification in Special Education and is seeking to enhance and improve upon their professional practice.

PROGRAM OF STUDY
The program of study requires a core of M.Ed. course requirements (6 credits), and a core of Major course requirements (9 credits), five Major course electives (15 credits), and two Program electives (6 credits). This program can be combined with the Supervisory certification, the Applied Behavior Analyst certification, or an individually devised program designed with assistance from an academic adviser. The individually designed program takes into account the work experience and professional goals of the candidate to tailor the course work to the needs of the student.

Special Education Supervisory Certification
18 credits

Program Purpose
The Special Education Supervisory Certification Program is designed to prepare professionals to become special education leaders for programs in their schools, districts, intermediate units, or other related areas.

Program Description
The graduate Special Education Supervisory Certification program is for individuals who already possess a valid PA Instructional I or Instructional II Teaching Certificate and who have a minimum of five years of professional school experience in special education or a related field. This program is for teachers who want to qualify for Pennsylvania Supervisor of Special Education certification in Special Education or as a stand-alone program for candidates holding certification in Special Education or as a stand-alone program for individuals who already possess a valid PA Instructional I or Instructional II Certification Preparation.

Pre-K-8 and/or 7-12 Special Education Certification

Subtotal: 18

Pre-K-8 and/or 7-12 Special Education Certification Preparation
Post-Baccalaureate Certification Preparation
30 credits maximum

During initial advisement classes listed below will be selected to become the student’s plan of study based on prior education and educational experiences. Student teaching will be required.

Subtotal: 18
**SPED - Special Education**

**SPED 500 - Special Topics (3 credits)**
This course consists of at least one field experience placement with populations having physical or mental disabilities in various agencies, developmental centers, rehabilitation facilities, and the like that serve the needs of that population throughout the tri-county area. Assignments in other geographical areas will be utilized by the department when deemed appropriate. Field experience supervision will be provided by the faculty of Special Education and Rehabilitation. Distribution: Advanced.

**SPED 520 - Teaching Reading to Students with Disabilities (3 credits)**
This course prepares teachers to use explicit, scaffolded instruction to effectively teach reading to students with disabilities. The course emphasizes research-validated literacy interventions and evidence-based instructional practices. It focuses on the components of reading and writing that pose challenges for students with disabilities. Distribution: Advanced.

**SPED 535 - Classroom Diversity (3 credits)**
This course encourages educators to identify their own values, prejudices, and goals; to examine their thoughts and/or misconceptions about culturally diverse communities. Designed to help them create school climates that celebrate diversity and meet the needs of students of different races, ethnicities, gender, and ability levels. Distribution: Advanced.

**SPED 540 - Language Arts for the Handicapped (3 credits)**
This course is designed to develop a knowledge of remedial techniques and special curricular considerations for teachers who work with individuals moderately, severely, or multiply disabled language impaired. Distribution: Advanced.

**SPED 550 - Nature and Needs of Exceptional Individuals (3 credits)**
This course deals with individuals having educational impairments including: identification and etiological factors; psychoeducational needs of emotionally disturbed, mentally handicapped, learning impaired, or severely physically disabled persons; community and professional services. Required for those students with limited experience in special education.

**SPED 551 - Inclusionary Practices (3 credits)**
His course is intended for administrators, counselors, psychologists, curriculum supervisors, all teachers (regular, special), and school nurses concerned with proving appropriate educational experiences for students with special education needs in regular educational setting. Required for special education certification.

**SPED 552 - Mainstreaming in Schools (3 credits)**
The purpose of the workshop is to cause meaningful interaction of special and regular education teachers. The interaction enables them to review and to develop positive models for their particular schools that allow for exceptional and non-exceptional children to learn together, to respect each other, to know each other. A major emphasis will be to devise, through group interaction, a plan for implementation of mainstreaming in the particular schools. The course is cross-listed with ELED 552 and PSED 552. Distribution: Advanced.

**SPED 553 - Creative Methods & Materials with Exceptional Individuals (3 credits)**
At the graduate level this course is designed for in-service regular classroom teachers anticipating students with multiple disabilities included in their classrooms, special educators, and other degree-holding persons planning to work with individuals with exceptionalities in a rehabilitative setting. Emphasis is on a case-by-case analysis of client or student needs, and development of appropriate projects for their training and rehabilitation. Small additional fee. Distribution: Advanced.

**SPED 554 - Curriculum & Instruction for Individuals with Mild Disabilities (3 credits)**
This course is designed to provide a basis for the development of individualized curriculum goals and instruction for students with mild disabilities. Distribution: Advanced.

**SPED 555 - Curriculum & Instruction for Individuals with Moderate/Severe/Profound Disabilities (3 credits)**
This course is designed to provide a basis for the development of individualized curriculum goals and instructions for students with moderate/severe/profound disabilities. Distribution: Advanced.

**SPED 557 - Family Services in Education (3 credits)**
The purpose of this course is to develop skills in working with parents of youths with exceptionalities. Attention will be given to conferencing, reporting, and instructing parents in the process of home training. Further attention will be given to directing parents toward community services and resources, developing school-initiated parent support groups. Distribution: Advanced.

**SPED 558 - Early Intervention (3 credits)**
This course is designed to develop skills in the identification and referral of preschool-age children with exceptionalities, determining training targets for this group, implementing alternative programs for individuals with multiple disabilities, developing appropriate preschool training environments, and implementing an adapted curriculum. Distribution: Advanced.

**SPED 559 - Collaboration in the Educational Process (3 credits)**
This course is designed to prepare special educators to function as consultants to regular education teachers and other school personnel. The use of consultation is reviewed at the pre-referral, referral, and mainstreaming level of service. The goals for this course include student competence in consultation concepts and skills in working with classroom teachers. Distribution: Advanced.

**SPED 560 - Thesis I (3 credits)**
This course consists of the development of a thesis topic and review of the literature, writing and editing of the thesis, and submission of the final paper to peer-reviewed journal. Prerequisites: ELED 570; SPED 566. Distribution: Advanced.

**SPED 561 - Functional Behavior Assessment (3 credits)**
This course will cover assessment practices in applied behavior analysis. Emphasis will be placed on conducting functional behavior assessment to identify various functions of challenging behaviors through data collection and analysis. Distribution: Advanced.

**SPED 562 - Applied Behavior Analysis Principles I (3 credits)**
This course will cover the basic concepts of behavior analysis as applied to a variety of situations in teaching individuals with exceptionalities.
Classroom management utilizing behavior management techniques will be presented. The content of this course is determined by the Fifth Task List of the Behavior Analyst Certification Board. Open to all students of graduate standing.

Distribution: Advanced.

**SPED 575 - Applied Behavior Analysis Principles II (3 credits)**

This is an advanced examination of the basic principles of behavior and the development and application of each. This course will examine the principles of behavior in depth and focus on the use of these principles in applied settings with students and/or individuals with disabilities. The content of this course is determined by the Fifth Task List of the Behavior Analyst Certification Board. Prerequisite: SPED 574 (B).

**SPED 576 - Single-Subject Research Design (3 credits)**

This course will develop student awareness of critical issues in special education which have relevance for research concerns. Additionally, appropriate and feasible single-subject research designs and techniques are discussed within the framework of current special education methods and procedures. Required for Master's thesis.

Distribution: Advanced.

**SPED 577 - Techniques in Applied Behavior Analysis (3 credits)**

This course will examine issues relevant to the development and application of interventions with individuals with low incidence disabilities and Autism Spectrum Disorder. Specific interventions will be discussed. Content for this course was determined by the Fifth Task List of the Behavior Analyst Certification Board and the Council for Exceptional Children Knowledge and Skill Statements. Prerequisites: SPED 574 (B) and SPED 575 (B).

**SPED 578 - Organization Behavioral Management (3 credits)**

This course will examine issues related to service delivery, systems change, and the staff development in the application of applied behavior analysis. The content of this course was developed in accordance with the Fifth Task List of the Behavior Analyst Certification Board. Prerequisites: SPED 574 (B) and SPED 575 (B).

**SPED 579 - Legal and Ethical Aspects in Professional Applied Behavior Analysis (3 credits)**

This course will introduce students to the ethical practices of applied behavior analysis, including relevant legislation and court decisions. Students will learn how the Behavior Analyst Certification Board Guidelines for Responsible Conduct will guide their practice, as well as specific guidelines for professionalism in representing the field of Applied Behavior Analysis. Prerequisites: SPED 574 (B) and SPED 575 (B).

**SPED 580 - Administration & Organization of Special Education (3 credits)**

The course is designed to review traditional and emerging leadership roles and organizational approaches in special education. The student will review, assess, and discuss implications of new mandates for human services. Objectives include evaluation of current delivery systems.

Distribution: Advanced.

**SPED 581 - Measure & Evaluation in Special Education (3 credits)**

This course utilizes a variety of measures to assess and evaluate the educational, behavioral, and developmental areas of students with exceptionalities using traditional and alternative assessment instruments based upon the results of these measures. Prerequisite: SPED 550.

Distribution: Advanced.

**SPED 582 - SEM: Current Issues (3 credits)**

This seminar is designed for all graduate students in the field of education who are interested in current issues arising out of litigation and legislated mandates within the field of special education. An emphasis will be placed upon issues which are presently affecting (and will continue to shape) services to learners with exceptionalities, regular and special education professionals, and administrators. Attention will also focus upon a class member's individual/professional concerns in the special education arena.

Distribution: Advanced.

**SPED 583 - SEM: Emotionally Disturbed (3 credits)**

The course will provide the student with a current overview of the field of education for students with emotional disturbances. Objectives include an awareness of conceptual models and program activities toward ameliorating impact of maladaptive behaviors. Prerequisite: SPED 550.

Distribution: Advanced.

**SPED 584 - SEM: Vocational & Career Education for Exceptional Individuals (3 credits)**

This course is designed to help the teacher to develop new skills and to find innovative means for career and vocational-technical planning and training with individuals with exceptionalities. Prerequisite: SPED 550.

Distribution: Advanced.

**SPED 585 - SEM: The Resource Room (3 credits)**

This course is designed to examine the Resource Room as an alternative delivery system in extending services to students with exceptionalities. Course work is designed to enhance students' skills in individualizing programs using diagnostic/prescriptive procedures. Prerequisite: SPED 550.

Distribution: Advanced.

**SPED 586 - SEM: Emotionally Disturbed (3 credits)**

The purpose of this course is to broaden the in-service teacher's knowledge of the characteristics of the student with learning disabilities, instructional models and programmatic planning, solving real-life management problems, material problems, and teaching problems, in a sharing and seminar setting. Prerequisite: SPED 550.

Distribution: Advanced.

**SPED 587 - Assistive Technology for Exceptional Individuals (3 credits)**

This course describes the use of assistive technology services and devices as related services in the special education process. Emphasis is placed on consumer-driven technology selection and evaluation processes. Students will learn how to access assistive technology services as well as strategies for collaborating with experts in technology.

Distribution: Advanced.

**SPED 588 - Seminar: Teaching Individuals with Physical Disabilities (3 credits)**

The course will focus on the development, implementation, and evaluation of special education curriculum. This will include problems of programming for students with exceptionalities; different curriculum approaches and review of research implications. Prerequisite: SPED 550 or enrolled in the Special Education Supervisory Certificate Program.

Distribution: Advanced.

**SPED 589 - Curriculum Issues in Special Education (3 credits)**

The course will focus on the development, implementation, and evaluation of special education curriculum. This will include problems of programming for students with exceptionalities; different curriculum approaches and review of research implications. Prerequisite: SPED 550 or enrolled in the Special Education Supervisory Certificate Program.

Distribution: Advanced.

**SPED 590 - Seminar in Teaching the Learning Disabled (3 credits)**

The course will focus on the development, implementation, and evaluation of special education curriculum. This will include problems of programming for students with exceptionalities; different curriculum approaches and review of research implications. Prerequisite: SPED 550 or enrolled in the Special Education Supervisory Certificate Program.

Distribution: Advanced.

**SPED 591 - Assistive Technology for Exceptional Individuals (3 credits)**

This course describes the use of assistive technology services and devices as related services in the special education process. Emphasis is placed on consumer-driven technology selection and evaluation processes. Students will learn how to access assistive technology services as well as strategies for collaborating with experts in technology.

Distribution: Advanced.

**SPED 592 - Seminar: Teaching Individuals with Physical Disabilities (3 credits)**

The course focuses on the development, implementation, and evaluation of special education curriculum. This will include problems of programming for students with exceptionalities; different curriculum approaches and review of research implications. Prerequisite: SPED 550 or enrolled in the Special Education Supervisory Certificate Program.

Distribution: Advanced.

**SPED 593 - Seminar: Teaching Individuals with Physical Disabilities (3 credits)**

The course focuses on the development, implementation, and evaluation of special education curriculum. This will include problems of programming for students with exceptionalities; different curriculum approaches and review of research implications. Prerequisite: SPED 550 or enrolled in the Special Education Supervisory Certificate Program.

Distribution: Advanced.

**SPED 594 - SEM: Mental Retardation (3 credits)**

This course will cover theories of intelligence, retardation, etiological factors of mental retardation, curriculum needs of mental retardation,
methods and materials of instruction, an overview of career considerations, and emerging trends for adult services. Distribution: Advanced.

**SPED 595 - Special Education Field Experience & Student Teaching (3 credits)**
During this experience, graduate students focus on analyzing pedagogical competencies and professional standards to skill and strategies related to teaching and learning. Graduate students spend a minimum of 120 hours in an educational setting and meet regularly with their university supervisor to reflect upon their experiences, their professional development and strategies related to teaching and learning as well as opportunities for observation(s) in the field.

**SPED 596 - Internship Special Education Supervision (3 credits)**
This supervised field experience is designed to provide the candidate for the Special Education Supervisor certificate with field experiences in personnel supervision, assessment techniques with the exceptional population, budgeting and financing for special class operation, participating in child study team conferences, curriculum development, and due process. Prerequisite: All courses listed for the Supervisory Certificate Program. Distribution: Advanced.

**SPED 599T - Special Education Graduate Transfer (1 - 6 credits)**
This supervised field experience is designed to provide the candidate for the Special Education Supervisor certificate with field experiences in personnel supervision, assessment techniques with the exceptional population, budgeting and financing for special class operation, participating in child study team conferences, curriculum development, and due process. Prerequisite: All courses listed for the Supervisory Certificate Program.

### Sport Management

**College of Business and Management**
Department of Sport Management
210 Zimbar-Liljenstein Hall
570-422-3495
www.esu.edu/smgt
mcameron@esu.edu

**Sport Management Faculty**

**Graduate Coordinator:**
Jaedeock Lee, Ph.D., (jaedeock@esu.edu)

**Associate Professor:**
Jaedeock Lee, Ph.D., Chair, (jaedeock@esu.edu)

**Assistant Professors:**
Minkyo Lee, Ph.D., (mlee17@esu.edu)
Xiaochen Zhou, Ph.D., (xzhou@esu.edu)

**Sport Management M.S.**

**Purpose of Degree**
The purpose of the Master of Science degree in Sport Management is to offer graduate level instruction based in theory while providing opportunities to apply competencies to practical settings. The Master of Science degree program in Sport Management prepares students for professional careers in the sport management industry. Students who successfully complete the program pursue career interests that may range from athletic administration in public and private schools, colleges, and universities, to the private sector, including sport clubs and professional athletics. This program requires an on-site internship of at least seven credit hours and the successful completion of the Sport Management Comprehensive Examination.

In summary, the Master of Science in Sport Management prepares graduates to enter a complex, changing global world with competence and confidence. The area of study is consistent with the North American Society of Sport Management (NASSM) review protocol.

**Student Learning Outcomes**
Students graduating from the Master of Science Degree program in Sport Management will be able to:
1. Illustrate knowledge of managerial principles required of sport managers in a contemporary sport setting.
2. Utilize sport industry vernacular and professional oral and written communication skills when interacting in the workplace.
3. Identify and describe best practices and research methods used by professionals in the sport industry.
4. Demonstrate critical thinking skills to interpret issues confronting professionals in sport management.

**PROGRAM OF STUDY**

**Student Qualifications • Undergraduate Prerequisites Support Advisement**
Prospective students should possess a common body of knowledge essential for successful advanced study in sport management. This body of knowledge typically includes undergraduate coursework or life experience contributed to a foundation of knowledge in the following areas: sport studies; health and physical education; and hotel and tourism.

**Typical time to finish:**
Students enrolling in the program on a full-time basis will have an opportunity to complete the required coursework within a full academic year and, depending on their internship and other program requirements, will typically complete all degree requirements in three full semesters.

**ILLUSTRATIVE PLAN OF STUDY**
All graduate students pursuing a Master of Science degree with a major in Sport Management will complete the following coursework (minimum 34 total credits required):

The minimum course requirements are as follows:

**Required core courses**
27 credits coursework, 7-10 credits internship:
- SMGT 513 Advanced Research Methods
- SMGT 519 Sport and Society
- SMGT 523 Administration: Physical Education Sport Programs
- SMGT 546 Planning and Management of Sport Facilities
- SMGT 547 Sports Business & Finance
- SMGT 548 Sports Marketing
- SMGT 549 Sports and the Law
- SMGT 550 Sport Personnel Management
- SMGT 570 Introduction to Research
- SMGT 586 Field Experience & Internship

**Elective courses**
Students may choose the following elective coursework:
- SMGT 551 Application of Computers to Sport Management
- SMGT 553 Ethical Issues in Sport Management
- SMGT 559 Public Relations in Sports Management
Final graduation requirement
Students are required to take a comprehensive exam based on the
coursework.

Admissions Requirement and Deadlines
Students will be admitted to the program based on demonstration of an
academic record that fulfills the existing Graduate Studies criteria required
for admission. Additional supporting documents include successful
completion of the GRE and/or GMAT exams. Students applying for
admission to the Master of Science degree program in Sport Management
are strongly encouraged to apply by March 15 before the academic year in
which they are seeking admission.

Graduate Assistantships
Graduate assistantships are available through the department. These are
awarded based upon merit and achievement to full-time students in the
graduate program. Graduate assistants do not teach classes, but complete
projects and tasks assigned by professors.
The graduate assistantship is awarded for the first year of full-time study,
with the possibility of extension through the first summer. Prospective
students should apply for a graduate assistantship at the time of original
application to the program, using the application form online.
For more information, contact: Dr. Jaedeock Lee, at 570-422-3340 or by e-
mail at jaedeock@esu.edu.

SMGT - Sport Management

SMGT 506 - Theory & Teaching of Coaching (3 credits)
This course is designed to provide an overview of the theories and
strategies necessary to become a successful coach. The welfare of the
athlete will be the primary focus. Sport areas covered will be philosophy,
pedagogy, physiology, medicine, and management. Prerequisite: 96
credits.
Distribution: Advanced.

SMGT 513 - Sport Data Analytics (3 credits)
This course is designed to provide the student basic statistical techniques
for analyzing and interpreting data for research in sport management and
related disciplines. The course will emphasize practical issues related to
planning, conducting, and interpreting research in sport management.
Distribution: Advanced.

SMGT 515 - The American Woman in Sport (3 credits)
The American woman in sport, including the history of her participation,
relationship to changing female roles and ideals will be studied. Also
attitudes toward competition for women, roles of women's sport
organizations, and motivations of sportswomen examined.
Distribution: Advanced.

SMGT 518 - Philosophy & Physical Education (3 credits)
This course is a review of contemporary philosophical positions and
implications for professional decision-making in physical education. Focus
is upon an awareness and a concern for the development of the student's
personal professional philosophy.
Distribution: Advanced.

SMGT 519 - D.E.I. in Sport (3 credits)
This course is designed to help students navigate the increasingly diverse
sport industry and improve students ability to work within and lead
diverse teams sort organizations. Social issue topics such as gender, race,
social economic status, identity, discrimination and bias, and how they
relate to the sport management are discussed.
Distribution: Advanced.

SMGT 523 - Leading Sport Organizations (3 credits)
This course is designed to offer students a comprehensive understanding
of leadership theory and its application in the sport industry. Students will
explore the integrated perception of leadership and management, dissect
leadership theories, and build upon their experiences to form a preferred
leadership style unique to sport. This sport focused course acclimates
students to leading various types of organization and management of
resources in the sport industry.
Distribution: Advanced.

SMGT 525 - Psychology of Human Performance (3 credits)
This course treats the research and theoretical consideration of the
psychological variables in human performance, with special reference to
the body self in movement, and the psychology of sport.
Distribution: Advanced.

SMGT 546 - Planning and Management of Sport Facilities (3 credits)
The course is designed to provide the student with knowledge of the
planning and management of facilities for physical education, athletic,
and intramural/recreational programs. Buildings, grounds, and
equipment, as well as maintenance of these facilities will be discussed.
Students will visit and tour a facility. The course is designed to provide the
student with knowledge of the planning and management of facilities for
school physical education, athletic, and intramural/recreational programs.
Buildings, grounds, and equipment, as well as maintenance of these
facilities will be discussed. Students will visit and tour a facility.
Distribution: Advanced.

SMGT 547 - Sports Business & Finance (3 credits)
This course is designed to provide the student with knowledge of the
business and financial considerations of various sports enterprises.
Distribution: Advanced.

SMGT 548 - Sports Marketing (3 credits)
The course is designed to provide the student with knowledge of sport
marketing as it relates to spectator and participant. It will also give the
student knowledge and understanding of the marketing considerations of
various sport organizations. Fund raising applications will also be
discussed.
Distribution: Advanced.

SMGT 549 - Sports and the Law (3 credits)
The focus of this course will be on legal concepts and principles related to
the administration, coaching and teaching of sports. Legal issues involving
personnel, facilities, equipment, transportation, medical aspects, liability
and gender will be examined. Legal terminology and the court systems
will be included.
Distribution: Advanced.

SMGT 550 - Sport Personnel Management (3 credits)
This course focuses on various leadership styles, managerial
communication and interaction skills and their relative effectiveness in
sport organizations. Attention is directed to specific personnel tasks such
as hiring, development and evaluation of sport staff, and personnel issues
of current importance.
Distribution: Advanced.

SMGT 551 - Application of Computers to Sport Management (3
credits)
This course is designed to provide students with computer knowledge
and skills applicable to sports management. The advantages and
application of computers in sports programs will be emphasized.
Opportunities for understanding and running existing computer
programs will be provided. This course is also offered through summer
Home Study.
Distribution: Advanced.
SMGT 553 - Ethical Issues in Sport Management  (3 credits)
This course will focus on the identification of ethical issues in sports situations, analyzing the actions and decisions as to value orientations and ethical stance, and identifying and formulating a consistent ethical base for one's own functioning as a sport administrator.
Distribution: Advanced.

SMGT 559 - Public Relations in Sports Management  (3 credits)
This course will focus on public relations concerns specific to athletic administrators, managers of sport facilities, and coaches. Content includes establishing a framework for public relations processes, communicative tools and techniques, and relationships with the media.
Distribution: Advanced.

SMGT 570 - Introduction to Research (3 credits)
This course provides students with a broad overview of graduate study and research in sport management. This course is designed to acquaint the graduate student with the methods and materials of graduate study and scientific inquiry.
Distribution: Advanced.

SMGT 571 - Independent Research (1 credit)
This course utilizes selected research techniques to attack a specific professional or academic problem. It includes preparation and presentation of a formal report. Students must consult with their adviser well in advance of registration. This course is required for all students in the research or project program, and it may be repeated with permission. Prerequisite: SMGT 570, 574.
Distribution: Advanced.

SMGT 572 - Thesis Seminar (3 credits)
This course utilizes selected research techniques to address a specific professional or academic problem. It includes preparation and presentation of a formal report. Students must consult their adviser well in advance of registration. This course is required for all students in the research or project program and it may be repeated with permission. Prerequisite: SMGT 570, 574.
Distribution: Advanced.

SMGT 574 - Research Laboratory (1 credit)
The preparation of the research proposal including the development of the purpose and design of the proposed research problem or thesis is the focus. This course must be repeated until "satisfactory" grade is earned. Prerequisite: Completion of MSES 570 or current enrollment. Distribution: Advanced.

SMGT 577 - Independent Study (3 credits)
Under the auspices of a qualified member of the faculty, the student pursues a pattern of readings, study, and research related to professional knowledge and understanding in health or physical education. Topics should be established prior to enrollment.
Distribution: Advanced.

SMGT 581 - Analysis of Gymnastics I Workshop (3 credits)
The critical analysis of biomechanical principles as they apply to both gross and fine gymnastic movement patterns will be studies. Additional emphasis will center around a presentation of analytic techniques specific to maximum realization of motor performance. Further research will be directed toward practical application of all research relevant to the gymnastic discipline. Both lecture-demonstration and seminar methods of instruction will be employed. Prerequisite: PETE 160, 260, or equivalent. Distribution: Advanced.

SMGT 582 - Analysis of Gymnastics II Workshop (3 credits)
A quantitative analysis of biomechanical principles as applied to both gross and fine gymnastic movement patterns. Additional emphasis centers on a critical review of the research relevant to the gymnastic discipline. Both lecture-demonstration and seminar methods of instruction will be employed. Prerequisite: PETE 160, 260, 360, or equivalent.
Distribution: Advanced.

SMGT 586 - Field Experience & Internship (3 - 12 credits)
This course is designed to provide the student with practical experience with a federal, state or private organization in some related aspect of physical education and/or sports medicine. Students will coordinate their course work acquired at East Stroudsburg University with specific field experience. This program will be supervised by a member of the SMGT Department. Prerequisite: Permission of the department.

SMGT 599T - Sport Management Graduate Transfer (1 - 6 credits)
This course is designed to provide the student with practical experience with a federal, state or private organization in some related aspect of physical education and/or sports medicine. Students will coordinate their course work acquired at East Stroudsburg University with specific field experience. This program will be supervised by a member of the SMGT Department. Prerequisite: Permission of the department.
Certificates

Graduate Certificate in Professional Spanish
As Spanish becomes more prevalent in all sectors of the American economy, the online graduate certificate in Professional Spanish can enhance the effectiveness of professionals who are already conversationally proficient in the language.

Benefits of this certificate include improved workplace performance, greater professional satisfaction, heightened viability in the job market, and the ability to connect with the increasing demand for services within Hispanic communities. Companies and organizations may see lowered costs and higher customer satisfaction due to more effective Spanish-English communication.

Students take three of the four core courses, plus one culturally-oriented course. Courses may be taken in any order, and summer offerings allow for completion of this certificate in twelve months.

PROGRAM REQUIREMENTS
12 credits

Additional Requirements
3.0 cumulative GPA required, with no grade below B-

Entrance Requirements: Evidence of Intermediate High proficiency in spoken Spanish (ACTFL OPI Scale), with departmental review of undergraduate transcript(s).

Required Courses
Nine credits from relevant, graduate-level courses from among the core departmental offerings in professional Spanish. Currently these courses include:

Faculty

This list of permanent faculty members is current as of August 7, 2020. Two dates follow each individual’s name. The first indicates the year of appointment to the university and the second denotes the year of appointment to the academic rank or position indicated.

Professor of Political Science
B.S., 1995, University of Southern Mississippi
M.S., 1997, University of Southern Mississippi
Ph.D., 2003, University of Mississippi

Abdalla M. Aldras (1997, 2001)
Associate Professor of Biological Sciences
B.S., 1981, Jordan University
M.S.P.H., 1987, Tulane University
Sc.D., 1991, Tulane University

Alberto Alegre (2006, 2019)
Professor of Early Childhood and Elementary Education
B.S., 1980, Universitat de Barcelona
B.S., 1985, Universitat de Barcelona
M.S., 1991, Universitat de Barcelona
M.A., 2002, Goddard College
Ph.D., 2008, Virginia Polytechnic Institute and State University

Mary Beth Allen (1997, 2008)
Professor of Reading
B.S., 1979, University of Maryland
M.Ed., 1989, Towson State University
Ed.D., 1995, Texas A & M - Commerce

(Mary) Elizabeth Azukas (2018, 2018)
Assistant Professor of Professional and Secondary Education
M.A.T., 1994, The College of New Jersey

Professor of Psychology
B.A., 1988, Pennsylvania State University
M.A., 1990, Marywood University
Ph.D., 2002, Walden University

LuAnn Batson Magnuson (2010, 2016)
Associate Professor of Communication Sciences and Disorders
B.S., 1982, East Stroudsburg University
M.S., 1987, Bloomsburg University
Ph.D., 2010, University of Medicine and Dentistry of New Jersey

Nurun N. Begum (2007, 2013)
Associate Professor of Early Childhood and Elementary Education
B.Ed., 1997, University of Dhaka
M.Ed., 1999, University of Dhaka
M.A., 2004, Indiana University of Pennsylvania
Ph.D., 2007, Indiana University of Pennsylvania

Todd Behr (1990, 2003)
Associate Professor of Economics
B.A., 1973, Gettysburg College
M.B.A., 1978, Lehigh University

Professor of Psychology
B.S., 1989, University of Pittsburgh
M.S., 1994, Pennsylvania State University
Ph.D., 1998, Pennsylvania State University

Kelly M. Boyd (2007, 2020)
Professor of Health Studies
B.S.Ed., 1990, Truman State University
M.S.Ed., 1991, Eastern Kentucky University
Ph.D., 2005, Southern Illinois University

Steven Boyer (2020, 2020)
Assistant Professor of Chemistry
B.S., 2012, Elizabethtown College
Ph.D., 2017, Binghamton University

Instructor, OASIS
B.A., 1981, East Stroudsburg University
M.Ed., 1988, William Paterson University

Valerie Braddock (2019, 2019)
Associate Professor of Nursing
D.N.P., Walden University
M.S.N., 2015, Walden University
B.S.N., 1996, Seton Hall University

Instructor of Health Studies
B.S., 1976, Pennsylvania State University
M.P.H., 1981, University of Michigan

Christine E. W. Brett (2005, 2018)
Professor of Physical Education
B.S., 1993, Russell Sage College
M.S., 1998, University of Southern Mississippi
Ph.D., 2002, Ohio State University

Professor of History
B.A., 1994, East Stroudsburg University
M.A., 1998, East Stroudsburg University
M.Litt. (studies), 1999-2001, University of Edinburgh, Scotland
Dr. Phil., 2006, University of Kassel, Germany

Professor of English
B.A., 1989, Miami University of Ohio
M.A., 1993, Miami University of Ohio

David Buckley (1990, 2000)
Professor of Physics
B.A., 1981, Rutgers College
M.S., 1983, Pennsylvania State University
Ph.D., 1994, University of Massachusetts
Olivia M. Carducci (2005, 2019)
Professor of Mathematics
B.S., 1983, Saint Mary’s College
M.S., 1985, Carnegie Mellon University
Ph.D., 1989, Carnegie Mellon University

Marguerite Carver (2019, 2019)
Instructor of Athletic Training
B.S., 2013, King’s College
M.S., 2015, West Chester University

Kevin M. Casebolt (1999, 2014)
Professor of Physical Education
B.S., 1992, Northern Illinois University
M.S.Ed., 1995, University of Kansas
Ph.D., 1998, University of Kansas

Professor of Special Education and Rehabilitation
B.S., 1981 SUNY at Buffalo
M.S., 1987, SUNY at Buffalo
Ph.D., 1994, Temple University

Jyh-Hann Chang (2006, 2016)
Professor of Psychology
B.S., 1990, Ursinus College
M.A., 1992, Beaver College
M.S., 1994, University of Connecticut
Ph.D., 1997 University of Connecticut

Dongsheng Che (2008, 2018)
Professor of Computer Science
B.A., 1992, Zhejiang Forestry College
M.S., 2000, University of Georgia
M.S., 2002, University of Georgia
Ph.D., 2008, University of Georgia

Jeyaprakash Chelladurai (2019, 2019)
Assistant Professor of Computer Science
B.S., 2003, University of Madras
M.S., 2006, University of Northern British Columbia
Ph.D., 2012, University of Calgary

Stanley Li-Ming Chiang (2010, 2020)
Professor of Hotel, Restaurant, & Tourism Management
B.S., 2002, Chinese Culture University
M.S., 2004, Chinese Culture University
Ed.D., 2010, University of Northern Iowa

Minhaz Chowdhury (2018, 2018)
Assistant Professor of Computer Science
B.S., 2008, Daffodil International University
M.S., 2014, North Dakota State University
Ph.D., 2018, North Dakota State University

Laureen Clossey (2007, 2020)
Professor Social Work
B.S., 1985, Western Connecticut State University
M.S.W., 1988, Columbia University
Ph.D., 2004, Bryn Mawr College

Professor of Physics
B.S., 1985, Pennsylvania State University
M.S., 1988, Drexel University
Ph.D., 1993, Drexel University

Professor of Philosophy and Religious Studies
B.A., 2002, Xavier University
Ph.D., 2007, SUNY Buffalo

Paul Creamer (2008, 2013)
Professor of Modern Languages
B.A., 1988, University of Illinois
M.A., 1992, University of Wisconsin
Ph.D., 1999, University of Wisconsin

Donald M. Cummings (1986, 2004)
Professor of Exercise Science
B.S., 1984, College of Charleston
M.S., 1985, East Stroudsburg University
Ph.D., 1997, Temple University

Marianne Cutler (2005, 2005)
Associate Professor of Sociology
B.A., 1985, Boston University
M.Ed., 1990, University of Massachusetts
M.A., 1998, University of North Carolina
Ph.D., 2003, University of North Carolina

Esther Daganzo-Cantens (2008, 2013)
Associate Professor of Modern Languages
M.A., 2002, Florida International University
Ph.D., 2006, Florida International University

Nicholas D’Angelo (2019, 2019)
Assistant Professor of Digital Media and Technology
B.A., 1996, Montclair State University
M.F.A., 2000, Cranbrook Academy of Art

David Daniel (2015, 2020)
Associate Professor of Business Management
B.S., 1998, Tusculum College
M.B.A., 2000, National University
M.P.A., 2005, Georgia State University

Darla D. Darno (2015, 2020)
Associate Professor of Criminal Justice
B.A., 2007, Youngstown University
M.A., 2008, Marymount University
Ph.D., 2015, Indiana University of Pennsylvania

Shala E. Davis (1997, 2006)
Professor of Exercise Science
B.S., 1987, University of Delaware
M.S., 1989, Wake Forest University
Ph.D., 1994, University of Virginia

Dominic (Don) J. Dellipriscoli (2002, 2005)
Assistant Professor of History
B.S., 1993, East Stroudsburg University
M.A., 1995 East Stroudsburg University

**Tevfik Demirciftci (2020, 2020)**
*Assistant Professor of Hospitality, Recreation & Tourism*
B.S., 2005, Bilkent University
M.S., 2007, University of Delaware
Ph.D., 2019, Istanbul University
Ph.D., 2020, University of Nevada

**Mary DeVito (2001, 2016)**
*Professor of Computer Science*
B.S., 1984, East Stroudsburg University
M.S., 1987 East Stroudsburg University
Ph.D., 1998, Rensselaer Polytechnic Institute

**Michelle DiLauro (2015, 2020)**
*Associate Professor of Social Work*
B.A., 1994, Rutgers University
M.S.W., 1995, Fordham University
Ph.D., 2001, Fordham University

**Susan Dillmuth-Miller (2008, 2019)**
*Associate Professor of Communication Sciences and Disorders*
B.S., 1991, Bloomsburg University
M.A., 1993, University of Cincinnati
Au.D., 2008, PA College of Optometry School of Audiology

*Associate Professor of Special Education and Rehabilitation*
B.A., 1996, Marywood University
M.Ed., 1998, Lehigh University
Ph.D., 2004, Lehigh University

**Christopher Domanski (2016, 2016)**
*Associate Professor of Theatre*
M.F.A., 2003, Ohio University

**Xue (Stella) Dong (2019, 2019)**
*Assistant Professor of Art*
B.A., Tongji University, Shanghia China
M.A., Auburn University

**Michelle Donlin (2017, 2017)**
*Assistant Professor - Library*
B.A., 2006, Pennsylvania State University
M.S., 2012, University of Maryland

**Dennis C. Douds (1966, 1966)**
*Assistant Professor of Sports Management*
B.S., 1963, Slippery Rock University
M.S., 1966, West Virginia University

*Professor of Psychology*
B.A., 1976, East Stroudsburg University
M.A., 1980, Marywood College
Ed.D., 1986, Lehigh University

**Christopher H. Dubbs (2020, 2020)**
*Assistant Professor of Mathematics*
B.S., 2011, Lock Haven University
M.S., 2013, Michigan State University
Ph.D., 2020, Michigan State University

**Christopher Dudley (2011, 2016)**
*Associate Professor of History*
B.A., 2001, Oberlin College
M.A., 2003, University of Chicago
Ph.D., 2010, University of Chicago

**Colleen Dudzinski (2002, 2002)**
*Assistant Professor of Athletics*
B.S., 1997, University of Pittsburgh
M.S., 2000, University of Pittsburgh
Ph.D., 2013, Rocky Mountain University of Health Professions

*Professor of Exercise Science*
B.A., 1982, University of Texas
M.A., 1983, Wake Forest University
Ph.D., 1992, Indiana University

**Erica Dymond (2018, 2018)**
*Assistant Professor of English*
B.A., 1995, Marywood University
M.A., 2000, University of Scranton
Ph.D., 2009, Lehigh University

**Sandra J. Eckard (2005, 2017)**
*Professor of English*
B.A., 1994, Frostburg State University
M.A., 1996, West Virginia University
Ph.D., 2001, Indiana University of Pennsylvania

**Johan L. Eliasson (2005, 2015)**
*Professor of Political Science*
B.S., 1997, California State University
M.A., 1999, Syracuse University
Ph.D., 2005, Syracuse University

*Professor of Physics*
B.A., 1991, Cornell University
M.S., 1993, California Institute of Technology
Ph.D., 1996, California Institute of Technology

**Sussie Eshun (1996, 2007)**
*Professor of Psychology*
B.A., 1989, University of Ghana
M.A., 1992, SUNY at Stony Brook
Ph.D., 1996, SUNY at Stony Brook

**Darlene Farris-LaBar (2006, 2016)**
*Professor of Art*
A.A.S., 2001, The College for Technology

**Christine Fischer (2017, 2017)**
*Assistant Professor of Health*
B.A., 2009, East Stroudsburg University
M.S., 2011, East Stroudsburg University
Ph.D., 2014, University of Toledo
Douglas Friedman (2010, 2010)  
*Associate Professor of Business Management*  
B.A., 1986, University of Pennsylvania  
M.B.A., 1994, Baruch College  
Ph.D., 2005, University of Michigan  

*Professor of History*  
B.S., 1990, Bowling Green State University  
M.A., 1997, University of New Orleans  
Ph.D., 2005, University of New Hampshire  

Rene’ Fuanta (2018, 2018)  
*Professor of Chemistry and Biochemistry*  
B.S., 2010 University of Buea  
Ph.D., 2018, Auburn University  

James Galdiieri (2017, 2017)  
*Instructor, Faculty Athletic Trainer*  
B.S., 2005, King’s College  
M.S., 2009, King’s College  

*Associate Professor of Mathematics*  
B.A., 1993, Connecticut College  
M.S., 1996, University of Connecticut  
Ph.D., 2000, University of Connecticut  

*Associate Professor of Special Education and Rehabilitation*  
B.S., 1995, East Stroudsburg University  
M.Ed., 1998, East Stroudsburg University  
M.Ed., 2002, DeSales University  
Ph.D., 2008, Fordham University  

Mark A. Gatesman (2015, 2015)  
*Assistant Professor, Librarian*  
B.A., 2004, Clarion University  
M.L., 2005 Clarion University  

*Associate Professor of Art*  
B.A., 1995, Manhattanville College  
Ph.D., 2005, Pennsylvania State University  

*Professor of Chemistry*  
B.S., 1980, University of California at Santa Cruz  
M.S., 1981, University of California at Santa Cruz  
Ph.D., 1987, University of California at Santa Cruz  

Beverlyn E. Grace-Odeleye (2005, 2005)  
*Assistant Professor, Academic Enrichment and Learning*  
B.S., 1976, Southern Illinois University  
M.Ed., 1980, Howard University  
Ph.D., 2003, Regent University  

Michael P. Gray (2004, 2016)  
*Professor of History*  
B.A., 1990, East Stroudsburg University  
M.A., 1991, East Stroudsburg University  
Ph.D., 1998, Kent State University  

Bonnie A. Green (2004, 2013)  
*Professor of Psychology*  
B.S., 1986, Pennsylvania State University  
M.S., 1998, Lehigh University  
Ph.D., 2002, Lehigh University  

Jeffrey W. Hardy (1998, 2006)  
*Associate Professor of Geography*  
B.S., 1991, Mississippi State University  
M.S., 1993, Louisiana State University  
Ph.D., 1998, Louisiana State University  

Kelly A. Harrison (1993, 2020)  
*Associate Professor of Athletic Training*  
B.S., 1988, University of Delaware  
M.S., 1989, Ohio University  
Ph.D., 2005, Rocky Mountain University of Health Professions  

T. Storm Heter (2005, 2020)  
*Professor of Philosophy and Religious Studies*  
B.A., 1997, University of Illinois  
M.A., 1999, University of Illinois  
Ph.D., 2003, University of Illinois  

Brian Hodge (2017, 2017)  
*Assistant Professor of Music*  
B.A., 2005, East Tennessee State University  
M.A., 2014, University of Memphis  
D.M.A., 2018, University of Memphis  

Christine Hofmeister (2007, 2014)  
*Professor of Computer Science*  
A.B., 1981, Bryn Mawr College  
M.S., 1987, Lehigh University  
Ph.D., 1993, University of Maryland  

Diane Holben (2018, 2018)  
*Assistant Professor of Professional and Secondary Education*  
B.S., 1987, Muhlenberg College  
M.S., 1993, East Stroudsburg University  
M.Ed., 2000, Arcadia University  
Ed.D., 2009, Lehigh University  

Jeffrey P. Hotz (2007, 2012)  
*Associate Professor of English*  
B.A., 1994, Georgetown University  
M.A., 1997, Georgetown University  
Ph.D., 2004, George Washington University  

*Professor of Sociology*  
B.A., 1990, National Taiwan University  
M.A., 1997, Syracuse University  
M.S., 1998, Syracuse University  
Ph.D., 1999, Syracuse University  

Shixiong Hu (2004, 2014)  
*Professor of Geography*  
B.A., 1990, Henan University  

M.S. 1995, South China Normal University
Ph.D., 2004, State University of New York-Buffalo

**Yi-hui Huang (2008, 2019)**
**Professor of Digital Media Technologies**
B.A., 1994, National Chengchi University
M.A., 1996, University of Iowa
M.F.A., 1997, University of Iowa
Ph.D., 2008, Ohio State University

**Professor of Biological Sciences**
B.S., 1988, University of Rochester
Ph.D., 1996, University of California

**Associate Professor of Physical Education**
B.S., 1993, Dong-A University
M.S., 2000, EWHA Woman’s University
Ph.D., 2008, University of Virginia

**Michael J. Jochen (2007, 2012)**
**Associate Professor of Computer Science**
B.A., 1991, University of Delaware
M.S., 2000, University of Delaware
Ph.D., 2007, University of Delaware

**Professor of Chemistry**
B.S., 1988, Lafayette College
M.A., 1990, Washington University
Ph.D., 1995, Washington University

**Christopher Lee Kavanau (2019, 2019)**
**Assistant Professor of Biological Sciences**
B.S., 2004, California State University
Ph.D., 2010, Icahn School of Medicine at Mount Sinai of NYU

**Assistant Professor of Mathematics**
B.A., 1995, Wittenberg University
M.S., 1999, University of Connecticut
Ph.D., 2003, University of Connecticut

**Professor of Chemistry**
B.S., 1979, Davidson College
Ph.D., 1984, University of Vermont

**Associate Professor of Psychology**
B.A., 1998, Rhode Island College
M.A., 2000, Rhode Island College
Ph.D., 2007, New Mexico State University

**Laura Kieselbach (2017, 2017)**
**Assistant Professor of English**
B.A., 2000, Pennsylvania State University
M.S., 2011, University of Central Florida
Ph.D. 2018, Northeastern University

**Heon Kim (2011, 2016)**
**Professor of Philosophy and Religious Studies**
B.A., 1994, Kankuk University of Foreign Studies
M.A., 2001, Marmara University
Ph.D., 2008, Temple University

**Professor of Computer Science**
B.S., 1979, Korea University at Seoul
M.S., 1984, University of Oklahoma
Ph.D., 1988, University of Oklahoma

**Jessica Klugh**
**Instructor, Athletic Trainer**
B.S., 2013, Slippery Rock University
M.S., 2016, Ohio University

**Alexis Koenig (2019, 2019)**
**Associate Professor of Nursing**
Ed.D., William Howard Taft University
M.S.N., University of Phoenix
A.A.S, Mercer County Community College

**Professor of Social Work**
B.S.W., 1984, Mansfield University
M.S.W., 1986, Marywood College
Ph.D., 2004, Rutgers University

**Associate Professor of Biological Sciences**
B.S., 1981, Michigan State University
M.S., 1983, Michigan State University
Ph.D., 1991, City University of New York

**Eun-Joo Lee (2008, 2008)**
**Associate Professor of Computer Science**
B.S., 1989, Chonnam National University
M.S., 1991, Chonnam National University
Ph.D., 1997, Chonnam National University

**Jaedeock Lee (2009, 2015)**
**Associate Professor of Sport Management**
B.A., 2003, Yonsei University
M.S., 2005, Yonsei University
Ph.D., 2009, Texas A&M University

**Minkyo Lee (2018, 2018)**
**Assistant Professor of Sport Management**
B.A., 2009, Yonsei University
M.S., 2012, Yonsei University
Ph.D., 2017, Indiana University

**Cynthia A. Leenerts (2005, 2010)**
**Associate Professor of English**
B.A., 1987, George Mason University
M.A., 1990, George Mason University
Ph.D., 1997, George Washington University

**Clare M. Lenhart (2013, 2018)**
**Associate Professor of Health**
B.S., 2002, University of Pittsburgh
M.P.H., 2005, University of Medicine and Dentistry of New Jersey
Paul Lippert (1985, 1998)
Professor of Communication
B.A., 1977, University of Michigan
M.A., 1980, New York University
Ph.D., 1990, New York University

Professor of Chemistry
B.S., 1982, Lebanon Valley College
Ph.D., 1988, Ohio State University

Joshua Loomis (2015, 2020)
Associate Professor of Microbiology
B.S., 1998, University of Florida
Ph.D., 2003, Pennsylvania State University

Associate Professor of English
B.A., 1974, University of Florida
M.F.A., 1990, Indiana University

Associate Professor of Criminal Justice
B.A., 2001, Pennsylvania State University
M.A., 2005, Rutgers University
Ph.D., 2013, Rutgers University

Monica Manchester (2019, 2019)
Associate Professor of Nursing
D.N.P., Drexel University
M.S.N., 2012, Drexel University
B.S.N., 2009, East Stroudsburg University

Professor of Computer Science
B.S., 1985, Michigan Technological University
M.S., 1991, University of Lowell
Ph.D., 1999, Air Force Institute of Technology

Associate Professor of Music
B.S., 1978, Western Connecticut State College
M.M., 1981, Ithaca College
Artist Diploma, 1987, Hartt School, University of Hartford
Ed.D., 1995, Teachers College, Columbia University

Kenneth M. Mash (1997, 2006)
Distinguished Professor of Political Science
B.A., 1987, Queens College, City University of New York
M.A., 1990, Pennsylvania State University
Ph.D., 1997, Pennsylvania State University

Scott Mathers (2020, 2020)
Assistant Professor of Criminal Justice
B.S., 1999, Coe College
M.A., 2005, Western Illinois University
Ph.D., 2014, Mississippi State University

Claranne Mathiesen (2019)
Assistant Professor of Nursing

David Mazure (2010, 2020)
Professor of Art
B.F.A., 1998, Rutgers State University of New Jersey
M.F.A., 2009, East Tennessee State University

Andrea M. Mcclanahan (2003, 2013)
Professor of Communication
B.A., 1998, Bloomsburg University
M.A., 1999, Ball State University
Ph.D., 2003, Ohio University

Adam McGlynn (2010, 2020)
Professor of Political Science
B.A., 2001, Plattsburgh State University
M.A., 2002, Stony Brook University
Ph.D., 2007, Stony Brook University

Assistant Professor of Academic Enrichment and Learning
A.A., 1990, San Bernadino College
B.A., 1992, California State University, San Bernadino
M.Ed., 1994, East Stroudsburg University
D.Ed., 2015, Indiana University of Pennsylvania

Frederick Meitner (2020, 2020)
Assistant Professor of Hospitality, Recreation & Tourism
B.B.A., 2013, Columbia Southern University
E.M.B.A., 2015, Strayer University
Graduate Certificate, 2019, Pennsylvania State University
Ph.D., 2020, Iowa State University

Annie Mendoza (2010, 2015)
Associate Professor of Modern Languages
B.A., 1998, Marquette University
M.A., 2001, University of Miami
Ph.D., 2010, University of California

Matthew Miltenberger (2013, 2018)
Associate Professor of Exercise Science
B.S. 2003, East Stroudsburg University
M.S., 2004, East Stroudsburg University
Ph.D., 2013, Seton Hall University

Ko Mishima (2007, 2019)
Professor of Political Science
B.A., 1991, Keio University
Ph.D., 2005, Johns Hopkins University

Professor of Exercise Science
B.S., 1996, Leicester University
M.M.S, 1997, University of Sheffield
Ph.D., 2004, University of Edinburgh

Assistant Professor of Communication
B.A., 2008, Anáhuac University
M.A., 2013, Spring Arbor University

Ph.D., 2012, Temple University

B.S., 1985, East Stroudsburg University
M.S., 1993 Villanova University

Ph.D., 1999, Rutgers State University of New Jersey
M.F.A., 2009, East Tennessee State University

Andrea M. Mcclanahan (2003, 2013)
Professor of Communication
B.A., 1998, Bloomsburg University
M.A., 1999, Ball State University
Ph.D., 2003, Ohio University

Adam McGlynn (2010, 2020)
Professor of Political Science
B.A., 2001, Plattsburgh State University
M.A., 2002, Stony Brook University
Ph.D., 2007, Stony Brook University

Assistant Professor of Academic Enrichment and Learning
A.A., 1990, San Bernadino College
B.A., 1992, California State University, San Bernadino
M.Ed., 1994, East Stroudsburg University
D.Ed., 2015, Indiana University of Pennsylvania

Frederick Meitner (2020, 2020)
Assistant Professor of Hospitality, Recreation & Tourism
B.B.A., 2013, Columbia Southern University
E.M.B.A., 2015, Strayer University
Graduate Certificate, 2019, Pennsylvania State University
Ph.D., 2020, Iowa State University

Annie Mendoza (2010, 2015)
Associate Professor of Modern Languages
B.A., 1998, Marquette University
M.A., 2001, University of Miami
Ph.D., 2010, University of California

Matthew Miltenberger (2013, 2018)
Associate Professor of Exercise Science
B.S. 2003, East Stroudsburg University
M.S., 2004, East Stroudsburg University
Ph.D., 2013, Seton Hall University

Ko Mishima (2007, 2019)
Professor of Political Science
B.A., 1991, Keio University
Ph.D., 2005, Johns Hopkins University

Professor of Exercise Science
B.S., 1996, Leicester University
M.M.S, 1997, University of Sheffield
Ph.D., 2004, University of Edinburgh

Assistant Professor of Communication
B.A., 2008, Anáhuac University
M.A., 2013, Spring Arbor University
Ph.D., 2017, Duquesne University

*Professor of Sociology*
- B.A., 1980, University of Massachusetts
- M.A., 1984, Boston College
- Ph.D., 1997, Boston College

**Shawn Munford (2006, 2016)**
*Associate Professor of Exercise Science*
- B.S., 2001, Bloomsburg University
- M.S., 2004, East Stroudsburg University
- Ph.D., 2011, Walden University

**Douglas Nay (2015, 2017)**
*Associate Professor of Business Management*
- B.S., 1982, Rutgers University
- M.B.A., 1988, New York University
- D.P.S., 2003, Pace University

*Professor of Economics*
- B.S., 1981, Indian Institute of Technology
- M.S., 1983, National Institute for Training in Industrial Engineering
- Ph.D., 1992, State University of New York, Buffalo

*Assistant Professor*
- B.S., 1992, Wilson College
- M.Ed., 1995, Shippensburg University
- D. Ed., 2009, Indiana University of Pennsylvania

**Kristin Noblet (2016, 2016)**
*Assistant Professor of Mathematics*
- B.S., 2005, Plymouth State University
- M.Ed., 2012, Plymouth State University
- Ph.D., 2016, University of Northern Colorado

*Associate Professor of History*
- B.A., 1985, University of Louisiana
- Ph.D., 2009, University of Chicago

**Mary Jane O’Merle (2007, 2007)**
*Instructor of Health*
- B.S., 1969, East Stroudsburg University
- M.S., 1975, East Stroudsburg University

*Associate Professor of Digital Media Technologies*
- B.A., 1995, University of Arizona
- M.A., 2001, Marywood University
- Ph.D., 2007, University of Memphis

*Professor of Sociology*
- B.S., 1977, University of Esfahan
- M.S., 1981, University of Missouri
- Ph.D., 1992, University of Missouri

**Tribhuvan Puri (2016, 2016)**
*Professor of Business Management*
- B.Tech., 1973, G.B. Pant University
- M.Tech., 1975, Indian Institute of Technology Kanpur
- M.A., 1985, University of Tennessee
- Ph.D., 1986, University of Tennessee

**Samuel E. Quainoo (1998, 2007)**
*Professor of Political Science*
- B.A., 1982, University of Ghana
- ICSA, Level 1, 1990, England
- M.A., 1993, SUNY at Binghamton
- Ph.D., 1996, SUNY at Binghamton

**Akila T. Rajappa (2019, 2019)**
*Assistant Professor of Communication Sciences and Disorders*
- B.S., 1997, Mysore University, India
- M.S., 2001, Bangalore University, India
- Ph.D., 2019, Columbia University

**Van Reidhead (2010, 2014)**
*Professor of Sociology*
- B.A., 1971, Brigham Young University
- M.A., 1974, Indiana University
- Ph.D., 1976, Indiana University

**Emily Rolinson (2017, 2017)**
*Assistant Professor of Biology*
- B.A., 2009, Skidmore College
- Ph.D., 2016, Stony Brook University

**Jeffrey Rosky (2017, 2017)**
*Associate Professor of Criminal Justice*
- B.A., 1990, Rutgers University
- M.S., 1998, University of Colorado
- Ph.D., 2010, Washington State University

**Jerry L. Ross (2016, 2016)**
*Associate Professor of Physics*
- B.S., 2003, Alma College
- B.A., 2003, Alma College
- Ph.D., 2011, Michigan Technological University

**Dorian Royal (2020, 2020)**
*Associate Professor of Nursing*
- B.S., 1995, New York University
- M.S., 2005, Columbia University
- D.N.P., 2015, Duke University

*Associate Professor of Athletic Training*
- B.S., 1996, East Stroudsburg University
- M.S., 1997, East Stroudsburg University
- Ph.D., 2005, University of Florida

*Professor of Modern Languages*
Alison L. Rutter (2005, 2009)
Associate Professor of Early Childhood and Elementary Education
B.A., 1978, Vassar College
M.A., 1994, Columbia University
Ed.D., 1999, Columbia University

Jessica Santiago (2019, 2019)
Assistant Professor, Academic Enrichment and Learning
B.S., 2003, East Stroudsburg University
M.S., 2007, Capella University
Ph.D., 2016, Capella University

Professor of Special Education and Rehabilitation
B.S., 1979, Bloomsburg University
M.Ed., 1981, Lehigh University
Ed.D., 1988, Lehigh University

N. Paul Schembari (1991, 2001)
Professor of Mathematics
B.S., 1984, Long Island University
M.A., 1987, Syracuse University
M.Phil., 1989, Syracuse University
Ph.D., 1991, Syracuse University

Elizabeth Scott (2017, 2017)
Assistant Professor, Library Archivist
B.A., 1996, Dickinson College
M.A., 1999, University of Albany, SUNY

Jan Selving (2010, 2017)
Associate Professor of English
B.A., 1990, Indiana University
M.F.A., 1994, Arizona State University

Steven Shive (2003, 2012)
Professor of Health Studies
B.S., 1985, University of Scranton
M.T.S., 1996, Berkley Seminary
M.A., 1996, Fordham University
M.Ph., 1997, East Stroudsburg University
Ph.D., 2000, Temple University

Professor of English
B.A., 1991, Rice University
M.A., 1994, University of Houston
Ph.D., 1999, University of Houston

Assistant Professor of Biological Sciences
B.A., 1975, University of South Florida
M.A., 1980, University of South Florida
Ph.D., 1990, University of Texas

Megan Smith (2015, 2015)
Librarian - Coordinator of Technical Services
B.A., 2007, Connecticut College
M.A., 2012, Rutgers University
NJSPC, 2012, Thomas Edison State College

Brandon Snyder (2018, 2018)
Instructor of Exercise Science
B.A., 2012, East Stroudsburg University
M.S., 2013, East Stroudsburg University

Professor of Professional and Secondary Education
B.A., 1991, University of Pennsylvania
Ph.D., 2007, Pennsylvania State University

Professor of Biology
B.S., 1990, St. Cloud State University
Ph.D. 1996, University of Nebraska Medical Center

Robert Thomas (2019, 2019)
Assistant Professor of Business Management
B.S., 1985, Kings College
M.B.A., 2013, University of Scranton

Professor, Academic Enrichment and Learning/Undeclared Major Adviser
B.A., 1981, King’s College
Ph.D., 1996, Temple University

Nancy P. VanArsdale (1990, 1999)
Professor of English
B.A., 1979, Bucknell University
M.A., 1981, New York University
Ph.D., 1991, New York University

Keith Vanic (2005, 2010)
Associate Professor of Athletic Training
B.S., 1994, East Stroudsburg University
M.S., 1996, James Madison University
Ph.D., 1998, University of Southern Mississippi

Assistant Professor of Nursing
B.S., 1987, West Chester University
B.S.N., 2003, Cedar Crest College
M.S.N. 2009, DeSales University
D.N.P., 2016, DeSales University

Jasmine Villa (2018, 2018)
Assistant Professor of English
B.A., 2011, University of Texas at El Paso
M.A., 2014, University of Texas at El Paso
Ph.D., 2018, University of Texas at El Paso

Carol Walker (2019)
Assistant Professor of Digital Media Technologies
B.A., 2001, St. Joseph’s College
B.A., 2001, St. Joseph’s College
M.A., 2004, East Stroudsburg University
M.Ed., 2008, East Stroudsburg University
Ph.D., 2012, Indiana University of Pennsylvania

Professor of Biological Sciences
B.S., 1995, University of Connecticut
M.S., 1999, North Carolina State University
Ph.D., 2003, North Carolina State University

Associate Professor of Business Management
B.A., 1995, National Chengchi University
M.B.A., 2004, Ohio State University
Ph.D., 2010, Southern Illinois University

Laura Waters (2006, 2013)
Associate Professor of Nursing
B.S.N., 1988, Youngstown State University
M.A., 2001, Youngstown State University
Ph.D., 2012, Kent State University

Professor of Biological Sciences
B.S., 1981, Hobart College
M.S., 1987, University of Vermont
M.S., 1989, University of Florida
Ph.D., 1995, University of Massachusetts

Professor of Physical Education
B.S., 1971, Baptist Bible College
M.A., 1982, University of Toledo
Ph.D., 1988, University of Toledo

Associate Professor of Biological Sciences
B.S., 1988, Lafayette College
Ph.D., 1996, Washington University

Allyson Wind
Assistant Professor - Library
B.S., 2006, University of Scranton
M.S., 2012, Drexel University iSchool

Chad A. Witmer (2000, 2016)
Professor of Exercise Science
B.A., 1995, University of Vermont
M.S., 1997, Northern University
Ph.D., 2009, New York University

Katrin Wolfe
Instructor, Athletics
B.S., 2006, Penn State University
M.S., 2008 West Virginia University
M.Ed., 2013, University of Pittsburgh

Xi (Tina) Yang (2019, 2019)
Assistant Professor of Business Management
B.A., 2010, Shanxi University
M.A., 2014, University of Texas Pan American
Ph.D., 2019, University of Texas Rio Grande Valley

Jennifer M. Young (2005, 2005)
Assistant Professor, Counseling and Psychological Services
B.A., 1994, Marist College
M.A., 1998, Suffolk University
Ph.D., 2002, Suffolk University

Ahmed Yousof, (2019, 2019)
Assistant Professor of Digital Media and Technology
M.A., 2002, The American University in Cairo
Ph.D., 2017, Indiana University of Pennsylvania

Professor of Communication
B.A., 1993, Anadolu University
M.A., 1995, Anadolu University
M.A., 1999, Morehead State University
Ph.D., 2007, Duquesne University

Peng Zhang (2009, 2020)
Professor of Physical Education
B.Ed., 2001, Beijing Sport University
M.Ed., 2004, Beijing Sport University
Ph.D., 2008, Ohio State University

Xuema Zang (2015, 2020)
Associate Professor of Mathematics
B.S., 1999, Qufu Normal University
M.S., 2005, 2006, University of Windsor
Ph.D., 2011, University of Windsor

Xiaochen Zhou (2018, 2018)
Assistant Professor of Sport Management
B.A., 2012, Beijing Sport University
M.S., 2014, University of Michigan
Ph.D., 2018, Temple University
