

In response to the COVID19 shelter-in-place directives, ETS will be offering the Praxis ETS Home for the Core Skills tests. The numbers listed in the chart below reflect the test numbers needed by our students for the Basic Skills tests required for program admission (TEC Approval). Registration for *ETS Home* will begin on May 15, 2020, and testing will begin on May 18, 2020. Testing sessions will be available from 10 AM to 7 PM (Eastern Standard Time), 7 days a week including holidays.

The cost will be the same, but there will be several changes to the test, specifically regarding delivery. You must take the test on either a personal laptop or desktop computer. Prior to signing up for a test, a link to test your computer's capabilities will be provided for you. The test **cannot be taken on a tablet or phone**. Your computer must run Windows 10, 8, or 7; if you are using a Mac, you must have Windows installed on your computer. Additionally, you must have a microphone, speakers, and camera on your computer (the internal mic and speakers plus your computer's webcam is fine). Headsets are not permitted.

When taking the test, your room must be private, and no one else may enter the room while you are testing. Prior to beginning the test, you will be asked to show your testing area to the online proctor using your webcam. They must be able to view your room in 360-degree access; using your laptop webcam to show them the room is fine. You will also need to show that your table or desk is completely clear of all items not permitted in the test, and no food or drink is allowed. Test sessions will be monitored in real-time using human proctors and artificial intelligence technology, and the entire session will be recorded on video.

If test taker would like to reschedule an existing appointment at a testing center for a Praxis at Home appointment, they will need to contact Praxis Customer service. To register, be sure to select the option for the Praxis Tests at Home - you will select a test date and time later with ProctorU.

As we receive more information about the Praxis *ETS Home*, we will share them with you. If you have questions about the Praxis *ETS Home*, please contact Educational Testing Services (ETS) as they will have the most up-to-date information.

Test Number	Test Name
5752	Core Combined
5713	Core Reading
5723	Core Writing
5733	Core Mathematics
