Who is your primary social media audience?

- Students

Please briefly describe the purpose of your account.

The social media accounts for East Stroudsburg University's Department of Occupational Therapy will provide content for students with valuable resources, updates, and opportunities. They foster community, share relevant information, facilitate engagement, and support student success in their occupational therapy journey.

Why this application would be approved:

1. The department's social media visual presence follows the institutional identity of ESU.
2. Both moderators are faculty or staff with @esu.edu email addresses.
3. The purpose of the account is clearly defined by providing what content will be posted and the intention behind the content.

Example of an application that would not be approved:

Who is your primary social media audience?

- Athletic Fans

Please briefly describe the purpose of your account.

We are planning to showcase spirit by gathering our medical sonography students in announcing when game times are for athletic events and coming up with clothing themes like a “white out” or “crazy hats.”

Why this application would not be approved:

1. The department’s social media visual presence does not follow the institutional identity of ESU (When submitted, the profile picture included on this submission had the institutional logo in unapproved colors green and blue).
2. The submission did not include two moderators that were faculty and staff. The moderator listed was a student and used a @live.esu.edu email.
3. The Instagram account listed for submission is utilizing a non-esu email address.
4. The purpose of the account is misused in that an academic department is utilizing its presence to promote content other than their department. The primary audience also disagrees with the department’s existing goals and objectives.
