

East Stroudsburg University
Plan for
Mathematical Skills Competency Requirement

Student _____ **Student ID#** _____
Major _____
Advisor _____
Initial semester of enrollment at ESU _____

I intend to: (Select one)

- ___ a. Take the ESU Basic Mathematics Competency Exam – see www.esu.edu/math for a schedule of upcoming exams
- ___ b. Enroll in ESU Math 090 during the upcoming semester or summer
- ___ c. Provide evidence to the Mathematics Department to show the mathematics competency requirement has been satisfied (Math SAT of 500 or higher, Proficient or Advanced PSSA Math Score for 11th grade test, acceptable transfer course)
- ___ d. Enroll in a Mathematics course at _____
Title of Course _____
Course number _____
Semester _____

(I realize the course selected must transfer to ESU as a general education mathematics course and that I must earn a grade of C or better. I further realize that until the course is completed and the transcript has been processed, I have not satisfied this requirement, and that therefore I may be subject to further holds on registration.)

I understand if I have not satisfied the requirement by the end of the semester indicated above, a hold will be placed on my registration.

Further, I understand I must satisfy the mathematical skills competency requirement to graduate from ESU.
