## **Dissertation Research Rubric**

The purpose of this grading rubric is to support your development as a scholar-researcher during the dissertation process. Your committee will use this rubric to evaluate your proposal and dissertation and communicate feedback about necessary revisions that will help you complete this project.

As you write, use this rubric as an outline for your study proposal and final dissertation. 5=Exceptional Scholarship 4=Acceptable Scholarship; all vital elements are satisfactory 3=Approvable Scholarship; however revisions would be needed in one or more important areas for an actual proposal 2=Not Acceptable Scholarship; one or two important areas are not sufficiently presented 1=Not Acceptable Scholarship; more than two important areas are not sufficiently presented

Ratings of 3 or above are satisfactory, while ratings 2 and below do not meet minimal standards to pass.

## **Table of Contents**

Abstract	2
Chapter I: Introduction	2
Chapter II: Literature Review	3
Chapter III: Research Method	1
Chapter III: Research Method – Qualitative Studies	1
Chapter III: Research Method– Quantitative Studies	5
Chapter III: Research Method – Mixed Methods	7
Chapter IV: Findings	9
Chapter IV Findings - Qualitative Studies	9
Chapter IV Findings - Quantitative Studies	9
Chapter IV Findings – Mixed Method Studies1	1
Chapter V: Discussion	2
General Comments : Applies to the Entire Manuscript13	3

Chapter and Quality Indicators	Specific Comments	Rating
	and Feedback	
Cover Page Formatted correctly		
Abstra	ct	
A. Describes the research problem and		
why it is important		
B. States research purpose		
C. Summarizes research question(s)		
D. Briefly describes the research design,		
methods and data analysis procedures		
Chapter I: Int	roduction	
1. Clearly demonstrates the significance of		
problem and worthiness of the study.		
2. A summary of the problem is well		
articulated and substantiates the study with		
references to more detailed discussions in		
Section 2.		
3. The problem statement describes the need		
for increased understanding about the issue		
to be studied.		
4. The nature of the study, specific research		
questions, and research objectives are briefly		
and		
clearly described. Reference is made to		
more detailed discussions in Section 3.		
5. The purpose of the study is described in a		
logical, explicit manner.		
6. The conceptual framework shows		
which ideas from the contemporary		
scholarship support/justify the research		
being conducted		
7. Key terms are operationally defined		
8. The Significance of the Study is described		
in terms of		
A. How the study can be applied to the local		
problem		
B. Professional application		
C. Positive social change (improvement of		
human or social conditions by promoting		
the worth, dignity, and development of		
individuals, communities, organizations,		

institutions, cultures, or societies)	
9. Section I ends with a transition statement	
that contains a summary or key point of the	
study and an overview of the content of the	
remaining sections in the study	

1. There is an introduction that         describes:         A. The content of the review the review         B. The organization of the review         C. The strategy used for searching the literature         2. The review of related research and         literature is clearly related to the problem statement as expressed in the research         questions and objectives         3. The review of the related research and         literature includes         A. Comparisons/contrasts of different points of view of different research outcomes         B. The relationship of the study to the previous empirical research that has come before it         4. The review contains concise summaries of literatures that help         A. Define the most important aspects of the study;         B. Substantiate the rationale of conceptual framework for the study         5. There is a literature based description of the potential themes and perceptions explored in the study         7. Literature related to the use of differing methodologies to investigating the outcomes of interest is reviewed         8. Uterature related to the use of differing methodologies to investigating the outcomes of interest is reviewed is an integrated, critical essay on the most relevant and current published knowleder on the tonic. The review is	Chapter II: Lite	rature Review

	knowledge on the topic. The review is		

organized around major themes.
--------------------------------

Chapter III: Res	search Method
Chapter III: Research Method – Qualita	ative Studies
1. Introduction describes how the research	
design derives logically from the problem or	
issue statement	
2. Design describes which qualitative	
tradition or research design will be used.	
The choice of research design is justified,	
with explanation why other likely choices	
would be less effective	
3. Research questions and sub-questions	
make sense, are answerable, are few in	
number, are clearly stated, and are open-	
ended.	
4. The context for the study is described	
and justified.	
5. Methods for ethical protection of	
participants are clearly explained step by	
step. Procedures for gaining access to	
participants are described.	
6. Role of the Researcher	
The role of the researcher is described in	
terms of past/current professional roles at	
setting, past/current professional	
relationships with the participants, and how	
these past/current roles and relationships	
are likely to affect data collection.	
Methods of establishing a researcher-	
participant working relation are	
appropriate. The researcher's	
experiences or biases related to the	
topic are described.	
7. Criteria for selecting participants are	
specified and are appropriate to the study.	
There is a justification for the number of	
participants, which is balanced with depth	
of inquiry-the fewer the participants the	
deeper the inquiry per individual.	
8. Data collection procedures are explained	
in detail. Data collection tools such as	

interview guide, observation guide, etc. are	
included in the Appendix. Choices about	
which data to collect are justified. Data	
collected are appropriate to answer the	
questions posed in relation to the	
qualitative tradition chosen. How and when	
the data was collected and recorded is	
described.	
9. How the data was analyzed is articulated.	
Procedures for dealing with discrepant cases	
are described. If a software program is used	
in the analysis, it is clearly described. Data	
analysis procedures after coding are	
described.	
10. Methods to address validity or	
trustworthiness (i.e. member-checking) are	
appropriate and specific.	
11. Assumptions, Limitations, Scope, and	
Delimitations provide descriptions of:	
A. Facts assumed to be true but not	
verified	
B. Potential weaknesses of the study	
C. The bounds of the study	

Chapter III: Research Method– Quantita	ative Studies	
1. Introduction includes a clear outline of		
the major areas of the section.		
2. Research Design and approach		
A. Includes a description of the research		
design and approach.		
B. Provides justification for using the		
design and approach.		
C. Derives logically from the problem or		
issue statement.		
3. Setting and Sample		
A. Describes the population from which		
the sample will be or was drawn.		
B. Describes and defends the		
sampling method including the		
sampling frame used.		
C. Describes and defends the sample size.		
D. Describes the eligibility criteria for study		

nouticinouto	
participants.	
E. Describes characteristics of the selected	
sample.	
4. If a treatment is used, it is described	
clearly and in detail.	
5. Instrumentation and Materials	
A. Presents descriptions of	
instrumentation or data collection tools	
to include: name of instrument; type of	
instrument; concepts measured by	
instrument; how scores are calculated	
and their meaning; processes for	
assessment of reliability and validity of	
the instrument(s); processes needed to	
complete instruments by participants;	
where raw data are or will be available	
(appendices, tables, or by request from	
the researcher).	
B. Includes a detailed description of data	
that comprise each variable in the	
study.	
6. Data Collection and Analysis	
A. Includes an explanation of descriptive	
and/or inferential analyses used in the	
study, such as: nature of the scale for	
each variable; statements of hypotheses	
related to each research question;	
description of parametric,	
nonparametric, or descriptive analytical	
tools used; and description of data	
collection processes.	
B. Description of any pilot study results, if	
applicable.	
7. Measures taken from protection of	
participants' rights are summarized. The	
Role of the Researcher in the data collection	
and data analysis procedures is described.	
The role of the researcher is described in	
terms of past/current professional roles at	
the setting, past/current professional	
relationships with the participants, how	
these past/current roles and relationships	
are likely to affect data collection.	

8. Assumptions, Limitations, Scope, and	
Delimitations provide descriptions of:	
A. Facts assumed to be true but not	
verified	
B. Potential weaknesses of the study	
C. The bounds of the study	

Chapter III: Research Method – Mixed M	lethods	
1. Introduction includes a clarification of the		
intent of mixing qualitative and quantitative		
data in a single study and an outline of which		
components are qualitative and which are		
quantitative.		
2. Research Design and Approach		
A. Indicates the strategy for data collection		
(concurrent or sequential)		
B. Includes a description of the		
multiple forms of data collection		
and analysis		
C. Provides justification for using the design		
and approach		
D. Includes when and where (data		
collection, analysis, interpretation) the		
integration of the approaches will occur.		
3 Setting and Sample		
A. Describes the population from which the		
sample will be/was drawn		
B. Describes and defends the sampling		
method, including the sampling frame		
used		
C. Describes and defends the sample size		
D. Describes the eligibility criteria for study		
participants		
E. Describes the characteristics of the		
selected sample		
F. Describes the role of the researcher in		
the data collection procedure		
4. Treatment and/or questions are clarified		
as being gathered sequentially or		
concurrently and connects to the objectives		
and questions of the study.		
5. The context and sequential or concurrent		
strategies for the study are described and		

justified.	
For the qualitative sequence:	
A. Procedures for gaining access to	
participants are described	
B. Methods of establishing a researcher-	
participant working relationship are	
appropriate	
C. Data triangulation is built into the	
data collection and analysis	
For the quantitative sequence	
of the design:	
Presents descriptions of	
instrumentation or data collection	
tools to include:	
1. Name and type of instrument	
and/or data to be collected.	
2. Concepts measured by	
instrument and/or data.	
3. How scores/responses are	
calculated/rated and their	
meaning.	
4. Process for assessing reliability	
and validity of the instrument(s) or	
internal validity/reliability.	
6. Date Analysis and Validation Procedure	
A. Identifies the procedures within the	
design.	
3. Analysis occurs within the quantitative	
approach and the qualitative approach,	
and/or between the two approaches.	
C. Validity of both the quantitative	
data and the qualitative findings is	
checked.	
7. Measures taken for protection of	
participants' rights are summarized. The	
Role of the Researcher in the data collection	
and data analysis procedures is described.	
The role of the researcher is described in	
terms of past/current professional roles at	
the setting, past/current professional	
relationships with the participants, how	
these past/current roles and relationships	
are likely to affect data collection, and the	
researcher's experiences or biases that are	
escarence s experiences of plases that ale	

related to the topic.	
8. Assumptions, Limitations, Scope, and	
Delimitations provide descriptions of:	
A. Facts assumed to be true but not verified	
B. Potential weaknesses of the study	
C. The bounds of the study	

Chapter IV: Findings		
Chapter IV Findings - Qualitative Studies		
1. The process by which the data were		
generated, gathered, and recorded is		
clearly described.		
2. The systems used for keeping track of		
data and emerging understandings		
(research logs, reflective journals,		
cataloging systems) are clearly described.		
3. The findings		
A. build logically from the problem and the		
research design.		
B. are presented in a manner that		
addresses the research questions		
4. Discrepant cases and non-confirming		
data are included in the findings.		
5. Patterns, relationships, and themes		
described as findings are supported by the		
data. All salient data are accounted for in		
the findings.		
6. A discussion on Evidence of Quality		
shows how this study followed procedures		
to assure accuracy of the data (i.e.,		
trustworthiness, member checks,		
triangulation, etc.). Appropriate evidence		
occurs in the appendices (sample		
transcripts, researcher logs, field notes,		
etc.). (This discussion may appear in section		
5 instead of 4).		

Chapter IV Findings - Quantitative Studies		
1. Section 4 is structured around the		
research questions and/or hypotheses		
addressed in the study, reporting findings		

related to each.	
2. Research tools:	
A. Data collection instruments have been	
used correctly.	
B. Measures obtained are reported clearly,	
following standard procedures.	
C. Adjustments or revisions to the use of	
standardized research instruments have	
been justified, consistent with standard	
practices, and any effects or limitations	
on the interpretation of findings are	
clearly described.	
3. Overall, data analysis (presentation,	
interpretation, explanation) is	
consistent with the research questions	
or hypotheses and underlying	
theoretical/conceptual framework of	
the study.	
4. Data analyses	
A. logically and sequentially address all	
research questions or hypotheses.	
B. where appropriate, outcomes of	
hypothesis- testing procedures are	
clearly reported (e.g., findings	
support or fail to support ).	
C. do not contain any evident	
statistical errors.	
5. Tables and Figures	
A. are as self-descriptive as possible,	
informative, formatted to conform	
to standard dissertation styles.	
B. are directly related to and referred to	
within the narrative text included in the	
section.	
C. have immediately adjacent comments.	
D. are properly identified (titled or	
captioned).	
E. show copyright permission (if not in the	
public domain).	
6. The comments on findings address observed consistencies and inconsistencies	
and discuss possible alternate interpretations.	
ווונכו אופו מנוטווג.	

7. In a concluding section of Section 4,	
outcomes are logically and systematically	
summarized and interpreted in relation to	
their importance to the research questions	
and hypotheses.	

Chapter IV Findings – Mixed Method S	Studies
1. The strategy (sequential, concurrent, or	
transformative) of the study is clearly	
established. Data are presented in the	
appropriate manner for the type of study	
conducted.	
2. The systems used for keeping track of	
data and emerging understandings is	
clearly described.	
3. The findings:	
A. Build logically from the problem and the	
research design.	
B. Are presented in a manner that	
addresses the research questions.	
C. Are consistent with the research	
questions or hypotheses and the	
underlying theoretical/conceptual	
framework of the study.	
D. Are clearly reported (e.g., findings	
support or fail to support) and are	
supported by the data.	
E. Do not contain any evident statistical	
errors.	
4. Tables and Figures for both the qualitative	
and quantitative data:	
A. Are as self-descriptive as possible,	
informative, and conform to standard	
Doctoral Study format.	
B. Are directly related to and referred to	
within the narrative text of the section.	
C. Have immediately adjacent comments.	
D. Are properly identified (titled or	
captioned).	
E. Show copyright permission (if not in the	
public domain).	
5. The structural approach for presenting	
and analyzing the data are appropriate and	

consistent with the chosen strategy	
(sequential, concurrent, or transformative).	
6. In a concluding section of Section 4,	
outcomes are logically and systematically	
summarized and interpreted in relation to	
their importance to the research questions	
and hypotheses. Patterns, relationships,	
and themes described as findings are	
supported by the data.	
7. A discussion on Evidence of Quality	
shows how this study followed procedures	
to assure accuracy of the data	
(trustworthiness, member checks,	
triangulation, etc.).	
Appropriate evidence occurs in the	
appendixes (sample transcripts,	
researcher logs, field notes, etc.).	

Chapter V:	Discussion
1. The section begins with a brief overview	
of why and how the study was done,	
reviewing the questions or issues being	
addressed and a brief summary of the	
findings	
2. The Interpretation of Findings	
A. includes conclusions that address all of	
the research questions,	
B. contains references to outcomes in	
Section 4,	
C. covers all the data,	
D. is bounded by the evidence collected,	
and	
E. relates the findings to a larger body of	
literature on the topic, including the	
conceptual/theoretical framework,	
F. includes a discussion of the practical	
applications of the findings.	
3. The Implications for Social Change	
are clearly grounded in the	
significance section of Section 1 and	
outcomes presented in Section 4. The	

implications are expressed in terms of	
tangible improvements to individuals,	
communities, organizations,	
institutions, cultures, or societies.	
5. Recommendations for Action.	
A. should flow logically from the	
conclusions and	
B. state who needs to pay attention to the	
results, and	
C. indicate how the results might be	
disseminated.	
5. Recommendations for Further Study	
point to topics that need closer	
examination and may generate a new	
round of questions.	
6. For qualitative studies, includes a	
reflection on the researcher's experience	
with the research process in which the	
researcher discusses possible personal	
biases or preconceived ideas and values,	
the possible effects of the researcher on	
the participants or the situation, and	
her/his changes in thinking as a result of	
the study.	
7. Limitations and Delimitations provide	
descriptions as related to the findings:	
A. Facts assumed to be true but not	
verified	
B. Potential weaknesses of the study	
C. The bounds of the study	
8. The work closes with a strong concluding	
statement making the "take-home	
message" clear to the reader.	

General Comments : Applies to the Entire Manuscript	
Writing Style and Composition	
A. The research study is written in	
scholarly language (accurate, balanced,	
objective, tentative).	
B. The writing is clear, precise, and avoids	
redundancy.	
C. APA 7 editition	
D. Statements are specific and topical	

	sentences are established for	
	paragraphs. The flow of words is	
	smooth and comprehensible.	
Ε.	Bridges are established between ideas.	
Or	ganization and Form	
Th	e proposal/final research study	
Α.	is logically and comprehensively	
	organized, using subheadings where	
	appropriate.	
В.	has a professional, scholarly	
	appearance.	
C.	is written with correct grammar,	
	punctuation, and spelling.	
D.	includes citations for the following:	
	direct quotations, paraphrasing, facts,	
	and references to research studies.	
Ε.	in-text citations are found in the	
	reference list.
