Subject: CARE Team: Still Responding

Good afternoon ESU faculty and staff,

We know that these are trying times and that students' stress levels are certainly elevated. Please be advised that ESU's CARE Team is still working and taking referrals for students who may be experiencing situations that are getting in the way of their personal, emotional, social, and academic success. If you determine there are students who are in need of assistance managing their stress, accessing technology, are struggling financially, experiencing psychological distress, etc., please submit a referral. You may do this two different ways:

1) In WarriorFish: when you enter the student's name in the top right and pull up their information, you can make a referral by clicking the "Referral" button and filling out the information.

2) By visiting www.esu.edu/care. Scroll to the bottom of the page and click "Submit Referral." Please fill out as much of the information as you can.

Regardless of how you submit the referral, a CARE Team member will reach out to the student to see what their needs are and how we can best provide services to assist them.

Please let us know if you have any questions. With your assistance, we can continue to ensure that all of our Warriors are successful.

We wish you and your families all of the best as we face these uncertain times.
