Inside Your Tutoring Session/Room

Inside the Tutoring Session/Room you will be able to share audio/video with your tutor (pictured left). A system dialog may pop-up asking for permission to access camera and microphone. To share them, click ‘Yes’ or ‘Agree’ to grant access to those devices. If you prefer, you may use the ‘Chat’ option instead of audio/video.

Once inside the room, you will see information on the tools available to you during your session. Please read through the descriptions of the tools available to you during your tutoring session. Most tools should look familiar from other programs you may use. However, if you are unsure what a tool does, please ask your tutor.

If you are not using video, you will be able to see when the tutor has joined the session by looking at the icon to the far right of the toolbar, it will indicate ‘2’.
